

**2009 7th IEEE/ACM
International Conference on
Formal Methods and Models for
Codesign**

(MEMOCODE 2009)

**Cambridge, Massachusetts, USA
13 – 15 July 2009**

IEEE Catalog Number: CFP09MCD-PRT
ISBN: 978-1-4244-4806-7

Table of Contents

Invited Talk

- Synthesis of Programs from Temporal Property Specifications 1
Amir Pnueli, Uri Klein

System Verification

- Bang for the Buck: Improvising and Scheduling Verification Engines for
Effective Resource Utilization 8
Malay K. Ganai, Weihong Li
- Refining Schizophrenia via Graph Reachability in Esterel 18
*Jeong-Han Yun, Chul-Joo Kim, Sunae Seo, Taisook Han, Kwang-Moo
Choe*
- The Role of Mutation Analysis for Property Qualification 28
Luigi Di Guglielmo, Franco Fummi, Graziano Pravadelli

Applications of Verification

- Incremental Modelling and Verification of the PCI Express Transaction
Layer 36
Peter Böhm
- Verification of an Industrial SystemC/TLM Model using LOTOS and
CADP 46
Hubert Garavel, Claude Helmstetter, Olivier Ponsini, Wendelin Serwe
- High-Level Optimization of Integer Multipliers over a Finite Bit-Width
with Verification Capabilities 56
Omid Sarbishei, Mahmoud Tabandeh, Bijan Alizadeh, Masahiro Fujita

Design Contest

- 2009 MEMOCODE Co-Design Contest 66
Forrest Brewer, James C. Hoe
- A Design Case Study: CPU vs. GPGPU vs. FPGA 69
Daniel L. Rosenband, Till Rosenband
- Implementing a Fast Cartesian-Polar Matrix Interpolator 73
*Abhinav Agarwal, Nirav Dave, Kermin Fleming, Asif Khan, Myron
King, Man Cheuk Ng, Muralidaran Vijayaraghavan*

Invited Talk

- Can We Computerize an Elephant? 77
David Harel

Microprocessors and Multicore

- Multicore Power Management: Ensuring Robustness via Early-Stage
Formal Verification 78
*Anita Lungu, Pradip Bose, Daniel J. Sorin, Steven German, Geert
Janssen*
- A Cross-Layer Approach to Heterogeneity and Reliability 88
*Daniel Williams, Aprotim Sanyal, Dan Upton, Jason Mars, Sudeep
Ghosh, Kim Hazelwood*
- Implementing a High-Performance Multithreaded Microprocessor: A
Case Study in High-level Design and Validation 98
Eric S. Chung, James C. Hoe

Tutorial

- An Introduction to Implementation Attacks and Countermeasures 108
Thomas Popp

Invited Talk

- Survival Strategies for Synthesized Hardware Systems 116
Martin Rinard

Codesign

- Codesign of Dependable Systems: A Component-Based Modeling Language 121
*Marco Bozzano, Alessandro Cimatti, Marco Roveri, Joost-Pieter
Katoen, Viet Yen Nguyen, Thomas Noll*
- Performance Estimation for Task Graphs Combining Sequential Path
Profiling and Control Dependence Regions 131
Fabrizio Ferrandi, Marco Lattuada, Christian Pilato, Antonino Tumeo
- Combining control and data abstraction in the verification of hybrid
systems 141
Xavier Briand, Bertrand Jeannot

Data Flow

Buffer Sharing in CSP-like Programs	151
<i>Nalini Vasudevan, Stephen A. Edwards</i>	
Static Data-Flow Analysis of Synchronous Programs	161
<i>Jens Brandt, Klaus Schneider</i>	
Bounded Dataflow Networks and Latency-Insensitive Circuits	171
<i>Muralidaran Vijayaraghavan, Arvind</i>
