TABLE OF CONTENTS

VOLUME 1

OPENING PLENARY SESSION

Toward Whole-Core Neutron Transport Without Spatial Homogenization 1
E. E. Lewis

Advances in High Performance Computing – the IBM Perspective 2
J. C. Sexton

NURESIM: A European Software Platform for Nuclear Reactor Simulation 3
C. Chauliac, J. M. Aragones, D. Bestion, D. G. Cacuci, N. Crouzet, F. P. Weiss, M. Zimmermann

SESION 1A: HONORING ENRICO SARTORI I

A Review of Monte Carlo Criticality Calculations – Convergence, Bias, Statistics 4
F.B. Brown

Radiation Transport Benchmarks for Simple Geometries with Void Regions Using the Spherical Harmonics Method 16
K. Kobayashi

Analysis and Benchmarking of Pentran Code Using the Oecd-nea Benchmark Problems 29
A. Haghighat, G. E. Sjoden, C. Yi

Revisiting the Tort Solutions to the Nea Suite of Benchmarks for 3D Transport Methods and Codes Over a Range in Parameter Space 41
K. B. Bekar, Y. Y. Azmy

SESSION 1B: HONORING ENRICO SARTORI I

Benchmarking of the Scale Code Package and Multi-group Cross Section Libraries for Analysis of Lead-cooled Fast Reactor 51
V. Memoli, B. Petrovic

A Simplified 2D HTTR Benchmark Problem 61
Z. Zhang, F. Rahnema, J.M. Pounders, D. Zhang, A. Ougouag

Recent Research Progress on UNIC at Argonne National Laboratory 80
M. A. Smith, D. Kaushik, A. Wollaber, W. S. Yang, B. Smith, C. Rabiti, G. Palmiotti

Assessment of Mark I Rod Irradiations in the UF Subcritical Water Tank Experiment Using Transport Methods 98
T. Plower, M. Rowe, G. Sjoden, R. Detwiler, J. Baciak

SESSION 2A: RADIATION TRANSPORT IN THE EARTH SCIENCES

Transfer of Electromagnetic Energy in Particulate Media: From Wave Theory of Scattering to Ballistic Transport Equation 109
M.I. Mishchenko

Inversion of Multi-angle Radiation Measurements 118
B. Cairns, A. Lacis, B. Carlson, K. Kbobelspiesse, M. Alexandrov

Modeling and Analysis of Offbeam Lidar Returns from Thick Clouds, Snow, and Sea Ice 126
T. Varnai, R. F. Cahalan

On the Application of Monte Carlo Solutions of the Radiative Transfer Equation for Cloudy Terrestrial Atmospheres 139
H. W. Barker

SESSION 2B: RADIATION TRANSPORT IN THE EARTH SCIENCES

Modeling of Radiation Transport in Coupled Atmosphere-snow-ice-ocean Systems 146
K. Stamnes, B. Hamre, J. J. Stamnes, G. Ryzhikov, M. Biryulina

Canopy Spectral Invariants: A New Concept in Remote Sensing of Vegetation 158
Y. Knyazikhin, M. Schull, L. Xu
Numerical Integration of the Feynman Path Integral for Radiative Transport 170
J. Tessendorf

SESSION 3A: MULTI-PHYSICS AND MULTI-DISCIPLINE SIMULATION METHODS I

Implicit Monte Carlo Radiation Transport in Multi-physics Simulations 182
N.A. Gentile
Time-step Limits for a Monte Carlo Compton-scattering Method 209
J.D. Densmore, J.S. Warsa, R.B. Lowrie
MOOSE: A Parallel Computational Framework for Coupled Systems of Nonlinear Equations 224
D. Gaston, G. Hansen, C. Newman
Tightly Coupled Multiphysics Simulations for Pebble Bed Reactors 234
H. Park, D. Gaston, S. Kadioglu, D. Knoll, R. Martineau, W. Taitano, D. Lebrun-Grandie

SESSION 3B: MULTI-PHYSICS AND MULTI-DISCIPLINE SIMULATION METHODS I

Framework for Simulation of Pellet/Cladding Thermal Interaction (PCTI) for Fuel Performance Calculations 246
G. Hansen, R. Martineau, C. Newman, D. Gaston
Implementation of a Plate-type Fuel Model to a Multi-physics Code and Benchmark Modeling of Special Power Excursion Reactor Tests 256
P. Liu, D. Wilhelm, A. Rineiski, F. Gabrielli, W. Maschek, G.B. Bruna
Generation of Consistent Conservative Cross Section Data for the Coupled System Code Athlet-quabox/cubbox 272
K. Velkov, S. Langenbuch
Development of a Coupling Scheme Between MCNP and COBRA-TF for the Prediction of the Pin Power of a PWR Fuel Assembly 279
V. Sanchez, A. Al-Hamry

SESSION 4A: MONTE CARLO TRANSPORT METHODS I

Relaxation Scheme for Monte Carlo Explicitly Restarted Arnoldi's Method for Criticality Calculations 295
J. L. Conlin, J. P. Holloway
The Appearance of Complex Values in Monte Carlo Calculation of Degenerate Eigenvalues 308
B.R. Nease, T. Ueki
Comparison of Some Monte Carlo Models for Bound Hydrogen Scattering 319
T.M. Sutton, T.H. Trumbull, C.R. Lubitz
Unbiased Minimum Variance Estimator of a Matrix Exponential Function. Application to Boltzmann/bateman Coupled Equations Solving. 334
E. Dumonteil, C. M. Diop

SESSION 4B: MONTE CARLO TRANSPORT METHODS I

Kernel Density Estimated Monte Carlo Global Flux Tallies 341
K. Banerjee, W. R. Martin
Rate of Convergence of Antithetic Transforms in Monte Carlo Simulation 354
M. S. Milgram, R. Dagan, B. Becker
An HP-Adaptivity Approach for Monte Carlo Tallies 366
B. C. Franke, R. P. Kensek
A Weight-window Generator for Electron-photon Transport in the Integrated Tiger Series Codes 378
B. C. Franke, M. J. Crawford, R. P. Kensek, J. A. Kraftcheck

SESSION 5A: TRANSPORT EFFECTS: THEORY, METHODS, MODELS, AND APPLICATIONS

A Hybrid Monte Carlo-S_2 Method for Preserving Neutron Transport Effects 386
E. R. Wolters, E. W. Larsen, W. R. Martin
Effects of the Temperature Discretization on Numerical Methods for Thermal Radiation Transport 402
R.G. McClarren, R.B. Lowrie
A Non-linear Optimal Discontinuous Petrov-galerkin Method for Stabilising the Solution of the Transport Equation 417
S.R. Merton, R.P. Smedley-Stevenson, C.C. Pain, A.G. Buchan, M.D. Eaton
Analytical Reconstruction Schemes for Coarse-mesh Spectral Nodal Solution of Slab-geometry S_N Transport Problems 439
R.C. Barros, H.A. Filho, G.M. Platt, F.B.S. Oliveira, D.S. Militao

SESSION 5B: TRANSPORT EFFECTS: THEORY, METHODS, MODELS, AND APPLICATIONS

High-order Discrete Ordinate Transport in Non-conforming 2D Cartesian Meshes 449
L. Gastaldo, R. Le Tellier, C. Suteau, D. Fournier, J.M. Ruggieri
Quasi Linear Representation of the Isotropic Scattering Source for the Method of Characteristics 461
C. Rabiti, G. Palmiotti, W. S. Yang, M. A. Smith, D. Kauchik, A. B. Wollaber
The Linear Source Approximation in Three Dimension Characteristics Method 474
X. M. Chai, K. Wang, D. Yao
Neutronic Modeling for Pebble Bed Reactors 488
M. Grimod, R. Sanchez, F. Damian

POSTER SESSION I

Breakeven Core Design Studies for a Sodium Cooled Fast Reactor 502
H. Joo, K. Lee, J. Yoo, Y. Kim
Improving Burnup Performance of Fast Sodium Cooled Reactor by Utilizing Thorium Based Fuels 514
S. Ghrayeb, K. Ivanov, S. Levine, F. Puente-Espel, E.P. Loewen
Analyses of High Temperature Pebble Bed Reactors with Plutonium Fuel 524
A. Meier, W. Bernnat, K. Hossain, G. Lohnert
Assessment of Eranos for HPLWR Core Analyses 537
L. Monti, F. Gabrielli, W. Maschek, T. Schulenberg
Sensitivity Study to Optimize the Thickness of a Moderator for Use in the AP1000 Source, Intermediate, and Power Range Excore Detectors 552
J. A. Kulesza
The CNCSN-2: One, Two- and Three-dimensional Coupled Neutral and Charged Particle Discrete Ordinates Code System 563
A. M. Voloschenko, S. V. Gukov, A. A. Russkov, M. I. Gurevich, D. A. Chkarovsky, V. P. Kryuchkov, O. V. Sumaneev, A. A. Dubinin
Realization of 3D Equations of Surface Harmonics Method in Suham-3D Code 571
V.F. Boyarinov
Analysis of the Creole Experiment on the Reactivity Temperature Coefficient for PWR UO2 and MOX Lattices, Using 3D Transport Calculations and JEFF3.1.1 Library 583
L. Erradi, A. Santamarina
Comparison of MCNP and WIMS-AECL/RFSP Calculations Against Critical Heavy Water Experiments in ZED-2 with Canflex-LVRF and Canflex-LEU Fuels 597
B. P. Bromley, D. G. Watts, J. Pencer, M. Zeller, Y. Dweiri
Preliminary Benchmark Evaluation of Japan's High Temperature Engineering Test Reactor 614
J.D. Bess
PWR Assembly Transport Calculation: A Validation Benchmark Using Dragon, Pentran, and Mcnp 626
T. Courau, G. Sjoden, G. Marleau
Validation of DYN3D Pin-power Calculation Against Experimental VVER-full-core Benchmark 639
J. Hadek, S. Mittag
TRIPOLI4 Solutions of VVER-1000 Assembly and Core Benchmarks 651
N. Petrov, N. P. Kolev, G. Todorova, F. X. Hugot, T. Visonneau

Use of TRIPOLI-4.5 Mesh Tally to Investigate Power Maps of the LEU-comp-therm-008 PWR Critical Lattices.....663
Y.K. Lee, F.X. Hugot
2-Dimensional PWR and BWR Whole Core Benchmark Problems.....675
F. Rahnema, S. Douglass, B. Forget

VOLUME 2

Time-dependent Anisotropic Distributed Source Capability in Transient 3-D Transport Code Tort-TD.....700
A. Seubert, A. Pautz, M. Becker, R. Dagan
Apollo3: A Common Project of CEA, AREVA and EDF for the Development of a New Deterministic Multi-purpose Code for Core Physics Analysis.....707
H. Golfier, R. Lenain, C. Calvin, J.J. Lautard, A.M. Baudron, P. Fougeras, P. Magat, E. Martinolli, Y. Dutheillet
Energy-angle Dependent Neutron Source in Deterministic Transport Codes with Spherical Harmonic Expansion.....724
M. Backer, R. Dagan, C. H. M. Broeders, A. Seubert, A. Pautz, G. Lohnert
CASMO-5 Versus MCNP-5 Benchmark of Radial Power Profile in a Fuel Pin.....735
Z. Xu, J. Rhodes, K. Smith
Fast Gamma Ray Leakage Spectra Simulation.....744
P. Humbert, B. Mechitoua
Domain Decomposition Parallelization of Neutron Transport Calculations.....751
S. Van Criekingen, F. Nataf, P. Have
Dragon Evaluation of the Effect of Heterogeneous Environment on PWR Assemblies.....763
H. Leroyer, G. Marleau
Study of the Acceleration of Nuclide Burnup Calculation Using GPU with Cuda.....773
S. Okui, Y. Ohoka, M. Tatsumi
The Whitestar Development Project: Westinghouse's Next Generation Core Design Simulator and Core Monitoring Software to Power the Nuclear Renaissance.....780
W. A. Boyd, L. T. Mayhue, V. S. Penkrot, B. Zhang
FLAIR: A Powerful But User Friendly Graphical Interface for Fluka.....790
V. Vlachoudis
A New Cross-section Generation Model in the Fast Code System and Its Application to the GEN-IV Gas-cooled Fast Reactor.....801
S. Pelloni, K. Mikityuk, A. Epiney
Effective Software Design for a Deterministic Transport System.....813
A.M. Watson, R.E. Grove, M.T. Shearer
Experience in the Use of the Monte-carlo Code Based Tracing Algorithm and the Volume Fraction Method in Vver Radiation Shielding Calculations.....822
M. I. Gurevich, S. M. Zaritsky, D. S. Oleynik, V. V. Sinitsa, A. A. Russkov, A. M. Voloschenko, V. I. Tsofin, A. D. Djalandinov, G. N. Manturov

SESSION 6A: HONORING ENRICO SARTORI II

Verification &Validation and Uncertainty Analysis in Multi-physics Modeling for Nuclear Reactor Design and Safety.....840
K. Ivanov, M. Avramova
A Proposal for a Benchmark to Monitor the Performance of Detailed Monte Carlo Calculation of Power Densities in a Full Size Reactor Core.....854
J. E. Hoogenboom, W. R. Martin
An Ultra-fine Group Slowing Down Benchmark.....870
B.D. Ganapol, G.I. Maldonado, M.L. Williams
Accuracy of Titan Based on a New OECD-NEA Benchmark Over a Range in Parameter Space.....882
C. Yi, A. haghighhat

SESSION 6B: COMPUTATIONAL METHODS

Determination of Solute-interstitial Interactions in NI-CR by First Principles.....891
J.D. Tucker, R. Najafabadi, T.R. Allen, D. Morgan

Computational Foundations for Reactor Fuel Performance Modeling 902
C. Newman, D. Gaston, G. Hansen
Massively Parallel Solving of 3D Simplified P_N Equations on Graphics Processing Units 913
W. Kirschenmann, L. Plagne, S. Ploix, A. Poncot
Extension of the Invariant Embedding Method for the Calculation of Particle Fluctuations 925
S. B. Degweker, I. Pazsit

SESSION 7A: METHODS FOR NONPROLIFERATION AND HOMELAND SECURITY I

Transport Methods Used for Homeland Security and Non-proliferation Detection Applications: An Overview 939
G. E. Sjoden, G. M. Ghita
Optimization of a Novel Solid-state Self Powered Neutron Detector 952
J. Dingley, Y. Danon, N. LiCausi, J. Q. Lu, I. B. Bhat
Calibration of the BC-523A Capture-Gated Liquid Scintillation Detector 964
M. Flaska, S. A. Pozzi, L. C. Mihailescu, P. Schillebeeckx
Analytical Description of Pulses Measured with an Organic Liquid Scintillator for Pulse Shape Discrimination 972
S.D. Ambers, M. Flaska, S.A. Pozzi

SESSION 7B: METHODS FOR NONPROLIFERATION AND HOMELAND SECURITY I

Combined Use of Neutron and Gamma Multiplicities for Determining Sample Parameters 981
I. Pazsit, A. Enqvist, S. Avdic
Design of a Neutron Detector Array for SNM Optimized by Radiation Transport Methods 993
G. Ghita, G. Sjoden
Computation of Improved Compton Scattering Momentum Transfer 1005
E. Caro
Monte Carlo Modelling of Neutron Coincidence Counting Systems for Nuclear Safeguards 1015
H. Tagziria, P. Peerani

SESSION 8A: MATHEMATICAL METHODS – GENERAL I

A P_1 Conforming DSA Scheme for DGFEM S_N Transport 1028
Y. Wang, J. C. Ragusa
Semi-consistent Diffusion Synthetic Acceleration for Discontinuous Discretizations of Transport Problems 1035
A.P. Barbu, M.L. Adams
A Diffusion Synthetic Accelerated Linear Discontinuous Version of the Spherical Geometry Method of Tubes 1048
M.E. Rising, T.S. Palmer
A Consistent Diffusion Synthetic Acceleration Technique Utilising Discontinuity Factors 1069
A. Copestake

SESSION 8B: MATHEMATICAL METHODS – GENERAL I

Multi-level Methods for Solving Multigroup Transport Eigenvalue Problems in 1D Slab Geometry 1088
D. Y. Anistratov, V. Y. Gol'din
Coupled Energy Group Iteration Scheme for Deterministic Transport Problems 1100
A.M. Watson
Fourier Analysis of Cell-wise Block-jacobi Splitting in Two-dimensional Geometry 1110
M. Rosa, J. S. Warsa, T. M. Kelley
A Jacobian-free Newton-krylov Iterative Scheme for Criticality Calculations Based on the Neutron Diffusion Equation 1122
D. F. Gill, Y. Y. Azmy

SESSION 9A: TRANSPORT IN STOCHASTIC MEDIA

Radiation Transport Through Random Media Represented As Measurable Functions: Positive Versus Negative Spatial Correlations 1137
A. B. Davis, M. Mineev-Weinstein
Analysis of Distances Between Inclusions in Finite One-dimensional Binary Stochastic Materials 1150
D. P. Griesheimer, D. L. Millman
Markovian Approach: from Ising Model to Stochastic Radiative Transfer 1179
E. Kassianov, D. Veron

SESSION 9B: TRANSPORT IN STOCHASTIC MEDIA

Anisotropic Diffusion in Model 2-D Pebble-bed Reactor Cores 1191
R. Vasques, E. W. Larsen
Radiation Transport Through Random Media 1204
G. Bal, W. Jing
A Comparison of Monte Carlo Particle Transport Algorithms for Binary Stochastic Mixtures 1207
P.S. Brantley
Levermore-pomraning Model Results for an Interior Source Binary Stochastic Medium Benchmark Problem 1230
P.S. Brantley, T.S. Palmer

SESSION 10A: HYBRID METHODS IN PARTICLE TRANSPORT I

A Hybrid Monte Carlo-deterministic Approach to Improve the Accuracy and Efficiency of Monte Carlo Calculations for Thermal Radiative Transfer 1246
A.B. Wollaber, E.W. Larsen
Forward-weighted Cadis Method for Variance Reduction of Monte Carlo Calculations of Distributions and Multiple Localized Quantities 1264
J. C. Wagner, E. D. Blakeman, D. E. Peplow
The Application of Weight Windows to "Global" Monte Carlo Problems 1276
T.L. Becker, E.W. Larsen
Application of the "Functional Monte Carlo" Method to Estimate Continuous Energy k-Eigenvalues and Eigenfunctions 1292
J. Yang, E. W. Larsen

SESSION 10B: HYBRID METHODS IN PARTICLE TRANSPORT I

Rejection Sampling from a Spherical Harmonics Angular Flux Functional Expansion for a Discrete Ordinates to Monte Carlo Splice 1311
S. C. Wilson, D. P. Griesheimer
Automated Weight-window Generation for Threat Detection Applications Using Advantg 1334
S.W. Mosher, T.M. Miller, T.M. Evans, J.C. Wagner
Multi-group Transport Methods for High-resolution Neutron Activation Analysis 1347
K. A. Burns, L. E. Smith, C. J. Gesh, M. W. Shaver
A Monte Carlo Synthetic Acceleration Method for the Non-linear, Time-dependent Diffusion Equation 1361
T. M. Evans, S. W. Mosher

SESSION 11A: COMPUTATIONAL MEDICAL PHYSICS I

Dose Verification for Accelerated Partial Breast Irradiation 1371
K. Hadad, B. D. Ganapol, R. Hamilton, C. Watchman
Adjoint Current-based Approaches to Prostate Brachytherapy Optimization 1382
J. A. Roberts, D. L. Henderson

VOLUME 3

Multigroup Neutron Dose Calculations for Proton Therapy 1397
C. T. Kelsey IV, A. K. Prinja
Application of Electron Dose Kernels to Account for Heterogeneities in Voxelized Phantoms 1412
A. K. Al-Basheer, G. E. Sjoden, M. Ghita, W. Bolch

SESSION 11B: COMPUTATIONAL MEDICAL PHYSICS I

Multidetector CT (MDCT) Modeling for Organ Dose Assessments of Various Patient Phantoms 1424
J. Gu, P. F. Caracappa, X. George X
Deformable and Posture-Changeable Computational Phantoms and Dosimetry Data for Standard External-Beam Irradiations 1436
J. Zhang, Y. H. Na, A. Ding, X. G. Xu
Analysis of SPECT Imaging Simulation Using the TITAN Transport Code 1447
K. Keller, C. Yi, A. Haghighat

SESSION 12A: METHODS FOR NONPROLIFERATION AND HOMELAND SECURITY II

Improving the Nuclear Data Base for Non-Proliferation and Homeland Security 1456
R. C. Haight, L. J. Bitteker, A. Couture, M. Devlin, N. Fotaides, A. Gavron, T. S. Hill, A. Laptev, R. O. Nelson, J. M. O'Donnell, T. N. Taddeucci, F. Tovesson, J. L. Ullmann, S. A. Wender
Study of the Prompt Gamma Ray Signal from Fissions in Special Nuclear Materials Induced Using an Associated Particle Neutron Generator 1467
D. S. Koltick, S. Z. Kane
Monte Carlo Simulation of the Full Multiplicity Distributions Measured with a Passive Counter 1476
E.C. Miller, S.D. Clarke, M. Flaska, S.A. Pozzi, P. Peerani
Optimization of a Compton Suppression Detector System Using CdZnTe and Liquid Scintillators 1486
M.M. Bourne, S.D. Clarke, S.A. Pozzi, A. Gueorguiev

SESSION 12B: CHARGED PARTICLE TRANSPORT

An Analysis of Moment Preserving Methods for High Energy Ion Transport 1494
P. H. Smith, A. K. Prinja
A Theoretical Result for Moment-Preserving Approximations to the Landau/Vavilov Straggling Model 1509
A. K. Prinja
Order-of-convergence Study of a Condensed-history Algorithm Implementation 1516
R. L. Keith, R. P. Kensek
R&D for Co-working Condensed and Discrete Transport Methods in GEANT4 Kernel 1524
M.G. Pia, P. Saracco, M. Sudhakar, A. Zoglauer, M. Augelli, E. Gargioni, C.H. Kim, L. Quintieri, P.P. De Queiroz Filho, D. De Souza Santos

SESSION 13A: MULTI-PHYSICS AND MULTI-DISCIPLINE SIMULATION METHODS II

Coupled Eranos/trace System for HPLWR 3 Pass Core Analyses 1536
L. Monti, T. Schulenberg
Analysis and Numerical Solution for Multi-physics Coupling of Neutron Diffusion and Thermomechanics in Spherical Fast Burst Reactors 1550
S. Y. Kadioglu, D. A. Knoll, C. De Oliveira
Application of the Jacobian-free Newton-krylov Method in Computational Reactor Physics 1560
D. A. Knoll, H. Park, K. Smith
High Accuracy Modeling for Advanced Nuclear Reactor Core Designs Using Monte Carlo Based Coupled Calculations 1571
R.P. Espel, M. Avramova, K. Ivanov

SESSION 13B: MULTI-PHYSICS AND MULTI-DISCIPLINE SIMULATION METHODS II

The Application of a Multi-Physics Toolkit to Spatial Reactor Dynamics 1585
I. Clifford, H. Jasak

Performance of Whole Core Pin-by-Pin Calculations by Domain Decomposition Through Alternate Dissections in Steady State and Transient Calculations 1597
J. J. Herrero, J. Jimenez, J. M. Aragones, C. Ahnert

Verification of Multiphysics Software: Space and Time Convergence Studies for Nonlinearly Coupled Applications 1608
V. Mahadevan, J. C. Ragusa, V. Mousseau

SESSION 14A: MONTE CARLO TRANSPORT METHODS II

A Time-dependent Fleck Factor to Enhance the Accuracy of the Implicit Monte Carlo Equations 1618
A.B. Wollaber, E.W. Larsen

A Linear SIMC Scheme Suitable for Extension to Multi-dimensions 1635
R.P. Smedley-Stevenson

Radiative Transfer with Monte Carlo Predictor-corrector Methods 1647
J. Cheatham, J. P. Holloway, W. R. Martin

A Linear Stability Analysis for Nonlinear, 1-D, Gray Implicit Monte Carlo Calculations 1661
A.B. Wollaber, E.W. Larsen

SESSION 14B: MONTE CARLO TRANSPORT METHODS II

Burnup Calculation Capability in the PSG2 / Serpent Monte Carlo Reactor Physics Code 1662
J. Leppanen, M. Pusa

On-the-fly Doppler Broadening for Monte Carlo Codes 1674
G. Yesilyurt, W. R. Martin, F. B. Brown

A Weighted Adjoint Source for Weight-window Generation by Means of a Linear Tally Combination 1686
C. J. Solomon, A. Sood, T. E. Booth

A New Approach to the Use of Group Scattering Data in Monte Carlo Neutron Transport 1703
J. Benstead

SESSION 15A: IN MEMORY OF BENGT CARLSON

The Converged SN Algorithm for Nuclear Criticality 1713
B.D. Ganapol, K. Hadad

SESSION 15B: IN MEMORY OF BENGT CARLSON

Deterministic Methods for Time-dependent Stochastic Neutron Transport 1730
R.S. Baker

Galerkin-Quadratures for the S_N Method in 2D Cartesian Geometries and Application to Forward-Peaked Scattering Particle Transport Problems 1741
T. Trahan, J. Ragusa, J. Morel

Analysis of Massively Parallel Discrete-ordinates Transport Sweep Algorithms with Collisions 1751
T.S. Bailey, R.D. Falgout

Scalable Parallel Prefix Solvers for Discrete Ordinates Transport 1766
S. Pautz, T. Pandya, M. Adams

SESSION 16A: COMPUTATIONAL MEDICAL PHYSICS II

Object Oriented Design of Anthropomorphic Phantoms and GEANT4-based Implementations 1778
R. De Souza E Silva, M. Begalli, M.G. Pia, M. Martins, P.Q. Filho, D. De Souza-Santos

A Project to Design a Software Package for Reporting Multidetector CT (MDCT) Doses 1785
A. Ding, J. Gu, H. Liu, P. F. Caracappa, G. Xu

Verification and Validation of Deterministic Radiation Transport Numerical Methods, Codes, and Nuclear Data for Estimating Radiation Dose to Patients During CT Scan 1796
J. M. Hykes, Y. Y. Azmy, S. Schunert, S. H. King, J. J. Klingensmith

Applications of Monte Carlo Computational Framework of a Medical Accelerator Used for Radiation Treatment 1811
B. Han, X.G. Xu, B. Bednarz

SESSION 16B: COMPUTATIONAL MEDICAL PHYSICS II

Deterministic Radiation Transport Simulations for Diagnostic Imaging Applications 1822
M. Ghita, G. E. Sjoden, A. Al-Basheer, M. M. Arreola, W. Bolch, C. Lee

Development of PC Based Monte Carlo Simulations for the Calculation of Scanner-specific Normalized Organ Doses from CT 1835
J.T.M. Jansen, P.C. Shrimpton, M. Zankl

Air Kerma Distribution in an Irradiation Facility - Comparison of Monte Carlo Simulations with Physical Dosimetry 1850
R. Sarmento, A. Belchior, J. Cardoso, I. Goncalves, P. Vaz

SESSION 17A: PERTUBATION AND VARIATIONAL METHODS

Variational Methods in the Kinetic Modeling of Nuclear Reactors: Recent Advances 1859
S. Dulla, P. Picca, P. Ravetto

Variational Reactivity Estimates: New Analyses and New Results 1868
J.A. Favorite

A Perturbation Response Function Generation Method 1883
D. Zhang, F. Rahnema

Simulating Small Changes in System Response by MCNP 1893
T. He, B. Su

SESSION 17B: PERTURBATION AND VARIATIONAL METHODS

A 1st Order Formulation of a Reaction Rate Variation for Spatial and Energy Collapsing 1905
A. Sargeni, G.B. Bruna, A. Santamarina

Computing Sensitivity and Handling Data Uncertainties in Activation Problems 1916
J. Cartier

On Reactivity Effects Calculations 1924
B.D. Abramov

SESSION 18A: MATHEMATICAL METHODS – GENERAL II

A Quasi-static Closure for 3rd Order Spherical Harmonics Time-dependent Radiation Transport in 2-D 1938
K. S. Oh, J. P. Holloway

Spatial Adaptivity for Time-dependent Diffusion Problems 1949
B. Turcksin, J. C. Ragusa

A Comparison of Constant Power Depletion Algorithms 1956
D. C. Carpenter

Monte Carlo Anchoring Method for Loosely-Coupled k-Eigenvalue Problems 1977
S. Yun, N.Z. Cho

SESSION 18B: MATHEMATICAL METHODS – GENERAL II

Subspace Multi -scale Approach for Reactor Analysis, Part I: Energy Variable 1991
J. P. Schaefer, H. S. Abdel-Khalik

Spectral Element Method for the Neutron Diffusion Equation on a Triangular Mesh 2002
S. Gonzalez-Pintor, G. Verdu, D. Ginestar

A Non Overlapping Parallel Domain Decomposition Method Applied to The Simplified Transport Equations 2015
B. Lathuiliere, M. Barrault, P. Ramet, J. Roman
Monte-carlo-based Simulation of LWR Cores with Innovative Fuel Concepts 2027
R. Nabbi, O. Schitthelm, H. J. Allelein, D. F. Da Cruz

SESSION 19A: IMPORTING CAD MODELS INTO SHIELDING AND CRITICALITY CODES

CAD-based Modeling for 3D Particle Transport 2032
Y. Wu, Q. Zeng, L. Lu
Current Status of the CAD Interface Program McCad for MC Particle Transport Calculations 2046
D. Große, H. Tsige-Tamirat
Importing CAD to Tripoli® 2057
J. C. Trama, P. Le Texier, F. Faure
Use of MCCAD for the Generation of Mcnp Models in Fusion Neutronics 2066
A. Serikov, U. Fischer, D. Grosse, P. Spaeh, H. Tsige-Tamirat

SESSION 19B: IMPORTING CAD MODELS INTO SHIELDING AND CRITICALITY CODES

Testing of the Tetrahedral Mesh Import Capability for Importing Converted CAD Files for Shielding and Criticality Calculations with Monk and Mcbend 2078
A. Bird, J. Martin, E. Shuttleworth, A. Cooper

VOLUME 4

Importing CAD Models Into Monk and Mcbend 2098
K. Searson, F. Fleurot, A.J. Cooper, P. Cowan
Acceleration Techniques for Direct Use of Cad-based Geometries in Monte Carlo Radiation Transport 2110
T. J. Tautges, P. P. H. Wilson, J. A. Kraftcheck, B. M. Smith, D. L. Henderson

SESSION 20A: HYBRID METHODS IN PARTICLE TRANSPORT II

Asymptotic Analysis of Spatial Discretizations in Implicit Monte Carlo 2121
J.D. Densmore
Hybrid Method of MOC and S_N Nodal for PWR Core Analysis 2135
T. Takeda, Y. Fujita, T. Kitada, K. Yamaji, H. Matsumoto
Hybrid S_N and Ray-tracing with Fictitious Quadrature for Simulation of Spect 2148
C. Yi, A. Haghighat
Decoupled Planar MOC Solution for Dynamic Group Constant Generation in Direct Three-dimensional Core Calculations 2157
Y. S. Jung, H. G. Joo

SESSION 20B: HYBRID METHODS IN PARTICLE TRANSPORT II

A Hybrid Diffusion/transport Method 2168
D. Zhang, F. Rahnema, A. Ouguang
Automatically Tuned Adaptive Differencing Algorithm for 3-D S_N Implemented in Pentran 2178
G. Sjoden, T. Courau, K. Manalo, C. Yi
Parallel Discrete Ordinates Methods in the Sceptre Project 2190
S. Pautz, B. Bohnhoff, C. Drumm, W. Fan
Software Engineering in the Sceptre Code 2202
S. Pautz, C. Drumm, B. Bohnhoff, W. Fan

SESSION 21A: COMPUTATIONAL FLUID DYNAMICS AND THERMAL HYDRALICS

Rans-based CFD Simulations of Sodium Fast Reactor Wire-wrapped PIN Bundles 2212
W. D. Pointer, J. Thomas, T. Fanning, P. Fischer, A. Siegel, J. Smith, A. Tokuhiro
A Simple and Efficient Diffuse Interface Method for Compressible Two-phase Flows 2225
R. A. Berry, R. Saurel, F. Petitpas
Modified Nodal Integral Method Incorporated with Irregular-shape Elements for Navier-stokes Equations 2243
K. Huang, R. Uddin
Improvements of a Finite Volume Based Multigrid Method Applied to Elliptic Problems 2255
N. Mechitoua, Y. Fournier, F. Hulsemann

SESSION 21B: COMPUTATIONAL FLUID DYNAMICS AND THERMAL HYDRALICS

Modified Choke Flow Criterion for the Two-phase Two-fluid Model 2268
S. Singh, V.A. Mousseau
Multi-resolution Modeling of Subassembly Pin Bundles for Advanced Fast Reactor Safety Simulations 2282
T. H. Fanning, W. D. Pointer, J. W. Thomas
Improved Thermal Modelling of a SNF Shipping-cask Drying 2295
D. Colmont, P. Roblin, C. Guerin
Ensuring Negative Coolant-Void Reactivity in Candu Generation III+ 2306
A. V. Popov, M. F. Fehri, R. P. Chambon, G. Marleau, A. Teyssedou, A. Olekhnovitch, O. M. Popescu, N. W. Mureithi

SESSION 23A: UNCERTAINTY ANALYSIS IN MODELING FOR MULTI-PHYSICS AND MULTI-SCALE SIMULATIONS I

Overview and Discussion of Phase I of the OECD LWR UAM Benchmark Activity 2317
K. Ivanov, M. Avramova, S. Kamerow, I. Kodeli, E. Sartori
Application of Global Sensitivity Analysis Approach to Exercise I-1 of the OECD LWR UAM Benchmark 2328
F. P. Espel, S. Ghrayeb, K. Ivanov, S. Tarantola
The University of Pisa Calculations for the Phase I of the OECD/NEA UAM Benchmark 2339
M. Ball, C. Parisim, F. D'Auria
Nuclear Data Uncertainty Analysis using the Coupling of DRAGON with SUSD3D 2348
A. Bidaud, G. Marleau, E. Noblat

SESSION 23B: UNCERTAINTY ANALYSIS IN MODELING FOR MULTI-PHYSICS AND MULTI-SCALE SIMULATIONS I

Development of Generalized Perturbation Theory Capability Within the Scale Code Package 2358
M.A. Jessee, M.L. Williams, M.D. Dehart
Monte Carlo Depletion and Uncertainty Analyses for a TRU Fuel Assembly Using JENDL 3.3 Covariance Data 2369
H.J. Park, H.G. Joo, C.H. Kim, H.J. Shim
Stochastic Methods for Uncertainty Quantification in Radiation Transport 2380
E.D. Fichtl, A.K. Prinja, J.S. Warsa
Uncertainty and Sensitivity Analysis in the Neutronic Parameters Generation Over the Coupled Thermalhydraulic-neutronic Nuclear Power Plant Simulations 2395
J. Juanas, T. Barrachina, R. Miro, R. Macian

SESSION 24A: CONVERGENCE ISSUES IN MONTE CARLO CRITICALITY SIMULATIONS

Instructive Concepts About the Monte Carlo Fission Source Distribution 2407
B.R. Nease, T. Ueki, T.M. Sutton, F.B. Brown

An Information Theory Based Analysis of Fission Source Correlation in Monte Carlo K-Eigenvalue Calculations 2417
F.B. Brown, B.C. Kiedrowski
A Combined Diagnostic Approach for Monte Carlo Source Convergence Identification 2429
M. T. Wenner, A. Haghighat
Noise Analysis of Smoothed Residual Acceleration, A Monte Carlo Neutron Source Convergence Algorithm 2443
B. E. Toth, W. R. Martin

SESSION 24B: CONVERGENCE ISSUES IN MONTE CARLO CRITICALITY SIMULATIONS

Using a Zero-Variance Scheme to Accelerate the Fission Source Convergence in a Monte Carlo Calculation 2456
S. Christoforou, J. E. Hoogenboom
Improved Criticality Convergence Via a Modified Monte Carlo Power Iteration Method 2466
T.E. Booth, J.E. Gubernatis
Application of the Stochastic Oscillator to Assess Source Convergence in Monte Carlo Criticality Calculations 2477
P.K. Romano
Application of Inactive Cycle Stopping Criteria for Monte Carlo Wielandt Calculations 2490
H. J. Shim, C. H. Kim

SESSION 25A: DETERMINISTIC TRANSPORT METHODS I

Generalized Finite Elements 2500
E. Wachspress
A Linear-discontinuous Cut-cell Discretization for the S_N Equations in R-Z Geometry 2507
M. S. Reed, J. E. Morel
A Piecewise Linear Discontinuous Finite Element Spatial Discretization of the Transport Equation in 2D Cylindrical Geometry 2515
T.S. Bailey, M.L. Adams, J.H. Chang, J.S. Warsa
Negative Flux Fixups in Discontinous Finite Element SN Transport 2529
S. Hamilton, M. Benzi, J. Warsa

SESSION 25B: DETERMINISTIC TRANSPORT METHODS I

A Positive Non-linear Closure for the S_N Equations with Linear-discontinous Spatial Differencing 2539
P. Maginot, J. Morel, J. Ragusa
Discrete Ordinate Mapping Algorithm for Region-based Quadrature Sets 2547
J.J. Jarrell, R.E. Grove, M.T. Shearer, A.M. Watson
A Robust Arbitrarily High Order Transport Method of the Characteristic Type for Unstructured Tetrahedral Grids 2556
R.M. Ferrer, Y.Y. Azmy
Surface Mesh Refinement with the Slice Balance Approach (SBA) 2571
R.E. Grove, M.T. Shearer

POSTER SESSION II

Moritz Enhancements for Visualization of Complicated Geometry Models 2586
K. A. Van Riper
MCNP and Visualization of Neutron Flux and Power Distributions 2596
L. Snoj, I. Lengar, G. Zerovnik, M. Ravnik
Mercury + Visit: Integration of a Real-time Graphical Analysis Capability Into a Monte Carlo Transport Code 2608
M. O'Brien, R. Procassini, K. Joy
FZ2MC: A Tool for Monte Carlo Transport Code Geometry Manipulation 2635
B. Hackel, D. Nielsen, R. Procassini
MCNPX Graphics and Arithmetic Tally Upgrades 2640
J.W. Durkee Jr., M.R. James, L.S. Waters

Enhancements to the Combinatorial Geometry Particle Tracker in the Mercury Monte Carlo Transport Code: Embedded Meshes and Domain Decomposition 2645
G. Greenman, M. O'Brien, R. Procassini, K. Joy

MCNPX and MCB Coupled Methodology for the Burnup Calculation of the KIPT Accelerator Driven Subcritical System 2666
Z. Zhong, Y. Gohar, A. Talamo

Dortorest: A Coupled Transport-depletion Code System for Lwr Fuel Assembly Burnup Calculations 2679
A. Pautz, U. Hesse

Development and Performance of the Andes/Cobra-III Coupled System in Hexagonal-Z Geometry 2690
J.A. Lozano, J. Jimenez, N. Garcia-Herranz, J.M. Aragones

Validating Models for Coolant Void Reactivity Evaluation in Candu Generation III+ 2703
A. V. Popov, M. Assawaroongruengchot, G. Marleau, A. Hebert, R. Karthikeyan

Spatial Meshing Effect and Reflector Treatment in PWR Core Modeling 2711
M. Fatone, L. Teunckens

On the Influence of Spatial Discretization in LWR Steady State and Burnup Calculations with Helios 1.9 2723
B. Merk, F.P. Weiß

An Extension of the Multigroup Analytic Nodal Method (MANM) to Problems in Hexagonal-Z Geometry 2739
D.I. Tomasevic, E.Z. Muller

ATUCHA-2 PHWR Monte Carlo MCNP5 and KENO-VI Models Development and Application 2756
M. Pecchia, C. Parisi, F. D'Auria, O. Mazzantini

Development of New Pin Power Recovery Methodology 2767
B. Zhang, F. Franceschini, E. Muller, P.F. Guimaraes

Deterministic and Stochastic Approach for a Void Reactivity Effect Evaluation: Application to a Generation IV Lead Fast Reactor (LFR) 2779
S. Bortot, R. Ghazy, M. E. Ricotti, C. Artioli, V. Peluso, M. Sarotto

VOLUME 5

Qualification of the TH-3DNK Coupled Code RELAP5/PARCSV2.7 Against a BWR Unstable Point at Peach Bottom Nuclear Power Plant 2799
T. Barrachina, R. Miro, A. Soler, G. Verdu

Verification of the Resonance Calculation Model for Rod Cluster Control Based on Ultra-fine-group Spectrum Calculation in the AEGIS Code 2805
M. Tabuchi, N. Sugimura, T. Ushio, M. Mori, A. Yamamoto, M. Tatsumi, Y. Ohoka

On the Adequacy of Cartesian Geometry Discrete Ordinates Solutions for Assembly Calculations 2814
S. Schunert, Y. Y. Azmy

An Investigation of the Temperature Correlation Effect in Lattice Calculations 2830
A. Hebert

Development of Open Code System for BWR Assembly Calculation by Monte Carlo Method 2838
T. Karino, T. Iwasaki, T. Yoshikawa, K. Shikota

Development of Spectral History Methods for Pin-by-Pin Core Analysis Method Using Three-Dimensional Direct Response Matrix 2849
T. Mitsuyasu, K. Ishii, T. Hino, M. Aoyama

Experimental and Computational Study of Power Distribution Flattening in a Reactor of GT-MHR Type at "ASTRA" Critical Facility 2861
V.F. Boyarinov, V.P. Garin, E.S. Glushkov, A.A. Zimin, G.V. Kompaniets, V.A. Nevinitsa, D.N. Polyakov, A.S. Ponomarev, N.N. Ponomarev-Stepnoi, O.N. Smirnov, P.A. Fomichenko, E.I. Chunyaev, S.L. Osipov, Y.P. Sukharev

A Comparison of Pebble Mixing and Depletion Algorithms Used in Pebble-bed Reactor Equilibrium Cycle Simulation 2873
H. D. Gougar, F. Reltsma, W. Joubert

Neutron Response of Silicon Carbide Semiconductor Detectors from Deterministic Adjoint Transport Calculations 2898
M. Rowe, K. Manalo, T. Plower, G. Sjoden

Axial Buckling Determination in a Reactor Core Containing Spacing Grid 2907
J. M. Mikus

Improvements and Core Applications of the Migration Mode Method 2920
D. Tomatis, A. Dall'Osso

Comparison of Probabilistic and Deterministic Error Propagation Calculations in Dragon 2934
M. Dion, G. Marleau

An Automated Cross Section Parametrization Method for MTR Application 2946
R. H. Prinsloo, P. M. Bokov, G. Stander, D. Botes, W. Joubert
Parameterization of Two-group Nodal Cross Section Data for POLCA-T BWR Transient Applications 2961
P.F. Guimaraes, E. Muller
Two-dimensional Whole Core Transport Calculations Using Paragon 2974
V.N. Kucukboyaci, M. Ouisloumen, F. Franceschini

SESSION 26A: REACTOR KINETICS

Improved Prediction of the Doppler Effect in Triso Fuel 2983
J. Ortensi, A.M. Ougouag
Enhancement of Xenon Dynamical Forecasts for PWR Guiding Systems Using Variational Data Assimilation 2996
A. Poncot, P. Erhard, J. Argaud, S. Gratton, B. Bouriquet, S. Ricci, S. Massart, O. Thual
Analysis of an Earthquake-Initiated-Transient in a PBR 3008
A.M. Ougouag, J. Ortensi, H. Hiruta
Investigation of Multigroup Effect in Transient Calculation to Determine Hottest Pin Enthalpy 3020
J. I. Yoon, J. H. Kim, H. G. Joo

SESSION 26B: REACTOR KINETICS

An Analytical Solution for an External Source Problem with Delayed Neutrons Using the Telegraphers Equation 3032
B. Merk, F.P. Weiß
Subcriticality Determination by Neural-based Inversion of Space-energy Neutron Kinetic Equations 3049
P. Picca, R. Furfaro, B.D. Ganapol, S. Dulla, P. Ravetto
A Time-dependent Method of Characteristics for 3D Nuclear Reactor Kinetics Applications 3059
J.B. Taylor, A.J. Baratta
Time Dependent Non-Extinction Probability for Prompt Critical Systems 3078
M. W. Gregson, A. K. Prinja

SESSION 27A: OPTIMIZATION METHODS

Evaluation of Numerical Techniques for Optimization of ISOCS Modeled Detector Measurement Geometries 3093
W. Russ, N. Menaa, D.Nakazawa, A. Bosko, R. Venkataraman, F. Bronson
Multi-Grid Genetic Algorithms for Space Shield Design 3105
S. Asbury, J.P. Holloway
Goal-oriented Mesh Adaptivity for Multi-dimension SP_N Equations 3115
B. Turcksin, J. C. Ragusa
Fuel Loading Pattern for Heterogeneous EPR Core Configuration Using a Distributed Evolutionary Algorithm 3124
J. M. Do, G. Arnaud, A. M. Baudron, J. J. Lautard

SESSION 27B: OPTIMIZATION METHODS

A Case Study to Test Mozaik for Different Optimization Problems 3137
K. B. Bekar, Y. Y. Azmy, K. Unlu, J. Brenizer Jr.
Cross Section Inference Based on PDE-Constrained Optimization 3146
M. Sternat, J. C. Ragusa
Adaptive Algorithms for a Self-shielding Wavelet-based Galerkin Method 3155
D. Fournier, R. Le Tellier

SESSION 28A: UNCERTAINTY ANALYSIS IN MODELING FOR MULTI-PHYSICS AND MULTI-SCALE II

Uncertainty Analysis of Cobra-TF Void Distribution Predictions for the OECD/NRC BFBT Benchmark 3168
M. Avramova, K. Ivanov, B. Krzykacz-Hausmann, K. Velkov, A. Pautz, Y. Perin

Prediction of Void Fraction Uncertainty Bands in BWR Fuel Bundles Using the CIAU Methodology 3183
K. Leung, A. Kovtonyuk, A. Petruzzi, F. D'Auria, D.R. Novog

Influence of the Neutron-Kinetic Feedback Parameter Variation on an Anticipated Transient Without Scram in APWR 3194
S. Kliem, S. Mittag, U. Rohde, F.P. Weiss

SESSION 28B: CRITICALITY SAFETY

Benchmark Analysis of a Metallic Plutonium Fueled BFS-55-1 Critical Assembly 3205
D. H. Kim, J. Yoo, C. S. Gil, S. J. Kim, Y. O. Lee

Criticality Accident Alarm System Modeling with Scale 3216
D.E. Peplow, L.M. Petrie Jr.

Analysis of Godiva-IV Delayed-Critical and Super-Prompt-Critical Conditions 3231
R.D. Mosteller, J.M. Goda

Application of Advanced Self-shielding Models to Criticality-safety Studies 3243
N. Martin, A. Hebert, F. Fernex, F. Bernard, J. Miss

SESSION 29A: NUCLEAR DATA METHODS AND ANALYSIS

An Extension of the Generation Method of Non-negative Scattering Cross-sections for a Two Dimensional Geometry 3254
J.W. Kim, Y. Lee, N.Z. Cho

Evaluating the Graphite Thermal Neutron Scattering Law Using Molecular Dynamic Correlation Functions 3267
B. D. Hehr, A. I. Hawari

Benchmark Experiment of Neutron Resonance Scattering Models in Monte Carlo Codes 3277
Y. Danon, E. Liu, D. P. Barry, T. I. Ro, R. Dagan

High Energy Neutron Scattering Benchmark of Monte Carlo Computations 3282
F. J. Saglime, Y. Danon, R. C. Block, M. J. Rapp, R. M. Bahran, D. P. Barry, G. Leinweber, N. J. Drindak, J. G. Hoole

SESSION 29B: NUCLEAR DATA METHODS AND ANALYSIS

An Alternative Stochastic Doppler Broadening Algorithm 3289
B. Becker, R. Dagan, C.H.M. Broeders, G. Lohnert

High Energy Neutron Time of Flight Measurements of Carbon and Beryllium Samples at the RPI LINAC 3301
M. Rapp, Y. Danon, R. C. Block, F. Saglime, R. Bahran, G. Leinweber, D. P. Barry, N. J. Drindak, J. G. Hoole

Influence of Nuclear Data Evaluations on Full Scale Reactor Core Calculations 3309
S. Langenbuch, A. Pautz, W. Zwermann, W. Bernnat, M. Mattes

Broad Group Cross Section Library for Fast Reactor Using Nuclide Dependent Collision Density 3319
T. Hazama

SESSION 30A: DETERMINISTIC TRANSPORT METHODS II

Sweepless Time-dependent Transport Simulations Using the Staggered-block Jacobi Method 3331
G. Davidson, E.W. Larsen

A Parallel Algorithm for Solving the Integral Form of the Discrete Ordinates Equations 3345
R. J. Zerr, Y. Y. Azmy

High-order Method of Characteristics for 2-D Unstructured Meshes 3360
E. Masiello, R. Clemente, S. Santandrea

Method of Long Characteristics Applied in Space and Time 3373
T. Pandya, M. Adams

SESSION 30B: DETERMINISTIC TRANSPORT METHODS II

Convergence Analysis for the Method of Characteristics in Unstructured Meshes 3391
R. Sanchez, S. Santandrea
Order-convergence Anomalies in Second-order Finite Elements Transport Methods 3408
C. Drumm
Filtered Spherical Harmonics Methods for Transport Problems 3422
R.G. McClarren, C.D. Hauck, R.B. Lowrie
A Quasidiffusion Method for Unstructured Quadrilateral Meshes in 2D XY Geometry 3436
W. A. Wieselquist, D. Y. Anistratov

EXTRA PAPERS

Nonlinear Stability Analysis of the Advanced Heavy Water Reactor: A Parametric Study 3450
V. Kumawat, P. Wahi
On the Importance of Being Discrete 3462
A.B. Kostinski
Development of a Coupling Scheme Between MCNP and Cobra-TF for the Prediction of the Pin Power of a PWR Fuel Assembly 3472
V. Sanchez, A. Al-Hamry
Reactor Physics Education: Time for (R)evolution 3486
W. F. G. Van Rooijen
Author Index
