TABLE OF CONTENTS

VOLUME 1

AUTOMOTIVE EMANATIONS & TESTING

Moving Forward with New Low Emissions Amine Catalyst Technology	1
<i>Ron Herrington, Gabor Felber, Ernie Rister</i>	
New Polyurethane Systems Based on Catalytically Active Polyols for Low VOCs Application In the Automotive Market	28
<i>Joon-mo Lee, Jeongmoo Kim, Sang-hyun Lee, Changha Park</i>	
Accelerated Aging of Moulded Foam: Selection of Parameters for a Value-Added Test	39
<i>G. Ron Blair, Bob Dawe, Jim McEvoy, Brian Neal, Roy Pask, Mark Weierstall</i>	
The Time Is Right for Harmonization of Foam Standards	70
<i>Roy Pask, G. Ron Blair, Mark Weierstall</i>	
Fast Cycle Time Low Density Automotive NVH Solutions with Excellent Acoustic Properties	81
<i>Helmut Stegt, Allan James</i>	

AUTOMOTIVE IP'S & PROCESSING

Improvements in Spray Polyurethane Technology	92
<i>John Erickson</i>	
Adhesion of Polyurethane Foam with Skin and Substrate Materials In Automotive Composite Instrument Panels	98
<i>C. D. Thomas, K. Kiszka, S. Burks, B. Weinlander, T. Fowler</i>	
An Evaluation of a New Tubular Energy Absorber/Polyurethane Foam Composite for Meeting Pedestrian Lower Leg Impact Requirements	113
<i>Paul Glance, Jack Jenny</i>	
Use of Solid Fillers in the Automotive industry	127
<i>Bjoern Dormann, Christian Decker</i>	

AUTOMOTIVE RENEWABLES

New Horizons for the Use of Bio-Polyols in Automotive Foams	132
<i>Romeo Stanciu, Hamdy Khalil, Liberato Mendoza, Jack Dai, Ricardo DeGenova, Tim Abraham</i>	
The Nobel Flexible Polyurethane Foam for the Environment-Friendly Automotive Seat Cushions	140
<i>Shinichi Egawa, Keita Ishibashi, Naoya Yoshii</i>	
Natural Oil Based Polyurethane Pad for Automotive Seat Application	148
<i>Kazuto Usaka, Hideaki Ootsuka, Hiroyuki Utsumi, Takashi Inoh, Yoshiyuki Murata, Tsuguyoshi Sakai, Daisuke Takagi</i>	
Advances in the Development of RENUVA™-Based Polyols for Molded Foam Applications	157
<i>Francois Casati, Bob Dawe, Sabrina Fregni, Dwight Latham, Yoshiaki Miyazaki</i>	
New Cell-Opening Surfactants for the Production of Water-Blown, Dimensionally-Stable Polyurethane Foams	165
<i>William Brown</i>	

CASE 1

Bismuth as an Alternative Polyurethane Catalyst.....	174
<i>Nathan Eckert, Robert Hart</i>	
High-Pressure Processing for CASE Applications	184
<i>Steve Willis, Thomas Elfroth</i>	
Novel Aliphatic Polyurethane Elastomers Based on 1,3 and 1,4-Bis (Isocyanatomethyl) Cyclohexane: Mechanical Properties and Phase Structures	193
<i>Rui Xie, Debkumar Bhattacharjee, John Argyropoulos, Lizhi Liu, Shouren Ge</i>	
High Performance Polyurethane Dispersion Having Polycarbonate Structure for Water- Based Coatings	206
<i>Naotaka Izumi, Iku Oki, Takaki Jono</i>	
Industrial Cyclocarbonate Based Polymers Including Nonisocyanate Materials.....	216
<i>Oleg Figovsky, Leonid Shapovalov</i>	

CASE 2

Morphology and Mechanical Properties of SPUA Postcure.....	226
<i>Qing Zhou, Hairong Liu, Xiaofeng Zhang, Ping Zhang, Jianming Yu</i>	
Characteristics of Dispersible Polyurethane Powders for Waterborne Systems	238
<i>Dai Soo Lee, Gwang Seok Song</i>	
Modern Titrimetric Polyol Analyses	243
<i>Ross Koile</i>	
Polyurethanes Based on Fish Polyols.....	247
<i>Tomas Vlcek, Jiri Zelenka, Katerina Zetkova, Ragnar Olason, Ragnar Gudmundsson</i>	

CHEMISTRY AND FUNDAMENTALS

Compression Recovery of Viscoelastic Foams	251
<i>Rajat Duggal, Bernard Obi, Asjad Shafi, Cora Leibig, Rudolf Koopmans</i>	
Rheology Study In Polyurethane Rigid Foams.....	263
<i>Rajat Duggal, Bernard Obi, Asjad Shafi, Cora Leibig, Rudolf Koopmans</i>	
Wood Flour and Multi-walled Carbon Nanotube (MWCNT) Filled Rigid Polyurethane Foam.....	275
<i>Jiang Yuan, Sheldon Shi, Sangyeob Lee</i>	
Study on the Thermal Self-Polymerization of MDI Using the Computational Chemistry	284
<i>Satoshi Murayama, Yuu Yanagihara</i>	
Microphase-Separated Structure and Mechanical Properties of Novel Poly (Carbonate- Based Polyurethanes)	295
<i>Mutsuhisa Furukawa, Ken Kojio, Tetsuo Masubuchi, Machiko Sakai</i>	

CONSTRUCTION 1

Novel Natural-Oil Based Rigid Foams for Demanding Applications: A Class I Polyisocyanurate Foam for Insulated Metal Building Panels	303
<i>David Sounik</i>	

Aromatic Polyester Polyols with High Aromatic Content and High Functionality for all Rigid Foam Applications	312
<i>Manuel Chumacero, David Shieh, Richard Donald</i>	
Comparison of Blowing Agent Performance In Isocyanurate Foams Used In the Production of Rigid Faced Continuous Panels	324
<i>Todd Volz, Michael Skowronski</i>	
New Developments in Polyisocyanurate Laminate Foam Formulations and Processing	336
<i>Sachchida Singh, Sheila Dubs, Jerry Pilgrim</i>	
Silicone Surfactants for Balancing Physical Properties Versus Flammability Performance In Rigid PUR Foam for Construction Applications	351
<i>Jean Vincent, John Miller, Tortsen Panitzsch, Roy LaRue, Mike Lafore</i>	

CONSTRUCTION 2

Effects of Natural Oil Polyols on Properties of Polyisocyanurate Foams	363
<i>Tim Lambert, Laurie Hill, Jennifer Yao, Guido Lipske</i>	
Novel Additive Technology Designed To Optimize the Use of Natural Oil Polyols In Support of the Construction Market	376
<i>Christian Eilbracht, Carsten Schiller, Peter Hohl</i>	
Industry Study of Compatibility of Spray Polyurethane Foam with CPVC.....	385
<i>Chris Porter, Roger Morrison</i>	
Novel Polyether Polyol for High Performance Rigid Polyurethane Foams.....	396
<i>Hiroshi Wada, Yoshinori Toyota, Yuko Miyamoto, Ketchikan Shimizu, C. Suzuki</i>	

CONSTRUCTION 3

Energy and Environmental Benefits of Insulating Commercial Roofing with Polyiso	407
<i>Jerry Phelan, George Pavlovich</i>	

VOLUME 2

New Commercial Energy Code Requirements: Growth Opportunity for PIR/PUR Insulation	457
<i>Lorraine Ross</i>	
The Role of Life Cycle Assessment In Quantifying the Value of Building Energy Efficiency Measures	466
<i>Paul Ashford</i>	
Effect of Tertiary Amine Catalysts on Performance of Spray Polyurethane Foams	474
<i>Katsumi Tokumoto, Masaki Ishida</i>	
Comparative Evaluation of Various Flame Retardants for Pour-In-Place and Spray Foam Applications	482
<i>Augusto Ibay, Ravi Joshi</i>	

ENVIRONMENT, HEALTH & SAFETY

Trade Association Outreach.....	490
<i>William Robert, Jean Kasakevich, Cynthia Graham</i>	

CPI/SPFA Spray Polyurethane Foam Insulation Emissions Testing Project	494
<i>Brian Karlovich</i>	
The Globally Harmonized System of Classification and Labeling of Chemicals (GHS)	498
<i>Jayne Clifton</i>	
Elastomeric Revetments - An Innovative Solution for Coastal Protection and Erosion Control	500
<i>Steven Hicks, David Bower, Marcus Leberfinger</i>	
OSHA Alliances - A Success Story for the Truck Bed Liner Industry	506
<i>Stephanie Bernard</i>	

FLAME RETARDANTS AND COMBUSTIBILITY

Development of Fire Safety Requirements In Europe for Application of PUR Foams In Construction	509
<i>Edith Antonatus</i>	
Recap of the 2008 International Building and Fire Code Hearings	523
<i>Lorraine Ross</i>	
Halogen-Free, High-Efficiency, Low-Scorch FR for Flexible Polyurethane Foams	527
<i>Maurice Venegas, Hoover Chew, Ravi Joshi, Susan Landry</i>	
Sustainable Flame Retardant Development for the Rigid Polyurethane Market	533
<i>Barbara Williams, Michael Nagridge, Jeffrey Stowell, Joop Wuestenenk, Mark Gelmont</i>	

FLEXIBLE FOAM

The Global Flexible Foam Industry - Is Quality Not Quantity the Real Industry Driver?	539
<i>Angela Austin</i>	
Is Comfort Taking a Back Seat in Home Furnishings?	547
<i>Raymond Neff, Steven Wujcik, Theodore Smiecinski, Roy Pask</i>	
Anti Cold Flow Additive	560
<i>Jochen Wilms, Johannes Buescher, Erin Kelly</i>	
Novel Amine Catalyst for Low Emanation Flexible Polyurethane Foam	567
<i>Annegret Terheiden, Ruediger Landers, Hans Schloens, Roland Hubel</i>	
Highly Porous Super-Soft Viscoelastic Foam Development	576
<i>Bernard Obi, Alan Schrock, Asjad Shafi, Rogelio Gamboa</i>	

FOOTWEAR

Economic Production of Wellington Boots Out of Polyurethane	585
<i>Bjoern Dormann, Christian Decker</i>	
New Amine-Based Catalysts for Low-density, Water-Blown Microcellular Foam Used in Shoe Soling Applications	589
<i>Michael Dimitroff</i>	
New Thermoplastic Polyurethane (TPU) from Renewable Sources	609
<i>Jesus Santamaria</i>	
Environmental Production of Sports-Footwear by Using Polyurethanes	621
<i>Christian Decker, Bjoern Dormann</i>	

What Position Will Polyurethane Have in the Footwear Industry Over the Next 5-10 Years?	626
<i>Steve Lee</i>	

INSULATION OPTIONS

Development of a Novel Foam Expansion Agent for Polyurethane Foams	631
<i>Mark Robin, Gary Loh, Joseph Creazzo</i>	
HBA-1 Blowing Agent Commercialization Status	639
<i>James Bowman, David Williams</i>	
Zero Ozone Depletion Potential Chemical and Equipment Technology for the Commercial Refrigeration Market	646
<i>Eric Rexrode, Dave Snider</i>	
Investigation of New Low GWP Blowing Agents for Rigid Polyurethane Foams	663
<i>Ben Chen, Joseph Costa, Philippe Bonnet, Maher Elsheikh, Laurent Abbas</i>	
A Comparison of Physical Properties [and their causative factors] of Froth v Pour Foams	671
<i>John Murphy</i>	

PROCESSING INNOVATIONS

Fully Automatic Production of Industrial Spring Aids Made of Micro Cellular Elastomers	685
<i>Christian Decker, Bjoern Dormann</i>	
New Innovations in Rigid Polyurethane and Cavity Fill Processing Equipment	688
<i>Michael Ruby, Theron Sherman</i>	
Innovative Technology for Multi-PUR Sound Deadening Components for Large Engines: Combining Innovative Processes to Develop a Turnkey Solution	693
<i>Massimo Taverna, Barry Pile</i>	
Laboratory RRIM Machines	698
<i>Otto Huiber</i>	

RENEWABLE CONTENT POLYOLS 1

Development of Natural Oil Polyols for Viscoelastic Foams Using RENUVA™ Technology	705
<i>Vinicius Serves, Stephen Lewis, Paul Cookson, David Babb, Bernard Obi, Ike Latham</i>	
New Polyols Based on High Renewable Content for the Production of High Resilience Flexible Slabstock Foams	714
<i>William Gower, Ricardo De Genova</i>	
Renewable Polyols for Polyurethane Flexible Foam	727
<i>Theodore Smiecinski, Raghu Gummaraju, Diane Langer</i>	
Natural Oil-Derived Diols for Renewable Polyurethane Products	740
<i>William Downey, Christofer Megson</i>	

Production and Evaluation of New Natural Oil Derived Polyols for Flexible Slabstock Foam	749
<i>Stanley Hager, Jack Reese, Susan McVey, Micah Moore, Richard Skorpenske, Nathan Chaffin</i>	

RENEWABLE CONTENT POLYOLS 2

The Measurement of Renewable Content In Natural Oil Polyols and Foams	766
<i>Juan Carlos Medina, David Babb, Hongming Ma, Bernard Obi</i>	
Eco-Efficiency Analysis Demonstrates the Environmental Benefits of Flexible Furniture Foams Made with BALANCE™ 50 Polyol	773
<i>Christopher Bradlee, Victoria Manea, Lauren M. Kloock</i>	
Honey Bee 230 and Honey Bee 150: Reactivity of Soy Based Polyols	783
<i>Xian Xian Du, Thomas Garrett</i>	
How Soybean Oil Polyol Changes Foaming Kinetics in Polyurethane Flexible Foams?	794
<i>Ling Zhang, Chris Macosko, Timothy Abraham, Gary Johnson, Mark Listemann</i>	
Natural Oil Polyol of High Reactivity for Rigid Polyurethane	801
<i>Ning Luo, Jianghong Qian, Jay Cupps, Yuling Wang, Bing Zhou, Larry Armbruster, Peter Frenkel</i>	

POSTER ABSTRACTS

Anti-Dripping and Flame-Retarded Thermoplastic Polyurethane	809
<i>Yung-Lung Chou, Ruei-Shin Chen</i>	
Design of Polyurethane-Based Composite Utility Poles for 80 Years and Beyond	810
<i>Mark Brown</i>	
Effect of Clay and Silica Micro and Nano Fillers on Properties of Flexible Molded Polyurethane Foams	811
<i>Ivan Javni, Kevin Song, Jie Lin, Zoran Petrovic</i>	
Is Comfort Taking a Back Seat In Home Furnishings?	812
<i>Raymond Neff, Steven Wujcik, Theodore Smieciniski, Roy Pask, Raghu Gummaraju</i>	
New Polyurethane System Based High Reactive Polyols for Low VOCs Application In the Automotive Market	813
<i>Joon-mo Lee, Jeongmoo Kim, Sang-hyun Lee, Changha Park, Inha Park</i>	
Polyurethane Foams with Reactive Resins for Casting and Adhesive Applications	814
<i>Ibrahim Sendijarevic, Aisa Sendijarevic, Vahid Sendijarevic</i>	
The Effect of Diisocyanate Isomer on Morphology and Viscoelastic Properties of Polyurethanes Based on 4,4'-Dicyclohexylmethane Diisocyanate	815
<i>Kazuyoshi Shiga, Ryo Murakami, Tetsuro Abe, Takashi Sasaki, Mikio Yamada</i>	
Water Stable Mercury Replacement Catalysts	816
<i>Paul Armitage, Joseph Atkinson, Rob Duncan, Arran Tulloch, Richard Ward</i>	
A Comparison of Physical Properties [and their causitive factors] of Froth v Pour Foams	817
<i>John Murphy</i>	
Commercialization: Low Global Warming Potential Blowing Agent	818
<i>J.M. Bowman, Dave Williams</i>	
Effect of Tertiary Amine Catalysts on Performance of Spray Polyurethane Foams	819
<i>Katsumi Tokumoto, Yutaka Tamano, Roger Van Maris, Ken Gay</i>	

Energy and Environmental Benefits of Insulating Commercial Roofing with Polyiso	820
<i>Jerry Phelan, George Pavlovich</i>	
Intumescent PU Based Raw Material System for the Production of Fire Resistant Articles	821
<i>Heiko Tebbe, John Sawaya</i>	
Moisture Curing, Liquid Polyurethane Adhesives for Structural Wood Bonding Applications	822
<i>Wu Suen, Charles Paul</i>	
Novel Polyether Polyol for High Performance Rigid Polyurethane Foams	823
<i>Hiroshi Wada, Yuko Miyamoto, Katuhiko Shimizu, Chitoshi Suzuki, Yoshinori Toyota</i>	
Property Modification of Conventional Oil Based Polyurethane Using Novel Flame Retardant Polyurethanes	824
<i>Hiteshkumar Patel, Rasmika Patel</i>	
Rigid Foam's Role in the New Energy Economy	825
<i>N/A</i>	
The Role of Catalysts in Improving Polyurethane Spray Foam	826
<i>Bulent Ozbas, Andrew Gary, Juan Burdeniuc, Jean Vincent, Goran Zarkov, Kim Eckart</i>	
Bio-Based Thermoplastic Polyurethane Elastomers	827
<i>Zoran Petrovic, Yijin Xu, Ivana Cvetkovic</i>	
Effects of Natural Oil Polyols on Properties of Polyisocyanurate Foams	828
<i>Tim Lambert, Jennifer Yao</i>	
Life Cycle Climate Performance of Cold Storage Panels Insulated with Rigid Polyurethane Foam Containing Hydrofluorocarbon and Hydrocarbon Blowing Agents	829
<i>Paul Ashford, Mike Cartmell, Tom Werkema</i>	
Polyurethane Recycling Options for Today, Tomorrow and the Future	830
<i>N/A</i>	
Renewable Catalytic Polyol	831
<i>Nicholas Kob, Haibo Zhao, Ron Herrington</i>	
Synthesis of S.Cilliar Fiber Reinforced Green Polymer Matrix Based Composites	832
<i>Vijay Kumar Thakur, Amar Singh Singha</i>	
The Globally Harmonized System of Classification and Labeling of Chemicals (GHS) Examples of Polyurethane Products	833
<i>Jayne Clifton</i>	
The Needed Technologies To Prevent Global Warming Related To House Insulation Using TWPG and CWP Analyses	834
<i>Akira Sekiya, Sayuri Okamoto</i>	
Alternative Catalysts To Mercury and Tin for 2K Urethane Systems	835
<i>John Florio</i>	
Aromatic Polyester Polyols with High Aromatic Content and High Functionality for all Rigid Foam Applications	836
<i>David Shieh, Richard Donald, Manuel Chumacero</i>	
Catalyst Effect on Carbonated Soybean Oil and Amine Reaction	837
<i>Ivan Javni, Ji Ye, Do Pyo Hong, Zoran Petrovic</i>	
Glycerine Carbonate - A Unique and Versatile Chemical	838
<i>Mark Posey, Haibo Zhao, Vincent Zhang</i>	
New Catalyst for Polyurethane System	839
<i>S. Dhamotharan</i>	

New Polyols for Polyurethanes with Polyacetal Structure	840
<i>M. Ionescu, S. Sinharoy, Z.S. Petrovic</i>	
Review of Silylated Polyurethane Prepolymers	841
<i>Misty Huang</i>	
UV Curable Polyurethane Dispersions from Dimer Acid Based Derivatives	842
<i>Erwin Honcoop, Wolfgang Geuking, William McNamee</i>	
Economic Production of Highest Quality Industrial Spring Aids Made of MCE Micro Cellular Elastomers	843
<i>Christian Decker, Bjoern Dormann</i>	
Environmental Production of Sports-Footwear by Using Polyurethanes	844
<i>Christian Decker, Bjoern Dormann</i>	
New Innovations in Rigid Polyurethane and Cavity Fill Processing Equipment	845
<i>Michael Ruby, Theron Sherman</i>	
Revealing More Insight into Foam Generation by Using an Advanced Test Container	846
<i>Erland Hofmann, Jeff Gross</i>
