

2007 IEEE Canada Electrical Power Conference

**Montreal, QC, Canada
25-26 October 2007**

IEEE Catalog Number:
ISBN 13:

CFP0783C-PRT
978-1-4244-1444-4

Table of Contents

A New Fault Ride-through Strategy for Doubly Fed Wind-Power Induction Generator	1
<i>Ali H. Kasem, Ehab F. El-Saadany, Hassan H. El- Tamaly, Mohamed A. A. Wahab</i>	
VARIABLE SPEED WIND TURBINES USING CAGE ROTOR INDUCTION GENERATORS CONNECTED TO THE GRID	8
<i>L. Mihet-Popa, V. Groza, G. Prostean, I. Filip, I. Szeidert</i>	
Dynamic Voltage Stabilization of Stand-Alone Wind Energy Schemes.....	14
<i>A. M. Sharaf, A. S. Aljankawey, I. H. Altas</i>	
Supervisory Hybrid Control of a Micro Grid System	20
<i>M. Shahid Khan, M. R. Iravani</i>	
Reliability Based Analysis for Optimum Allocation of DG.....	25
<i>Y.M.Attwa, E.F. El-Saadany</i>	
Network Security Management and Authentication of Actions for Smart Grids Operations.....	31
<i>Alexander Hamlyn, Helen Cheung, Todd Mander, Lin Wang, Cungang Yang, Richard Cheung</i>	
A Hybrid Photovoltaic PV Array-Battery Powered EV-PMDC Drive Scheme.....	37
<i>A. M. Sharaf, E. Ozkop, I. H. Altas</i>	
Solar Photovoltaic Array's Shadow Evaluation Using Neural Network with On-Site Measurement.....	44
<i>Dzung D. Nguyen, Brad Lehman, Sagar Kamarthi</i>	
Modeling Photovoltaic DC primary sources as grid connected inverter supplies considering non linear effects	50
<i>C. González-Morán, P. Arboleya, G. Díaz, J. Gómez-Aleixandre</i>	
Effect of Low Voltage Ride Through Technologies on Wind Farm	56
<i>Jean Morneau, Chad Abbey, Geza Joos</i>	
Design of a Robust Speed and Position Sensorless Decoupled P-Q Controlled Doubly-Fed Induction Generator for Variable-Speed Wind Energy Applications.....	62
<i>K. Gogas, G. Joos, B.T. Ooi, Y.Z. Zhang, B. Mwinyiwiwa</i>	
The impact of power converter technologies on stand alone wind turbine applications.....	68
<i>Handy Fortin Blanchette, Kamal Al-Haddad</i>	
Flicker Contribution of a Wind Power Plant with Single and Multiple Turbine Representations	74
<i>Roohollah Fadaeinedjad, Mehrdad Moallem, Gerry Moschopoulos, Sondeep Bassan</i>	
A Practical Method for Estimation of Fault Ride-Through Capability of Wind Power Farms Based on Squirrel-Cage Rotor Induction Generators	80
<i>Ahda P. Grilo, Diogo Salles, Walmir Freitas, Carlos A. F. Murari</i>	
Variable Speed Operation of a New Very Low Head Hydro Turbine with Low Environmental Impact.....	85
<i>Philippe Lautier, Claude O'Neil, Claire Deschênes, Hervé Joël Nanga Ndjana, Richard Fraser, Marc Leclerc</i>	
Smaller Hydro, Higher Risk	91
<i>S. Pejovic, B. W. Karney, Q. Zhang, G. Kumar</i>	
Electricity Usage in Water Distribution Networks	97
<i>Gaurav Kumar, B. W. Karney</i>	
Standardization as Prevention of Fatigue Cracking of Hydraulic Turbine-Generator Shaft	103
<i>T. Maricic, D. Haber, S. Pejovic</i>	
Electrical Power Crisis in Bangladesh: Impacts of the Optimal Use of Energy Limited Hydro Unit on the System Reliability and Production Cost	111
<i>Q. Ahsan, Mohammad Tawhidul Alam</i>	
A Novel Shunt Hybrid Power Filter for the Mitigation of Power System Harmonics.....	117
<i>ab.Hamadi, S. Rahmani ,W. Santana, K. Al-Haddad</i>	

Table of Contents

Properties and Applications of Quadratic Converters	123
<i>Sondeep Bassan, Gerry Moschopoulos</i>	
Analysis of a Hybrid Current Source Converter with Bi-directional Power Flow Capability	128
<i>M. F. Naguib, Luiz A. C. Lopes</i>	
Analysis of Harmonic Reduction for Synchronized Phase-shifted Parallel PWM Inverters with Current Sharing Reactors.....	134
<i>Nacer Benaïfa, Hussain Bierk, Abu Hamed M. A. Rahim, Ed Nowicki</i>	
A Low-Cost Modulated Filter Compensator for Energy-Efficient Enhancement in AC Utilization Systems.....	140
<i>Adel M. Sharaf, Yevgen Biletskiy, Hassan A. Mahasneh</i>	
Real-Time and Off-Line Simulation of a Detailed Wind Farm Model Connected to a Multi-Bus Network	145
<i>Jean-Nicolas Paquin, Julien Moyer, Guillaume Dumur, Vincent Lapointe</i>	
Islanded Operation of A Doubly-Fed Induction Generator (DFIG) Wind-Power System with Integrated Energy Storage.....	153
<i>Amirnaser Yazdani</i>	
PMSG Wind Turbine Performance Analysis During Short Circuit Faults.....	160
<i>A. Abedini, A. Nasiri</i>	
Performance optimization of low-speed induction generators for direct drive wind turbines	166
<i>G. Madescu, A. Trica, N. Budisan, O. Prostean, M. Biriescu, M. Mot</i>	
Operation of Single-phase Grid-Connected Inverters with Large DC Bus Voltage Ripple.....	172
<i>Nayeem A. Ninad, Luiz A. C. Lopes</i>	
Optimal Fault Predictors for Arc-Type Faults in Radial and Meshed Alternating Current Distribution Systems	177
<i>G. B. Weyrich Morris, E. Castillo-Guerra, A. M. Sharaf, M. Stevenson</i>	
Dynamic analysis and field verification of an innovative anti-islanding protection scheme based on directional reactive power detection	183
<i>Farid Katiraei, Aidan Foss, Chad Abbey, Benjamin Strehler</i>	
Todd Mander, Helen Cheung, Alexander Hamlyn, Richard Cheung.....	189
<i>Todd Mander, Helen Cheung, Alexander Hamlyn, Richard Cheung</i>	
Control and Protection of Distribution Network with Non-Utility Induction Generators.....	195
<i>Hamidreza Bakhshi, Innocent Kamwa</i>	
Single Stage Power Electronic Interface for a Fuel Cell Based Power Supply System.....	201
<i>Shailendra Jain, Jin Jiang, Xinhong Huang, Srdjan Stevandić</i>	
Design and Implementation of a Control System for a Microgrid involving a Fuel Cell Power Module	207
<i>Zhutian Wang, Xinhong Huang, Jin Jiang</i>	
Fuel Cells – Configuration and Operation	213
<i>Janaki Balakrishnan</i>	
Status Review of Power Control Strategies for Fuel Cell Based Hybrid Electric Vehicles	218
<i>Di Wu, Sheldon S. Williamson</i>	
Impact of Large-Scale Distributed Energy Sources Under Government Incentive Programs: An Example	224
<i>A. T. Moore, J. Jiang</i>	
Hydro Hydraulics - a disappearing art?	230
<i>J. L. Gordon</i>	
Neuro-Fuzzy Vector Control for Doubly-Fed Wind Driven Induction Generator	236
<i>Hany M. Jabr, Narayan C. Kar</i>	

Table of Contents

Review of Distributed Generation Product and Interconnection Standards for Canada	242
<i>Sylvain Martel, Dave Turcotte</i>	
Optimizing the Annual Energy Production of Doubly-Fed Induction Generator Based Wind Turbines	248
<i>D. Aguglia, R. Wamkeue, P. Viarouge, J. Cros</i>	
New Generation of Signal processing Techniques for Power System Applications	256
<i>M. Karimi-Ghartemani, A. Bakhshai, S. Eren</i>	
Reducing Subway's Energy.....	261
<i>Francois Ruelland, Kamal Al-Haddad</i>	
Assessment of Efficiency Improvement Techniques for Future Power Electronics Intensive Hybrid Electric Vehicle Drive Trains.....	268
<i>Xin Li, Sheldon S. Williamson</i>	
Off-Grid Diesel Power Plant Efficiency Optimization and Integration of Renewable Energy Sources.....	274
<i>Philippe Lautier, Martin Prévost, Patrick Éthier, Patrick Martel</i>	
Energy Efficient Single Stage Axial Fan (ENEF).....	280
<i>C. D. Pitis</i>	
Increased Number of Voltage Steps for Cascaded H-bridge Multilevel Inverters using 3-level Operation in each Half-cycle	286
<i>Arif Al-Judi, Nacer Benaïfa, Abu Hamed M. A. Rahim, Ed Nowicki</i>	
An Active Resonance Damper for Distribution Systems Using an ARIMAX Parameter Estimator	290
<i>W. C. Santana, K. Al-Haddad, S. Rahmani, F. Fnaiech, L. E. B. da Silva</i>	
The Application of the Cascaded Multilevel Converters in Grid Connected Photovoltaic Systems	296
<i>S. Ali Khajehoddin, Alireza Bakhshai, Praveen Jain§</i>	
Input-State Feedback Linearization Control of Two- Stage Matrix Converters Interfaced With High-Speed Microturbine Generators.....	302
<i>M. Hamouda, K. AL-Haddad, F. Fnaiech, H. Blanchette</i>	
Development of Investment Strategies for Wind Power Generation	308
<i>Chanapan Kongnam, Somboon Nuchprayoon</i>	
The Integrated Operation of a Renewable Power System.....	314
<i>Mu-Kuen Chen</i>	
Study of a Hybrid Wind-Diesel System with Compressed Air Energy Storage	320
<i>Hussein Ibrahim, Adrian Ilinca, Rafic Younès, Jean Perron, Tammam Basbous</i>	
Renewable Energy in China: A Strategic Imperative	326
<i>C. H. Zhang, Z.H. Zhao, H.L. Lai, J. K. Han</i>	
Development and Trend of Wind Power in China.....	330
<i>Jinsong Kang, Zhiwen Zhang, Yongqiang Lang</i>	
Wind Energy Developments in Manjil and Roodbar (Iran)	336
<i>A. A. Lotfi Neyestanak</i>	
Short-Term Wind Energy Forecasting	342
<i>P.R.J. Campbell</i>	
Modifying power curve of Variable Speed Wind Turbines by Performance Evaluation of Pitch- Angle and Rotor Speed Controllers.....	347
<i>M.H. Zamani, G.H. Riahy, Ali Jahanbani Ardakani</i>	
A New Dynamic Voltage Restoration Topology Applied to a Double Connected Solar Plant.....	353
<i>P. Arboleya, C. González-Morán, G. Díaz, J. Gómez-Aleixandre, A. Hidalgo</i>	

Table of Contents

An MPPT Controller Design for Photovoltaic (PV) Systems Based on the Optimal Voltage Factor Tracking	359
<i>J. Ghaisari, M. Habibi, A. Bakhshai</i>	
A Simple Current Mode Controller for Two Switches Buck-Boost Converter for Fuel Cells.....	363
<i>Ahmad Ale Ahmad, Adib Abrishamifar</i>	
Research on Drive System of Fuel Cell Electric Vehicles.....	367
<i>Jinsong Kang, Guoqing Xu Zhouyun, Zhang Jun Gong</i>	
Biomass Gasifier Based Hybrid Energy System for Rural Areas.....	371
<i>S.Ashok, P.Balamurugan</i>	
Modeling and Simulation of Natural Gas Microturbine Application for Residential Complex Aiming Technical and Economical Viability Analysis	376
<i>A.B.M.Aguiar, J.O.P.Pinto, C.Q.Andrea, L.A.H.Nogueira</i>	
DSM Approach for Water Heater Control Strategy Utilizing Elman Neural Network	382
<i>Y.M.Atwa, E.F. El-Saadany, M.M. Salama</i>	
VRB Modelling for the Study of Output Terminal Voltages, Internal Losses and Performance.....	387
<i>J. Chahwan, C. Abbey, G. Joos</i>	
Comparison and Analysis of Different Energy Storage Techniques Based on their Performance Index.....	393
<i>Hussein Ibrahima, Adrian Ilinca, Jean Perron</i>	
Influence of overvoltages in induction motors fed by PWM voltage inverters on power efficiency	399
<i>Boukhemis Chetate, Mohand Tahar Belassel, Stephane Simard, Rachid Beguenane</i>	
Transient Stability Assessment for Induction Generator Embedded Power Systems.....	405
<i>Yu-Jen Lin, Rui-Xiang Ho, Jing-Xiong Yang, Tzu-Chen Hung, M-Jen Chen</i>	
Communication Security Architecture for Smart Distribution System Operations.....	411
<i>Todd Mander, Helen Cheung, Alexander Hamlyn, Richard Cheung</i>	
Network-enabled Real-time Monitoring of Smart Power Distribution Operating States.....	417
<i>Alexander Hamlyn, Helen Cheung, Todd Mander, Lin Wang, Cungang Yang, Richard Cheung</i>	
Strategy and Role-based Model of Security Access Control for Smart Grids Computer Networks.....	423
<i>Helen Cheung, Alexander Hamlyn, Todd Mander, Cungang Yang, Richard Cheung</i>	
Modeling and Forecasting of Energy Prices using Non-stationary Markov Models versus Stationary Hybrid Models including a Survey of all Methods	429
<i>Hamed Valizadeh Haghi, S. M. Moghaddas Tafreshi</i>	
A Hybrid Modelling Technique for Load Forecasting	435
<i>P.R.J. Campbell</i>	
A Comprehensive Short-Term Operations Framework for a Disco in Competitive Electricity Markets	440
<i>Ayed A. S. Algarni, Kankar Bhattacharya,</i>	
Annual Electricity Demand Prediction for Iranian Agriculture Sector Using ANN and PSO	446
<i>Seyyed Ali Pourmousavi Kani, Nima Farrokhzad Ershad</i>	
Voltage Rise due to Regenerative Braking of DC machines associated with Gantry Cranes at Kaohsiung Harbour	452
<i>Yu-Jen Lin, Ch-Yi Hung, Tzu-Chen Hung</i>	
Implementation of Capacitor Placement and Voltage Reduction on Distribution Feeder.....	456
<i>Somboon Nuchprayoon, Natthaphot Wiraphorn</i>	
Novel Control Strategies For Photovoltaic Powered PMDC Motor Drives.....	461
<i>A.M. Sharaf, E. Elbakush, I. H. Altas</i>	

Table of Contents

Improving the Efficiency of Electrical Systems via Exergy Methods.....	467
<i>Marc A. Rosen</i>	
Exergy Concept and its Application.....	473
<i>Marc A. Rosen</i>	
Reactive Power Control of Current Source Converter based Wind Energy System.....	479
<i>Yongqiang Lang, Bin Wu, Navid Zargari</i>	
5] Field Validation of a Doubly Fed Induction Generator (DFIG) Model.....	484
<i>Soubhik Auddy, Rajiv K. Varma, Michael Dang</i>	
Performance of a Controller for Small Grid Connected Wind Turbines	490
<i>R. Ahshan, M. T. Iqbal, George K. I. Mann</i>	
Wind Power in Ontario: An Economical Valuation	496
<i>M.H. Albadi, E.F. El-Saadany</i>	
Voltage and Frequency Regulation of a Stand- Alone Self-Excited Induction Generator	502
<i>Ghulam Dastagir, Luiz A. C. Lopes</i>	
THROUGH POWER FLOW CONTROL	507
<i>R. Mohamedi, S. Lefebvre, A-O. Ba, A. Houle</i>	
Network-based Adaptive Protection Strategy for Feeders with Distributed Generations	514
<i>Helen Cheung, Alexander Hamlyn, Cungang Yang, Richard Cheung</i>	
A Monitoring and Identification Scheme for Power Quality Assessment.....	520
<i>Yevgen Biletskiy, Ning Chang, Adel M. Sharaf, Hassan A. Mahasneh</i>	
Voltage Variation Analysis in Interconnected Electrical Network - Distributed Generation.....	525
<i>Mamadou Lamine Doumbia, Kodjo Agbossou</i>	
Improved Power Quality Based Controller for a 3-Phase 4-Wire Isolated Wind Energy System	531
<i>Bhim Singh, Gaurav Kumar Kasal, Ambrish Chandra, Kamal-Al-Haddad</i>	
Global Demand Projections for Renewable Energy Resources	537
<i>Aiden J. Morrison</i>	
Using Geothermal Energy and Industrial Waste Heat for Power Generation.....	543
<i>Vasile Minea</i>	
To Switch, or Not to Switch: A Critical Analysis of Canada's Ban on Incandescent Light Bulbs	550
<i>M. Ivanco, B. W. Karney, K. J. Waher</i>	
between Development of a Versatile Voltage Stability Index Algorithm.....	556
<i>D. O. Dike, S. M. Mahajan, G. Radman</i>	
Reactive Power Ancillary Service from Wind Farms.....	562
<i>Nayeem Rahmat Ullah, Kankar Bhattacharya, Torbjorn Thiringer</i>
