

Proceedings

Quantitative Evaluation of Systems

QEST 2008

**14-17 September 2008
St. Malo, France**

**Organized by
INRIA Rennes, Bretagne - Atlantique**

Los Alamitos,
California

Washington • Tokyo

Table of Contents

Quantitative Evaluation of Systems

QEST 2008

Message from General Chair	ix
Message from Program Chairs	xi
Organizing Committee	xiii
Technical Program Committee	xiv
Steering Committee	xv
Additional Reviewers	xvi

Invited Talks

Autonomous Model Learning for Reinforcement Learning	3
<i>Michael Littman</i>	

Session 1: Networking

A Control-Theoretic Modeling Approach for Service Differentiation in Multi-hop Ad-hoc Networks	7
<i>Yimeng Yang, Boudewijn R. Haverkort, and Geert J. Heijenk</i>	
On the Data Delivery Delay taken by Random Walks in Wireless Sensor Networks	17
<i>Issam Mabrouki, Gwillerm Froc, and Xavier Lagrange</i>	
Analysis of an M/G/1 Queue with Repeated Inhomogeneous Vacations with Application to IEEE 802.16e Power Saving Mechanism	27
<i>Sara Alouf, Eitan Altman, and Amar P. Azad</i>	
CaVi -- Simulation and Model Checking for Wireless Sensor Networks.....	37
<i>Athanassios Boulis, Ansgar Fehnker, Matthias Fruth, and Annabelle McIver</i>	
Performance Model Generation for MPSoC Design-Space Exploration.....	39
<i>B.D. Theelen</i>	
Möbius Trace Analysis with Traviando.....	41
<i>Ruth Lamprecht and Peter Kemper</i>	

Session 2: Quantitative Verification

Reduction Techniques for Model Checking Markov Decision Processes	45
<i>Frank Ciesinski, Christel Baier, Marcus Größer, and Joachim Klein</i>	
Quantitative Model-Checking of One-Clock Timed Automata under Probabilistic Semantics	55
<i>Nathalie Bertrand, Patricia Bouyer, Thomas Brihaye, and Nicolas Markey</i>	
Symbolic Partition Refinement with Dynamic Balancing of Time and Space	65
<i>Ralf Wimmer, Salem Derisavi, and Holger Hermanns</i>	
Cell Assisted APMC.....	75
<i>Alexandre Borghi, Thomas Herault, Richard Lassaigne, and Sylvain Peyronnet</i>	

ProbDiVinE-MC: Multi-core LTL Model Checker for Probabilistic Systems	77
<i>Jiří Barnat, Lubós Brim, Ivana Černá, Milan Češka, and Jana Tůmová</i>	

Prism2Promela	79
<i>Christopher Power and Alice Miller</i>	

Session 3: Tools

KPC-Toolbox: Simple Yet Effective Trace Fitting Using Markovian Arrival Processes	83
<i>Giuliano Casale, Eddy Z. Zhang, and Evgenia Smirni</i>	

VATS: Virtualized-Aware Automated Test Service	93
<i>Sebastian Gaisbauer, Johannes Kirschnick, Nigel Edwards, and Jerry Rolia</i>	

Symbolic Magnifying Lens Abstraction in Markov Decision Processes.....	103
<i>Pritam Roy, David Parker, Gethin Norman, and Luca de Alfaro</i>	

Recent Extensions to the Stochastic Process Algebra Tool CASPA	113
<i>Martin Riedl, Johann Schuster, and Markus Siegle</i>	

A Tool Supporting Evaluation of Non-markovian Fault Trees	115
<i>Giacomo Bucci, Laura Carnevali, and Enrico Vicario</i>	

The Performability Tool Pility.....	117
<i>Lucia Cloth and Boudewijn R. Haverkort</i>	

Invited Talks

Composing Web Services in an Open World: QoS Issues	121
<i>Albert Benveniste</i>	

Session 4: Performance Analysis I

A Joint Moments Based Analysis of Networks of MAP/MAP/1 Queues.....	125
<i>András Horváth, Gábor Horváth, and Miklós Telek</i>	

Product Form Approximations for Communicating Markov Processes	135
<i>Peter Buchholz</i>	

Session 5: Performance Analysis II

Discrete Time Markov Chains Competing over Resources: Product Form Steady-State Distribution.....	147
<i>Jean-Michel Fourneau</i>	

Memory Efficient Calculation of Path Probabilities in Large Structured Markov Chains	157
<i>Paolo Ballarini and András Horváth</i>	

Session 6: Counter-Examples

Hintikka Games for PCTL on Labeled Markov Chains	169
<i>Harald Fecher, Michael Huth, Nir Piterman, and Daniel Wagner</i>	

Regular Expressions for PCTL Counterexamples	179
<i>Berteun Damman, Tingting Han, and Joost-Pieter Katoen</i>	

Debugging of Dependability Models Using Interactive Visualization of Counterexamples	189
<i>Husain Aljazzar and Stefan Leue</i>	

Invited Talks

Linear Programming, Lyapunov Functions, and Performance Analysis	201
<i>Peter Glynn</i>	

Session 7: High-Level Models

Automatic Translation of UML Sequence Diagrams into PEPA Models.....	205
<i>Mirco Tribastone and Stephen Gilmore</i>	

Analysis of Large Scale Interacting Systems by Mean Field Method	215
<i>Andrea Bobbio, Marco Gribaudo, and Miklòs Telek</i>	

Polynomial Throughput Bounds for Equal Conflict Petri Nets with Multi-guarded Transitions	225
<i>Jorge Júlvez</i>	

New Solvers for Asymmetric Systems in GreatSPN.....	235
<i>Souheib Baarir, Marco Beccuti, and Giuliana Franceschinis</i>	

A Parallel and Distributed Analysis Pipeline for Performance Tree Evaluation	237
<i>Darren K. Brien, Nicholas J. Dingle, William J. Knottenbelt, Harini Kulatunga, and Tamas Suto</i>	

An Experimental Framework for PIPE2.....	239
<i>Marc Melià, Catalina M. Lladó, Ramon Puigjaner, and Connie U. Smith</i>	

Session 8: Probabilistic and Timed Systems

Quasi-Birth-Death Processes, Tree-Like QBDS, Probabilistic 1-Counter Automata, and Pushdown Systems	243
<i>Kousha Etesami, Dominik Wojtczak, and Mihalis Yannakakis</i>	

Computing Expected Absorption Times for Parametric Determinate Probabilistic Timed Automata	254
<i>Najla Chamseddine, Marie Duflot, Laurent Fribourg, Claudine Picaronny, and Jeremy Sproston</i>	

Approximate Analysis of Probabilistic Processes: Logic, Simulation and Games	264
<i>Josée Desharnais, François Laviolette, and Mathieu Tracol</i>	

Conflict-Tolerant Real-Time Features.....	274
<i>Deepak D'Souza, Madhu Gopinathan, S. Ramesh, and Prahladavaradan Sampath</i>	

Session 9: Applications

Cross-Profiling for Embedded Java Processors	287
<i>Walter Binder, Martin Schoeberl, Philippe Moret, and Alex Villazón</i>	

Characterization of the E-commerce Storage Subsystem Workload	297
<i>Xi Zhang, Alma Riska, and Erik Riedel</i>	

Modeling Peer-to-Peer Botnets.....307
Elizabeth Van Ruitenbeek and William H. Sanders

Tutorial

Perfect Generation, Monotonicity and Finite Queueing Networks.....319
Jean-Marc Vincent

Randomness in Wireless Networks: How to Deal with It320
Merouane Debbah

Correctness Verification and Quantitative Evaluation of Timed Systems Based on Stochastic State Classes.....321
Enrico Vicario

Model Checking and Decision Procedures for Probabilistic Automata and Markov Chains322
James Worrell

Author Index 323
