## 4th International Conference on Networked Computing and Advanced Information Management

Gyeongju, Korea  
September 2-4, 2008

Los Alamitos, California  
Washington • Tokyo

Fourth International Conference on  
Networked Computing and Advanced  
Information Management

NCM 2008

**TABLE OF CONTENTS**

**VOLUME 1**

**Welcome Message from the General Chair**  
**Welcome Message from the Program Chair**  
**International Committee**  
**Program Committee**

|                                                                                                                              |           |
|------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>[ETCTR] Efficient Target Localization by Controlling the Transmission Range in Wireless Sensor Networks .....</b>         | <b>1</b>  |
| <i>Sajjad Hussain Chaudhary, Ali Kashif Bashir, Myong-Soon Park</i>                                                          |           |
| <b>A Calculus to Reduce Spatial and Temporal Complexity for Specification and Analysis of Complex Real-Time Systems.....</b> | <b>6</b>  |
| <i>Jungrhan Choi, Jinho On, Moonkun Lee, Jin-Young Choi</i>                                                                  |           |
| <b>A Database Design of RFID Document Management System with e-Ink technology .....</b>                                      | <b>12</b> |
| <i>Bae Soon Hark, Jong Hwa Choi, Choon Seong Leem</i>                                                                        |           |
| <b>A Design of One-Time Password Mechanism Using Public Key Infrastructure.....</b>                                          | <b>16</b> |
| <i>Hyun-Chul Kim, Hong-Woo Lee, Kyung-Seok Lee, Moon-Seog Jun</i>                                                            |           |
| <b>A Frame of Personalized Information Filtering System Based on XML .....</b>                                               | <b>23</b> |
| <i>Yongming Guo, Dehua Chen, Liangxu Liu, Jiajin Le</i>                                                                      |           |
| <b>A Hierarchical Routing Protocol for Sensor Network Reconfiguration .....</b>                                              | <b>28</b> |
| <i>Hoon Kwon, Jeong-Hee Kim, Ho-Young Kwak</i>                                                                               |           |
| <b>A Hierarchical Storage Strategy Based on Block-Level Data Valuation .....</b>                                             | <b>34</b> |
| <i>Xiaonan Zhao, Zhanhuai Li, Leijie Zeng</i>                                                                                |           |
| <b>A Hybrid Interference Model-Based Topology Control Algorithm.....</b>                                                     | <b>40</b> |
| <i>Yongzhen Liu, Xinming Zhang, Qiong Liu, Shifang Dai</i>                                                                   |           |
| <b>A Misused Key Detection Mechanism for Hierarchical Routings in Wireless Sensor Network.....</b>                           | <b>45</b> |
| <i>Min-Woo Park, Jong-Myoung Kim, Young-Ju Han, Tai-Myoung Chung</i>                                                         |           |
| <b>A Neural Network Approach to the Optimal Combination of Product Color Design .....</b>                                    | <b>51</b> |
| <i>Yang-Cheng Lin, Chung-Hsing Yeh, Chen-Hui Hung</i>                                                                        |           |
| <b>A Novel Approach for Fault-Tolerant Ethernet Implementation .....</b>                                                     | <b>56</b> |
| <i>Anh Pham Hoang, Jong Myung Rhee, Se Mog Kim, Dong Ho Lee</i>                                                              |           |
| <b>A Novel Dynamic Tuning of the Contention Window (CW) for IEEE 802.11e Enhanced Distributed Control Function.....</b>      | <b>60</b> |
| <i>Jun Lv, Xinming Zhang, Xiaojun Han</i>                                                                                    |           |
| <b>A Novel Energy Efficient Wireless Sensor MAC Protocol .....</b>                                                           | <b>66</b> |
| <i>Peng Sun, Xinming Zhang, Zhenzhong Dong, Yi Zhang</i>                                                                     |           |

|                                                                                                          |            |
|----------------------------------------------------------------------------------------------------------|------------|
| <b>A Novel Feedback Scheduling Approach for Resource-Constrained Network Control System.....</b>         | <b>71</b>  |
| <i>Qi-Zhang, Xian-ming Tang, Jin-shou Yu</i>                                                             |            |
| <b>A Recovery Model for Survivable Distributed Systems through the Use of Virtualization.....</b>        | <b>77</b>  |
| <i>Thandar Thein, Manish Pokharel, Sung-Do Chi, Jong Sou Park</i>                                        |            |
| <b>A Road Structures Construction and Maintenance Measurement Design Using USN.....</b>                  | <b>83</b>  |
| <i>Nam-kyun Kim, Mu-wook Pyeon, Byoung-kil Lee, Jae-sun Park</i>                                         |            |
| <b>A Routing Protocol Based on Distance Vector in Ad Hoc Networks .....</b>                              | <b>90</b>  |
| <i>Zhipeng Liu, SeongKwon Cheon, ChongGun Kim</i>                                                        |            |
| <b>A Scalable Linkage Method for Large Scale Event-Data Processing.....</b>                              | <b>96</b>  |
| <i>Hiromichi Kobashi, Riichiro Take, Shigeo Kawata</i>                                                   |            |
| <b>A Self-Training Algorithm for Load Balancing in Cluster Computing.....</b>                            | <b>102</b> |
| <i>Parimah Mohammadpour, Mohsen Sharifi, Ali Paikan</i>                                                  |            |
| <b>A Simulation for Map Transmission in a DMB Environment.....</b>                                       | <b>108</b> |
| <i>Jung Ok Kim, Chillo Ga, Kiyun Yu</i>                                                                  |            |
| <b>A Smart Medication Prompting System and Context Reasoning in Home Environments .....</b>              | <b>113</b> |
| <i>Myungeun Lim, Jaehun Choi, Daehee Kim, Soojun Park</i>                                                |            |
| <b>A Study on the Self-Directed Learning Management System .....</b>                                     | <b>117</b> |
| <i>Young-Hwan Woo, Suk-Won Hong, Sang-Bok Kim</i>                                                        |            |
| <b>A Survey on Training Algorithms for Support Vector Machine Classifiers .....</b>                      | <b>121</b> |
| <i>Guosheng Wang</i>                                                                                     |            |
| <b>A Survey on Visualization for Wireless Security .....</b>                                             | <b>127</b> |
| <i>Chi Yoon Jeong, Beom Hwan Chang, Jung Chan Na</i>                                                     |            |
| <b>A System Implementation of Pushing Advertisement to Handheld Devices via Bluetooth .....</b>          | <b>131</b> |
| <i>Yu-Liang Chen, Hung-Jen Chou, Chen-Pu Lin, Hsien-Tang Lin, Shyan-Ming Yuan</i>                        |            |
| <b>A Task-Role Based Access Control Model with Multi-Constraints .....</b>                               | <b>135</b> |
| <i>Lin Yao, Xiangwei Kong, Zichuan Xu</i>                                                                |            |
| <b>A Taxonomy and Survey on Distributed File Systems .....</b>                                           | <b>142</b> |
| <i>Tran Doan Thanh, Subaji Mohan, Eunmi Choi, SangBum Kim, Pilsung Kim</i>                               |            |
| <b>A TMO Based Real-Time Model: Supporting u-GIS Informative Construction Technology Innovation.....</b> | <b>148</b> |
| <i>MyoungJin Kim, Hanku Lee, Muwook Pyeon, Yangdam Eo, Dongkeun Lee, Wonsa Lee</i>                       |            |
| <b>A Wireless Networking Technologies Overview Over Ubiquitous Service Applications.....</b>             | <b>154</b> |
| <i>Chen-Shu Wang, Yeu-Ruey Tzeng</i>                                                                     |            |
| <b>Adaptive Safety Critical Middleware for Distributed and Embedded Safety Critical System .....</b>     | <b>160</b> |
| <i>Zhang Yi, Wandong Cai, Wang Yue</i>                                                                   |            |
| <b>An Approach for Robust Routing Algorithms in Ad Hoc Network .....</b>                                 | <b>165</b> |
| <i>Hochul Jeon, Taehwan Kim, Joongmin Choi</i>                                                           |            |

|                                                                                                                            |            |
|----------------------------------------------------------------------------------------------------------------------------|------------|
| <b>An Approach Towards an Architecture for Solving Combinatorial Problems in a Ubiquitous Environment .....</b>            | <b>169</b> |
| <i>Guillermo Cabrera G., Jose Miguel Rubio L.</i>                                                                          |            |
| <b>An Automatic Identification of a Damaged Malicious File Using HMM against Anti-Forensics .....</b>                      | <b>175</b> |
| <i>Dongju Ryu, Minsoo Kim, Yong-Min Kim</i>                                                                                |            |
| <b>An Improved Fast Handover Algorithm Based on the Enhanced Access Router (EAR-FMIPv6) .....</b>                          | <b>183</b> |
| <i>Inwhae Joe, Hoonsang Yun</i>                                                                                            |            |
| <b>An Intersection-Centric Priority Algorithm for Traffic Simulation Based on Multi-Agents .....</b>                       | <b>187</b> |
| <i>Xiao-Fan Zhi, Zhi-Cheng Liao, Shi-Yong Zhang, Yi-ping Zhong</i>                                                         |            |
| <b>Analysis and Application of Bio-Inspired Multi-Net Security Model .....</b>                                             | <b>193</b> |
| <i>Ruijuan Zheng, Qingtao Wu, Mingchuan Zhang</i>                                                                          |            |
| <b>Analysis of the Passenger Pick-Up Pattern for Taxi Location Recommendation .....</b>                                    | <b>197</b> |
| <i>Junghoon Lee, Inhye-Shin, Gyung-Leen Park</i>                                                                           |            |
| <b>Application of Combined Traffic Demand Forecasting for Comprehensive Transport Corridor .....</b>                       | <b>203</b> |
| <i>Yanhong Li, Zhenzhou Yuan, Shouhua Cao, Ying Ding, Peifeng Hu</i>                                                       |            |
| <b>Application of Digital Rights Management to Accounting Information Processing in the Semantic Web Environment .....</b> | <b>209</b> |
| <i>Xiaoyi Chen, Dianping Ouyang</i>                                                                                        |            |
| <b>Applying Machine Learning Techniques for Environmental Reporting .....</b>                                              | <b>215</b> |
| <i>Sotiris Kotsiantis, Dimitris Kanellopoulos</i>                                                                          |            |
| <b>Behavior Observation-Based Rival's Private Information Inferring .....</b>                                              | <b>222</b> |
| <i>Lihua Zhou, Weiye Liu, Yufeng Xu, Hongmei Chen</i>                                                                      |            |
| <b>Compensated Time Synchronization in WSN with Multiple Reference Nodes .....</b>                                         | <b>227</b> |
| <i>Woo Hyuk Jang, Youngmi Kwon</i>                                                                                         |            |
| <b>Coverage Ratio in the Wireless Sensor Networks Using Monte Carlo Simulation .....</b>                                   | <b>233</b> |
| <i>Seok Myun Kwon, Jin Suk Kim</i>                                                                                         |            |
| <b>Convolutional Coding in Cooperative Relay Systems with Spread Spectrum .....</b>                                        | <b>237</b> |
| <i>Kun Hua, Won Mee Jang, Lim Nguyen</i>                                                                                   |            |
| <b>Damage Detection of Structural Members by Prediction of Variation in Strain Energy .....</b>                            | <b>242</b> |
| <i>Hee-Chang Eun, Gon Kim, Ki-Bong Park, Tae-Wan Kim, Min-Su Lee</i>                                                       |            |
| <b>Data Structures for Storing File Namespace in Distributed File System .....</b>                                         | <b>248</b> |
| <i>Luu Hoang Long, Eunmi Choi, SangBum Kim, Pilsung Kim</i>                                                                |            |
| <b>Decoding Cognitive States from fMRI Data Using Single Hidden-Layer Feedforward Neural Networks .....</b>                | <b>254</b> |
| <i>Hieu Trung Huynh, Yonggwon Won</i>                                                                                      |            |
| <b>Density Mining Based Resilient Data Aggregation for Wireless Sensor Network .....</b>                                   | <b>259</b> |
| <i>Shu Qin Ren, Jong Sou Park</i>                                                                                          |            |
| <b>Design and Implementation of Communication System among Heterogeneous Multi-Agent System .....</b>                      | <b>265</b> |
| <i>Yoe-Jin Yoon, Kee-Hyun Choi, Dong-Ryeol Shin</i>                                                                        |            |
