

Proceedings of the 11th IEEE International

Conference on Power Electronics

Cuernavaca, Morelos, Mexico, August 24-27, 2008

INTERNATIONAL CONFERENCE ON POWER ELECTRONICS

Organizers:

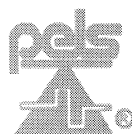

CENIDET - National Center for Research and Technological Development

IEEE -Section Morelos - Power Electronics Chapter

SOMEPE - Power Electronics Mexican Society

cenidet
Centro Nacional de Investigación y
Desarrollo Tecnológico

SOMEPE

CIEP'08 Technical Program

Table of Content

Monday, August 25th

KEYNOTE LECTURERS: Power Electronics for Alternative Energy Sources **xv**
9:00 - 12:00 hrs.

Session Chairs: Jaime Arau, CENIDET, MEXICO
Carlos Aguilar, CENIDET, MEXICO

A Look to the Future of the Electric Sector (INVITED PAPER) **xvii**
J. Huacuz, Instituto de Investigaciones Electricas, Cuernavaca, MEXICO.

Power Electronics for Alternative Energy Sources (INVITED PAPER) **xviii**
M. Rashid, University of Florida, USA.

Power Conditioning Structures and Schemes for Alternative Renewable Resource Technologies (INVITED PAPER) **xix**
J. L. Duran, Instituto Tecnológico de Chihuahua, MEXICO.

SESSION No. 1: Power Factor Correction **1**
14:00 – 16:00 hrs.

Session Chairs: Pedro Bañuelos, Universidad de las Americas-Puebla, MEXICO
Mario Ponce, CENIDET, MEXICO

Study of the Power Factor Correctors with Fast Output-Voltage Feedback Loop **3**
J. Sebastian, D. Lamar, M. Arias, M. Rodriguez, A. Rodriguez, Universidad de Oviedo, SPAIN.

Input Current Shaper Operating in DCM, N. Vazquez, A. Jimenez, C. Hernandez, E. Rodriguez, R. Orosco, Instituto Tecnológico de Celaya, MEXICO. **11**

A New Very Simple Control Circuitry for the Flyback Family of Power Factor Correctors Operating in Continuous Conduction Mode, D. Lamar, M. Arias, M. Rodriguez, A. Rodriguez and J. Sebastian, Universidad de Oviedo, SPAIN. **15**

Three-Phase Asymmetrical Power Source with Power Factor Correction, S. Hernandez, P. Bañuelos, Universidad de las Americas, MEXICO. **23**

SESSION No.2: Electronic Ballast **31**
16:30 – 18:00 hrs.

Session Chairs: Elias Rodriguez, Instituto Tecnológico de Celaya, MEXICO

Analysis and Design of a Model Based on Step Response for the Stability in Lamps HID , M A. Juarez*, M. Ponce*, J. Arau*, E. Flores*, J. Ribas**, J. M Alonso**, CENIDET*, MEXICO and Universidad de Oviedo, SPAIN **.	33
Influence Of The Use Of Square Waveforms In Fluorescent Lamps , M.A. Juárez, M. Ponce, J. Arau , E. Flores, A.Parada, CENIDET, MEXICO.	39
Dynamic Study Of The Time Constant In HID Lamps , M A. Juarez, M. Ponce, J. Arau, E. Flores, R.Osorio, V.H. Olivares, CENIDET, MEXICO.	43
 <i>Tuesday, August 26th</i>	
SESSION No. 3: Active Power Filters 8:00 – 10:00 hrs.	49
Session Chairs: Victor M. Cardenas, UASLP, MEXICO Jose Luis Duran, Instituto Tecnologico de Chihuahua, MEXICO	
A Current Limiter Based on an Active Current Power Filter , N. Vazquez*, D. Rico*, C. Hernandez*, E. Rodriguez*, R. Orosco*, J. Arau**, Instituto Tecnologico de Celaya and CENIDET, MEXICO.	51
Practical Considerations in the PWM rectifier with Active Filter Function , E. Barcenas, J. Arau, V. M. Cardenas, R. Alvarez, CENIDET and UASLP, MEXICO.	56
A Model-Based Controller for a Three-phase Four-leg Shunt Active Filter with Homopolar Current Compensation , R.E. Torres, G. Escobar, A.A. Valdez and M.F. Martinez, IPICYT, MEXICO.	63
An Adaptive Controller for a Shunt Active Filter Considering Load and Line Impedances , G. Escobar*, A.A. Valdez*, R. Ortega**, IPICYT*, MEXICO and SUPELEC, FRANCE**.	69
 SESSION No.4: Control in Power Electronics 10:30 – 12:00 hrs.	75
Session Chairs: Gerardo Guerrero, CENIDET, MEXICO	
Digital Implementation of a Direct Mean Torque Control for AC Servo Drives Based on a Hybrid DSP/FPGA Controller System , R. Morales*, M. Pacas**, Instituto Tecnologico de Apizaco, MEXICO and University of Siegen**, GERMANY.	77
Design and Manufacture of a Mobile Robot applied to the Manipulation of Explosives , L. A. Zuñiga, J.C. Pedraza, E. Gorrostieta L. Garcia, J. M. Ramos, C.A. Gonzalez, Universidad Autonoma de Queretaro; Secretaria de la Defensa Nacional; CIDESI and Universidad del Valle de Mexico-Queretaro, MEXICO.	84

Practical modifications of a repetitive-based controller aimed to compensate $6L \pm 1$ harmonics, G. Escobar*, R.E. Torres*, A.A. Valdez*, M.F. Martinez*, P.G. Hernandez**, IPICYT and GE, MEXICO. **90**

SESSION No. 5: DC-DC Converters **97**
14:00 – 16:00 hrs.

Session Chairs: Jesus Olivier, Universidad Politecnica de Madrid, SPAIN
Horacio Visairo, INTEL Corporation, MEXICO

A simple DC-UPS based in Forward-Forward Topology, Design and Simulation, L.A. Flores*, O. García**, A. Roman* and M.S. Esparza%, Universidad Autonoma de Aguascalientes*, MEXICO; Universidad Politecnica de Madrid**, SPAIN and Instituto Tecnologico de Aguascalientes%, MEXICO. **99**

Multiple-Output DC-to-DC based on the Flyback Converter, N. Vazquez*, H. Lopez*, C. Hernandez*, H. Calleja**, Instituto Tecnologico de Celaya * and CENIDET **, MEXICO. **105**

A Study on Load Power Probability-Distribution-Function Effect on Power Conversion Efficiency, J. A. Abu-Qahouq*, M. Bynum** and Lilly Huang**, University of Alabama* and INTEL Corporation **, USA. **109**

Multi-Mode Synchronous Buck Converter with Non-Uniform Current Distribution for Portable Applications, J.C.Vilchis, C. Aguilar and J. Arau, CENIDET, MEXICO. **114**

SESSION No. 6: Fault Diagnosis and Simulation **121**
16:30 – 18:00 hrs.

Session Chairs: Hugo Calleja, CENIDET, MEXICO

A Novel Strategy to Replace the Damaged Element for Fault-Tolerant Induction Motor Drive, M.A. Rodriguez* & A. Claudio*, D. Theilliol**, L. G. Vela*, L. Hernandez* %, CENIDET*, UNACAR & and ESIME-IPN%, MEXICO, Universite Henri Poincare **, FRANCE. **123**

Design Strategy to Optimize the Reliability of Power Converters, F. Chan* and H. Calleja**, Universidad Autonoma de Quintana Roo* and CENIDET**, MEXICO. **128**

Top-down methodology employing hardware description languages (HDLs) for designing digital control in power converters, L. Laguna, R. Prieto, J. Oliver, J. Cobos, Universidad Politecnica de Madrid, SPAIN. **133**

Wednesday, August 27th

SESSION No. 7: Grid Converters **139**
8:00 – 10:00 hrs.

Session Chairs: Miguel Velez, University of Puerto Rico at Mayaguez, USA
Abraham Claudio, CENIDET, MEXICO

Characterization of tracking performance for a three-phase reference signal generator for utility connected applications , J. Hoyo*, H. Calleja** and J. Alcala***, Instituto Tecnológico de Hermosillo*, CENIDET** and Universidad de Colima***, MEXICO.	141
Determination of an ideal ripple injection technique for high performance multi-pulse rectifiers , I. Araujo*, A. Forsyth**, F. J.Chivite**, ESIME-IPN*, MEXICO and University of Manchester**, U.K.	147
Losses Analysis in Power Semiconductor Devices of a Single-Phase Active Multi-Level Rectifier with Voltage Sag Ride-Through Capability , V. Godinez, J. Lira and C. Nuñez, Universidad Autonoma de San Luis Potosi-UASLP, MEXICO.	156
A Fast AC Voltage Regulator , N. Vazquez, A. Velazquez, C. Hernandez, E. Rodriguez, R. Oroasco, Instituto Tecnológico de Celaya, MEXICO.	162
SESSION No. 8: Alternative Energy Sources 10:30 – 12:00 hrs.	167
Session Chairs: Nimrod Vazquez, Instituto Tecnológico de Celaya, MEXICO	
Hyerarchical Control of Hybrid Power Systems , M. Torres and M. Velez, University of Puerto Rico at Mayaguez, USA.	169
Comparison Between Two-Stage and Integrated Power Conditioner Architecture for Fuel Cell Based Power Supply System , A. Vazquez*, C. Aguilar* and F. Canales*&, CENIDET, MEXICO and AAB, Switzerland.	177
Two Inputs DC/DC Converter Applicable in Clean-Energy Resources , N. Vazquez, A. Hernandez, C. Hernandez, E. Rodriguez, J. Arau*, Instituto Tecnológico de Celaya* and CENIDET**, MEXICO.	185
SESSION No. 9: Modeling and Simulation 14:00 – 16:00 hrs.	191
Session Chairs: Ismael, Araujo, ESIME-IPN, MEXICO Manuel Adam, CENIDET, MEXICO	
4H-SiC PiN Diode Electrothermal Model for Conduction and Reverse Breakdown for Pspice Simulator , L. Hernandez* %, A. Claudio*, M. Cotorogea*, J. Aguayo* and M. A. Rodriguez* &, CENIDET*, ESIME-IPN Unidad Culhuacan%, UNACAR &, MEXICO.	192
Test Bench to Emulate an Electric Vehicle through Equivalent Inertia and Machine DC , I. Alcala, A.Claudio, G. Guerrero, CENIDET, MEXICO.	198
Modeling and Simulation Requirements for the Analysis and Design of DC Distributed Power Electronic Systems , J. A. Oliver, R. Prieto, L. Laguna and J. A. Cobos, Universidad Politecnica de Madrid, SPAIN.	204
A Parameterization Tool for Power Electronics Design at System Level , R.Prieto, L. Laguna, J.Oliver, J. Cobos, Universidad Politecnica de Madrid, SPAIN.	210
