

Fourth International Conference  
on  
**Wireless Communication  
and  
Sensor Networks  
( WCSN-2008 )**

December 27-29, 2008

Jointly organized by by IIITA (Allahabad) and DAVV (Indore)  
at the Indian Institute of Information Technology, Allahabad, India

**A IIIT Allahabad Publication**

# TABLE OF CONTENTS

|                                                                                                                                          |           |
|------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Base Station Initiated Dynamic Routing Protocol for Heterogeneous Wireless Sensor Network using Clustering .....</b>                  | <b>1</b>  |
| <i>Shirshu Varma, Neelam Nigam, U S Tiwary</i>                                                                                           |           |
| <b>Security Topology in Wireless Sensor Networks with Routing Optimisation.....</b>                                                      | <b>7</b>  |
| <i>M Ismail, M Y Sanavullah</i>                                                                                                          |           |
| <b>Distributed Energy Efficient Routing in Ad Hoc Networks .....</b>                                                                     | <b>16</b> |
| <i>Radhika D Joshi, Priti P Rege</i>                                                                                                     |           |
| <b>An Efficient Hybrid MAC Layer Protocol Utilized for Wireless Sensor Networks .....</b>                                                | <b>22</b> |
| <i>Ketan Sarvakar, Pravesh S Patel</i>                                                                                                   |           |
| <b>A Decentralised Clustered and Hash-based Intrusion Detection System for Wireless Sensor Networks .....</b>                            | <b>27</b> |
| <i>S V Patel, Kamlendu Pandey, V R Rathod</i>                                                                                            |           |
| <b>Node Stability Based Clustering Algorithm for Mobile Ad Hoc Networks.....</b>                                                         | <b>31</b> |
| <i>Meenu Chawla, Jyoti Singhai, Sweta Jain, Amitabh Shrivastava</i>                                                                      |           |
| <b>Design of Low Power Multiplier with Reduced Spurious Transition Activity Technique for Wireless Sensor Network.....</b>               | <b>36</b> |
| <i>S Saravanan, M Madheswaran</i>                                                                                                        |           |
| <b>A Dynamic, Real-time and On-demand Heuristic Broadcasting Scheme for Multiple Data-item Transactions in Wireless Environment.....</b> | <b>40</b> |
| <i>Siba K Udgata</i>                                                                                                                     |           |
| <b>A Balanced 1-Hop Clustering Scheme for Mobile Ad hoc Network.....</b>                                                                 | <b>45</b> |
| <i>Siba K Udgata, T Mallikarjun</i>                                                                                                      |           |
| <b>Data Clustering in Sensor Networks using ART .....</b>                                                                                | <b>51</b> |
| <i>Manish Kumar, Shekhar Verma, P P Singh</i>                                                                                            |           |
| <b>Perfect Difference Set – Network for Wireless Sensor Networks .....</b>                                                               | <b>57</b> |
| <i>Sudhir G Akojwar, Rajendra M Patrikar</i>                                                                                             |           |
| <b>Sweep Line Algorithm for k-Coverage in Wireless Sensor Networks .....</b>                                                             | <b>63</b> |
| <i>Rameshwar Nath Tripathi, S V Rao</i>                                                                                                  |           |
| <b>Reconfigurable Wireless Sensor Network Node based on NIOS Core .....</b>                                                              | <b>67</b> |
| <i>P Muralidhar, C B Rama Rao</i>                                                                                                        |           |
| <b>Efficient Localization Scheme for Wireless Sensor Networks.....</b>                                                                   | <b>73</b> |
| <i>S Ganesh</i>                                                                                                                          |           |
| <b>Length-Based Anchor-Free Distributed Localization in a Covered Sensor Network.....</b>                                                | <b>77</b> |
| <i>B Sau, K Mukhopadhyaya</i>                                                                                                            |           |
| <b>Traffic Based Clustering in Wireless Sensor Network.....</b>                                                                          | <b>83</b> |
| <i>Vijay Kr Chaurasiya, S Rahul Kumar, Shekhar Verma, G C Nandi</i>                                                                      |           |
| <b>Wireless Sensor Network Prototype in Virtual Automation Networks: Implementation and Coexistence Aspects .....</b>                    | <b>89</b> |
| <i>Vishwas Lakkundi, Jan Beran, Marko Krätzig</i>                                                                                        |           |
| <b>Maximizing Anonymity of a Vehicle .....</b>                                                                                           | <b>95</b> |
| <i>Brijesh Kumar Chaurasia, Shekhar Verma, S M Bhakser</i>                                                                               |           |

|                                                                                                                             |            |
|-----------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Implementation and Analysis of Practical Algorithm for Data Security .....</b>                                           | <b>99</b>  |
| <i>Willi Ballenthin, Foti Kacani, Julia Albath, Sanjay Madria</i>                                                           |            |
| <b>MILD Based Sliding Contention Window Mechanism for QoS in Wireless LANs.....</b>                                         | <b>105</b> |
| <i>Meenakshi Bharatiya, Sunita Prasad</i>                                                                                   |            |
| <b>A System for Locating Users of WLAN using Statistical Mapping in Indoor and Outdoor Environments-LOIDS.....</b>          | <b>111</b> |
| <i>K Krishna Naik, M N Giri Prasad</i>                                                                                      |            |
| <b>Security Enhancements in GSM Cellular Standard .....</b>                                                                 | <b>116</b> |
| <i>Musheer Ahmad, Izharuddin</i>                                                                                            |            |
| <b>GPS-less Animal Tracking System .....</b>                                                                                | <b>120</b> |
| <i>Apurva Joshi, Naga VishnuKanth I, Navkar Samdaria, Sumit Bagla, Prabhat Ranjan</i>                                       |            |
| <b>Smart Vibration Sensor with Wireless Communication for Recording and Analyzing Train Vibration .....</b>                 | <b>126</b> |
| <i>Alka Dubey, Ashish Verma</i>                                                                                             |            |
| <b>A New Algorithm of Encryption in Non-Cooperation IFF System.....</b>                                                     | <b>129</b> |
| <i>Zhang Ya, Li Bo, Li ShiZhong</i>                                                                                         |            |
| <b>Message Broadcast in VANETs using Group Signature .....</b>                                                              | <b>131</b> |
| <i>Brijesh Kumar Chaurasia, Shekhar Verma, S M Bhakser</i>                                                                  |            |
| <b>Performance Study of Space-Time Trellis Coded MC-CDMA System Employing Different Detection Techniques .....</b>          | <b>137</b> |
| <i>Lokesh Kumar Bansal, Aditya Trivedi</i>                                                                                  |            |
| <b>Dynamic Spectrum Management Scheme in a Smart Software Radio .....</b>                                                   | <b>141</b> |
| <i>Hemalatha Rallapalli, K Lal Kishore</i>                                                                                  |            |
| <b>Performance Analysis of Space-Time Trellis Codes with Receive Antenna Selection .....</b>                                | <b>148</b> |
| <i>A S Hiwale, A A Ghatol, S D Bhad</i>                                                                                     |            |
| <b>Performance Analysis of MIMO Space Diversity Technique for Wireless Communications .....</b>                             | <b>153</b> |
| <i>Vibhav Kumar Sachan, Ankur Gupta, Avinash Kumar</i>                                                                      |            |
| <b>Performance Analysis of OFDMA System with Multiple Data Rate in Rayleigh Fading Channel .....</b>                        | <b>157</b> |
| <i>R J Susan, Sakuntala S Pillai</i>                                                                                        |            |
| <b>Rate Adaptive Resource Allocation for Multiuser OFDM using NSGA – II .....</b>                                           | <b>161</b> |
| <i>Nitin Sharma, Adithya Rao, Akshat Dewan, Mustafa Safdari</i>                                                             |            |
| <b>Reduced Tree-Search, Heuristic and Linear Decoupler Low-Complexity MIMO Detectors .....</b>                              | <b>167</b> |
| <i>Isaque Suzuki, Fernando Ciriaco, Taufik Abrao, Leonardo D. de Oliveira</i>                                               |            |
| <b>GA, SA, and TS Near-Optimum Multiuser Detectors for S/MIMO MC-CDMA Systems.....</b>                                      | <b>173</b> |
| <i>Taufik Abrao, Fernando Ciriaco, Leonardo D. Oliveira, Bruno A. Angelico, Paul Jean E. Jeszensky, Fernando Casadevall</i> |            |
| <b>An Equilateral Triangular Patch Antenna with T-Shaped Notch for Enhanced Gain .....</b>                                  | <b>179</b> |
| <i>Pramendra Tilanthe, P C Sharma</i>                                                                                       |            |
| <b>Spectrum Hand-off Schemes and Optimum Utilization of Spectrum Holes in Cognitive Radio Networks .....</b>                | <b>181</b> |
| <i>Chhavi Viz, Siba K Udgata</i>                                                                                            |            |
| <b>Analysis of MIMO Capacity for Spatial Channel Model with Partial CSI Knowledge .....</b>                                 | <b>187</b> |
| <i>Rajiv Saxena, Ravi Kumar</i>                                                                                             |            |
| <b>Multiple Spreading Codes-based MAC Protocol for Wireless Networks .....</b>                                              | <b>192</b> |
| <i>Geetam Singh Tomar, Shekhar Verma, Brijesh Kumar Chaurasia, Abinit Kumar</i>                                             |            |

|                                                                                                                                |            |
|--------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Performability and Survivability Analysis of GSM .....</b>                                                                  | <b>196</b> |
| <i>Neetesh Purohit, Sanjiv Tokekar</i>                                                                                         |            |
| <b>A New Measure of Survivability for a Cellular Network .....</b>                                                             | <b>201</b> |
| <i>Neetesh Purohit, Sanjiv Tokekar</i>                                                                                         |            |
| <b>Forward Link Performance of Packet Data in Presence of Soft Handoff in Cellular CDMA .....</b>                              | <b>206</b> |
| <i>Srinivas Nallagonda, Sanjay Dhar Roy, Sumit Kundu</i>                                                                       |            |
