

Proceedings of the

First International Conference on Software Testing, Verification and Validation

April 9-11, 2008, Lillehammer, Norway

Los Alamitos, California

Washington • Tokyo

Table of Contents

First International Conference on Software Testing, Verification and Validation (ICST 2008)

General Chair's Welcome Message	x
Program Chairs' Introduction	xi
Keynote Abstracts	xii
Committees	xv

Regular Track

RT1: Test Assessment and Fault Localization-1

Efficient Test Data Generation for Variables with Complex Dependencies	3
<i>Armin Beer and Stefan Mohacsi</i>	
Relationships between Test Suites, Faults, and Fault Detection in GUI Testing	12
<i>Jaymie Strecker and Atif Memon</i>	
Structural Testing of Executables	22
<i>Sébastien Bardin and Philippe Herrmann</i>	

RT2: Test Assessment and Fault Localization-2

Generation of All-Paths Unit Test with Function Calls	32
<i>Patricia Mouy, Bruno Marre, Nicky Williams, and Pascale Le Gall</i>	
A Crosstab-Based Statistical Method for Effective Fault Localization	42
<i>Eric Wong, Tingting Wei, Lei Zhao, and Yu Qi</i>	
Mutation Testing for Aspect-Oriented Programs	52
<i>Fabiano Cutigi Ferrari, José Carlos Maldonado, and Awais Rashid</i>	

RT3: Test Assessment and Fault Localization-3

Evaluating Automated Unit Testing in Sulu	62
<i>Roy Patrick Tan and Stephen Edwards</i>	
On the Predictability of Random Tests for Object-Oriented Software	72
<i>Ilinca Ciupa, Alexander Pretschner, Andreas Leitner, Manuel Oriol, and Bertrand Meyer</i>	
Less is More: A Minimalistic Approach to UML Model-Based Conformance Test Generation	82
<i>Amit Paradkar, Matthew Kaplan, Tim Klinger, Avik Sinha, Clay Williams, and Cemal Yilmaz</i>	

RT4: Testing Real-time Systems

Traffic-Aware Stress Testing of Distributed Real-Time Systems Based on UML Models in the Presence of Time Uncertainty	92
<i>Vahid Garousi</i>	

Scheduling Timed Modules for Correct Resource Sharing	102
<i>Cristina Seceleanu, Paul Pettersson, and Hans Hansson</i>	

Testability of Dynamic Real-Time Systems: An Empirical Study of Constrained Execution Environment Implications	112
<i>Birgitta Lindström, Jeff Offutt, and Sten F. Andler</i>	

RT5: Testing Web Applications

State-Based Testing of Ajax Web Applications	121
<i>Alessandro Marchetto, Paolo Tonella, and Filippo Ricca</i>	

A Three-Tiered Testing Strategy for Cookies	131
<i>Andrew Tappenden and James Miller</i>	

Prioritizing User-Session-Based Test Cases for Web Applications Testing.....	141
<i>Sreedevi Sampath, Renée Bryce, Gokulanand Viswanath, Vani Kandimalla, and A. Güneş Koru</i>	

RT6: Regression testing and OO testing-1

Trace-based Reflexive Testing of OO Programs with T2.....	151
<i>Wishnu Prasetya, Tanya Vos, and Arthur Baars</i>	

Relation between Depth of Inheritance Tree and Number of Methods to Test	161
<i>Muhammad Rabee Shaheen and Lydie du Bousquet</i>	

Testing Consequences of Grime Buildup in Object Oriented Design Patterns.....	171
<i>Clemente Izurieta and James Bieman</i>	

RT7: Model Based Testing-1

Contract-Based Verification for Aspect-Oriented Refactoring.....	180
<i>Naoyasu Ubayashi, Jinji Piao, Suguru Shinotsuka, and Tetsuo Tamai</i>	

Testing Java Components Based on Algebraic Specifications	190
<i>Bo Yu, Liang Kong, Yufeng Zhang, and Hong Zhu</i>	

UML Activity Diagram Based Testing of Java Concurrent Programs for Data Race and Inconsistency.....	200
<i>Bin Lei, Linzhang Wang, and Xuandong Li</i>	

RT8: Test Process and Tools-1

Testing Grid Application Workflows Using TTCN-3	210
<i>Jens Grabowski, Helmut Neukirchen, and Thomas Rings</i>	

Mining Software Repositories to Study Co-Evolution of Production & Test Code	220
<i>Andy Zaidman, Bart Van Rompaey, Serge Demeyer, and Arie van Deursen</i>	

The Use of Intra-Release Product Measures in Predicting Release Readiness.....	230
<i>M.P. Ware, F.G. Wilkie, and M. Shapcott</i>	

RT9: Test Process and Tools-2

Test-Driven Assessment of Access Control in Legacy Applications	238
<i>Yves Le Traon, Tejedine Mouelhi, Alexander Pretschner, and Benoit Baudry</i>	
An Evaluation of Two Bug Pattern Tools for Java.....	248
<i>Stefan Wagner, Florian Deissenboeck, Michael Aichner, Johann Wimmer, and Markus Schwalb</i>	
Tool Support for Expert-Centred Code Assessments	258
<i>Reinhold Plösch, Harold Gruber, Gustav Pomberger, Matthias Saft, and Stefan Schiffer</i>	

RT10: Regression Testing and OO Testing-2

Empirical Software Change Impact Analysis using Singular Value Decomposition	268
<i>Mark Sherriff and Laurie Williams</i>	
An Empirical Study on Bayesian Network-Based Approach for Test Case Prioritization	278
<i>Siavash Mirarab and Ladan Tahvildari</i>	
A Metamodel for the Measurement of Object-Oriented Systems: An Analysis using Alloy	288
<i>Jacqueline McQuillan and James Power</i>	
Automated Session Data Repair for Web Application Regression Testing.....	298
<i>Nadia Alshahwan and Mark Harman</i>	

RT11: Model Based Testing-2

Extended Finite State Machine Based Test Derivation Driven by User Defined Faults	308
<i>Khaled El-Fakih, Anton Kolomeez, Svetlana Prokopenko, and Nina Yevtushenko</i>	
Simulation of Multi-Formalism Models with ModHel'X.....	318
<i>Frédéric Boulanger and Cécile Hardebolle</i>	
On Combining Multi-Formalism Knowledge to Select Models for Model Transformation Testing	328
<i>Sagar Sen, Benoit Baudry, and Jean-Marie Mottu</i>	

RT12: Model Based Testing-3

Model-Based Tests for Access Control Policies.....	338
<i>Alexander Pretschner, Tejedine Mouelhi, and Yves Le Traon</i>	
Generating Test Requirements for the Service Connections based on the Layers of SOA	348
<i>Hojjin Yoon, Eun Mi Ji, and Byoungju Choi</i>	
Detecting and Repairing Inconsistencies across Heterogeneous Models	356
<i>Dimitrios Kolovos, Richard Paige, and Fiona Polack</i>	

Industry Track

IT1: Model Based Testing

Model Based Testing of System Requirements Using UML Use Case Models	367
<i>Bill Hasling, Helmut Goetz, and Klaus Beetz</i>	
Test Instrumentation and Pattern Matching for Automatic Failure Identification.....	377
<i>Dan Traviison and Geoff Staneff</i>	
Comparing Aspects with Conventional Techniques for Increasing Testability.....	387
<i>Jani Metsä, Mika Katara, and Tommi Mikkonen</i>	
Test Data Provision for ERP Systems	396
<i>Sebastian Wieczorek, Alin Stefanescu, and Ina Schieferdecker</i>	

IT2: Test Process, Organization, and Tools

Selective Homeworkless Review	404
<i>Eitan Farchi and Shmuel Ur</i>	
Designing and Building a Software Test Organization	414
<i>Bruce Benton</i>	
Challenges and Solutions in Test Staff Relocations within a Software Consultancy Company	423
<i>Daniel Larsson, Robert Feldt, and Håkan Bertilsson</i>	
The Role of Stability Testing in Heterogeneous Application Environment	432
<i>Krzysztof Rogoz and Thomasz Padlo</i>	

IT3: Testing Specialized Software

Testing Predictive Software in Mobile Devices	440
<i>Raghunath Vemuri</i>	
A Script-Based Testbed for Mobile Software Frameworks.....	448
<i>Walter Hargassner, Thomas Hofer, Claus Klammer, Josef Pichler, and Gernot Reisinger</i>	
Automation Method for Testing XML/DB/XML Layers.....	458
<i>Debarshi Raha and Mohan Jadhav</i>	
An Industrial Case Study of Bypass Testing on Web Applications.....	465
<i>Jeff Offutt, Qingxiang Wang, and Joann Ordille</i>	

IT4: Test, Validation, and Fault Localization

Pre-Testing Flash Device Driver through Model Checking Techniques	475
<i>Moonzoo Kim, Yunja Choi, Yunho Kim, and Hotae Kim</i>	
Model-Based Testing of Automotive Systems	485
<i>Eckard Bringmann and Andreas Krämer</i>	

IT5: Test and Validation (Short Papers)

How to Test the Intangible Properties of Graphical User Interfaces?.....	494
<i>Josef Pichler and Rudolf Ramler</i>	
Workflow Inspector—A Test Tool for Microsoft Workflow Foundation	498
<i>Alexander Lechner and Ruth Breu</i>	
Model-Based Quality Assurance of Windows Protocol Documentation.....	502
<i>Wolfgang Grieskamp, Dave MacDonald, Nicolas Kicillof,</i> <i>Alok Nandan, Keith Stobie, and Fred Wurden</i>	

Student Track

ST1: Test and Validation-1

Distributed In Vivo Testing of Software Applications	509
<i>Matt Chu, Christian Murphy, and Gail Kaiser</i>	
A Methodology for UML Models V&V.....	513
<i>Andrea Baruzzo and Marco Comini</i>	
Quality of Automatically Generated Test Cases Based on OCL Expressions	517
<i>Stephan Weißleder and Bernd-Holger Schlingloff</i>	
Improving Automated Testing of Multi-Threaded Software.....	521
<i>Ayla Dantas, Francisco Brasileiro, and Walfredo Cirne</i>	

ST2: Test and Validation-2

Functional Search-Based Testing from State Machines	525
<i>Raluca Lefticaru and Florentin Ipate</i>	
Verifying and Analyzing Adaptive Logic through UML State Models.....	529
<i>Andres Ramirez and Betty Cheng</i>	
Statistical Sampling Based Approach to Alleviate Log Replay Testing.....	533
<i>Ravidutta Kodre, Hadar Ziv, and Debra Richardson</i>	
A Fitness Function to Find Feasible Sequences of Method Calls for Evolutionary Testing of Object-Oriented Programs	537
<i>Myoung Yee Kim and Yoonsik Cheon</i>	
A JML Compiler Based on AspectJ	541
<i>Henrique Rebêlo, Ricardo Lima, Márcio Cornélio, and Sérgio Soares</i>	

Author Index	545
