

2008 IEEE International Frequency Control Symposium

**Honolulu, HI
19-21 May 2008**

Pages 1-417

IEEE Catalog Number:
ISBN 13:

CFP08FRE-PRT
978-1-4244-1794-0

TABLE OF CONTENTS

Plenary Talk

The Search for Gravitational Waves	1
<i>F.J. Raab, LIGO Hanford Observatory</i>	

Tiersten Memorial Session

Several Extensions of Mindlin-Gazis's Analysis of Rotated Y-Cut of Quartz	10
<i>Morio Onoe, University of Tokyo; Shigetaka Kaga, Nihon Dempa Kogyo Co., Ltd.</i>	
Direct and Inverse Energy Trapping in the Thin Film Resonators and Optimization of Their Designs	19
<i>J. Detaint, IMPMC Universites Paris VI, Paris VII, CNRS;</i> <i>B. Capelle, IMPMC Universites Paris VI, Paris VII, CNRS</i>	
Finite Element Analysis of Thickness Shear Crystals with Surface Irregularities	25
<i>D. Puccio, Quartzdyne, Inc.; E.P. EerNisse, Quartzdyne, Inc.</i>	
Finite Element Analysis of Lateral Field Excited Thickness Shear Sensors	31
<i>E.P. EerNisse, Quartzdyne, Inc.; D. Puccio, Quartzdyne, Inc.; R. Lucklum, Otto-von-Guericke University Magdeburg;</i> <i>U. Hempel, Otto-von-Guericke University Magdeburg</i>	

Sensors & Actuators

Characterization and Modeling of a Bulk Acoustic Wave Particle Focusing Device	35
<i>Surendra K. Ravula, Sandia National Laboratories; Darren W. Branch, Sandia National Laboratories;</i> <i>Karl Westlake, Sandia National Laboratories; Igal Brener, Sandia National Laboratories</i>	
Wave Propagation in an Acoustic Wave Guide Sensor for Liquids Driven by Pulsed Excitation of Surface Acoustic Waves	39
<i>G. Lindner, Coburg University of Applied Sciences; H. Faustmann, Coburg University of Applied Sciences;</i> <i>S. Krempel, Coburg University of Applied Sciences; M. Münch, Coburg University of Applied Sciences;</i> <i>S. Rothballer, Coburg University of Applied Sciences; F. Singer, Coburg University of Applied Sciences</i>	
Improved Sensitivity of TSM Sensors Using a Composite Sensor-Actuator Hybrid Structure (SAHS)	44
<i>Johann deSa, Drexel University; Qiliang Zhang, Drexel University; Ertan Ergezen, Drexel University;</i> <i>Ryszard Lec, Drexel University</i>	

Edge Effects with Liquid Droplets Deposited on Acoustic Resonators: Consequences of Vortex Flow	50
<i>Diethelm Johannsmann, Clausthal University of Technology</i>	
Multi-Mode Excitation of Electromagnetic-Acoustic Resonant Sensor Arrays	53
<i>Frieder Lucklum, Johannes Kepler University Linz; Bernhard Jakoby, Johannes Kepler University Linz</i>	
 Optical Clocks	
Optical Lattice Clocks with Non-Interacting Bosons and Fermions	58
<i>Hidetoshi Katori, University of Tokyo; Masao Takamoto, University of Tokyo; Tomoya Akatsuka, University of Tokyo; Hidekazu Hachisu, University of Tokyo</i>	
Optical Frequency Standard at 1.54 μm Based on the HI Molecule and Extended Cavity Laser Diode	65
<i>V. Calabrese, Politecnico di Milano; M. Norgia, Politecnico di Milano; A. Pesatori, Politecnico di Milano; C. Svelto, Politecnico di Milano</i>	
 Noise & Stability Measurement	
Long-Term Frequency Aging Rate for Unpowered Space-Class Oscillators	69
<i>M. Bloch, Frequency Electronics, Inc.; J. Ho, Frequency Electronics, Inc.; O. Mancini, Frequency Electronics, Inc.; Louis Terracciano, Frequency Electronics, Inc.; Leo Mallette, Boeing Company</i>	
The Reflectometer – An Indispensable Instrument for Eliminating Frequency Jumps and Noise in Precision Crystal Oscillators	75
<i>Martin Bloch, Frequency Electronics, Inc.; O. Mancini, Frequency Electronics, Inc.; C. Stone, Frequency Electronics, Inc.</i>	
Noise Measurements Beyond the Standard Thermal Noise Limit	79
<i>Eugene N. Ivanov, University of Western Australia; Michael E. Tobar, University of Western Australia</i>	
 Physical Sensors	
Analysis of Inhomogeneous Stress Distribution in Surface Acoustic Wave Resonator	81
<i>D. Hermelin, FEMTO-ST; W. Daniaux, FEMTO-ST; J. Garcia, FEMTO-ST; S. Ballandras, FEMTO-ST; B. Belgacem, SENSEOR; M. Bruniaux, SENSEOR</i>	
Phononic Crystal Sensor	85
<i>Ralf Lucklum, Otto-von-Guericke University Magdeburg</i>	
Development of a Biomedical Tissue Differentiation System Using Piezoelectric Actuators	91
<i>David Oliva Uribe, University of Hannover; Ralf Stroop, University Hospital Marburg; Tobias Hemsel, University of Paderborn; Jörg Wallaschek, University of Hannover</i>	
A New Angular Velocity Sensor Using the Temperature Stable AT-Cut Quartz	95
<i>Yook-Kong Yong, Rutgers University; Mihir Patel, Rutgers University</i>	

Timekeeping I

Novel Diode Pumped Yb:KYF₄ and Yb:YLF₄ Lasers for Optical Frequency Metrology at 1μm / 0.5 μm	99
<i>N. Coluccelli, Politecnico di Milano; G. Galzerano, Politecnico di Milano; P. Laporta, Politecnico di Milano; L. Bonelli, University of Pisa; A. Toncelli, University of Pisa; A. Di Lieto, University of Pisa; M. Tonelli, University of Pisa; V. Calabrese, Politecnico di Milano; M. Norgia, Politecnico di Milano; A. Pesatori, Politecnico di Milano; C. Svelto, Politecnico di Milano</i>	
Low Power ⁸⁵Rb CPT Atomic Clock	103
<i>Shigeyoshi Goka, Tokyo Metropolitan University; Taisuke Okura, Tokyo Metropolitan University; Munetake Moroyama, Tokyo Metropolitan University; Yasuaki Watanabe, Tokyo Metropolitan University</i>	
Dark Resonance in Bichromatic Linearly Polarized Optical Field on Cs D₁ Line	107
<i>K. Watabe, NMIJ, AIST; T. Ikegami, NMIJ, AIST; Akifumi Takamizawa, NMIJ, AIST; Shinya Yanagimachi, NMIJ, AIST; Shin-Ichi Ohshima, NMIJ, AIST; Svenja Knappe, NIST</i>	
Ultra-Stable Optical Cavities: Design and Experiments at LNE-SYRTE	110
<i>J. Millo, LNE-SYRTE; S. Dawkins, LNE-SYRTE; R. Chicireanu, LNE-SYRTE; D. Varela Magalhães, LNE-SYRTE; C. Mandache, LNE-SYRTE; D. Holleville, LNE-SYRTE; M. Lours, LNE-SYRTE; S. Bize, LNE-SYRTE; P. Lemonde, LNE-SYRTE; G. Santarelli, LNE-SYRTE</i>	
Nonlinear Pressure Shifts of ⁸⁷Rb and ¹³³Cs in Ar and Kr	115
<i>F.J. Gong, Princeton University; Y.-Y. Jau, Princeton University; W. Happer, Princeton University</i>	
A Compact Optical Bench for Laser Cooling	118
<i>S. Perrin, LNE-SYRTE; F.X. Esnault, LNE-SYRTE; D. Holleville, LNE-SYRTE; S. Guérandel, LNE-SYRTE; N. Dimarcq, LNE-SYRTE; V. Ligeret, Alcatel Thales III-V Lab; J. Delporte, CNES</i>	
A Frequency Stabilized Tunable Pulsed Quantum Cascade Laser	122
<i>Marian Taslakov, Institute of Electronics; Valentin Simeonov, Ecole Polytechnique Fédérale de Lausanne; Hubert Van Den Bergh, Ecole Polytechnique Fédérale de Lausanne</i>	
 New Sensor Structures	
Mems Compatible PZT Arrays for Ultrasonic Applications on 3 Dimensional Carriers	127
<i>Stefan Schimpf, Otto-von-Guericke University Magdeburg; Bertram Schmidt, Otto-von-Guericke University Magdeburg</i>	
Gap Wave Propagating in Layered Piezoelectric Material Structures with Initial Stress	132
<i>Jianke Du, Ningbo University; Xiaoying Jin, Ningbo University; Ji Wang, Ningbo University</i>	
Surface Acoustic Waves Propagating in Magneto-Electro-Elastic Material Structures	135
<i>Jianke Du, Ningbo University; Xiaoyu Cheng, Ningbo University; Ji Wang, Ningbo University</i>	
Investigation of Pseudo-Lateral-Field-Excitation in (yxl)-16.5° LiTaO₃	139
<i>Wenyan Wang, Tsinghua University; Chao Zhang, Research Institute of Tsinghua University in Shenzhen; Zhitian Zhang, Tsinghua University; Yan Liu, Research Institute of Tsinghua University in Shenzhen; Guanping Feng, Research Institute of Tsinghua University in Shenzhen; Ji Wang, Ningbo University</i>	

Remote Electromagnetic Excitation of Miniaturized In-Plane Plate Resonators for Sensing Applications	144
<i>Erwin K. Reichel, Johannes Kepler University Linz; Christian Riesch, Vienna University of Technology; Franz Keplinger, Vienna University of Technology; Bernhard Jakoby, Johannes Kepler University Linz</i>	
An Analysis of Propagation of Surface Acoustic Waves in Rotating Piezoelectric Plates	148
<i>Ji Wang, Ningbo University; Rongxing Wu, Ningbo University; Jianke Du, Ningbo University; Dejin Huang, Ningbo University</i>	
Natural Single-Phase Unidirectional Transducers on a LiNbO₃ Substrate for SAW Sensor Applications	152
<i>Masao Takeuchi, Tamagawa University</i>	

Oscillators, Synthesizers & Noise I

A Novel PLL Based on Phase Comparison Between Two Signals with Different Frequencies	156
<i>Faxi Chen, Xidian University; Wei Zhou, Xidian University; Hai Wang, Xidian University; Shixiang Qian, National Key Lab For Electronic Measurement Technology; Weining Jiang, National Key Lab For Electronic Measurement Technology</i>	
Improvements in OCXO Performance by the Use of an On-Board Microprocessor	159
<i>Mike F. Wacker, Vectron International; David A. Villella, Vectron International</i>	
A New Experimental Method to Characterize Cyclostationary Noise Models of Bipolar Devices	165
<i>A.A. Lisboa de Souza, XLIM; J.C. Nallatamby, XLIM; M. Prigent, XLIM; J. Obregon, XLIM</i>	
Investigation of Self-Temperature-Sensing of SC-Cut with Simultaneous Excitation of Two Higher Overtones in Dual-Mode Crystal Oscillator	170
<i>Vladimír Štofanič, Slovak Academy of Sciences; Igor Baláž, Slovak University of Technology; Marian Minárik, Slovak University of Technology; Elena Cocherová, Slovak University of Technology</i>	
A New Method to Increase Loaded Q of Extremely Low Phase Noise SAW Oscillator	174
<i>Takeshi Imai, Nihon University; Yukinori Sakuta, Nihon University; Yoshifumi Sekine, Nihon University</i>	
A Novel, High Resolution Oscillator Model for DES Systems	178
<i>Georg Gaderer, Austrian Academy of Sciences; Aneta Nagy, Austrian Academy of Sciences; Patrick Loschmidt, Austrian Academy of Sciences; Nikolaus Kerö, Oregano Systems</i>	

Materials, Filters & Resonators I

2GHz STW Resonators of Low Insertion Loss, Low Q	184
<i>Wei Zhou, CETC; Xiaoli Liu, CETC</i>	
The Spurious Vibration Analysis of Ceramic Resonator Using 3rd Overtone Vibration	187
<i>Jeong-Ho Cho, Korea Institute of Ceramic Engineering and Technology; Yong-Hyun Lee, Korea Institute of Ceramic Engineering and Technology; Myoung-Pyo Chun, Korea Institute of Ceramic Engineering and Technology; Byung-Ik Kim, Korea Institute of Ceramic Engineering and Technology</i>	

The Characterization of Permanent Acoustic Bonding Agents	191
<i>Fred S. Hickernell, University of Arizona</i>	
Dual Band Filter Based on Film Bulk Acoustic Resonator	195
<i>Re-Ching Lin, National Sun Yat-Sen University; Ying-Chung Chen, National Sun Yat-Sen University; Kuo-Sheng Kao, SHU-TE University; Da-Long Cheng, SHU-TE University; Chih-Ming Wang, Cheng Shiu University; Chien-Chuan Cheng, De Lin Institute of Technology</i>	
Balanced Low-Loss Longitudinally-Coupled Double-Mode Resonator SAW Filters with Impedance Conversion	199
<i>S.A. Doberstein, ONIIP</i>	
The Analysis of High Frequency Vibrations of Layered Anisotropic Plates for FBAR Applications	204
<i>Dejin Huang, Ningbo University; Ji Wang, Ningbo University; Jianke Du, Ningbo University</i>	
The Resonance Characteristics of Solidly Mounted Resonators with $\frac{1}{2} \lambda$ and $\frac{1}{4} \lambda$ Configurations	209
<i>Ching-Liang Wei, National Sun Yat-Sen University; Ying-Chung Chen, National Sun Yat-Sen University; Chien-Chuan Cheng, De Lin Institute of Technology; Chih-Ming Wang, Cheng Shiu University; Kuo-Sheng Kao, SHU-TE University; Po-Tung Hsieh, National Cheng Kung University</i>	
Radiation Effects on Premium Q and Supreme Q Cultured Quartz Crystals	213
<i>Harish Bahadur, National Physical Laboratory; Kiyotaka Ninagawa, Okayama University of Science; H Nishido, Okayama University of Science; Teruo Usami, Okayama University of Science; Masahiro Kayama, Okayama University of Science; Shin Toyoda, Okayama University of Science</i>	
Determination of the Crystalline Quality of the Piezoelectric Materials of Class 32 Using X-Ray Topography	219
<i>B. Capelle, IMPMC; Jacques Detaint, IMPMC; Yves Epelboin, IMPMC</i>	
An Improved Mode Shape Measurement System with Two Lasers of Different Wavelengths	225
<i>Yasuaki Watanabe, Tokyo Metropolitan University; Noriyuki Imaeda, Tokyo Metropolitan University; Kentaro Tachibana, Tokyo Metropolitan University; Shigeyoshi Goka, Tokyo Metropolitan University; Takayuki Sato, Tokyo Metropolitan University; Hitoshi Sekimoto, Tokyo Metropolitan University</i>	
A Dual-T Quartz Crystal Resonator Circuit and its Application to 10MHz Oscillator	229
<i>Takehiko Adachi, Yokohama National University; Daisuke Akamatsu, Yokohama National University; Koichi Hiram, Yamanashi University; Yasuhiko Nakagawa, Yamanashi University; Takeshi Yanagisawa, Tokyo Institute of Technology</i>	
Piezoelectric Aluminum Nitride Resonator for Reference Oscillator	233
<i>F. Verjus, NXP Semiconductors; A. Fougerat, NXP Semiconductors; J. Rousseard, NXP Semiconductors; F. Le Cornec, NXP Semiconductors; S. Loiseau, NXP Semiconductors; L. Valbin, Université Paris Est</i>	
Acceleration Sensitivity Measurements of Quad Relief Mount Langasite Resonators	237
<i>Reichl B. Haskell, Vectron International; James E. Buchanan, Vectron International; Bharat B. Desai, Vectron International; Daniel S. Stevens, Vectron International; Yoonkee Kim, U.S. Army Communications-Electronics RDEC</i>	

Thin Film Devices and Fabrication

Intrinsic Temperature Compensation of Aluminum Nitride Lamb Wave Resonators for Multiple-Frequency References	240
<i>Jan H. Kuypers, University of California at Berkeley; Chih-Ming Lin, University of California at Berkeley; Gabriele Vigevani, University of California at Berkeley; Albert P. Pisano, University of California at Berkeley</i>	
Superior Dual Mode Resonances for $\frac{1}{4} \lambda$ Solidly Mounted Resonators	250
<i>Chung-Jen Chung, National Sun Yat-Sen University; Ying-Chung Chen, National Sun Yat-Sen University; Chien-Chuan Cheng, De Lin Institute of Technology; Chih-Ming Wang, Cheng Shiu University; Kuo-Sheng Kao, SHU-TE University</i>	
Integration of Electrostrictive $\text{Ba}_{0.7}\text{Sr}_{0.3}\text{TiO}_3$ Thin Films Into Bulk Acoustic Wave Resonator for RF-Frequency Tuning Under DC Bias	254
<i>B. Ivira, CEA/LETI/Minattec; A. Reinhardt, CEA/LETI/Minattec; E. Defaj, CEA/LETI/Minattec; M. Aïd, CEA/LETI/Minattec</i>	
Multiple-Frequency Thickness-Mode Thin-Film Piezoelectric-on-Substrate Filter Array	259
<i>Wanling Pan, Georgia Institute of Technology; Farrokh Ayazi, Georgia Institute of Technology</i>	

Sensor Systems

Multi Reader/Multi-Tag SAW RFID Systems Combining Tagging, Sensing, and Ranging for Industrial Applications	263
<i>Andreas Stelzer, Johannes Kepler University; Stefan Scheiblhofer, Johannes Kepler University; Stefan Schuster, Johannes Kepler University; Maria Brandl, Johannes Kepler University</i>	
Passive Wireless SAW Sensors for IVHM	273
<i>William C. Wilson, NASA Langley Research Center; Daniel F. Perey, NASA Langley Research Center; Gary M. Atkinson, Virginia Commonwealth University; Rebecca O. Barclay, Christopher Newport University</i>	
Orthogonal Frequency Coded SAW Sensors and RFID Design Principles	278
<i>D.C. Malocha, University of Central Florida; J. Paulina, University of Central Florida; D. Gallagher, University of Central Florida; N. Kozlovski, University of Central Florida; B. Fisher, University of Central Florida; N. Saldanha, University of Central Florida; D. Puccio, Quartzdyne, Inc.</i>	
A New Anti-Collision Method for SAW Tags Using Linear Block Codes	284
<i>Maria Brandl, Johannes Kepler University; Stefan Schuster, Johannes Kepler University; Stefan Scheiblhofer, Johannes Kepler University; Andreas Stelzer, Johannes Kepler University</i>	
SAW Noise-Like Coded Reflector Structures	290
<i>N.Y. Kozlovski, University of Central Florida; D.C. Malocha, University of Central Florida</i>	

Opto and Microwave Oscillators

Mode-Coupled VCO Replaces Expensive DRO	296
<i>Ulrich L. Rohde, Synergy Microwave Corporation; Ajay K. Poddar, Synergy Microwave Corporation</i>	

Miniature Oscillators Based on Optical Whispering Gallery Mode Resonators	305
<i>Vladimir S. Ilchenko, OEwaves, Inc.; Jerry Byrd, OEwaves, Inc.; Anatoliy A. Savchenkov, OEwaves, Inc.; Andrey B. Matsko, OEwaves, Inc.; David Seidel, OEwaves, Inc.; Lute Maleki, OEwaves, Inc.</i>	
Low Noise X-Band Exciter Using a Sapphire Loaded Cavity Oscillator	309
<i>Lowell Hoover, Polyphase Microwave Inc.; Henry Griffith, Technology Service Corporation; Keith DeVries, NSW Crane</i>	
A Low Power, Low Phase Noise 10 GHz MIC Oscillator	312
<i>E. Dupouy, XLIM; J.-C. Nallatamby, XLIM; M. Prigent, XLIM; C. Laporte, CNES</i>	
 Properties & Applications of New Materials	
High Temperature Piezoelectric Single Crystal $\text{ReCa}_4\text{O}(\text{BO}_3)_3$ for Sensors	316
<i>Shujun Zhang, Pennsylvania State University; Thomas R. Shrout, Pennsylvania State University; Yiting Fei, Crystal Photonics Inc.; Bruce H.J. Chai, Crystal Photonics Inc.; Eric Frantz, Pennsylvania State University; David W. Snyder, Pennsylvania State University</i>	
Investigations of a-plane and c-plane GaN-Based Synchronous Surface Acoustic Wave Resonators	320
<i>Marc Loschonsky, IMTEK, Albert-Ludwigs-Universität Freiburg; David Eisele, IMTEK, Albert-Ludwigs-Universität Freiburg; Armin Dadgar, Otto-von-Guericke University Magdeburg; Alois Krost, Otto-von-Guericke University Magdeburg; Sylvain Ballandras, FEMTO-ST; Leonhard Reindl, IMTEK, Albert-Ludwigs-Universität Freiburg</i>	
Precise Measurements of BAW and SAW Properties of Languisite in the Temperature Range from 25°C to 1000°C	326
<i>J. Bardong, Carinthian Tech Research AG; M. Schulz, Clausthal University of Technology; M. Schmitt, IMTEK, Albert-Ludwigs-Universität Freiburg; I. Shrena, IMTEK, Albert-Ludwigs-Universität Freiburg; D. Eisele, IMTEK, Albert-Ludwigs-Universität Freiburg; E. Mayer, IMTEK, Albert-Ludwigs-Universität Freiburg; L.M. Reindl, IMTEK, Albert-Ludwigs-Universität Freiburg; H. Fritze, Clausthal University of Technology</i>	
Study of LGS Crystal Micro-Resonators Using Flexure Mode: Temperature-Compensated Cuts	332
<i>G. Douchet, FEMTO-ST; F. Sthal, FEMTO-ST; E. Bigler, FEMTO-ST; R. Bourquin, FEMTO-ST</i>	
 Biological Sensors	
An Integrated Microfluidics-on-SAW ("μF-on-SAW") Setup for Multi-Sample Sensing	337
<i>Konstantinos Mitsakakis, FORTH; Angeliki Tserepi, Institute of Microelectronics, NCSR; Electra Gizeli, FORTH, University of Crete</i>	
A High Frequency Thickness Shear Mode (TSM) Sensor for Detection of Biomarkers for Prostate Cancer	341
<i>Ertan Ergezen, Drexel University; Robert Weisbein Hart, Drexel University; Ramila Philip, Immunotope Inc.; Ryszard M. Lec, Drexel University</i>	

Acoustic Wave Biosensor for Detecting DNA Conformation; a Study with QCM-D	346
<i>Achilleas Tsortos, FORTH; Giorgos Papadakis, FORTH, University of Crete; Electra Gizeli, FORTH, University of Crete</i>	
Resonant Acoustic Profiling for Biological Detection and Diagnostics	350
<i>W. Chiu, Cambridge Medical Innovations; C.J. Hammond, Cambridge Medical Innovations; R. Hammond, Cambridge Medical Innovations; L. Harding, Cambridge Medical Innovations; E. Hawkins, Cambridge Medical Innovations; X. Li, Cambridge Medical Innovations; S. Moore, Cambridge Medical Innovations; K. Sanders, Cambridge Medical Innovations; A. Sleptsov, Cambridge Medical Innovations; C. Zhou, Cambridge Medical Innovations; M.A. Cooper, Cambridge Medical Innovations</i>	
A Surface Acoustic Wave Sensor for the Study of Membrane-Protein/Ligand Interactions Using Whole Cells	356
<i>M. Saitakis, IMBB-FORTH, University of Crete; Anastasia Dellaporta, IMBB-FORTH, University of Crete; Electra Gizeli, IMBB-FORTH, University of Crete</i>	
Monitoring Cell Adhesion and Characterizing Cell Viscoelasticity by Using Thickness Shear Mode (TSM) Resonate Sensor	360
<i>Fang Li, University of Pittsburgh; Qing-Ming Wang, University of Pittsburgh; James H.-C. Wang, University of Pittsburgh</i>	
 Microwave Clocks I	
New Measurement of the Rubidium Hyperfine Frequency Using LNE-SYRTE Fountain Ensemble	366
<i>J. Guéna, LNE-SYRTE; F. Chapelet, LNE-SYRTE; P. Rosenbusch, LNE-SYRTE; P. Laurent, LNE-SYRTE; M. Abgrall, LNE-SYRTE; G.D. Rovera, LNE-SYRTE; G. Santarelli, LNE-SYRTE; S. Bize, LNE-SYRTE; A. Clairon, LNE-SYRTE; M.E. Tobar, University of Western Australia</i>	
Stability Evaluation of Systematic Effects in a Compensated Multi-Pole Mercury Trapped Ion Frequency Standard	371
<i>E.A. Burt, Jet Propulsion Laboratory; S. Taghavi, Jet Propulsion Laboratory; J.D. Prestage, Jet Propulsion Laboratory; R.L. Tjoelker, Jet Propulsion Laboratory</i>	
Observation of a Bimodal Behavior in a Whispering Gallery Mode Maser Oscillator	377
<i>K. Benmessai, FEMTO-ST; D.L. Creedon, University of Western Australia; P.-Y. Bourgeois, FEMTO-ST; N. Bazin, FEMTO-ST; M.E. Tobar, University of Western Australia; Y. Kersalé, FEMTO-ST; V. Giordano, FEMTO-ST</i>	
Reaching a Few 10^{-13} T-$1/2$ Stability Level with the Compact Cold Atom Clock HORACE	381
<i>F.X. Esnault, LNE-SYRTE; S. Perrin, LNE-SYRTE; D. Holleville, LNE-SYRTE; S. Guerandel, LNE-SYRTE; N. Dimarcq, LNE-SYRTE; J. Delporte, CNES</i>	
Detailed Description of FCs1: NRC's Cesium Fountain Primary Standard	386
<i>L. Marmet, National Research Council Canada; B. Hoger, National Research Council Canada; P. Dubé, National Research Council Canada; A.A. Madej, National Research Council Canada; J.E. Bernard, National Research Council Canada</i>	

Novel Oscillators and Modeling

Resonator Miniaturization for Oscillators	392
<i>Wan-Thai Hsu, Discera Inc.</i>	
Comparative Analysis of MEMS, Programmable, and Synthesized Frequency Control Devices Versus Traditional Quartz Based Devices	396
<i>Robert Henry, Pletronics Inc.; David Kenny, Pletronics Inc.</i>	
Multi-Frequency Pierce Oscillators Based on Piezoelectric AlN Contour-Mode MEMS Resonators	402
<i>Chengjie Zuo, University of Pennsylvania; Nipun Sinha, University of Pennsylvania; Jan Van der Spiegel, University of Pennsylvania; Gianluca Piazza, University of Pennsylvania</i>	
Self-Referenced, Trimmed and Compensated RF CMOS Harmonic Oscillators as Monolithic Frequency Generators	408
<i>Michael S. McCorquodale, Mobius Microsystems, Inc.</i>	
Voltage Controlled Oscillators with Ferroelectric Capacitors	414
<i>Abu Kabir, University of Colorado at Colorado Springs; Asad Jamil, University of Colorado at Colorado Springs; Yulan Zhang, University of Colorado at Colorado Springs; Thottam Kalkur, University of Colorado at Colorado Springs</i>	
Ultra Low Power Oscillator for UHF RFID Transponder	418
<i>F. Cilek, University of Erlangen-Nuremberg; K. Seemann, University of Erlangen-Nuremberg; D. Brenk, University of Erlangen-Nuremberg; J. Essel, University of Erlangen-Nuremberg; J. Heidrich, University of Erlangen-Nuremberg; R. Weigel, University of Erlangen-Nuremberg; Gerald Holweg, Infineon Technologies Graz Austria</i>	

Chemical Sensors

High Sensitivity Quartz Cantilever Gas Sensors	422
<i>Reichl B. Haskell, SenGenuity - Vectron International; Daniel S. Stevens, SenGenuity - Vectron International; Jeffrey C. Andle, SenGenuity - Vectron International; Maly Chap, SenGenuity - Vectron International</i>	
Acoustic Chemosensors for Real-Life Environments	431
<i>Peter A. Lieberzeit, University of Vienna; A. Rehman, University of Vienna; B. Najafi, University of Vienna; A. Mujahid, University of Vienna; Franz L. Dickert, University of Vienna</i>	
CMUT as a Chemical Sensor for DMMP Detection	434
<i>Hyunjoo J. Lee, Stanford University; Kwan Kyu Park, Stanford University; Ömer Oralkan, Stanford University; Mario Kupnik, Stanford University; Butrus T. Khuri-Yakub, Stanford University</i>	
Small Volume Determination of the Viscosity-Density Product for Ionic Liquids Using Quartz Crystal Harmonics	440
<i>N. Doy, Nottingham Trent University; G. McHale, Nottingham Trent University; P. Roach, Nottingham Trent University; M.I. Newton, Nottingham Trent University; C. Hardacre, Queens University Belfast; R. Ge, Queens University Belfast; R.W. Allen, University of Sheffield; J.M. MacInnes, University of Sheffield; M.R. Bown, University of Sheffield</i>	

Gravimetric Chemical Sensor Based on the Direct Integration of SWNTs on AlN Contour-Mode MEMS Resonators	443
<i>Matteo Rinaldi, University of Pennsylvania; Chiara Zuniga, University of Pennsylvania; Nipun Sinha, University of Pennsylvania; Marzie Taheri, University of Pennsylvania; Gianluca Piazza, University of Pennsylvania; Samuel M. Khamis, University of Pennsylvania; A.T. Johnson, University of Pennsylvania</i>	

Optical Clocks & Combs

Strontium Optical Lattice Clock: 10^{-16} Uncertainty	449
<i>A.D. Ludlow, JILA NIST-CU; G.K. Campbell, JILA NIST-CU; S. Blatt, JILA NIST-CU; M.M. Boyd, JILA NIST-CU; T. Zelevinsky, JILA NIST-CU; M.J. Martin, JILA NIST-CU; M.H.G. de Miranda, JILA NIST-CU; J.W. Thomsen, JILA NIST-CU; Jun Ye, JILA NIST-CU; T.M. Fortier, NIST; J.E. Stalnaker, NIST; S.A. Diddams, NIST; C.W. Oates, NIST</i>	

Magneto-Optical Trap of Neutral Mercury for an Optical Lattice Clock	451
<i>M. Petersen, LNE-SYRTE; J. Millo, LNE-SYRTE; D.V. Magalhães, LNE-SYRTE, Instituto de Física de São Carlos; C. Mandache, LNE-SYRTE, INFLPR; S.T. Dawkins, LNE-SYRTE; R. Chicireanu, LNE-SYRTE; Y. Lecoq, LNE-SYRTE; O. Acef, LNE-SYRTE; G. Santarelli, LNE-SYRTE; A. Clairon, LNE-SYRTE; S. Bize, LNE-SYRTE</i>	

Calculation of the Quantum-Limited Comb Lineshape for a Mode-Locked Ti:Sapphire Laser	455
<i>John T. Willits, University of Colorado at Boulder; Jared K. Wahlstrand, University of Colorado at Boulder; Steven T. Cundiff, University of Colorado at Boulder; Curtis R. Menyuk, University of Maryland</i>	

Low-Drift and Low-Jitter Microwave Signal Synthesis from Mode-Locked Lasers	461
<i>Jungwon Kim, MIT; Franz X. Kärtner, MIT</i>	

Timekeeping II

Design and Implementation of IRIG-B Code Time System Using CPLD Technique Based on PCI Bus	464
<i>Hong-Jiao Ma, Chinese Academy of Sciences; Yong-Hui Hu, Chinese Academy of Sciences; Fu-Ping Wu, Chinese Academy of Sciences; Hai-Bo Yuan, Chinese Academy of Sciences; Jian-Xun Li, Xi'an University of Technology</i>	

Equivalent Phase Comparison Frequency and its Characteristics	468
<i>Wei Zhou, Xidian University; Hui Zhou, Xidian University; Wenjing Fan, Xidian University; Hai Wang, Xidian University; Shixiang Qian, National Key Lab For Electronic Measurement Technology; Weining Jiang, National Key Lab For Electronic Measurement Technology</i>	

Autonomous Positioning Based on Pulsar Timing Model	471
<i>Jian-xun Li, Xi'an University of Technology; Xi-zheng Ke, Xi'an University of Technology</i>	

Timing for the Loran-C Signal by Beidou Satellite and Error Correction for the Transmission Time	476
<i>Kai-feng Yang, Xi'an University of Technology; Jian-xun Li, Xi'an University of Technology</i>	

Analysis and Comparison of Performance of Frequency Standard Measurement Systems Based on Beat-Frequency Method	479
<i>Ya Liu, Chinese Academy of Sciences; Xiaohui Li, Chinese Academy of Sciences; Dan-Ni Wang, Chinese Academy of Sciences; Wen-Li Wang, Chinese Academy of Sciences; Jian-Xun Li, Xi'an University of Technology</i>	
A Time and Frequency Measurement Method Based on Delay-Chain Technique	484
<i>Hai Wang, Xidian University; Wei Zhou, Xidian University; Zhiqi Li, Xidian University; Shixiang Qian, National Key Lab For Electronic Measurement Technology; Weining Jiang, National Key Lab For Electronic Measurement Technology; Chunxu Wang, Xidian University</i>	
Analysis of the Asia-Pacific TWSTFT Network	487
<i>Wen-Hung Tseng, Chunghwa Telecom Co., Ltd.; Shinn-Yan Lin, Chunghwa Telecom Co., Ltd.; Kai-Ming Feng, National Tsing Hua University</i>	
Optical and Microwave Timing Transfer and Synchronization Using Optical Pulse Trains	493
<i>Jungwon Kim, MIT; Jonathan A. Cox, MIT; Jian J. Chen, MIT; Franz X. Kärtner, MIT</i>	
Differential Delay Between Two Geodetic GPS Receivers for L1 and L2 Code and Carrier Signals	496
<i>M. Hottovy, Colorado School of Mines; M. Weiss, National Institute of Standards and Technology</i>	
Study on a New Time Synchronization Method for Underwater Targets and Vehicles	501
<i>Fuping Wu, Chinese Academy of Sciences; Gun Li, University of Electronic Science and Technology of China; Xianhe Huang, University of Electronic Science and Technology of China</i>	
Development of High Precision and Multifunctional Timing System Using Integrated GPS/BD Receiver	507
<i>Gun Li, University of Electronic Science and Technology of China; Fuping Wu, Chinese Academy of Sciences; Jingfa Wei, Chinese Academy of Sciences; Xianhe Huang, University of Electronic Science and Technology of China</i>	
Data Analysis and Phase Ambiguity Removal in the ACES Microwave Link	515
<i>Loïc Duchayne, LNE-SYRTE; Peter Wolf, LNE-SYRTE; Luigi Cacciapuoti, ESTEC, European Space Agency; Marc-Peter Hess, Astrium Space Transportation; Marco Siccardi, TimeTech GmbH; Wolfgang Schäfer, TimeTech GmbH</i>	

Sensor Applications & Signal Processing

Proximity Sensing through Air-Film Damping Effect Caused by Length-Extensional-Mode Piezoelectric Vibrator	523
<i>Ken Yamada, Tohoku Gakuin University; Shou Kaneko, Tohoku University; Tatsuya Nagasawa, Tohoku Gakuin University</i>	
Methanol Sensor Using a Surface Acoustic Wave	526
<i>T. Nomura, Shibaura Institute of Technology; K. Nishida, Shibaura Institute of Technology; A. Saitoh, Shibaura Institute of Technology; T. Mochizuki, Star Micronics Co., Ltd.</i>	

Examination for Realization of a High Precision Crystal Sensor	532
<i>Takeru Muto, Nihon Dempa Kogyo Co., Ltd.; Shigenori Watanabe, Nihon Dempa Kogyo Co., Ltd.; Shunichi Wakamatsu, Nihon Dempa Kogyo Co., Ltd.; Mitsuaki Koyama, Nihon Dempa Kogyo Co., Ltd.</i>	
Ammonia Sensing Characteristics of Quartz Resonator Coated with ZnO Nanowires Sensitive Layer	535
<i>Hongbin Cheng, University of Pittsburgh; Lifeng Qin, University of Pittsburgh; Fang Li, University of Pittsburgh; Qing-Ming Wang, University of Pittsburgh</i>	
Extraction of Material Parameters from a Multilayer Multi-Harmonic Thickness Shear Mode (MTSM) Sensor Data Using Genetic Algorithm	538
<i>Ertan Ergezen, Drexel University; Matias Hochman, Drexel University; Johann Desa, Drexel University; Ryszard M. Lec, Drexel University</i>	
 Oscillators, Synthesizers & Noise II	
An All-Digital PLL Using Frequency Multiplying/Dividing Number with Decimals in 0.18-μm Digital CMOS	544
<i>Takamoto Watanabe, DENSO Corporation; Shigenori Yamauchi, DENSO Corporation; Tomohito Terasawa, DENSO Corporation</i>	
A CMOS Cubic Voltage Generator for a Temperature Compensated Crystal Oscillator (TCXO)	550
<i>Jaehyun Lim, Pennsylvania State University; Insoo Kim, Pennsylvania State University; Kyusun Choi, Pennsylvania State University; David Kenny, Pletronics, Inc.</i>	
Dynamic Noise-Feedback and Mode-Coupling Mechanism Silences the VCXOs Phase Noise	554
<i>Ulrich L. Rohde, Synergy Microwave Corporation; Ajay K. Poddar, Synergy Microwave Corporation</i>	
Measurement and Test Techniques in Production of Precision Frequency Control Devices	562
<i>Jinglu Ma, The 54th Research Institute China Electronics Technology Group Corporation; Wei Zhou, Xidian University; Yongbo Liu, Xidian University; Zhaomin Jia, Xidian University; Hai Wang, Xidian University; Chengzhi Zou, Xidian University; Ming Yu, Xidian University</i>	
Development of Ultra Low Noise VHF OCXO with Excellent Temperature Stability	565
<i>Katsuaki Sakamoto, Nihon Dempa Kogyo Co., Ltd.; Kuichi Kubo, Nihon Dempa Kogyo Co., Ltd.; Kozo Ono, Nihon Dempa Kogyo Co., Ltd.</i>	
MMIC Regenerative Divider	569
<i>Trang Pham, Northrop Grumman Corporation; Howard N. Fudem, Northrop Grumman Corporation; Pat Green, Northrop Grumman Corporation; Michael M. Driscoll, Northrop Grumman Corporation; Pat Dever, Northrop Grumman Corporation; M.K.E. Hauser, Northrop Grumman Corporation</i>	
Design and Implementation of a Forward Two-PLL Diophantine Frequency Synthesizer with 500$\times$ Resolution Improvement	572
<i>Paul Peter Sotiriadis, SOTEKCO</i>	

Development of Synthesis Chains Based on a Cryogenic Sapphire Oscillator	576
<i>Motohiro Kumagai, NICT; Hiroyuki Ito, NICT; Mizuhiko Hosokawa, NICT;</i>	
<i>Giorgio Santarelli, LNE-SYRTE; Clayton R. Locke, University of Western Australia;</i>	
<i>John G. Hartnett, University of Western Australia</i>	

Materials, Filters & Resonators II

Resonator Using Guided Waves in a Piezoelectric Layer Above a Bragg Mirror	581
<i>Issiaka Koné, STMicroelectronics, CEA/LETI/Minatex; Bertrand Dubus, IEMN UMR CNRS 8520;</i>	
<i>Lionel Buchaillet, IEMN UMR CNRS 8520; Alexandre Reinhardt, CEA/LETI/Minatex; Fabrice Casset,</i>	
<i>CEA/LETI/Minatex; Marc Aïd, CEA/LETI/Minatex; Jean François Carpentier, STMicroelectronics;</i>	
<i>Pascal Ancey, STMicroelectronics</i>	
About Nonlinear Effects in the Quartz Homeotypes Single Crystals	586
<i>Jaroslav Nosek, Technical University of Liberec; Lidmila Burianova, Technical University of Liberec</i>	
An Analysis of Quartz Crystal Resonators with Mindlin Plate Theory Based Parallel Finite Element Method on a Linux Cluster	592
<i>Ji Wang, Ningbo University; Wenke Hu, Ningbo University; Wenhua Zhao, Vectron International;</i>	
<i>Jianke Du, Ningbo University; Dejin Huang, Ningbo University</i>	
Lumped Element Equivalent Circuit for Shear Piezoelectric Cylindrical Resonators	596
<i>Piotr Kielczynski, Polish Academy of Sciences; Marek Szalewski, Polish Academy of Sciences</i>	
A Novel Structure of AlN/SiO₂/Si, AlN/Si SAW Filter	600
<i>Trang Hoang, CEA/LETI; Patrice Rey, CEA/LETI; Marie-Helene Vaudaine, CEA/LETI;</i>	
<i>Philippe Robert, CEA/LETI; Philippe Benech, IMEP INPG/UJF/CNRS</i>	
Characterization of Guided Modes Excited by Periodically Poled Transducers on Si	604
<i>E. Courjon, FEMTO-ST; G. Ulliac, FEMTO-ST; J. Garcia, FEMTO-ST; V. Petrini, FEMTO-ST;</i>	
<i>W. Daniau, FEMTO-ST; S. Ballandras, FEMTO-ST; J. Hauden, Photline Technologies</i>	
Characteristics of Dual Mode AlN Thin Film Bulk Acoustic Wave Resonators	609
<i>Qingming Chen, Kunming University of Science and Technology; Fang Li, University of Pittsburgh;</i>	
<i>Hongbin Cheng, University of Pittsburgh; Qing-Ming Wang, University of Pittsburgh</i>	
Effect of Mo Layer on Performance of AlN/Si SAW Filter	615
<i>Trang Hoang, CEA/LETI; Patrice Rey, CEA/LETI; Marie-Helene Vaudaine, CEA/LETI;</i>	
<i>Philippe Robert, CEA/LETI; Philippe Benech, IMEP INPG/UJF/CNRS</i>	
Design and Fabrication of High-Q Langasite Resonator Arrays for High Temperature Applications	619
<i>E. Ansoerge, Otto-von-Guericke University Magdeburg; S. Hirsch, Otto-von-Guericke University</i>	
<i>Magdeburg; Bertram Schmidt, Otto-von-Guericke University Magdeburg; Jan Sauerwald, Clausthal</i>	
<i>University of Technology; Holger Fritze, Clausthal University of Technology</i>	
Characterization of SOI Lamé-Mode Square Resonators	625
<i>Lynn Khine, National University of Singapore; Moorthi Palaniapan, National University of Singapore;</i>	
<i>Lichun Shao, National University of Singapore; Wai-Kin Wong, National University of Singapore</i>	

Stress Control in AlN and Mo Films for Electro-Acoustic Devices	629
<i>Valery V. Felmetzger, Tegal Corporation; Pavel N. Laptev, Tegal Corporation</i>	

Micromachined Devices & Materials

VHF and UHF Mechanically Coupled Aluminum Nitride MEMS Filters	634
<i>Roy H. Olsson III, Sandia National Laboratories; Cody M. Washburn, Sandia National Laboratories; James E. Stevens, Sandia National Laboratories; Melanie R. Tuck, Sandia National Laboratories; Christopher D. Nordquist, Sandia National Laboratories</i>	

A Resonance Dynamical Approach to Faster, More Reliable Micromechanical Switches	640
<i>Yang Lin, University of California at Berkeley; Wei-Chang Li, University of California at Berkeley; Zeying Ren, University of California at Berkeley; Clark T.-C. Nguyen, University of California at Berkeley</i>	

Nonlinear Behavior of Lamé-Mode SOI Bulk Resonator	646
<i>L.C. Shao, National University of Singapore; M. Palaniapan, National University of Singapore; L. Khine, National University of Singapore; W.W. Tan, National University of Singapore</i>	

Microwave Clocks II

Compact Microwave Mercury Ion Clock for Space Applications	651
<i>John D. Prestage, Jet Propulsion Lab; Meirong Tu, Jet Propulsion Lab; Sang K. Chung, Jet Propulsion Lab; Paul MacNeal, Jet Propulsion Lab</i>	

Rubidium Frequency Standard for the GPS IIF Program and Modifications for the RAFSMOD Program	655
<i>Ryan T. Dupuis, PerkinElmer Optoelectronics; Thomas J. Lynch, PerkinElmer Optoelectronics; John R. Vaccaro, PerkinElmer Optoelectronics</i>	

Transient CPT Signals Arising from Rapid Changes in Laser Polarization	661
<i>J. Camparo, The Aerospace Corporation; M. Huang, The Aerospace Corporation; J. Coffey, The Aerospace Corporation</i>	

All-Photonic Clock: Laser-Atomic Oscillator	665
<i>Yuan-Yu Jau, Princeton University; William Happer, Princeton University</i>	

Effects of the Intensity Difference of Two Laser Fields on Coherent Population Trapping Clocks	669
<i>Zhong Wang, Peking University; Ke Deng, Peking University; Dingwu He, Peking University; Xinyuan Liu, Peking University; Lu Liu, Peking University; Tao Guo, Peking University; Xuzong Chen, Peking University</i>	

Noise Measurements and Modeling

Oscillator AM-to-FM Noise Conversion Due to the Dynamic Frequency-Drive Sensitivity of the Crystal Resonator	672
<i>Michael M. Driscoll, Northrop Grumman Electronic Systems</i>	

Characterizing the Impact of Time Error on General Systems	677
<i>Victor S. Reinhardt, Raytheon Space and Airborne Systems</i>	
Modeling Negative Power Law Noise	685
<i>Victor S. Reinhardt, Raytheon Space and Airborne Systems</i>	
Algorithm of MTIE Point Estimate Computing for Non-Uniform Sampling of Time Error	693
<i>Andrzej Dobrogowski, Poznan University of Technology; Michal Kasznia, Poznan University of Technology</i>	
 Sensor Interactions	
Sensor Response of Superhydrophobic Quartz Crystal Resonators	698
<i>G. McHale, Nottingham Trent University; P. Roach, Nottingham Trent University;</i> <i>C.R. Evans, Nottingham Trent University; N.J. Shirtcliffe, Nottingham Trent University;</i> <i>S.J. Elliott, Nottingham Trent University; M.I. Newton, Nottingham Trent University</i>	
Lateral Field Excited Quartz Crystal Resonator Sensors for Determination of Acoustic and Electrical Properties of Liquids	705
<i>U. Hempel, Institute for Automation and Communication; E.P. EerNisse, Quartzdyne, Inc.; D. Puccio, Quartzdyne, Inc.; R. Lucklum, Otto-von-Guericke University Magdeburg; P. Hauptmann, Otto-von-Guericke University Magdeburg; R. Fernandez Diaz, Universidad Polit�cnica de Valencia; A. Arnau Vives, Universidad Polit�cnica de Valencia</i>	
Acoustic Characterization of Thin Polymer Layers for Love Mode Surface Acoustic Waveguide	711
<i>L. El Fissi, SENSEOR; J.-M. Friedt, SENSEOR; S. Ballandras, FEMTO-ST; L. Robert, FEMTO-ST;</i> <i>F. Ch�rioux, FEMTO-ST</i>	
Love Wave Sensors: Sectional Guiding Layers	717
<i>P. Roach, Nottingham Trent University; M.I. Newton, Nottingham Trent University;</i> <i>G. McHale, Nottingham Trent University</i>	
New SH Surface Acoustic Wave Sensor for Measuring Simultaneously the Viscosity and Pressure of Liquids at High Pressure	721
<i>Piotr Kielczynski, Polish Academy of Sciences; Marek Szalewski, Polish Academy of Sciences</i>	
 Time & Frequency transfer and fundamental physics	
Long Distance Optical Frequency Transfer Over Fiber: Predicting the Frequency Stability from the Fiber Noise	725
<i>N.R. Newbury, NIST; P.A. Williams, NIST; W.C. Swann, NIST</i>	
Continuous Operation of an Odd Parity Lorentz Invariance Test in Electrodynamics Using a Microwave Interferometer	729
<i>Michael E. Tobar, University of Western Australia; Eugene N. Ivanov, University of Western Australia;</i> <i>Paul L. Stanwix, University of Western Australia; Jean-Michel Le Floch, University of Western Australia;</i> <i>John G. Hartnett, University of Western Australia</i>	

Time and Frequency Transfer Using a WAAS Satellite with L1 and L5 Code and Carrier	733
<i>M.A. Weiss, NIST; E. Powers, United States Naval Observatory; A. Kropp, United States Naval Observatory; B. Fonville, United States Naval Observatory; P. Fenton, NovAtel Inc.; R. Pelletier, National Research Council Canada</i>	

Frequency Synthesizers

An Ultra-Low Phase-Noise Ka-Band Tunable Frequency Synthesizer	738
<i>Milan S. Raj, MIT; Matthew Z. Straayer, MIT; Thomas E. Collins III, MIT</i>	
Principles of Cascaded Diophantine Frequency Synthesis	744
<i>Paul Peter Sotiriadis, SOTEKCO</i>	
Synthesis of Low-Spur GHz Sinusoids Using a 4-Bit D/A Converter	750
<i>Donald T. Comer, Brigham Young University; Darren S. Korth, Brigham Young University</i>	
A New Spurious Component Suppression Technique in Fractional-N Frequency Synthesizers	753
<i>Hongyu Wang, University College London; Paul V. Brennan, University College London</i>	
A Broadband, Low Phase Noise, Fast Switching PLL Frequency Synthesizer	758
<i>Alexander Chenakin, Phase Matrix, Inc.</i>	

Design and Analysis of Frequency Control Devices

BAW Resonator Design Considerations – An Overview	762
<i>Gernot G. Fetting, TriQuint Semiconductor Inc.</i>	
Demonstration of Large Complete Phononic Band Gaps and Waveguiding in High-Frequency Silicon Phononic Crystal Slabs	768
<i>Saeed Mohammadi, Georgia Institute of Technology; Ali A. Eftekhari, Georgia Institute of Technology; William D. Hunt, Georgia Institute of Technology; Ali Adibi, Georgia Institute of Technology</i>	
Full-Wave Analysis of Piezoelectric Boundary Waves Propagating Along Metallic Grating Sandwiched in Between Two Semi-Infinite Layers	773
<i>Yiliu Wang, Chiba University; Ken-Ya Hashimoto, Chiba University; Tatsuya Omori, Chiba University; Masatsune Yamaguchi, Chiba University</i>	
Integrated Software for Image Processing in RF SAW/BAW Laser Probe System	778
<i>Nan Wu, Chiba University; Ken-Ya Hashimoto, Chiba University; Keisuke Kashiwa, Chiba University; Tatsuya Omori, Chiba University; Masatsune Yamaguchi, Chiba University</i>	
Frequency Sources and Filters Applications Using High Overtone Bulk Acoustic Resonators Exhibiting High Q.f Product	783
<i>Dorian Gachon, FEMTO-ST; Jeremy Masson, FEMTO-ST; Émilie Courjon, FEMTO-ST; Yannick Gruson, FEMTO-ST; Sylvain Ballandras, FEMTO-ST</i>	

Space Science

Microfabricated Atomic Magnetometers and Applications	789
<i>John Kitching, NIST; Svenja Knappe, NIST; Vishal Shah, NIST; Peter Schwindt, NIST; Clark Griffith, NIST; Ricardo Jimenez, NIST; Jan Preusser, NIST; L.-A. Liew, NIST; J. Moreland, NIST</i>	
ACES/PHARAO Space Program Status	795
<i>Philippe Laurent, SYRTE; Michel Abgrall, SYRTE; Andre Clairon, SYRTE; Pierre Lemonde, SYRTE; Giorgio Santarelli, SYRTE; Christophe Salomon, ENS-LKB; Didier Massonnet, CNES; Luigi Cacciapuoti, ESTEC, European Space Agency</i>	
Frequency and Timing Requirements for the LISA Mission	801
<i>Massimo Tinto, Jet Propulsion Laboratory</i>	

Environmental Effects

Vibration-Induced PM Noise Measurements of a Rigid Optical Fiber Spool	807
<i>J. Taylor, NIST; C. Nelson, NIST; A. Hati, NIST; N. Ashby, NIST; D.A. Howe, NIST</i>	
Phase Noise of a High Performance OEO and an Ultra Low Noise Floor Cross-Correlation Microwave Photonic Homodyne System	811
<i>Danny Eliyahu, OEwaves, Inc.; David Seidel, OEwaves, Inc.; Lute Maleki, OEwaves, Inc.</i>	
Reducing Phase Noise Degradation Due to Mechanical Vibration on High Performance Quartz Resonator Oscillators for Gateway Applications	815
<i>Gregory Ernst, Hughes Network Systems, LLC; Jack Lundstedt, Hughes Network Systems, LLC; Ted Harben, Hughes Network Systems, LLC; Peter McLaren, Hughes Network Systems, LLC; John Ho, Frequency Electronics, Inc.; Dmitriy Bogomolov, Frequency Electronics, Inc.; Charles Stone, Frequency Electronics, Inc.</i>	
Method of Power Recycling in Co-Axial Mach Zender Interferometers for Low Noise Measurements	821
<i>Stephen Parker, University of Western Australia; Eugene Ivanov, University of Western Australia; Michael Tobar, University of Western Australia</i>	
Sub-Microdegree Phase Measurement Technique Using Lock-in Amplifiers	825
<i>William D. Walker, University of Freiburg, IMTEK</i>	
Microcontroller Compensated Overtone TCXO with Low Phase Noise Characteristic	829
<i>Xianhe Huang, University of Electronic Science and Technology of China; Feng Tan, University of Electronic Science and Technology of China; Peng Dai, University of Electronic Science and Technology of China; Dongpei He, University of Electronic Science and Technology of China; Wei Fu, University of Electronic Science and Technology of China</i>
