

Proceedings of the 8th International Conference on Electric Fuses and their Applications

**Ceyrat, France
10-12 September 2007**

IEEE Catalog Number:	CFP0782C-PRT
ISBN 10:	2-84516-363-0
ISBN 13:	978-2-84516-363-8

CONTENTS

Opening Lecture		Page
J.-L. Gelet	To the origins of fuses	1
Session I		
Diagnostics and Characterisation, Fuse Behaviours		
J. Cai, J. Wang	Using a parallel resonance circuit to measure time-current characteristics of high voltage current-limiting fuses	11
C.S. Psomopoulos, D. Diamadopoulou, C. Karras, P. Karagiannopoulos, E. Tsvlikas	Experimental investigation of the fusion in cylindrical exploding wires using high current densities with industrial frequency	17
A. Ávila Ramírez	Some common performance characteristics of gas-blast interrupters and power expulsion fuses	23
W. Bussière, D. Rochette, S. Memiaghe, G. Velleaud, T. Latchimy and P. André	Measurement of the prearcing time and the fulgurite length in HBC fuse in the case of tests performed with an A.C. 100 kVA station	35
Session II		
Technology, Design and Manufacturing		
H. He, J. Wang	A high voltage vacuum type hybrid current limiting fuses for double protection of the shunt power capacitors	43
V. Giurgiu and G. Oarga	Improved technology for manufacturing of the high-voltage fuse-links	47
Y. Ishikawa, K. Hirose, M. Asayama, Y. Yamano and S. Kobayashi	Dependence of current interruption performance on the element patterns of etched fuses	51
D.H. Tourn and J.C. Gomez	Low voltage lithographic fuses: preliminary results of breaking capacity and cyclic load tests	57
M. Koprivšek	Comparison of electrical behaviour between the liquid metal current limiter and the low voltage melting fuse	61
A. Raihane, O. Bonnefoy, J.-L. Gelet, J.-M. Chaix, G. Thomas	Compaction by horizontally vibrated 3D granular materials. Application to sand filling and compaction in electrical fuses	67
El. Darie, Em. Darie	Fault current limiters based on high temperature superconductors	69

Session III

Mathematical Modelling and Fundamental Processes - Part I: Fuse Operation

J. Bassford	The background and aims of Profuse	77
A. Plesca	A complete 3D thermal model for fast fuses	79
D. Rochette, W. Bussière, R. Touzani, S. Memiaghe, G. Velleaud and P. André	Modelling of the pre-arcing period in HBC fuses including solid – liquid – vapour phase changes of the fuse element	87
P. André, J. Aubreton, W. Bussière, M.F. Elchinger, S. Memiaghe, D. Rochette	Basic data: composition, thermodynamic properties and transport coefficients applied to fuses	95
R.E. Brown	Time correlated techniques to investigate arcing dynamics about the peak voltage instant during current interruption in sand filled fuses using an optical spectrum analyser	101
W. Bussière, D. Rochette, P. André, G. Velleaud, and S. Memiaghe	Study of the SiO ₂ plasma radiation. Application to the fuse arc plasma	109
M.A. Saqib, A.D. Stokes, I.S. Falconer and B.W. James	Estimation of the plasma's particle densities during the arcing period of a high-voltage fuse	121
S. Memiaghe, W. Bussière and D. Rochette	Numerical method for pre-arcing times: application in HBC fuses with heavy fault-currents	127

Session IV

Mathematical Modelling and Fundamental Processes - Part II: Electrode Phenomena

J. Rossignol, P. Testé, E. Bourillot, B. de Fonseca, J. Jouhannaud	Experimental approach of the interaction between a submicroscopic cathode tip and the plasma	135
J.M. Bueno Barrachina, S. Catalán Izquierdo, C.S. Cañas Peñuelas, F. Cavallé Sesé	Arc roots FEM modelling and simulation at plane electrodes	139
P. Testé, J. Rossignol	Thermal model of the evolution of fragments inside a microscopic spot: A multiscale approach of the interaction plasma/cathode	145
A. Lefort, M. Abbaoui, D. Sallais, N. Ben Jemaa, E. Carvou	Theoretical and experimental determination of erosion rate for silver contacts under 14 VDC	153
N.M.Yatsenko and E.A. Yatsenko	Radiation of system of linear wires in magnetoplasma	159

Session V

Standards, Hazard and Environmental Aspect

R. Wilkins	Effect of electrode orientation, insulating barriers, and current-limiting fuses on arc flash events	167
D. Sweeting, A.D. Stokes	Energy transfers within arcing faults in electrical equipment	169
M. Lang, T. Neal and R. Wilkins	Introduction to Arc Flash	179
H. Bessei	Incorrect use of fuse characteristics in IEC 62271-105 restricts H.V. fuse application in ring main units	185
M. Grote, G. Fink	Fuse recycling in Germany – an initiative for Europe	191
J.-L. Gelet, J. Gauchon	Facing global-warming, manufacturers are invited to think to eco-design environmental product declaration also concerns fuses	197
