

2008 IEEE International Performance Computing and Communications Conference

(IPCCC)

**Austin, Texas, USA
7 – 9 December 2008**

IEEE Catalog Number: CFP08PHO-PRT
ISBN: 978-1-4244-3368-1

Table of Contents

Session 1A: Wireless Sensor Networks I

TIME: Time-based Index Management for Event Query Processing in Wireless Sensor Networks 1

Guilin Li (*Harbin Institute of Technology, CN*)

Jianzhong Li (*Harbin Institute of Technology, CN*)

Yingshu Li (*Georgia State University, US*)

Divisible Load Scheduling in Wireless Sensor Networks with Information Utility 9

Kijeung Choi (*Stony Brook University, US*)

Thomas G. Robertazzi (*University at Stony Brook, US*)

Design and Evaluation of Localization Protocols and Algorithms in Wireless Sensor Networks Using UWB 18

Di Wu (*Hunan University, CN*)

Lichun Bao (*University of California, Irvine, US*)

Min Du (*Hunan University, CN*)

Renfa Li (*Hunan University, CN*)

Session 1B: Storage

Distributed Energy-Efficient Scheduling for Data-Intensive Applications with Deadline Constraints on Data Grids 26

Cong Liu (*The University of North Carolina at Chapel Hill, US*)

Progressive Parity-Based Hardening of Data Stores 34

Ahmed Amer (*University of Pittsburgh, US*)

Jehan-Francois Paris (*University of Houston, US*)

Darrell Long (*University of California at Santa Cruz, US*)

Thomas Schwarz (*Santa Clara University, US*)

An Adaptive Cache Management Using Dual LRU Stacks to Improve Buffer Cache Performance 43

Shenggang Wan (*Huazhong University of Science and Technology, CN*)

Cao Qiang (*Huazhong University of Science and Technology, CN*)

Xubin He (*Tennessee Technological University, US*)

Session 1C: System Security

Understanding Divide-Conquer-Scanning Worms 51

Yubin Li (*Florida International University, US*)

Zesheng Chen (*Florida International University, US*)

Chao Chen (*Indiana University Purdue University Fort Wayne, US*)

Detection of Worm Propagation Engines in the System Call Domain using Colored Petri Nets	59
<i>Arnur Tokhtabayev (Binghamton Univeristy, US)</i> <i>Andrey Dolgikh (Binghamton University, US)</i>	
A Highly Available Transparent Linux Cluster Security Model	69
<i>Visham Ramsurrun (University of Mauritius, MU)</i> <i>Sunjiv Soyjaudah (University of Mauritius, MU)</i>	

Session 2A: Wireless Sensor Networks II

Increasing Lifetime of Wireless Sensor Network Using Controllable Mobile Cluster Heads	77
<i>Torsha Banerjee (University of Cincinnati, US)</i> <i>Dharma Agrawal (University of Cincinnati, US)</i>	
TSS: An Energy Efficient Communication Scheme for Low Power Wireless Networks	85
<i>Rabindranath Ghosh (St. Thomas' College, Kolkata, India, IN)</i> <i>Koushik Sinha (Honeywell Technology Solutions Lab, IN)</i> <i>Bhabani Sinha (Indian Statistical Institute, IN)</i>	
Coding-Aware Multi-path Routing in Multi-Hop Wireless Networks	93
<i>Song Han (University of Texas at Austin, US)</i> <i>Zifei Zhong (University of Texas, Austin, US)</i> <i>Hongxing Li (Nanjing University, CN)</i> <i>Guihai Chen (Nanjing University, CN)</i> <i>Edward Chan (City University of Hong Kong, HK)</i> <i>Aloysius Mok (University of Texas at Austin, US)</i>	

Session 2B: Internet Computing

A Network Connection Proxy to Enable Hosts to Sleep and Save Energy	101
<i>Miguel Jimeno (University of South Florida, US)</i> <i>Ken Christensen (University of South Florida, US)</i> <i>Bruce Nordman (Lawrence Berkeley National Laboratory, US)</i>	
Cooperative Monitoring for Internet Data Centers	111
<i>Kuai Xu (Arizona State University, US)</i> <i>Feng Wang (Arizona State University, US)</i>	
A Transient Overload Generator for Web Servers	119
<i>Paulo Farah (Faculdade Atual da Amazônia, BR)</i> <i>Cristina Murta (Federal Center for Technological Education, BR)</i>	

Session 2C: Application Layer and Network Management I

An Evaluation of Java RMI/JavaSpaces and Ruby DRb/Rinda	127
<i>Abhishek Jaiantilal (University of Colorado, US)</i>	

Yifei Jiang (*University of Colorado, US*)
Shivakant Mishra (*University of Colorado, US*)

Performance Models for the Instance Pooling Mechanism of the JBoss Application Server 135

Fábio Souza (*Universidade Federal de Pernambuco, BR*)
Roberto Arteiro (*Federal University of Pernambuco, BR*)
Nelson Rosa (*Federal University of Pernambuco, BR*)
Paulo Maciel (*Federal University of Pernambuco, BR*)

Massively Parallel Network Coding on GPUs 144

Xiaowen Chu (*Hong Kong Baptist University, HK*)

Session 3A: Wireless Ad Hoc / Mesh Networks I

Delay and Capacity Optimization in Multi-radio Multi-channel Wireless Mesh Networks 152

Weihuang Fu (*University of Cincinnati, US*)

Location Authentication Methods for Network Access Control 160

Lichun Bao (*University of California, Irvine, US*)

Neighborhood Route Diffusion for Packet Salvaging in Networks with High Mobility 168

Muhannad Quwaider (*Michigan State University, US*)
Jayanthi Rao (*Michigan State University, US*)
Subir Biswas (*Michigan State University, US*)

Session 3B: Effective and SECURE Routing

Simple and Effective Adaptive Routing Algorithms in Multi-Layer Wormhole Networks 176

Kyung Su (*University of Texas at San Antonio, US*)

Towards Green Routers: Depth-Bounded Multi-Way Pipelining for Power-Efficient IP Lookup 185

Weirong Jiang (*University of Southern California, US*)
Viktor Prasanna (*University of Southern California, US*)

KAEF: An En-route Scheme of Filtering False Data in Wireless Sensor Networks 193

Ting Yuan (*Fudan University, CN*)
Shiyong Zhang (*Fudan University, CN*)
Yiping Zhong (*Fudan University, CN*)
Jianqing Ma (*Fudan University, CN*)

Session 4A: P2P and Distributed Networks

Analysis of Peer-to-Peer Traffic Using a Behavioural Method Based on Entropy 201

João Gomes (*University of Beira Interior, PT*)

Pedro Inácio (*University of Beira Interior, PT*)
Mario Freire (*University of Beira Interior, PT*)
Manuela Pereira (*University of Beira Interior, PT*)
Paulo Monteiro (*Universidade de Aveiro, PT*)

A New Trust Framework Based on Reputation for Unstructured P2P Networks 209

Tian Chunqi (*Tongji University, CN*)

Theoretical and Experimental Evaluation of Communication-Induced Checkpointing Protocols in F_E Family 217

Yi Luo (*University of Kentucky, US*)
D. Manivannan (*University of Kentucky, US*)

Session 4B: Application Layer and Network Management II

Laboratory Measurements and Verification of PSI/SI Transmission in DVB-H Systems 225

Jani Väre (*Nokia, FI*)
Jyrki Alamaunu (*Senior Research Scientist, FI*)
Harri Pekonen (*Nokia, FI*)

A Group-aware Service Discovery Scheme in Ubiquitous Environment using Service Assignment 233

Hankyul You (*Information and Communications University, KR*)

Competitive Analysis of Fairness in FIFO Buffer Management 239

Fei Li (*George Mason University, US*)

Session 5A: Wireless Sensor Networks III

QELAR: A Q-learning-based Energy-Efficient and Lifetime-Aware Routing Protocol for Underwater Sensor Networks 247

Tiansi Hu (*University of Connecticut, US*)
Yunsi Fei (*University of Connecticut, US*)

UD-GEM: A Multi-Path Routing Algorithm for Wireless Sensor Networks 256

Qiang Ye (*University of Prince Edward Island, CA*)

An Efficient Key Distribution Scheme for Establishing Pairwise Keys with a Mobile Sink in Distributed Sensor Networks 264

Amar Rasheed (*Texas A&M University, US*)
Rabi Mahapatra (*Texas A&M University, US*)

Session 5B: Application Layer and Network Management III

Analysis on Probabilistic View Coverage for Image Sensing -- A Geometric Approach 271

Fulu Li (*Massachusetts Institute of Technology, US*)

Stability Analysis for Communication of Voice and Data Terminals with Packet 281

Reservation Multiple Access Protocol

Amirali Sharifi (*Sterne Kessler Goldstein and Fox P.L.L.C., US*)

Lightweight and Mutual Authentication Scheme for Mobile Radio Frequency Identification(mRFID) Systems **289**

Muhammad Ikram (*Ajou University, KR*)

Md. Aminul Haque Chowdhury (*Ajou University, KR*)

Hassen Redwan (*Ajou University, KR*)

Ki-Hyung Kim (*Ajou University, KR*)

Session 6A: Potpourri**Directional Double Metric Routing in Wireless Mesh Network** **297**

Dapeng Wang (*University of Science and Technology of China, CN*)

Shoubao Yang (*University of Science and Technology of China, CN*)

Yun Hu (*University of Science and Technology of China, CN*)

Peng Zhang (*University of Science and Technology of China, CN*)

Joint Adaptive Redundancy and Partial Retransmission for Reliable Transmission in Wireless Sensor Networks **303**

Hao Wen (*Tsinghua University, CN*)

Hongkun Yang (*Tsinghua University, CN*)

HSP2P: A High Scalability P2P Simulation Framework with Measured Realistic Network Layer Support **311**

Hao Gong (*Huawei Technologies Co., Ltd, CN*)

Guangyu Shi (*Huawei Technologies Co., Ltd, CN*)

Youshui Long (*Huawei Technologies Co., Ltd, CN*)

Session 6B: Transport Layer and Optical Burst Switches**Towards a Queue Sensitive Transport Protocol** **319**

Ritesh Kumar (*University of North Carolina at Chapel Hill, US*)

Jasleen Kaur (*University of North Carolina at Chapel Hill, US*)

Modeling and Performance Evaluation of Optical Burst Switched Ring Networks with Efficient Adaptive Routines **327**

Xingbo Gao (*University of Central Florida, US*)

Mostafa Bassiouni (*University of Central Florida, US*)

QoS Behavior of Optical Burst Switching under Multimedia Traffic: an Analytical Approach **335**

Aresh Dadlani (*University of Tehran, IR*)

Ahmad Khonsari (*University of Tehran, IR*)

Ali Rajabi (*University of Tehran, IR*)

Mohammadreza Aghajani (*SHarif University of Technology, IR*)

Workshop: The 1st Workshop on Dynamic Spectrum Access and Cognitive

Radio Networks

- Spectrum Handoff for Cognitive Radio Networks: Reactive-Sensing or Proactive-Sensing?** 343
Li-Chun Wang (*National Chiao Tung University, TW*)
Chung-Wei Wang (*National Chiao Tung University, TW*)
- Asynchronous Detection and Avoidance (DAA) Protocol for Interference Mitigation in Dynamic Spectrum Access** 349
Yu-Sheng Wang (*National Taiwan University, TW*)
Chun-Ting Chou (*National Taiwan University, TW*)
- Graph Theoretic Approach to QoS-Guaranteed Spectrum Allocation in Cognitive Radio Networks** 354
Sameer Swami (*University of Cincinnati, US*)
Chittabrata Ghosh (*University of Cincinnati, US*)
Rucha Dhekne (*University of Cincinnati, US*)
Dharma Agrawal (*University of Cincinnati, US*)
Ken Berman (*University of Cincinnati, US*)
- Spectral Sensing of Adaptive Frequency Hopping Signal for Cognitive Radio** 360
Kapil Jaiswal (*Indian Institute of Sciences, IN*)
- Universal Classifier Synchronizer Demodulator** 366
Qinqin Chen (*Virginia Polytechnic Institute and State University, US*)
Ying Wang (*Virginia Polytechnic Institute and State University, US*)
Charles Bostian (*Virginia Polytechnic Institute and State University, US*)
- Minimizing Energy Consumption Using Cognitive Radio** 372
An He (*Virginia Polytechnic Institute and State University, US*)
Xuetao Chen (*Virginia Polytechnic Institute and State University, US*)
Jeffrey Reed (*Virginia Polytechnic Institute and State University, US*)
Bill Tranter (*Virginia Polytechnic Institute and State University, US*)
Kyung Bae (*Virginia Polytechnic Institute and State University, US*)
Srikathyayani Srikanteswara (*Intel Corporation, US*)
Masoud Sajadieh (*Intel Corporation, US*)

Workshop: The 1st IEEE International Workshop on Generation C Wireless Networks

- Traffic Differentiating Queue For Enhancing AODV Performance in Real-Time Interactive applications** 378
Allaa R. Hilal (*German University in Cairo, EG*)
Amal El-Nahas (*German University in Cairo, EG*)
Ahmed Bashandy (*Cairo University, EG*)
Samir Shahin (*Cairo University, EG*)
- Discovering Resources in Tuple-Based Pervasive Systems using Resource-Aware Routing** 384
Saman Kolahdooz (*Iran University of Science and Technology, IR*)
Shahpour Rahmani (*Iran University of Science and Technology, IR*)

Mohsen Sharifi (*Iran University of Science and Technology, IR*)

Throughput Enhancement of Macro and Femto Networks By Frequency Reuse and Pilot Sensing 390

Tae-Hwan Kim (*Sungkyunkwan University, KR*)

Tae-Jin Lee (*Sungkyunkwan University, KR*)

RFID Reader Anti-collision Algorithm Using a Server and Mobile Readers Based on Conflict-Free Multiple Access 395

Jun-Bong Eom (*Sungkyunkwan University, KR*)

Tae-Jin Lee (*Sungkyunkwan University, KR*)

Automatic Generation of User's Profiles for Location-Based Adaptation of Multimedia Documents 400

Fayçal M'hamed Bouyakoub (*USTHB University, DZ*)

Abdelkader Belkhir (*USTHB University, DZ*)

Fuzzy Evaluation for Wireless Sensor Networks Based on Rough Set Theory 406

Lun Zhang (*Swiss Federal Institute of Technology, CH/Tongji University, CN*)

Yan Lu (*Tongji University, CN*)

Lan Chen (*Tongji University, CN*)

Tuning Data Reporting and Sensing for Continuous Monitoring in Wireless Sensor Networks 412

Teek P. Sharma (*Indian Institute of Technology, IN*)

Ramesh C. Joshi (*Indian Institute of Technology, IN*)

Manoj Misra (*Indian Institute of Technology, IN*)

Assessment Strategy with Markov Chain Utilized in Wireless Sensor Networks 418

Lun Zhang (*Swiss Federal Institute of Technology, CH/Tongji University, CN*)

Dongxiu Ou (*Tongji University, CN*)

Enhanced Scanning Scheme for Delay-Constrained Fast Handoff in IEEE 802.11 WLANs 422

Yazan M. Allawi (*Information and Communications University, KR*)

Min-Gon Kim (*Information and Communications University, KR*)

Minho Kang (*Information and Communications University, KR*)

Exploring Load Balancing in Heterogeneous Networks by Rate Distribution 427

Kuheli Louha (*University of Cincinnati, US*)

Jung Hyun Jun (*University of Cincinnati, US*)

Dharma P. Agrawal (*University of Cincinnati, US*)

Workshop: The 1st IEEE International Workshop on Network Security and Privacy

Practical Covert Channel Implementation through a Timed Mix-Firewall 433

Richard Newman (*University of Florida, US*)

Ira Moskowitz (*Naval Research Lab., US*)

Masquerading a Wired Covert Channel into a Wireless-like Channel 439

Mina Guirguis (*Texas State University, US*)

Jason Valdez (*Texas State University, US*)

A Proxy Agent for Small Network-Enabled Devices	445
Hong Qian (<i>Gemalto, Inc.</i>)	
Karen Lu (<i>Gemalto, Inc.</i>)	
Asad Ali (<i>Gemalto, Inc.</i>)	
Threshold Proxy Re-Signature	450
Piyi Yang (<i>Shanghai Jiao Tong University, US</i>)	
Zhenfu Cao (<i>Shanghai Jiao Tong University, US</i>)	
Xiaolei Dong (<i>Shanghai Jiao Tong University, US</i>)	
Support for Security and Privacy in SenSearch	456
Jyh-How Huang (<i>University of Colorado, US</i>)	
John Black (<i>University of Colorado, US</i>)	
Shivakant Mishra (<i>University of Colorado, US</i>)	
Proxy Aided Key Pre-distribution Schemes for Sensor Networks	462
Mahalingam Ramkumar (<i>Mississippi State University, US</i>)	
Subjective Audio Quality over Secure IEEE 802.11 Wireless Local Area Networks	469
Benjamin Ramsey (<i>Air Force Institute of Technology, US</i>)	
Barry Mullins (<i>Air Force Institute of Technology, US</i>)	
Activity-based Security Scheme for Ubiquitous Environments	475
Le Xuan Hung (<i>KyungHee University, KR</i>)	

Workshop: The 1st IEEE International Workshop on Information and Data Assurance

Distributed Detection of Replica Cluster Attacks in Sensor Networks Using Sequential Analysis	482
Jun-Won Ho (<i>The University of Texas at Arlington, US</i>)	
A Model to Use Denied Internet Traffic to Indirectly Discover Internal Network Security Problems	486
Chet Langin (<i>Southern Illinois University Carbondale, US</i>)	
Hongbo Zhou (<i>Southern Illinois University Carbondale, US</i>)	
Shahram Rahimi (<i>Southern Illinois University Carbondale, US</i>)	
Adaptive Access Control Scheme Utilizing Context Awareness in Pervasive Computing Environments	491
Jung Hwan Choi (<i>Sungkyunkwan University, KR</i>)	
Dong Hyun Kang (<i>Sungkyunkwan University, KR</i>)	
Hyunsu Jang (<i>Sungkyunkwan University, KR</i>)	
Young Ik Eom (<i>Sungkyunkwan University, KR</i>)	
On the Formal Verification of a Cluster Based Key Management Protocol for Wireless Sensor Networks	499
Reiner Dojen (<i>University of Limerick, IE</i>)	
Fan Zhang (<i>University of Limerick, IE</i>)	
Tom Coffey (<i>University of Limerick, IE</i>)	
The Scalability of Secure Lock	507

Cory Antosh (*Air Force Institute of Technology, US*)

Barry Mullins (*Air Force Institute of Technology, US*)

Mitigating Evil Twin Attacks in 802.11

513

Kevin Bauer (*University of Colorado, US*)

Harold Gonzales (*University of Colorado, US*)

Damon McCoy (*University of Colorado, US*)

Noise-Resistant Payload Anomaly Detection for Network Intrusion Detection Systems

517

Sun-il Kim (*University of Alabama in Huntsville, US*)

Nnamdi Nwanze (*State University of New York at Binghamton, US*)

Towards Mathematically Modeling the Anonymity Reasoning Ability of an Adversary

524

Douglas Kelly (*Air Force Institute of Technology, US*)
