TABLE OF CONTENTS

Volume 1

COMPACTION, YIELDING, PORE COLLAPSE, PLASTICITY

Seawater in Chalk: An EOR and Compaction Fluid	1
<i>Tor Austad</i>	
Plastic Compaction and Anisotropic Permeability Development in Unconsolidated Sands with Implications for Horizontal Well Performance.....	8
<i>Brian Ronald Crawford, D.W. Webb, and K.H. Searles</i>	
Laboratory Study of Hydrothermal Deformation in Unconsolidated St. Peter Quartz Sand	23
<i>Stephen Karner, A.K. Kronenberg, J.S. Chester, F.M. Chester, and A. Hajash, Jr.</i>	
Characterizing the Permeability-Porosity Relationship During Compactive Cataclastic Flow.....	29
<i>Wenlu Zhu, L. Montési, and T.-F. Wong</i>	
A Qualitative Comparison Between Discrete Particle Modeling and Laboratory Observations of Compaction Bands in Porous Rock.....	34
<i>Rune M. Holt, Liming Li, and David J. Holcomb</i>	
Geomechanical Modeling of Subsidence and Compaction in the M1 and Jintan Gas Fields, Offshore Malaysia	40
<i>Dinara Khalmanova, John Dudley, and Ezimah K. Oden</i>	
Depletion-Induced Reservoir Compaction: Two Geomechanical Models and Their Application in the Planning of Subsidence Monitoring.....	49
<i>Peter Maarten Schutjens and Kees Hindriks</i>	

COUPLED PROCESSES, FLOW AND TRANSPORT

Coupled Deformation and Fluid Flow Modelling of Simple Fault Systems and Implications on Hydrocarbon Preservation Potential.....	62
<i>Yanhua Zhang, Anthony Gartrell, Jim R. Underschultz, and David N. Dewhurst</i>	
Coupled Analysis of Change in Fracture Permeability During the Cooling Phase of the Yucca Mountain Drift Scale Test.....	72
<i>Jonny Rutqvist, Barry Freifeld, Ki-Bok Min, Derek Elsworth, and Yvonne Tsang</i>	
Development of a Shear-Flow Coupling Test Method for a Natural Rock Joint	82
<i>Yasuhiro Mitani, T. Esaki, H. Ikemi, Y. Yamagami, and K. Ikusada</i>	
A New In-Situ Approach for Hydromechanical Characterization of Mesoscale Fractures: the High-Pulse Poroelasticity Protocol (HPPP)	88
<i>Frederic Cappa, Jean Virieux, Jonny Rutqvist, and Chin-Fu Tsang</i>	
Fracture Aperture Change in Response to Reactive Transport of Silica and Thermoelastic Effects	95
<i>Chakra Rawal and Ahmad Ghassemi</i>	
A Simple Model for Coupling Between the Normal Stiffness and the Hydraulic Transmissivity of a Fracture.....	105
<i>Robert W. Zimmerman</i>	

Measuring Coupled Geochemical Alteration and Geomechanical Deformation in Discreet Variable-Aperture Fractures	112
<i>Russell L. Detwiler</i>	
Experimental Study on the Permeability of Soft Rock During the Triaxial Shear Process	117
<i>Kawai Yusuke, Kishida Kiyoshi, Nakashima Shinchiro, and Yasuhara Hideaki</i>	
CO₂ /N₂ Injection in Deep Coals and Its Impact on Coal Permeability	123
<i>Satya Harpalani and Abhijit Mitra</i>	
Dissolution of a Stressed Calcite Crystal- High Resolution Strain Measurements and Interface Observations	131
<i>Zvi Karcz, Leehee Laronne, Richard Polizotti, Deniz Ertas, and Einat Aharonov</i>	
Estimation of Ground Stability in Considering Groundwater and Air Bubbles Using Multiphase Simulator	137
<i>Kiyoshi Kishida, N. Jacimovic, T. Hosoda, S. Nakashima, T. Kodaka, and H. Yasuhara</i>	
Chemically- and Mechanically-Mediated Influences on Rock Fractures and Their Implications on Thermomechanical Loading Cycle	145
<i>Ki-Bok Min, Jonny Rutqvist, and Derek Elsworth</i>	
3D Analysis of Coupled Stress-Flow in Jointed Rock Masses Using Finite Element Method	154
<i>Moataz A. Al-Obaydi, N.K. Samadhiya, and M.N. Viladkar</i>	
Modelling Thermal Geomechanical Effects on Simulation Porosity	168
<i>David Tran, Long Nghiem, Lloyd Buchanan, Mikhail Geilikman, Ted Leshchyshyn, Selim Hannan, and Sau-Wai Wong</i>	
Chemo-Poromechanical Finite Element Modeling of a Wellbore in Swelling Shale	180
<i>X.X. Zhou and Ahmad Ghassemi</i>	
Hydraulic and Poroelastic Properties of Porous Rocks and Concrete Materials	189
<i>Denis Labrie and B. Conlon</i>	
Laboratory Poromechanics Simulation and Modeling of Transversely Isotropic Hollow Cylinders	200
<i>Son Hoang and Younane Abousleiman</i>	
Pore Pressure and Chemical Stresses Around a Borehole in a Shale Formation	208
<i>Quanxin Guo, Z.-H. Jin, and Y.-Z. Feng</i>	
Parallel Finite Element Methods for Thermo-Hydro-Mechanical (THM) Coupled Problems: MPI Concepts on Different Parallel Computer Platforms	217
<i>Olaf Kolditz, Wenqing Wang, Georg Kosakowski, and Thomas Boenisch</i>	
A Mathematical Model for Rock Deformation's Effect on Flow in Porous and Fractured Reservoirs	225
<i>Yu-Shu Wu and Yuan Di</i>	
Concept of a Hydro-Mechanical-Thermal Simulation of a Fractured Reservoir.	235
<i>Mando Guido Blöcher, Andreas Reinicke, Inga Moeck, Harald Milsch, and Gunter Zimmerman</i>	

FRACTURE MECHANICS AND FRACTURE PROPAGATION

Natural Fractures in the Barnett Shale: Constraints on Spatial Organization and Tensile Strength with Implications for Hydraulic Fracture Treatment in Shale-Gas Reservoirs	243
<i>Julia F. W. Gale and Jon Holder</i>	
Numerical Modeling of Fracturing in a Rock Model Material with Pre-Existing Flaws	252
<i>Chi Hyun Park and Antonio Bobet</i>	
Crack Coalescence Tests on Granite	261
<i>Jay Miller and Herbert H. Einstein</i>	
Analysis of Failure Potential Around a Hydraulic Fracture in Jointed Rock	269
<i>Jun Ge and Ahmad Ghassemi</i>	

Multi-Fracture Propagation Modeling: Applications to Hydraulic Fracturing in Shales and Tight Gas Sands	277
<i>Jon E. Olson</i>	
Modeling Fracture Propagation with the Numerical Manifold Method	285
<i>Xinmei An</i>	
Effect of Thermal Loading on Compressional Wave Velocity, Mode I Fracture Toughness and Tensile Strength	293
<i>Kwangmin Kim and John Kemeny</i>	
Experimental Study of Subcritical Crack Growth Under Mode I, Mode II and Mode III Loading	298
<i>Tae Young Ko and John Kemeny</i>	
Laboratory Hydraulic Fracturing Tests on Small Homogeneous and Laminated Blocks	305
<i>Amrut Sudarshan athavale and Jennifer L. Miskimins</i>	
A Method for Determination of Mode II Fracture Toughness at Elevated Confining Pressure	314
<i>Tobias Backers, Ove Stephansson, and Tobias Meier</i>	
Observations of Hydraulic Fracture Initiation and Propagation in a Brittle Polymer	322
<i>John Dudley, Hudson Wu, Edward Golovin, Alexander Chudnovsky, George Wong, and Yuri Shulkin</i>	
Nucleation and Growth of Anti-Wing Crack from Tips of Strike-Slip Flaw	335
<i>Wong Hoi-Chu Robina, Y.S.H. Guo, L.Q. Liu, P.X. Liu, and S.P. Ma</i>	
Behaviour and Impact of Dynamic Induced Fractures in Waterflooding and EOR	344
<i>Paul Van Den Hoek, D. Zwarts, R. Al-Masfry, B. Hustedt, J.-D. Jansen, and L. Schijndel</i>	
Avoiding Drilling Problems by Strengthening the Wellbore While Drilling	354
<i>Hong Wang and Mohamed Soliman</i>	
A Comparison of Numerical and Experimental Results of Hydraulic Fracture Growth Into a Zone of Lower Confining Stress	364
<i>Ruiting Wu, Andrew P. Bunger, Robert G. Jeffrey, and Eduard Siebrits</i>	
Hydraulic Fracture Simulation Revisited	372
<i>John Dudley, Alexander Chudnovsky, Frank Fan, Yuri Shulkin, Haiying Zhang, and George Wong</i>	
Size Effect on Subcritical Crack Growth in Coconino Sandstone	379
<i>Tae Young Ko and John Kemeny</i>	
Simulation of Fracturing and Mechanical Damage in Rocks	385
<i>Yanhua Zhang and Alison Ord</i>	
Using Centrally Cracked Ring Specimen for Investigating Mixed Mode Fracture Toughness of Rocks	391
<i>Majid R. Ayatollahi and M.R.M. Aliha</i>	
A Coupled Stress and Energy Criterion for Natural and Artificial Triggering of Dry Snow Slab Avalanches	398
<i>Marilena Cardu, Lorenzo Chiaravalloti, Bernardino Chiaia, Pietro Cornetti, and Barbara Frigo</i>	
Experimental Analysis of Confined Shear Fracturing of Saturated Granite and Numerical Analysis by 2D Hydro-Mechanical Coupled Bonded-Particle Modeling	407
<i>Jeoungseok Yoon, Seokwon Jeon, Ove Stephansson, and Georg Dresen</i>	
Numerical Simulation of Geomechanic Fracture Networks: Application to Measuring Effective Permeability Variability	414
<i>Adriana Paluszny and Stephen Matthai</i>	

FRACTURED ROCK, DISCONTINUITIES, ROCK MASSES

Improvement of Fracture Mapping Efficiency by Means of 3D-Laser Scanning	423
<i>Ann Bäckström, Quanghong Feng, and Flavio Lanaro</i>	

Triangulation-Based 3D Laser Imaging for Underground Rock Mass Characterization: Impact of Operational Parameters	427
<i>Jason Mah, Claire Samson, Steve Mckinnon, and Doug Aikman</i>	
The Practical Modelling of Discontinuous Rock Masses with Finite Element Analysis	436
<i>Reginald Hammah, John Curran, and Thamer Yacoub</i>	
Empirical Design of Span Openings in Weak Rock Based Upon Support Type Employed	444
<i>Andrea Ouchi, Rimas Pakalnis, and Tom Brady</i>	
Numerical Simulation of Mechanical Layering in Sedimentary Rock Masses: A New Hybrid GeoDFN-DDA Approach	449
<i>Dagan Bakun-Mazor, Yossef H. Hatzor, and William Dershowitz</i>	
Qomroud Long Tunnel Project in Iran: Rock Mass Characterization Along the First 10.4 Km.....	458
<i>Ali Shafiei, Fahimeh Fani Sani, Mansour Sotoudeh, and Maurice B. Dusseault</i>	
Comparison of Various Shear Failure Criteria Using the Results of Direct Shear Tests on Artificial Rough Surfaces	472
<i>Morteza Gharouni-Nik</i>	
Characterization of Discontinuities Using 3-D Laser Scanner	476
<i>Eui-Seob Park, D.S. Cheon, J.H. Synn, Y.B. Jung, and Y.K. Choi</i>	
Endoscopic Method of Rock Mass Quality Evaluation - New Experiences.....	483
<i>Piotr Malkowski, Tadeusz Majcherczyk, and Zbigniew Niedbalski</i>	
Reproducibility in Rock Mass Classification.....	490
<i>Ali Ameli</i>	

HIGH- AND LOW-TEMPERATURE GEOMECHANICS

Numerical Simulation of Ice-Ring Formation Around an Underground LNG Storage Cavern.....	495
<i>So-Keul Chung and Eui-Seob Park</i>	
Dynamic Properties of Granite Exposed to Low Temperature	502
<i>Shiyi Lim and Guowei Ma</i>	
A Three-Dimensional Poroelastic Model for Water Injection Into a Geothermal Reservoir	507
<i>Ahmad Ghassemi, Xioxian Zhou, and Alexander Cheng</i>	
Analysis of Injection-Induced Micro-Earthquakes in a Geothermal Steam Reservoir, the Geysers Geothermal Field, California	514
<i>Jonny Rutqvist and Curtis M. Oldenburg</i>	
Numerical Modeling of Subsidence Above a Solidifying Magma Chamber	523
<i>A. Simakin and Ahmad Ghassemi</i>	
Numerical Modeling of Thermal Stress in a Layered Rock Mass.....	529
<i>Qi Tan, X. Luo, and S. Li</i>	
Characteristics of Rock Under Cryogenic Conditions for a Underground LNG Storage Cavern.....	535
<i>Chan Park, D.S. Cheon, S.K. Chung, H.D. Lim, and Y.J. Park</i>	

IN SITU STRESS MEASUREMENT, PREDICTION, AND MODELING

Insights Into Borehole Deformation and Relationship Between Wellbore Induced Stresses, Breakouts, and In-Situ Stresses	540
<i>Ashraf M. Al-Tahini and Younane N. Abousleiman</i>	
Development of Borehole Tangential Deformation Gage and Its Application for Determining the Stress in Rock	552
<i>Akira Igarashi, Takatoshi Ito, Kotaro Sekine and Kazuo Hayashi</i>	

Overcoring in Deep Surface Boreholes - Recent Experiences and Lessons for the Future	558
<i>Jonny Sjöberg, Rebecca Bertilsson, and Rolf Christiansson</i>	
Exploring the Possibility of Mining the Stabilising Pillars in South African Gold Mines	568
<i>Michael Kilroe Roberts, S.M. Spottiswoode, G. Henry, J. Kuipers, S. Perritt, A.J. Jager, G. Guler and S. Majiet</i>	
Hydraulic Fracturing Stress Measurements Near a Headrace Tunnel and Proposed DUSEL Validation	579
<i>Bezalel C. Haimson</i>	
A New Strategy of Hydrofracturing for Deep Stress Measurements, BABHY, and Its Application to a Field Test.....	584
<i>Takatoshi Ito, Kentaro Omura, Koji Yamamoto, Hisao Ito, Hiroshi Tanaka, Kato Harumi, and Yoshiaki Karino</i>	
Constraining the Far-Field in Situ Stress State Near a Deep South African Gold Mine.....	593
<i>Amie Lucier, Mark D. Zoback, Vincent Heesakkers, and Ze'ev Reches</i>	
In-Situ Stress Modeling of a Salt-Based Gravity Driven Thrust Belt in a Passive Margins Setting Using Physical and Numerical Modeling	605
<i>Jozina Dirkzwager and Tim Dooley</i>	
Borehole Triple Breakouts - Fiction or Reality in Nature?	611
<i>Javier Alejandro Franquet, Cormac Parsons, and Khalid Ahmed</i>	
Three-Dimensional Unit Stress Tensor Modeling of Complex Orebody Geometry.....	620
<i>Jonny Sjöberg</i>	
Investigating the Contemporary Kinematics and the 3D State of Stress of the Upper Rhine Graben (Germany) Using 3D Finite Element Modeling	629
<i>Gwendolyn Peters, Thies Joachim Buchmann, and Peter T. Connolly</i>	
Recent Faulting in the Upper Rhine Graben (Germany): A 3D Finite Element Approach to Predict Fault Reactivation	641
<i>Thies Joachim Buchmann, Gwendolyn Peters, and Peter T. Connolly</i>	
Rock Stress as a Safety Concern for Design of Pressure Tunnels in Seymareh Dam Project.....	646
<i>Mahmoud Yazdani and Fritz Rummel</i>	

Volume 2

LAB AND IN SITU TESTING, CHARACTERIZATION, UPSCALING

Perspectives on Laboratory Rock Testing Procedures.....	654
<i>Manfred Blümel and D. Scott Kieffer</i>	
Shaped-Core Uniaxial Compression Test for Studying Borehole Breakout in Rocks	659
<i>Seiji Nakagawa and Russell T. Ewy</i>	
Development of an Automated Triaxial System for Thermo-Hydromechanical Testing of Rocks.....	668
<i>Fanny Descamps and Jean-Pierre Tshibangu</i>	
The Shale Puncher - a Compact Tool for Fast Testing of Small Shale Samples	675
<i>Jørn Fredrik Stenebråten, E. Fjær, S. Haaland, A.V. Lavrov, and E.F. Sønstebo</i>	
Image Analysis of Shear Banding.....	683
<i>Jeffery J. Riedel, Qing Lin, Chu-Shu Kao, and Joseph F. Labuz</i>	
Strength and Failure Modes of Macroporous Rock: Results from Laboratory Testing and 3D Numerical Models	689
<i>C.D. Jespersen, R. J. Spence, Mary M. MacLaughlin, J. Parkhurst, and Nick Hudyma</i>	
Geotechnical Properties of Soluble Rocks from a Dam Site in Iran	695
<i>Ali Shafiei, Zari Baghdadokht, Mansour Sotoudeh, and Maurice B. Dusseault</i>	

Back-Analysis of Elastic Properties of the Ground Using Data from a Largescale Plate Load Test	704
<i>Nedim Radonicic, Igor Gresovnik, Karl Grossauer, Hansjoerg Gober, and Wulf Schubert</i>	
Estimating the Unconfined Compressive Strength of Vesicular Basalts Via Bulk Specific Gravity of the Rock Sample	713
<i>William Chester Gates</i>	
Up-Scaling of Rock Mechanical and Petrophysical Properties from Grain Scale to Log Scale by Point-Load and Wedge Indentation Tests	719
<i>Rico Ramos, L.Y. Chin, and M.B. Enderlin</i>	
Effect of Weathering on Strength and Modulus of Basalt and Siltstone	725
<i>David Xuefan Gu and Isabelle Lamb</i>	
Behavior of Mechanical Anisotropic Specimens Under Triaxial Testing	733
<i>Abdolhadi Ghazvinian, M.R. Hadei, and B. Modani</i>	
Volumetric Expansion Ratio of Rock Mass Affected on Surface Subsidence in Abandoned Mine Area	739
<i>Sung O. Choi and Hee-Joong Lee</i>	
A Rapid Method for Real-Time Evaluation of Formation Strength	746
<i>Hamed Soroush</i>	
Experimental Study on Deformation Behavior of Rock Under Uniaxial Compression and Direct Tension	753
<i>Xie Qiang, Yu Xianbin, and Carlos Dinis Da Gama</i>	
Characterization of Cavities in Marble from Automatic Monitoring of Hydraulic Rotary Drilling in Ground Investigation	758
<i>Wei Gao, J. Chen, and Z.Q. Yue</i>	
Case Study of Drilling Process Monitoring from Two Adjacent Holes with Two Drills	764
<i>Chen Jian, W. Gao, and Z.Q. Yue</i>	

MELANGE, MIXED MATERIALS AND CHAOTIC ROCKS

Mechanical Properties of Virtual Block-In-Matrix Colluvium	775
<i>Yii-Wen Pan, Meng-Hsiu Hsieh, and Jyh-Jong Liao</i>	
Engineering the Geological Chaos of Franciscan and Other Bimrocks	783
<i>Edmund Medley</i>	
Tunnel Design and Construction in a Franciscan Melange	792
<i>Shawn Patrick Spreng, Richard M. Nolting, Michael T. Mcrae, and Hemang Desai</i>	
Franciscan Complex, California: Problems in Recognition of Melanges, and the Gap Between Research Knowledge and Professional Practice	801
<i>John Wakabayashi</i>	
Analysis of the Block-Size Distribution in the Shale-Limestone Chaotic Complex (Tuscany, Italy)	814
<i>Niccolo' Coli, Paolo Berrt, Daniela Boldini, and Piero Castellucci</i>	

NEW APPLICATIONS FOR RISK ASSESSMENT IN ROCK MECHANICS

Slip on Repository Rock Fractures Induced by Large Earthquakes. Results from Dynamic Discreet Fracture Modeling.	821
<i>Billy Falth, Harold Hökmark, and Raymond Munier</i>	
A Risk Evaluation Approach for Pit Slope Design	833
<i>Luis Fernando Contreras, Oskar K.H. Steffen, Peter J. Terbrugge, and Julian Venter</i>	

Reliability Estimation of Rock Slopes	851
<i>Amitava Ghosh and Fernando Ferrante</i>	
A Quantitative Risk Assessment Framework for Rock Slides.....	859
<i>Sebnem Duzgun</i>	
Logistic Regression Improvements to the Scaled Span Method for Dimensioning Surface Crown Pillars Over Civil or Mining Openings.....	868
<i>Trevor G. Carter, Benjamin Cottrell, José Carvalho, and Chuck Steed</i>	
Risk Assessment in Strategic and Tactical Geomechanical Underground Mine Design	881
<i>William Bawden</i>	

NUMERICAL/ANALYTIC/CONSTITUTIVE MODELING OF ROCK PROCESSES

A New Membrane Boundary for DEM Modeling of Triaxial Tests on Intact Rock	892
<i>Yuannian Wang and Fulvio Tonon</i>	
Validation of General Single Rock Block Stability Analysis	901
<i>Pooyan Asadollahi and Fulvio Tonon</i>	
A New Method to Estimate Paleoseismic PGA Using Dynamic Numerical Back-Analysis of Keystone Displacements in Historic Masonry Structures	908
<i>Yossef Hatzor, Ronnie Kamai, and Gony Yagoda-Biran</i>	
Recent Applications of Discontinuous Deformation Analysis and Manifold Method	919
<i>Gen-Hua Shi</i>	
Tunnel Stability Analysis Using a Method Coupling Block Theory and 3D DDA	927
<i>Man-Chu Ronald Yeung, Ning Sun, and Qinghui Jiang</i>	
Influence of Structure and Mechanical Properties of Joint Rock Mass Elements on its Deformation Under Compression	933
<i>Mikhail Grigorievich Zertsalov</i>	
Analytical Failure Criterion for Kink Zone Instability.....	941
<i>Jean-Francois Noel and Guy Archambault</i>	
Simulation of Seismicity Accompanying Hydraulic Fracture Propagation.....	948
<i>Anastasia A. Dobroskok and Alexander M. Linkov</i>	
Evaluation of Three-Dimensional Hoek-Brown Strength Criteria.....	954
<i>Lianyang Zhang</i>	
Multi-Scale, Non-Linear Numerical Analysis of Mining Induced Deformation	960
<i>David Alexander Beck</i>	
Applicability of Drucker-Prager Failure Criterion to Estimate Polyaxial Rock Strength.....	968
<i>Murali M. Gadde and John A. Rusnak</i>	
Stability Analysis of Rock Surface Spillways Using a Partition of Unity Method.....	978
<i>Johannes L. Wibowo and Jeen-Shang Lin</i>	
Rock Mechanics Modeling Based on Soft Granulation Theory	984
<i>Hamed Owladeghaffari, Ezzedin Bakhtavar, Kouroush Shahriar, and Mostafa Sharifzadeh</i>	
Development of a Numerical Simulator for Analyzing the Geomechanical Performance of Hydrate-Bearing Sediments	995
<i>Jonny Rutqvist and George Moridis</i>	
Investigation of the Stress-Dependence of Static and Dynamic Moduli of Sandstones Using a Discrete Element Method.....	1004
<i>Liming Li and Erling Fjær</i>	
Point Load Solutions for an Inclined Transversely Isotropic Rock	1014
<i>Cheng-Der Wang, Z.D. Yang, T.B. Hu, and J.J. Liao</i>	

Development of Three-Dimensional Discontinuous Deformation Analysis (3-D DDA) with 3rd Order Displacement Function.....	1025
<i>S. Amir Reza Beyabanaki</i>	

REMOTE SENSING, MONITORING, SEISMICITY

Numerical Simulation of Acoustic Emission in Large-Scale Underground Excavations	1031
<i>Ming Cai, P.K. Kaiser, Y. Tasaka, H. Kurose, M. Minami, and T. Maejima</i>	
Microseismic Monitoring of a Controlled Collapse at Ocele Mari, Romania.....	1040
<i>Cezar Trifu and V. Shumila</i>	
A Microseismic Trial at Lihir Open-Cut Gold Mine for the Investigation of Potentially Explosive Geothermal Areas	1045
<i>Xun Luo, A. Creighton, and J. Gough</i>	
Monitoring Steam Injection Deformation Using Microseismicity and Tiltmeters	1051
<i>Shawn Maxwell, J. Du, and J. Shemeta</i>	
Joint Inversion of Downhole Tiltmeter and Microseismic Data and Its Application to Hydraulic Fracture Mapping in Tight Gas Sand Formation.....	1058
<i>Jing Du, Norm R. Warpinski, Eric J. Davis, Larry G. Griffin, and Scott Malone</i>	
Management of High Stress and Seismicity at Vale Inco Creighton Mine	1069
<i>Farid Malek, Cezar Trifu, Fidelis T. Suorineni, Samantha Espley, and Mike Yao</i>	
Local Earthquake Tomography for Imaging Mining-Induced Changes Within the Overburden Above a Longwall Mine	1077
<i>Erik Westman, Kray Luxbacher, and Peter Swanson</i>	
Automatic Displacement Monitoring Data Interpretation - The Next Step Towards an Expert System for Tunneling.....	1084
<i>Karl Grossauer, Wulf Schubert, and Gerold Lenz</i>	
Estimation of Moisture Movement in the Ground Around the Dunhuang Mogao Grottoes by Satellite Remote Sensing	1091
<i>Keigo Koizumi, Yohei Ueno, Chikaosa Tanimoto, Chunze Piao, Li Zuixiong, Wang Xudong, and Guo Qinglin</i>	
Surveillance and Diagnostics of Permanent Bottomhole Gauge Data Coupled with Geomechanical Modeling to Identify Sources of Formation Damage	1099
<i>Robert Holicek, Jose Adachi, Lumay Viloria, Ali Mese, and Yacouba Traore</i>	
Void Detection Demonstration: Cross Hole Seismic Tomography	1105
<i>D. Scott Kieffer, K. Hanna, and M. Bluemel</i>	
Using Image Mosaic Technology for Tunnel Inspection	1114
<i>Tai-Tien Wang, Fang-Ming Chang, and Tsan-Hwei Huang</i>	
Guidelines for Development of Re-Entry Protocols in Seismically Active Mines	1121
<i>Javier Vallejos and Steve Mckinnon</i>	
Observation of the Spatial and Temporal Changes of Microseismic Source Parameters and Locations, Used to Identify the State of the Rock Mass in Relation to the Peak and Post-Peak Strength Conditions.....	1130
<i>Adam Coulson and William Bawden</i>	
Microseismic Monitoring of Burn Front in an Underground Coal Gasification Experiment	1149
<i>Xun Luo, Q. Tan, C. Luo, and Z. Wang</i>	
Induced Seismicity Risk in Irani Oil and Gas Fields	1155
<i>Mohammadreza Jalali, Hossein Memarian, Mehdi Zare, and Maurice Dussealt</i>	
Microseismic Monitoring of Longwall Strata to Provide Real Time Instability Indications to Mine Management at Rajendra Coalmine in India	1162
<i>Sivakumar Cherukuri, Srinivasan Chennappa, Ch. Surya Narayana Murthy, and Y.V. Rao</i>	

Numerical Study of Fault Geometrical Effects on Seismic Stability of Large Underground Caverns	1171
<i>Mahmoud Yazdani and Saeed Ardeshiri</i>	
Microseismicity Associated with Rockbursting	1179
<i>David Regalado Palomino and Alfonso Carbajal Rojas</i>	
A Change Detection Method for Slope Monitoring and Identification of Potential Rockfall Using Three-Dimensional Imaging	1185
<i>James Donovan and Wasim Razi Ali</i>	

ROCK EXCAVATION AND BREAKAGE, DYNAMIC LOADING

Modeling Rock and Drill Cutter Behavior	1193
<i>Keith A. Heasley, Ihsan B. Tulu, H. Ilkin Bilgesu, and Ozge Sunal</i>	
Rigid Impact - the Mechanism of Percussive Rock Drilling	1199
<i>Dongmin Niu</i>	
Prediction of Directional Changes in Well Drilling Based on Formation Rock Strength	1204
<i>Runar Nygaard and Geir Hareland</i>	
Controlled Blasting at Durtlang-Leitan: A Successful Blasting Operation in Sensitive and Hilly Area	1208
<i>Chhangte Sawmliana, Rakesh Kumar Singh, Pijush Pal Roy, Sanghrima Chawngthu, and Ramhluna Khiangte</i>	
Assessment of Blast Performance Based on Energy Distribution	1217
<i>Vedala Rama Sastry and Ram Chandar Karra</i>	
Numerical Modeling of Consumption Energy and Fracture Behavior of Spherical Rocks in a Jaw Crusher	1228
<i>A. Refahi, Jamshid Aghazadeh Mohandes, and B. Rezaei</i>	

ROCK PHYSICS AND GEOPHYSICS

Empirical and Theoretical Models: Applicability to Predictions of Elastic Moduli of Composites and Rocks	1240
<i>Franklin J. Ruiz and J. Dvorkin</i>	
Granular Dynamics Model to Study Elastic and Fabric Properties of Simulated Packs	1252
<i>Ratnanabha Sain, T. Mukerji, and G. Mavko</i>	
Rock Physics Modeling of Soft Sedimentary to Hard Crystalline Rocks for Rock Engineering Applications	1257
<i>Toru Takahashi and Soichi Tanaka</i>	
Effects of the Sub-Porosity on Wave Propagation Across a Fracture	1261
<i>Angel A. Acosta-Colon and Laura J. Pyrak-Nolte</i>	
Shear-Stress Monitoring on a Rough Fracture Using Seismic Wave Scattering	1270
<i>Seiji Nakagawa</i>	
Derivation of Anisotropy Parameters in a Shale Using Borehole Sonic Data	1279
<i>John Joseph Walsh, Bikash Sinha, Tom Plona, Douglas Miller, and Mike Ammerman</i>	
Strain Sensitivity of Wave Velocities in Sediments and Sedimentary Rocks	1285
<i>Rune M. Holt, Erling Fjær, Olav-Magnar Nes, and Jørn Stenebråten</i>	
Laboratory Observation of CO₂ Phase Transition Induced Seismic Velocity Change	1293
<i>Zhengwen Zeng, A. Jakupi, T. Bigelow, R.B. Grigg, J. Kringstad, M. Belobraydic, and X. Zhou</i>	

Volume 3

SALT AND CREEPING MATERIALS

Geomechanical Effects of a 3D Vertical Salt Well Drilling by FEA.....	1309
<i>Freddy Mackay, Fabricio Botelho, Nelson Inoue, and Sergio Fontoura</i>	
Correlation of Sonic Log Values to Strength in Salt.....	1319
<i>Geir Hareland, Ivan Vinicio Olea, Farid Shirkavand, John Hayes, Runar Nygaard, Bob Teichrob, and Andang Kustamsi</i>	
Creep in Unconsolidated Shale and Its Implication on Rock Physical Properties.....	1324
<i>Chandong Chang and Mark Zoback</i>	
Computational Modelling of the Rate Dependent Deformation and Liquefaction of Chalk.....	1332
<i>Anthony James Crook, Jian Guo Yu, Roar E. Flatebø, and Tron Golder Kristiansen</i>	
Salt Mechanics and Casing Deformation in Solution-Mined Gas Storage Operations	1348
<i>Lawrence Brun Hilbert and V.K. Saraf</i>	
Creep of Rocksalt at Low Temperatures.....	1360
<i>William B. Durham, D.L. Olgaard, J.L. Urai, and J. Schoenherr</i>	

SLOPE AND OPEN PIT STABILITY, FOUNDATIONS, DAMS

A Case Study of Pile Loading Tests in Poorly Cemented Rock	1366
<i>Chih-Sheng Ku, Jhy-Jong Liao, Der-Her Lee, and Jian-Hong Wu</i>	
An Investigation on Back Analysis of Heavily-Jointed Rock Mass- Applied in Kargar Cut Slope	1372
<i>M. Sharifzadeh, H. Aghababae, and Pedram Khodayarpour</i>	
Slope Stability Analysis for Plane Failure Under the Influence of a Tension Crack.	1380
<i>Haswanto Hasan and Rafek A. Ghani</i>	
Does Shaft Resistance of Piles in Rock Scale with RQD?	1387
<i>Ilia Wainshtein, Yossef H. Hatzor, and Mike Doktofsky</i>	
Movement Monitoring as a Tool for Back Analysis of Slope Stability Illustrated by a Case Study	1397
<i>Mahdi Jamali, Seyed Hassan Khoshrou, and Seyed Mostafa Hosseini Roholamini</i>	
A New Analytical Method for Analysis of Flexural Toppling Failure in Rock Slopes.....	1402
<i>Abbas Majdi and Mehdi Amini</i>	
Geotechnical and Temporal Risk Assessment of a Large Slope Deformation.....	1412
<i>Stanley Mark Miller, Giovanni Barla, Giovanna Piovano, and Marco Barla</i>	
Influence of Geological Structures on Failure Initiation, Internal Deformation and Kinematics of Rock Slides.....	1420
<i>Christian Zangerl and C. Prager</i>	
Ground Support in Strong Fractured Rock in Diavik Open Pit Mine	1433
<i>William Steller, Scott Sylte, and Sarah Greer</i>	
Modification of SMR for Simple Users	1438
<i>Won-Kyong Song, Yong Bok Jung, and Choon Sunwoo</i>	
Failure Mechanism Following Peak Strength in Carboniferous Permian Soft Rock.....	1443
<i>Dragotin Ocepek and Janko Logar</i>	
Application of the Block Theory for Rock Slope Stability Analysis at Highway Semenyih-Sg.Long (SSL), Selangor State in Malaysia	1452
<i>Haswanto Hasan and Rafek A. Ghani</i>	

Parametric Three-Dimensional Simulations of Dispersion of Rockfall Trajectories	1456
<i>Tsuyoshi Nishimura, H. Kiyama, and T. Fukuda</i>	
Photogrammetric Mapping and Geological Characterization of Foundation Blocks in the Right Abutment of East Canyon Dam	1463
<i>Joseph T. Kottenstette and Peter T. Shaffner</i>	
Assessing Potential Rock Fall Impacts and Foundation Block Movement, Iron Canyon Fish Ladder, Upper Bidwell Park, Chico, California.....	1479
<i>Drew Kennedy, Nate Manley, and Darren Mack</i>	
Use of Innovative Numerical Modelling and Rock Mass Characterization Approaches for Design of Foundations Within Weak Coralline Limestones.....	1486
<i>Trevor G. Carter, J. L. Carvalho, J.P. Dittrich, B.J. Cottrell, B. Leew, K. Cirulis, D.A. Bruce, and J. Burdess</i>	

STABILITY/SUPPORT OF WELLBORES, TUNNELS AND MINES

Use of Magnetic Anisotropy Sensor for Estimation of Axial Force in Psanchors Used for Large Underground Cavern	1499
<i>Shinichi Akutagawa, K. Morimoto, E. Nakamori, S. Mori, and S. Baba</i>	
Assessment of Mine Haulage Drift Stability Using Nonlinear Analysis.....	1504
<i>(Benny) Yaohua Zhang and Hani S. Mitri</i>	
Stability and Support Issues in the Construction of Large Span Caverns for Physics	1512
<i>Chris Laughton</i>	
Estimating Ore Pass Longevity in Hard Rock Mines	1521
<i>John Hadjigeorgiou and F. Mercier-Langevin</i>	
Evaluating the Effectiveness of Various Nozzle Designs for High Pressure Waterjet Scaling of Loose Rocks from Mine Openings	1529
<i>Mark Kuchta, E. Poeck, H. Miller, and R. Cooper</i>	
Model Tests and Numerical Analyses on the Stability of a Cavern Complex	1542
<i>Zhu Weishen, Yong Li, Lei Zhang, Xiaoli Xin, Linfeng Sun, and Qingsong Ma</i>	
Inter-Panel Barrier Pillar Study in a Deep Utah Coal Mine	1549
<i>William Pariseau, Michael McCarter, and Jeff McKenzie</i>	
In Situ Measurements of Pillar Behaviour in the Bushveld Platinum Deposits of South Africa ...	1558
<i>Bryan Philip Watson, J. Kuijpers, and P. Miovsky</i>	
The Effect of Different Mixing Techniques on the Strength Behavior of Paste Backfill	1569
<i>A. Philip E. Dirige and James F. Archibald</i>	
The Use of Glass as Pozzolan in Backfill Binder Recipes	1576
<i>Euler De Souza, Aubrey Sargeant, and James F. Archibald</i>	
Engineering Design of Backfill Systems in Adjacent Pillar Mining.....	1584
<i>A. Philip E. Dirige and Euler De Souza</i>	
Estimation of Pillar Strength in the Presence of Non-Coal Bands in Coal Seams	1594
<i>Angad Kushwaha and Prakash Krishna Sheorey</i>	
The Behavior of Sand Grains Around the Perforation Channel by Coupled LBM and DEM	1603
<i>Satoshi Ohtsuki and Toshifumi Matsuoka</i>	
Questions and Comprehensive Economic Evaluation Model for Sand Management.....	1608
<i>Benjing Dong, Yinghong Zhang, and Cunzhi Cheng</i>	
Application of Geomechanics Technology in Borehole Stability Reduces Well Construction Costs	1615
<i>Gary Gang Wang, Fersheed Mody, and Uday Tare</i>	

Design of Cemented Rockfill Span for Longhole Stope	1627
<i>M. Kockler and S.J. Jung</i>	
Evaluation of Mechanical Properties of Cements	1633
<i>Robert Darbe, David Mcmehan, and Benjamin Iverson</i>	
Por elastoplastic Analysis of Factors Controlling Sand Production from a Hemispherical Cavity	1638
<i>Qingfeng Tao, Richard Birchwood, and Ahmad Ghassemi</i>	
Proposal of a Practical Guide of Convergence Measurements in Horonobe Underground Research Laboratory	1645
<i>Kimikazu Tsukaka and Masanao Yamasaki</i>	
Design of NATM Initial Support on the Caldecott 4th Bore	1654
<i>Bhaskar Bahadur Thapa, Thomas Marcher, Michael Mcrae, and Heiner Sander</i>	
Numerical Simulation of a Branching-Out Tunnel Construction Process Using Flac3D	1663
<i>Yong Li and Zhu Weishen</i>	
Evaluation of Screen Integrity in Horizontal Open-Hole Screen Completions - A Numerical Approach	1667
<i>Chengho A. Lee, George Wong, and John Dudley</i>	
Long-Term Stability Study of Open-Hole Completions in a Producing Hydrocarbon Field	1678
<i>Gaia Capasso, G. Musso, and S. Mantica</i>	
Modeling of Stability of Junctions in Multilateral Wells Using Finite Element	1686
<i>Alberto Lopez Manriquez, Augusto L. Podio, and Kamy Sepehrnoori</i>	
Design of Ductile Tunnel Linings	1695
<i>Wulf Schubert</i>	
Engineering Geological Problems Along the Qomroud Long Tunnel Lot No.1 in Iran	1702
<i>Ali Shafiei</i>	
Rock Type and Hole Failure Pattern Effects on Sand Production	1718
<i>Euripides Papamichos, Jørn F. Stenebråten, Pierre Cerasi, Alexandre Lavrov, Ioannis Vardoulakis, Giin-Fa Fuh, Marco Brignoli, Clemente H. De Castro Goncavles, and Ole Havmøllen</i>	
Characterizing Excavation-Induced Perturbations Around a Short Tunnel in an Overconsolidated Clay Shale	1730
<i>Salina Yong, Simon Loew, and Corrado Fidelibus</i>	
Tunnelling Project in Difficult Geological Conditions in Korea	1737
<i>Hee-Soon Shin</i>	
Design for Swelling Ground on the Caldecott Forth Bore	1742
<i>S. H. Jason Choi, Bhaskar B. Thapa, and Michael T. Mcrae</i>	
Study of Wellbore Stability Due to Drilling Fluid/Shale Interactions	1747
<i>Mao Bai, Quanxin Guo, and X.-Z. Jin</i>	

UNCERTAINTY/STOCHASTICS/PROBABILITY

Deep Water Exploration Well Pre-Drill DST Sanding Potential Prediction Using Monte Carlo Simulations	1757
<i>Xianjie Yi, James E. Sabolcik, and Harvey E. Goodman</i>	
Bayesian Framework for the Deformability Modulus Updating in an Underground Structure	1765
<i>Luis Manuel Ribeiro E Sousa, Tiago Miranda, and Antonio Gomes Correia</i>	
Modeling Uncertainty in the Permeability of Stress-Sensitive Fractures	1772
<i>Daniel Moos and Colleen Barton</i>	
Evaluation of Åknes Rock Slide Hazard Using Event Trees	1781
<i>Unni Kolderup Eidsvig, Vidar Kveldsvik, and Suzanne Lacasse</i>	

Some Aspects on Model Uncertainty in the Calculation of Block Stability Using Kinematics Limit Equilibrium (Abstract)	1782
<i>Mehdi Bagheri, Alireza Baghbanan, and Håkan Stille</i>	

WASTE DISPOSAL, SEAL INTEGRITY, UNDERGROUND STORAGE

Rock Mass Response During High Pressure Grouting	1791
<i>Rikard Gothåll and H. Stille</i>	
Geomechanical Stability Assessment of Williston Basin Formations for Petroleum Production and CO₂ Sequestration	1797
<i>Zhengwen Zeng</i>	
A Simplified Hydro-Mechanical Approach Taking Into Account Gas Effect in Underground Waste Disposal	1806
<i>Gilles Duveau, Y. Jia, and J.F. Shao</i>	
Effect of CO₂ Injection on Mechanical Properties of Berea Sandstone	1815
<i>Yasuki Oikawa, Takashi Takehara, and Toshiyuki Tosha</i>	
Numerical Simulation Evaluating the Structural Stability of the Strategic Petroleum Reserve (SPR) in Bayou Choctaw Salt Dome, USA	1821
<i>Byoung Yoon Park, Courtney G. Herrick, and Moo Y. Lee</i>	
Direct Numerical Simulation of Fluid Driven Fracturing Events with Application to Carbon Sequestration	1830
<i>Joseph Morris and Scott M. Johnson</i>	
Hydro-Mechanical Evolution of Damaged Zones Around a Microtunnel in a Claystone Formation of the Swiss Jura Mountains	1835
<i>Paul Marschall, T. Trick, G.W. Lanyon, J. Delay, and H. Shao</i>	
Rock Mechanics Issues in the Swedish Waste Management Program	1846
<i>Harald Anders Hökmark, Margareta Lönnqvist, Billy Fälth, and Rolf Christiansson</i>	

WEAK ROCKS, SHALES, GRANULAR MATERIALS

Shear Failure and Brittle to Ductile Transition in Shales from P-Wave Velocity	1858
<i>Marte Gutierrez and Runar Nygaard</i>	
Elastic, Geomechanical and Petrophysical Properties of Shales	1865
<i>Dave Dewhurst, Tony Siggins, Utpalendu Kuila, Ben Clennel, Mark Raven, and Hege Nordgard-Bolas</i>	
Laboratory Characterization of Anisotropy and Fluid Effects on Shale Mechanical Properties Using Inclined Direct Shear Testing Device IDSTD	1877
<i>Minh H. Tran, Younane N. Abousleiman, and Son K. Hoang</i>	
Shale Triaxial Strength Alteration Due to Brine Exposure	1887
<i>Russell T. Ewy, Craig A. Bovberg, and Rudolf J. Stankovich</i>	
Geomechanical Properties of a Conglomerate from Iran	1896
<i>Ali Shafiei, Mansour Sotoudeh, and Maurice B. Dusseault</i>	
The Role of Oversize Particles on the Shear Strength and Deformational Behavior of Rock Pile Material	1904
<i>Ahmadali Fakhimi and Hooman Hosseinpour</i>	
Experimental Work on Unconsolidated Sand: the Effect of Burial Depth at Time of Deformation	1911
<i>Erling Rykkelid and Elin Skurtveit</i>	
Proppant Placement During Tight Gas Shale Stimulation: Literature Review and Speculation	1919
<i>John D. McLennan, Mao Bai, and Sidney Green</i>	

Observation and Modeling of the Hydraulic Fracture Tip in Sand 1933
Hans J. de Pater and Yufei Dong

Investigating the Shear Mechanics of Kuan-Miao Sandstone Using Undrained Ring Shear Test 1945
Cheng-Jie Liao, Po-Ying Chen, Der-Her Lee, Hung-Ming Lin, and Jian-Hong Wu
