## TABLE OF CONTENTS

### IRON AND NICKEL ALUMINIDES

|                                                                                                                                                       |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Strengthening Mechanisms for Fe-Al-Based Alloys With Increased Creep Resistance at High Temperatures</b> .....                                     | 1  |
| <i>Martin Palm, Ronny Krein, Srdjan Milenkovic, Gerhard Sauthoff, Doty Risanti, Charles Stallybrass, André Schneider</i>                              |    |
| <b>Microstructure and Mechanical Properties of an Extruded Fe<sub>30</sub>Ni<sub>20</sub>Mn<sub>25</sub>Al<sub>25</sub> Alloy</b> .....               | 13 |
| <i>J.A. Loudis, T.C. Boyd, D.A. Coen, I. Baker</i>                                                                                                    |    |
| <b>Microstructure Control Using Precipitate Phases for the Development of Heat Resistant Fe<sub>3</sub>Al-Based Alloys</b> .....                      | 19 |
| <i>Satoru Kobayashi, Stefan Zaefferer</i>                                                                                                             |    |
| <b>Strengthening at High Temperatures in an Iron-Aluminium Alloy by the Precipitation of Stable and Coherent Intermetallic Particles</b> .....        | 25 |
| <i>David G. Morris, Maria A. Muñoz-Morris, Luis M. Requejo</i>                                                                                        |    |
| <b>Effects of Dislocation and Microstructure on Pseudoelasticity in D0<sub>3</sub>-Type Fe<sub>3</sub>Al Single Crystals</b> .....                    | 31 |
| <i>Yukichi Umakoshi, Takashi Nakajima, Hiroyuki Y. Yasuda</i>                                                                                         |    |
| <b>Texture Memory Effect During Heat Treatment in the Heavily Cold Rolled Ni<sub>3</sub>Al Foils</b> .....                                            | 37 |
| <i>Masahiko Demura, Ya Xu, Kyosuke Kishida, Toshiyuki Hirano</i>                                                                                      |    |
| <b>Compression Creep Behavior of B2 Al-Ni-Ru Ternary Alloys</b> .....                                                                                 | 43 |
| <i>Fang Cao, Tresa M. Pollock</i>                                                                                                                     |    |
| <b>Modifications of Surface Microstructure and Properties Induced by High Current Pulsed Electron Beam (HCPEB) Treatments of Intermetallics</b> ..... | 49 |
| <i>Thierry Grosdidier, Jianxin Zou, Gang Ji, Kemin Zhang, Xiangdong Zhang, Shengzhi Hao, Chuang Dong</i>                                              |    |
| <b>High Temperature Sulfidation Resistance of DO<sub>3</sub>-Ordered FeAl Tested in H<sub>2</sub>S-Rich Gases</b> .....                               | 55 |
| <i>Pierre-Yvan Thery, Anna Fraczkiwicz, Cecile Genevois, Xavier Longaygue, Francois Ropital</i>                                                       |    |
| <b>Synthesis of FeAl Hetero-Nanostructured Bulk Parts via Spark Plasma Sintering of Milled Powder</b> .....                                           | 61 |
| <i>Thierry Grosdidier, Gang Ji, Frédéric Bernard, Sébastien Launois</i>                                                                               |    |
| <b>TEM Observation of Vacancy Clustering Process in FeAl Single Crystal</b> .....                                                                     | 67 |
| <i>Masafumi Tsunekane, Kyosuke Yoshimi, Kouichi Maruyama</i>                                                                                          |    |

## **THEORY**

|                                                                                                                                      |            |
|--------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>First-Principle Theory of Phase Stability, Phase Equilibria and Phase Transition of Ordered Compounds .....</b>                   | <b>73</b>  |
| <i>Tetsuo Mohri</i>                                                                                                                  |            |
| <b>Structural Transformations and Improved Ductility in Ordered FeCo and ZrCo Intermetallics.....</b>                                | <b>85</b>  |
| <i>Maja Krcmar, Chong Long Fu, James R. Morris</i>                                                                                   |            |
| <b>The Effect of Constraints on Plastic Deformation .....</b>                                                                        | <b>91</b>  |
| <i>Vaclav Paidar</i>                                                                                                                 |            |
| <b>Precipitation-Induced Nano-Twinning .....</b>                                                                                     | <b>97</b>  |
| <i>Franz Dieter Fischer, Fritz Appel, Helmut Clemens</i>                                                                             |            |
| <b>Evolution and Interaction of Dislocations in Intermetallics: Fully Anisotropic Discrete Dislocation Dynamics Simulations.....</b> | <b>103</b> |
| <i>Qian Chen, Bulent Biner</i>                                                                                                       |            |
| <b>The Role of Phase Stability in Ductile, Ordered B2 Intermetallics .....</b>                                                       | <b>109</b> |
| <i>James R. Morris, Yiyang Ye, Maja Krcmar, Chong Long Fu</i>                                                                        |            |

## **MAGNETIC INTERMETALLICS**

|                                                                                                                                                                    |            |
