# TABLE OF CONTENTS

## Volume 1

|                                                                                                                                                                                    |           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Development Of Web Based Power Quality Monitoring System For Handling User Custom Power Quality Query And Auto Power Quality Monitoring Report Notification Via Email .....</b> | <b>1</b>  |
| <i>B. E. Kushare, A.A. Ghatol, S. Kala</i>                                                                                                                                         |           |
| <b>Predictive Performance Evaluation Of Interconnected Power System Through Telecommunication Network Management .....</b>                                                         | <b>8</b>  |
| <i>P. S. Tiwari</i>                                                                                                                                                                |           |
| <b>Harmonic Analysis At An Educational Institution Using C.A.8332 .....</b>                                                                                                        | <b>12</b> |
| <i>N. Senthilnathan, T. Manigandan, S. Palaniswami</i>                                                                                                                             |           |
| <b>Electricity Trading In Power Market: An Over View And Issues .....</b>                                                                                                          | <b>19</b> |
| <i>D. Venu Gopal</i>                                                                                                                                                               |           |
| <b>Reformation And Market Design Of Power Sector In India .....</b>                                                                                                                | <b>26</b> |
| <i>R.N. Lahiri, A. Sinha, S. Chowdhury, S. P. Chowdhury</i>                                                                                                                        |           |
| <b>Advanced Technologies In Power Transmission System .....</b>                                                                                                                    | <b>30</b> |
| <i>K.P. Satsangi, K. Sandeepkumar</i>                                                                                                                                              |           |
| <b>Key Initiatives In Process Improvement For Newly Formed Power Distribution Company .....</b>                                                                                    | <b>33</b> |
| <i>R. N. Lahiri, A. Sinha, S. Chowdhury, S. P. Chowdhury</i>                                                                                                                       |           |
| <b>Techno-economics Of Solar Wind Hybrid System In Indian Context: A Case Study .....</b>                                                                                          | <b>39</b> |
| <i>A. M. Jain, B. E. Kushare</i>                                                                                                                                                   |           |
| <b>A New Method To Estimate The O&amp;M Costs For The Financial Planning Of The Wind Power Projects Based On Wind Speed .....</b>                                                  | <b>45</b> |
| <i>D. R. Joshi, S. H. Jangamashetti</i>                                                                                                                                            |           |
| <b>Enhancement of available transfer capability with FACTS device in competitive power market .....</b>                                                                            | <b>50</b> |
| <i>B. V. Manikandan, S. C. Raja, P. Venkatesh</i>                                                                                                                                  |           |
| <b>ANFIS gain scheduled CSTR with genetic algorithm based PID minimizing integral square error .....</b>                                                                           | <b>57</b> |
| <i>U. S. Banu, G. Uma</i>                                                                                                                                                          |           |
| <b>Fuzzy gain scheduled pole placement based state feedback control of CSTR .....</b>                                                                                              | <b>63</b> |
| <i>U. S. Banu, G. Uma</i>                                                                                                                                                          |           |
| <b>Closed loop stability analysis for the particle swarm optimization dynamics .....</b>                                                                                           | <b>69</b> |
| <i>D. Sen, S. Dey</i>                                                                                                                                                              |           |
| <b>Novel topologies for identification and control of PMSM using artificial neural network .....</b>                                                                               | <b>75</b> |
| <i>R. Kumar, R. A. Gupta, A. K. Bansal</i>                                                                                                                                         |           |
| <b>Optimization of PID parameters using genetic algorithm and particle swarm optimization .....</b>                                                                                | <b>81</b> |
| <i>M. Willjuice Iruthayarajan, S. Baskar</i>                                                                                                                                       |           |
| <b>Nonlinear modeling of loudspeaker using adaptive second order Volterra filters .....</b>                                                                                        | <b>87</b> |
| <i>D. Sankar, T. Thomas</i>                                                                                                                                                        |           |

|                                                                                                                                                                 |            |
