

Megagauss Magnetic Fields and High Energy Liner Technology

**Proceedings of the
2006 International Conference on
Megagauss Magnetic Field Generation and Related
Topics**

and

**International Workshop on High Energy Liners &
High Energy Density Applications**

**November 5-10, 2006
Santa Fe, New Mexico, USA**

Table of Contents

Preface

Welcome to Megagauss 2006.....	xi
Technical Topics and Committees.....	xiii
History of the Megagauss Conference.....	xvi
The Megagauss Institute Award.....	xvii

Review

The Generation and Use of Pulsed Magnetic Fields.....	1
<i>F. Herlach</i>	
Contribution of Vladimir K. Chernyshev to a Development of Explosive Pulsed Power and Applications.....	13
<i>A.V. Ivanovsky</i>	

High Energy Liner Workshop

The Basis of Magnetized Target Fusion—A Fusion Primer.....	27
<i>I.R. Lindemuth and R.E. Siemon</i>	
Update on Mago Progress	37
<i>S.F. Garanin, V.I. Mamyshev, and V.B. Yakubov</i>	
Issues of Liner-Plasma Compression.....	47
<i>P.J. Turchi</i>	
The Quest for the Wholly Stable Liner	57
<i>W.L. Atchison, P.J. Turchi, and D.S. Lemons</i>	
Analysis of the Liner Stability in Various Experiments	69
<i>A.M. Buyko, S.F. Garanin, D.V. Karmishin, V.N. Mokhov, N.V. Sokolova, V.B. Yakubov, and V.V. Zmushko</i>	
Power System Based on the Mago System with Fissile Materials – Mago/Fission.....	77
<i>V.N. Mokhov</i>	
MHD-Neutronics Modeling for Magnetized Target Fusion	83
<i>S. Chaturvedi</i>	

Progress on Liner Implosions for Compression of FRC's	93
<i>J.H. Degnan, A.N. Brown, T. Cavazos, S.K. Coffey, M. Domonkos, M.H. Frese, S.D. Frese, D. Gale, C. Gilman, C. Grabowski, T.P. Intrator, R. Kirkpatrick, G.F. Kiuttu, F.M. Lehr, J. V. Parker, R.E. Peterkin, Jr., N.F. Roderick, E.L. Ruden, R.E. Siemon, W. Sommars, W. Tucker, P.J. Turchi, G.A. Wurden, and Y.C.F. Thio</i>	
Investigation of Solid Quasi-Spherical Liner Implosion Using Diagnostic Test Stand and Helical Explosive Magnetic Generator as a Pulsed Power Source.....	103
<i>B.T. Egorychev, D.V. Avdeev, V.V. Avdoshin, A.M. Buyko, G.I. Volkov, A.M. Glybin, A.V. Ivanovsky, V.A. Ivanov, Y.I. Ivanov, A.I. Krayev, V.B. Kudelkin, A.I. Kuzyayev, I.V. Morozov, S.V. Pak, S.M. Polyushko, A.A. Petrukhin, A.A. Savosin, A.N. Skobelev, V.K. Chernyshev, V.I. Shpagin, A.A. Zimenkov, W.L. Atchison, and R.J. Faehl</i>	
Results and Prospects of Material Strength Studies on Electrophysical Facilities Based on Perturbation Growth in Liner Systems	109
<i>A.M. Buyko, V.V. Zmushko, W.L. Atchison, and R.E. Reinovsky</i>	
Survey of Optical Velocimetry Experiments – Applications of PDV, a Heterodyne Velocimeter	119
<i>D.B. Holtkamp</i>	
Stability of Plasma Configurations During Compression	129
<i>E.L. Ruden and J.H. Hammer</i>	
Modeling Liner Compression of FRCs: Obstacles and Advances	137
<i>M.H. Frese, S.D. Frese, D.J. Amdahl, J.H. Degnan, and N.F. Roderick</i>	
Wall Heating and Impurity Mixing Considerations During Magnetic Compression Experiments.....	147
<i>R.J. Faehl, I.R. Lindemuth, R.E. Siemon, and T. Awe</i>	
The Challenge of Wall-Plasma Interaction with Pulsed MG Fields Parallel to the Wall	155
<i>R.E. Siemon, B.S. Bauer, T.J. Awe, M.A. Angelova, S. Fuelling, T. Goodrich, I.R. Lindemuth, V. Makhin, V. Ivanov, R. Presura, W.L. Atchison, R.J. Faehl, R.E. Reinovsky, D.W. Scudder, P.J. Turchi, J.H. Degnan, E.L. Ruden, M.H. Frese, S.F. Garanin, and V.N. Mokhov</i>	
Sensitivity of M=0 Growth to EOS and Other Material Properties.....	161
<i>M.A. Angelova, B.S. Bauer, R.E. Siemon, I.R. Lindemuth, and V. Makhin</i>	

Development of an Experiment to Study Plasma Formation by Megagauss Fields	167
<i>S. Fuelling, T.J. Awe, B.S. Bauer, T. Goodrich, V. Makhin, V.V. Ivanov, R. Presura, R.E. Siemon, R.E. Reinovsky, P.J. Turchi, J.H. Degnan, and E.L. Ruden</i>	
Modeling of Plasma Formation and Evolution on the Surface of Ohmically Heated Conductors.....	173
<i>V. Makhin, M. Angelova, T.J. Awe, B.S. Bauer, S. Fuelling, I.R. Lindemuth, and R.E. Siemon</i>	
Real Time Feedback Control System for an Electromagnetic Launcher.....	179
<i>R.W. Karhi, J.J. Mankowski, D.J. Hemmert, and S.L. Holt</i>	
A Bench Top Railgun with Distributed Energy Sources and Diagnostics	185
<i>B.T. McDaniel, J.J. Mankowski, D. Wetz, B. McHale, and M. Kristiansen</i>	
2-D MHD Study of Instabilities During the Compression Phase of an Inverse Z-Pinch MTF System	191
<i>P.V. Subhash, S. Madhavan, and S. Chaturvedi</i>	

Megagauss Magnet Technology

Recent Developments At the Dresden High Magnetic Field Laboratory.....	197
<i>J. Wosnitza, A.D. Bianchi, T. Herrmannsdörfer, S. Zherlitsyn, and S. Zvyagin</i>	
Performance of First 90 T Insert Magnet for US-DOE 100 T Multi-Shot Pulsed Magnet Program.....	207
<i>C.A. Swenson, J.R. Sims, and D.G. Rickel</i>	
Newly Designed Destructive Magnetic Coils for Mega-Gauss Fields At ISSP.....	217
<i>E. Kojima and S. Takeyama</i>	
Single Turn Multi-Megagauss System At the NHMFL-Los Alamos to Study Plutonium	227
<i>C.H. Mielke and R.D. McDonald</i>	
Investigation of Reinforced, Magnet-Coil Support Shells for the NHMFL 100 Tesla Non-Destructive Magnet.....	233
<i>J.R. Sims, J.B. Schillig, H. Coe, and C.N. Ammerman</i>	

Development of a Pulsed High Magnetic Field Laboratory At Huazhong University of Science and Technology	239
<i>C. Wang, X.Z. Duan, K.X. Yu, T. Peng, Z.C. Xia, H.F. Ding, L. Li, F. Herlach, and J. Vanacken</i>	

Explosive Pulsed Power Technology

Explosive Pulsed Power for Controlled Fusion	245
<i>V.A. Demidov and V.D. Selemir</i>	
Recent Advances in Modeling Helical Fcgs	255
<i>G.F. Kiuttu, J.B. Chase, D.M. Chato, and G.G. Peterson</i>	
Development and Testing of a High-Gain Magnetic Flux Compression Generator	265
<i>J.V. Parker, T.C. Cavazos, C.E. Roth, J.H. Degnan, G.F. Kiuttu, F.M. Lehr, and S.K. Coffey</i>	
Modernization of the MK-IX Generator	275
<i>J. Goforth, H. Oona, D. Herrera, R. Meyer, D. Tasker, and D. Torres</i>	
A Fabrication Method for a Mid-Sized, High-Energy-Density, Flux Compression Generator	281
<i>T.A. Holt, A.J. Young, A.A. Neuber, and M. Kristiansen</i>	
Disc Explosive Magnetic Generator and Quasi-Spherical Liner Simulations with a 1D Code	287
<i>A.M. Buyko</i>	
Energy Compression Experiments: Simulation of Small-Size MCG to Obtain a Radio Frequency Source	293
<i>M.M. Kekez</i>	
Experimental and Theoretical Analyses of Explosively-Formed Fuse (EFF) Opening Switches	301
<i>D.G. Tasker, J.H. Goforth, H. Oona, G. Kiuttu, and M. Domonkos</i>	
Characterization of Explosively Driven Ferroelectric Generator Material	307
<i>S.L. Holt, D.J. Hemmert, J.W. Walter, J.J. Mankowski, J.C. Dickens, M. Kristiansen, and L.L. Altgilbers</i>	
Transformer-Type Seeding System of a Helical FCG Based on a Transverse Shock Wave Ferromagnetic Generator	313
<i>S.I. Shkuratov, E.F. Talantsev, J. Baird, L.L. Altgilbers, and A.H. Stults</i>	

A New Concept of Explosive Pulsed Power: Design of Macro Primary Power Sources Based on Elementary Miniature Shock-Wave Ferromagnetic Cells.....	319
<i>S.I. Shkuratov, E.F. Talantsev, J. Baird, L.L. Altgilbers, and A.H. Stults</i>	
Pulse Charging of Capacitor Bank by Explosive-Driven Shock Wave Ferroelectric Generator.....	325
<i>S.I. Shkuratov, E.F. Talantsev, J. Baird, L.L. Altgilbers, and A.H. Stults</i>	
New Concept for Constructing an Autonomous Completely Explosive Pulsed Power System: Transverse Shock Wave Ferromagnetic Primary Power Source and Loop Flux Compression Amplifier	331
<i>S.I. Shkuratov, E.F. Talantsev, J. Baird, L.L. Altgilbers, and A.H. Stults</i>	
Compact Autonomous Completely Explosive Pulsed Power System Based on Transverse Shock Wave Demagnetization of Nd₂Fe₁₄B and Magnetic Flux Compression	337
<i>S.I. Shkuratov, E.F. Talantsev, J. Baird, L.L. Altgilbers, and A.H. Stults</i>	
Experimental Study of an Explosive Cumulative Current Closing Switch for Powerful Capacitor Facilities.....	343
<i>P.V. Duday, V.A. Ivanov, A.I. Krayev, O.D. Mikhailov, and A.N. Skobelev</i>	
Powerful Pulsed Source with Adjustable Time of Current Rise on the Basis of Helical EMG and Explosive Opening Switch to Drive Solid Liners.....	349
<i>P.V. Duday, A.M. Glybin, B.T. Egorichev, V.A. Ivanov, A.I. Krayev, V.B. Kudel'kin, S.M. Polyushko, I.V. Morozov, S.V. Pak, A.N. Skobelev, and G.I. Volkov</i>	
Time Dependent Inductance Calculation of Magneto-Cumulative Generator During Explosion Using Finite Element Method.....	353
<i>I-M. Sung, B-K. Joe, C-Y. You, and C. Lee</i>	
Electro-Explosive Switches for Helical Flux Compression Generators.....	359
<i>D. Belt, J. Mankowski, A. Neuber, J. Dickens, and M. Kristiansen</i>	
Nanosecond Sparkgap Switches.....	365
<i>P.T. Tracy, J.H. Burch, L.L. Altgilbers, T.X. Zhang, and S.T. Wu</i>	

High Current Design

Coupling Magnetic Fields and ALE Hydrodynamics for 3D Simulations of MFCGs	371
<i>D.A. White, R.N. Rieben and B.K. Wallin</i>	
Computer Model of a Quasi-Force-Free Magnet with a 100-T Field	377
<i>G.A. Shneerson, O.S. Koltunov, D.A. Dyogtev, S.I. Krivosheev, V.V. Titkov, A.I. Borovkov, D.S. Mikhaluk, and S.L. Shishigin</i>	
Three-Dimensional Calculations of Electrical Parameters in Flux Compression Systems	385
<i>C.D. Sijoy and S. Chaturvedi</i>	
Megampere Pulsed Alternators for Large EM Launchers	391
<i>I.R. McNab, C.J. Heyne, and M.V. Cilli</i>	
Algorithm for Unfolding Current From Faraday Rotation Measurement	399
<i>S.E. Mitchell</i>	

Material Response

The Use of Pressure Pulses Arising From the Creation of Strong Pulsed Magnetic Fields for the Study of the Dynamic Strength of Materials	407
<i>S.I. Krivosheev and G.A. Shneerson</i>	
Summary of Isentropic Compression Experiments Performed with High Explosive Pulsed Power	413
<i>D.G. Tasker, J.H. Goforth, and H. Oona</i>	
Demo Experiment on Sample Recovery, Isentropically Compressed by Ultra-High Magnetic Field Pressure	419
<i>M.I. Dolotenko</i>	
A Compact Pulser for Magnetically Driven Isentropic-Compression Experiments.....	425
<i>M. Bavay, J. Mervini, R.B. Spielman, G. Avriilaud, M. Delchambre, J. Guerre, F. Bayol, and F. Cubaynes</i>	
Pulsed Power Hydrodynamics: an Application of Pulsed Power and High Magnetic Fields to the Exploration of Material Properties and Problems in Experimental Hydrodynamics.....	431
<i>R.E. Reinovsky, W.L. Atchison, G. Dimonte, A. Kaul, G. Rodriguez, C. Rousculp, and P.T. Reardon</i>	

Dynamic Friction Experiments At the Atlas Pulsed Power Facility	441
<i>C.L. Rousculp, J.E. Hammerberg, D.M. Oro, G. Rodriguez, P.M. Goodwin, M.A. Salazar, R.E. Reinovsky, R.J. Faehl, J.R. Becker, R.A. Berglin, K.W. Delzer, G.H. Gomez, R.M. Malone, D.V. Morgan, T.V. Pate, and K.E. Theuer</i>	
Spall and Damage in Convergent Geometry Using Pulsed Power.....	447
<i>A.M. Kaul and G. Rodriguez</i>	
Experimental Test Bench on the Basis of Helical EMG to Study Spallation Mechanisms in Cylindrical Geometry.....	453
<i>S.V. Balashov, P.V. Duday, B.T. Egorychev, A.M. Glybin, Yu.N. Gorbachev, V.A. Ivanov, A.V. Ivanovsky, N.Yu. Ilyushkina, G.V. Karpov, V.E. Kolomyitsev, A.I. Krayev, V.B. Kudel'kin, A.I. Kuzyayev, I.V. Morozov, S.S. Nadezhin, S.V. Pak, A.A. Petrukhin, Yu.V. Savtsova, N.I. Sitnikova, A.N. Skobelev, O.A. Tyupanova, V.A. Vasyukov, G.I. Volkov, R.R. Zubayerova, B.G. Anderson, W.L. Atchison, A.M. Kaul, M. Salazar, G. Rodriguez, R.E. Reinovsky, L. Tabaka, and D.T. Westley</i>	
Quasi-Trapezoidal Shape Current Pulse Former Experimental Series «R-Damage»	459
<i>P.V. Duday, A.M. Glybin, V.A. Ivanov, I. Izotov, G.V. Karpov, A.I. Kuzyayev, I.V. Morozov, S.V. Pak, A.A. Petrukhin, A.N. Skobelev, and G.I. Volkov</i>	
Cooling and Condensation of Hydrogen Isotopes in Isentropic Compression Device.....	465
<i>G.V. Boriskov, A.I. Bykov, N.I. Egorov, and V.N. Pavlov</i>	
Isentropic Compression of Crystal Phase of Hydrogen Isotopes in Megabar Pressure Range	473
<i>A.I. Bykov, N.I. Egorov, G.V. Boriskov, M.I. Dolotenko, Yu.P. Kuropatkin, V.D. Mironenko, S.I. Belov, V.G. Belyashkin, M.V. Lomonosov, and N.B. Lukyanov</i>	
Use of Radiography to Study EOS of Condensed Hydrogen Isotopes Within Megabar Pressure Range	479
<i>A.I. Bykov, N.I. Egorov, Yu.P. Kuropatkin, N.B. Lukyanov, V.D. Mironenko, and V.N. Pavlov</i>	
Isentropic Compression of Condensed Hydrogen Up to Megabar Pressure	485
<i>A.I. Bykov, N.I. Egorov, G.V. Boriskov, M.I. Dolotenko, Yu.P. Kuropatkin, N.B. Lukyanov, V.D. Mironenko, S.I. Belov, V.G. Belyashkin, and M.V. Lomonosov</i>	

Ultra High Power Applications

High Current Wire Array and Gas Puff Implosions on the Z Accelerator to Produce Intense K-Shell X-Ray Emissions.....	489
<i>C.A. Coverdale, C. Deeney, B. Jones, P.D. LePell, A.L. Velikovich, J.W. Thornhill, J.P. Apruzese, K.G. Whitney, R.W. Clark, J. Davis, J.S. Levine, H.M. Sze, J.W. Banister, B.H. Failor, N. Qi, and Y. Maron</i>	
Equilibrium Ignition, a Minimum Energy Route to Fusion Via Multiple Mass Shell Collisions.....	501
<i>S.A. Colgate</i>	
Z-Pinch Requirements for Achieving High Yield Fusion Via a Z-Pinch Driven, Double Ended Hohlraum Concept.....	507
<i>R.W. Lemke, R.A. Vesey, M.E. Cuneo, M.P. Desjarlais, and T.A. Mehlhorn</i>	
Dynamic Hohlraum Z-Pinches as Radiation Sources for High Energy Density Experiments.....	513
<i>R.R. Peterson, D.L. Peterson, R.G. Watt, H.E. Tierney, T.E. Tierney, G.C. Idzorek, G.R. Magelssen, R.J. Kanzleiter, J.E. Bailey, M. Jones, M. Lopez, G.A. Rochau, and T.W.L. Sanford</i>	
A 1-MA LTD Cavities Building Blocks for Next Generation ICF/IFE	523
<i>M.G. Mazarakis, W.E. Fowler, D.H. McDaniel, C.L. Olson, S.T. Rogowski, R.A. Sharpe, K.W. Struve, and A.A. Kim</i>	
Author Index	529
Participant Index	533
