INSTITUTE OF FLORIDA STUDIES

The Institute of Florida Studies at Hillsborough Community College is a community based educational Center committed to serving the needs of educational and outreach programs in environmental studies. The purpose of the Institute is to promote a greater understanding and appreciation of the biological, ecological, economic, recreational, and aesthetic importance of environmental systems, and of the natural history of Florida through education, training, information, and research.

The Institute of Florida Studies hosted its First Annual Conference on Coast Restoration (now known as the Annual Conference on Ecosystems Restoration and Creation) in 1973. The Conference provides a forum for the global exchange of results of the latest scientific research and case studies on restoration, creation, and management of not only freshwater and coastal wetland systems but total ecosystems including upland and transitional areas. The conference is designed to be of particular benefit to governmental agencies, planning organizations, college and universities, corporations, and environmental groups. These proceedings are a compilation of papers presented at the 33rd Annual Conference on Ecosystems Restoration and Creation.

The Institute of Florida acknowledges the following people for their support and help with conference and assisting in preparation of the proceedings for publication: Patrick Cannizzaro, Peter Rossi, Dr. Peter Germroth, Johnnie Hurst, and Donna Lewis. Appreciation is also extended to Fred Webb and Dr. Felix Haynes.

These proceedings could not have been completed without the time and efforts of the authors and reviewers.

To all these people, thank you.

TABLE OF CONTENTS

Substrate Selection of Juvenile *Procambarus Alleni* (Everglades Crayfish) and *Procambarus Fallax* (Slough Crayfish) Under Labora 1
P. G. VanArman

An Analysis of Homeowner Encroachments Into Conservation Easements Dedicated to the South Florida Water Management District 16
R. E. Miller Jr., R. M. Robson

A History of Innovation and Conservation at Pinellas County Utilities 28
W. W. Fall, R. M. Powell

Hydrological Restoration and Ecological Response in an Impaired Mangrove Lagoon 39
E. C. Milbrandt, J. T. Evans

Brooksville Plant Materials Center: Developing Sources of Native Wetland Plants for Revegetation in Florida 56
M. J. Williams, J. Grabowski

Evaluating the Ecological Integrity of Wetlands in Florida Wetland Mitigation Banks 64
K. C. Reiss, E. Hernandez, M. T. Brown

Gypsum-Water Management Interactions on the Survival, Yield, and Protein Content of Selected Species of Marsh Vegetation 80
G. C. Sigua, W. H. Hudnall, J. A. Prudente

Beach *Vitex* Ecology and Dune Restoration 91
C. A. Gresham

Tracking Structural and Functional Changes in Natural and Restored Mangrove Forests of Sarasota Bay, Florida 104
G. E. Raulerson

Ecosystem Biological Feedback Mechanisms Within Wetlands Restoration Projects 117
L. L. Weishar, J. Teal

Plant Community Structure of a Wetland Mitigation Site in Southern Maryland 132
B. Banks, I. Levavi, S. Krizek, P. Sharpe, P. Kangas
