

POWERFUL BEYOND IMAGINATION

PROCEEDINGS

NOVEMBER 11-17, 2006

TAMPA CONVENTION CENTER, TAMPA, FLORIDA

SPONSORS:

IEEE Computer Society:
Committees on Supercomputing
Applications and Computer Architecture

ACM SIGARCH:
Association for Computing Machinery Special
Interest Group on Computer Architecture

SC06 Table of Contents

SC Committee
Advisory Committee
Steering Committee
Technical Program Committee

Panel

Is High-Performance, Reconfigurable Computing the Next
Supercomputing Paradigm?

100 Years of Digital Data

Data Intensive Computing

Architecture

The Potential Energy Efficiency of Vector Acceleration.....1

The Design Space of Data-Parallel Memory Systems.....11

A Performance Comparison through Benchmarking and Modeling of Three Leading
Supercomputers: Blue Gene/L, Red Storm, and Purple23

Memory

Sequoia: Programming the Memory Hierarchy.....33

CellSs: A Programming Model for the Cell BE Architecture.....46

A Memory Model for Scientific Algorithms on Graphics Processors.....57

Interconnect Routing and Scheduling

Adaptive Routing in High-Radix Clos Networks.....67

A Near-Optimal Real-time Hardware Scheduler for Large
Cardinality Crossbar Switches.....78

Level-Wise Scheduling Algorithm for Fat Tree Interconnection Networks.....90

Scalable Systems Software

A Software Based Approach for Providing Network Fault

Tolerance in Clusters Using the uDAPL Interface: MPI Level Design and Performance Evaluation.....	99
Problem Diagnosis in Large-Scale Computing Environments.....	112
From Mesh Generation to Scientific Visualization: An End-to-End Approach to Parallel Supercomputing.....	125
MPI and Communications	
High-Performance and Scalable MPI over InfiniBand with Reduced Memory Usage: An In-Depth Performance Analysis.....	140
Adaptive, Transparent Frequency and Voltage Scaling of Communication Phases in MPI Programs.....	153
Software Routing and Aggregation of Messages to Optimize the Performance of the HPCC Randomaccess Benchmark.....	167
MPI Tools and Performance Studies	
MPI Performance Analysis Tools on Blue Gene/L.....	178
Quantifying the Potential Benefit of Overlapping Communication and Computation in Large-Scale Scientific Applications.....	193
Blocking vs. Non-Blocking Coordinated Checkpointing for Large-Scale Fault Tolerant MPI.....	209
Grid Allocation and Reservation	
Improving Grid Resource Allocation via Integrated Selection and Binding.....	222
Toward a Doctrine of Containment: Grid Hosting with Adaptive Resource Control.....	236
Grid Capacity Planning with Negotiation-based Advance Reservation for Optimized QoS.....	248
Grid Applications	
Parallel Genomic Sequence-Searching on an Ad-Hoc Grid: Experiences, Lessons Learned, and Implications.....	264
Sustainable Adaptive Grid Supercomputing: Multiscale Simulation	

of Semiconductor Processing across the Pacific.....278

High-Performance Dynamic Graphics Streaming for Scalable
Adaptive Graphics Environment.....289

Grid Networks and Portals

Revisiting Web Server Workload Invariants in the Context of
Scientific Web Sites.....298

End-System Aware, Rate-Adaptive Protocol for Network Transport in
LambdaGrid Environments.....311

Evaluating Grid Portal Security.....325

Grid Scheduling and Protocols

Supporting Dynamic Migration in Tightly Coupled Grid Applications.....339

Evaluation of a Workflow Scheduler Using Integrated
Performance Modeling and Batch Queue Wait Time Prediction.....352

Benchmarking XML Processors for Applications in Grid Web Services.....362

Grid Resource Management

CRUSH: Controlled, Scalable, Decentralized Placement of Replicated Data.....375

CycleMeter: Detecting Fraudulent Peers in Internet Cycle Sharing.....387

Designing a Runtime System for Volunteer Computing.....400

Data Management and Query

Hypergraph Partitioning for Automatic Memory Hierarchy Management.....410

Multiple Range Query Optimization with Distributed Cache Indexing.....422

Estimating Query Result Sizes for Proxy Caching in Scientific
Database Federations.....433

Imaging and Visual Analysis

Toward Real-Time, Image Guided Neurosurgery Using Distributed and Grid Computing.....	447
Large Image Correction and Warping in a Cluster Environment.....	460
Detecting Distributed Scans Using High-Performance Query-Driven Visualization.....	472
Biology	
PBPI: A High Performance Implementation of Bayesian Phylogenetic Inference.....	485
Locality and Parallelism Optimization for Dynamic Programming Algorithms in Bioinformatics.....	495
Computing Large Sparse Multivariate Optimization Problems with an Application in Biophysics.....	505
Molecular Dynamics	
Scalable Algorithms for Molecular Dynamics Simulations on Commodity Clusters.....	515
Blue Matter: Approaching the Limits of Concurrency for Classical Molecular Dynamics.....	528
Preliminary Investigation of Advanced Electrostatics in Molecular Dynamics on Reconfigurable Computers.....	542
Particles and Continuum	
Nested OpenMP for Efficient Computation of 3D Critical Points in Multi-Block CFD Datasets.....	554
Modeling Pulse Propagation and Scattering in a Dispersive Medium: Performance of MPI/OpenMP Hybrid Code.....	565
Performance Modeling and Optimization of a High Energy Colliding Beam Simulation Code.....	575

Tools and Techniques for Performance

Architectures and APIs: Assessing Requirements for Delivering
FPGA Performance to Applications.....588

Exploiting the Performance of 32-Bit Floating Point
Arithmetic in Obtaining 64-Bit Accuracy.....600

FFT Program Generation for Shared Memory: SMP and Multicore.....617

Blue Gene System Software

Topology Mapping for Blue Gene/L Supercomputer.....629

Designing a Highly-Scalable Operating System: The Blue Gene/L Story.....642

Design and Implementation of a One-Sided Communication
Interface for the IBM eServer Blue Gene Supercomputer.....651
