

Proceedings

LAB-RS 2008

***2008 ECSIS Symposium
on Learning and Adaptive Behaviors
for Robotic Systems***

***6-8 August 2008
Edinburgh, Scotland, United Kingdom***

Organized by
European Center for Secure Information and Systems (ECSIS.EU)
The University of Edinburgh, United Kingdom

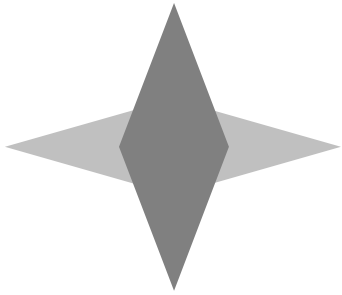

Supported by
European Center for Secure Information and Systems (ECSIS.EU)
Institute for System Level Integration, United Kingdom
Spiral Gateway Ltd., United Kingdom

Hosted by
The University of Edinburgh, United Kingdom

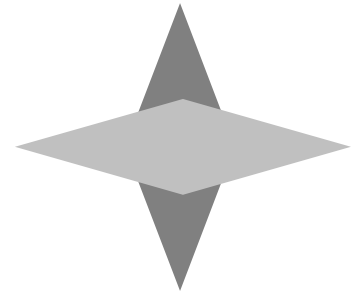

Los Alamitos, California
Washington • Tokyo

LAB-RS 2008

2008 ECSIS Symposium on Learning and Adaptive Behaviors for Robotic Systems

Table of Contents

Preface	vii
Conference Organizers	viii
Program Committee	ix
Keynote Talk 1	x
Keynote Talk 2	xi
Mixture Model Segmentation for Gait Recognition	3
<i>Matthew Field, David Stirling, Fazel Naghdy, and Zengxi Pan</i>	
What is an Appropriate Theory of Imitation for a Robot Learner?	9
<i>Joe Saunders, Chrystopher L. Nehaniv, and Kerstin Dautenhahn</i>	
Drumming with a Humanoid Robot: Results from Human-Robot Interaction Studies	15
<i>Hatice Kose-Bagci, Kerstin Dautenhahn, and Chrystopher L. Nehaniv</i>	
Movement Times in Inter- and Intrapersonal Human Coordination	17
<i>Cordula Vesper, Sonja Stork, and Anna Schubö</i>	
Improving Robotic System Robustness via a Generalised Formal Artificial Neural System.....	23
<i>Gareth Howells and Konstantinos Sirlantzis</i>	
Scalable Biologically Inspired Neural Networks with Spike Time Based Learning.....	29
<i>Lyle N. Long</i>	
Recurrent Neural Associative Learning of Forward and Inverse Kinematics for Movement Generation of the Redundant PA-10 Robot.....	35
<i>R. Felix Reinhart and Jochen J. Steil</i>	
Evolvability of Neuromodulated Learning for Robots.....	41
<i>Peter Dürre, Claudio Mattiussi, Andrea Soltoggio, and Dario Floreano</i>	
Learning Vision Algorithms for Real Mobile Robots with Genetic Programming.....	47
<i>Renaud Barate and Antoine Manzanera</i>	
Towards Object Classification Using 3D Sensor Data.....	53
<i>Sören Schwertfeger, Jann Poppinga, Max Pfingsthorn, and Andreas Birk</i>	

Learning Robot Dynamics for Computed Torque Control Using Local Gaussian Processes Regression	59
<i>Duy Nguyen-Tuong and Jan Peters</i>	
Surprise-Based Learning for Developmental Robotics.....	65
<i>Nadeesha Ranasinghe and Wei-Min Shen</i>	
Continuous Adaptation in Robotic Systems by Indirect Online Evolution.....	71
<i>Marcus Furuholmen, Mats Hovin, Jim Torresen, and Kyrre Glette</i>	
Using Cognitive Semantics to Integrate Perception and Motion in a Behavior-Based Robot	77
<i>D. Paul Benjamin, Deryle Lonsdale, Damian Lyons, and Siddharth Patel</i>	
A Constraint-Based Behavior Fusion Mechanism on Mobile Manipulator.....	83
<i>Shu Huang, Erwin Aertbeliën, and Hendrik Van Brussel</i>	
Adaptive Communication Promotes Sub-system Formation in a Multi Agent System with Limited Resources.....	89
<i>Di Prodi Paolo, Bernd Porr, and Florentin Wörgötter</i>	
Dual Robust Controller Design for High Power AC Servo Drive.....	97
<i>Stone Cheng, Yuan-Yong Huang, and Hsin-Hung Chou</i>	
Autonomous Navigation of an Unmanned Ground Vehicle in Unstructured Forest Terrain.....	103
<i>Joel Alberts, Dean Edwards, Terence Soule, Mike Anderson, and Michael O'Rourke</i>	
Simultaneous Localization and Mapping Based on PF-MDS	109
<i>Hongmo Je and Daijin Kim</i>	
Author Index	115
