9th International Conference of Chinese Transportation Professionals 2009

(ICCTP 2009)

Harbin, China
5-9 August 2009

Volume 1 of 5

ISBN: 978-1-61567-393-3
# TABLE OF CONTENTS

## Volume 1

### TRANSPORTATION SAFETY

<table>
<thead>
<tr>

Design and Validation of Wireless Dynamic Testing System for Bridge Based on the 941B Type Vibration Sensor ........................................... 211
Zonghong Li, Lianzhen Zhang, Xiaodi Zhu, Hongjiang Gu, Zitian Jiang
Application of Fractal Theory in Pavement Surface Texture Measurement ........................................................................................................ 219
Yan Yuan, Anxing Lai, Yan Que
Research on Application of Externally Prestressing for Simple-Continuous Bridge ................................................................. 226
Kejian Sheng, Rongda Li, Zonglin Wang
Restraint Efficacy Analysis and Structure Optimization for the Design of Airplane Metal Chocks .............................................................. 234
Fuhai Li, Hongbin Gu, Hongyu Tao
The Comparison of Three Getting Signal Control Delay Video Methods at Signalized Intersection .................................................. 241
Huiling Zhang, Keqin Li, Hongbo Qian, Guimio Su
Enhancing Immersion through Adjusting Parameters of Vehicle Driving Simulator ........................................................................... 247
Xiaobo Zhou, Shunying Zhu, Hong Wang, Bing Liu
A Calculation Method for the Information Utility of Traffic Guide Signs .......................................................................................... 254
Li-Li Zhu, Jian-Jun Shi, Xin-dong Chen
Safety Evaluation Methods of Road Traffic Based on Gray Cluster Theory ........................................................................................... 260
L. Wei, Z. Guan
Road Traffic Control Information and Traffic Resource Analysis System ................................................................................................. 268
Hai Zhang, Zhongzhen Yang, Yonglei Jiang, Haigui Kang
Research on the Crashworthiness Optimization of Curved-Road Concrete Barriers .................................................................................. 277
Zhengbao Lei, Lan Liu, Zuo Peng, Shijing Hou
Highway Accidents Analysis with Panel Data Model .............................................................................................................................. 287
T. Xu, X. Sun, Y. He, C. Xie
The Impacts of Differential Speed Limits on Speed ................................................................................................................................. 294
Shuzi Liu, Xiaohua Sun, Yulong He, Shuchao Hou
Study on the Influence of Coarse Aggregate on the Pavement Performance of Road Cement Concrete .......................................................... 300
Ai-quin Shen, Jian-ping Xiong, Jun-hui He, Tai-jun Liu
Research on the Competitiveness of China’s Ports ................................................................................................................................. 307
B. Liu, C. Liu
Equilibrium Model of Trip Modes in Road Traffic and Orientation of Charge Policy .......................................................................................... 317
Linlin Wu, Qifen Zha, Jianyi Liu
Analysis of the Influence of Emergent Incident on Expressways by Simulation .......................................................................................... 323
M. Li, W. Jin, S. Fang
Optimization of Regional Traffic Structure from the Perspective of Sustainable Development .............................................................. 330
Linlin Wu, Qifen Zha, Jianyi Liu
Performance Evaluation of Waterproof Bond Layer Materials Based on Grey Target Theory ................................................................. 336
Xin Yu
Probabilistic Pedestrian-Vehicle Conflict Micro-Model in Non-Signal Controlled Multi-Lane Segments ............................................................. 343
S. Lu, S. Fang, S. Zheng
Research on Simulation of Train Tracing Operation Based CBTC ............................................................................................................ 351
Z. Ma, X. Chai, L. Chong
Research on Rapid Curing Technology of Lime-Flyash-Cement Stabilized Macadam ............................................................................... 357
Yuanzhuo Chen, Zhenxia Li, Xuancang Wang
Experimental Research on Shear Connectors’ Stress of Composite Beam Bridge under Complex Stress Condition ................................................ 365
Shibo Zhang, Ronghui Wang, Juqin Zhang, Lingfeng Gong
A Retrograde Vehicle Detection Method Based on the Optical Flow Field ........................................................................................................ 371
You-ting Zhao, Xi-ying Li, Zhen-bo Wang
Research on a Risk Analysis System of Vessel-Bridge Collision ................................................................................................................... 378
Tao Fu, Junjie Wang, Junjian Zhang
Methods of Setting Maximum Speed Limits on Freeways ....................................................................................................................... 384
Guozhu Cheng, Yulong Pei
Study on the Carrying Capability of Preplanned Regional Earthquake Evacuation Corridor Based on Macro-Simulation ........................................... 390
Yang Wang, Zhihe Li, Jing Cao, Xiaobin Yang
The Analysis of Traffic Flow State on Foggy Expressway Based on Fuzzy Clustering .................................................................................... 398
Jianjun Wang, Chenfeng Xie, Zhenwen Chang, Jingjing Zhang
Research on the Impact of Drivers’ Heart Rate on Longitudinal Slope of Freeway Tunnel .............................................................. 405
Jianjun Zhao, Cao He, Yanni Shi
A Study on Cable-Removing Scheme of the Cable-Stay System of the Zhijing River Bridge ........................................................................... 413
Jianjun Wei, Nanhe Chen
Design Theory for Speed Control by Using Constant Edge Rate ................................................................................................................. 419
Bing Liu, Shunying Zhu, Hong Wang, Jing Xu, Qinmei Sun
Optimization of Dynamic Dispatching Decisions of Local Wagon-Flows in Terminals with IRTS ........................................................................... 425
Zaoyan Hu, Yaoyong Yan
Laboratory Evaluation of the Warm Mix Asphalt Performance in Liaoning .................................................................................................. 433
Yanhai Yang, Huaizhi Zhang, Yundong Wu
Model of High Speed Railway Wheel Ovalization ................................................................................................................................. 440
Xueyuan Zhang, Xinbiao Xiao, Xuexiong An
From Time Based Speed Series to Behavior Sequence: The Transformations and Applications of VTDR Data .................................................. 449
Zhenfeng He, Zhencheng Huang
Road Safety in Sections under Mixed Flow Traffic Environment .............................................................. 456

Sixin Liu, Xiaoduan Sun, Yulong He

Analysis on Vehicle No-Sideslip Single Side Skid Equivalent Frictional Coefficient ........................................ 463

Yongqiang Yue, Qing Zhao, Qingsong Xia

Discussion on Methods of Traffic Routes’ Alignment Survey and Application of Principle of Least Squares ........ 470

Yubao Liang, Baixi He, Shaotang Liu, Qianli Ma

A Study on Speeding Driving Based on Expected Speed .............................................................................. 480

Chen Hu, Xiaoduan Sun, Shici Liu

Vehicle Tracking from Videos Based on Mean Shift Algorithm ...................................................................... 486

Chang-Zhen Xiong, Yi-Gui Pang, Zheng-Xi Li, Yu-Li Liu, Yong-Hong Li

The Evaluation of Micro-Benefit on Highway Construction Investments .......................................................... 494

Hong Chen, Yujia Tian, Dianliang Xiao, Fengxia Wang

Noise Source Identification and Noise Reduction of a Double Crank Four Ring-Plate-Type Cycloid Reducer...... 501

B. Yang, Y. Liu, X. Zhang

Analysis Model for Operating Speed on Two-Lane Secondary Highway .......................................................... 507

Y. Zang, Y. Xiao, Yujia Tian

Study on the Method for Calculating Ship Squat in the Restricted Channel ...................................................... 515

Zhong-Yi Zheng, Long-Hui Gang, Hong-Xi Li

A Study on Driver’s Dynamic Visual Characteristics ..................................................................................... 521

Fei Song, Xiao-kuang Yang

Study of Hydrodynamic Pressure on the Cylindrical Pile-Cap Pier in Deep Water Subjected to Seismic Action .... 528

Haoping Liu, Bo Song, Guoming Zhang

Influencing Factors Contributing to Rear-End Collisions on Highways: PCA Based Investigation and Findings... 536

H. Jia, H. Xu, Y. Pei, H. Ji

Passenger Transport Demand Prediction for Newly-Built Regions .................................................................. 542

Maoxin Zhang, Yixing Liu

The Method to Identify Black Spots of Long Highway Tunnel ........................................................................ 549

Zhuangjin Ma, Chunfu Shao, Shengrui Zhang, Juan Zhang

Study on the Relationship of Traffic Flow Complexity and Traffic Conflict on Urban Road ............................. 555

Zhihong Xu, Xuewu Chen, Meixin Zhang

Control and Monitoring of Surface Subsidence for Shallow Tunnel under Existing Railway ........................... 562

Xinzhe Wang, Liying Xing

Voids Classification Standard for Cement Concrete Pavement Slabs Based on Service Life .......................... 569

Sheng Zeng, Jia Xu

Design of 3D Virtual Simulation and Evaluation System for Road Traffic Signs ................................................ 575

Haijiao Jiang, Zhiyong Zhang, Jian Chen, Zhengpeng Fang

Using VISSIM to Calculate the Capacity of Urban Expressway Interchange ................................................... 583

Tao Chen, W. Zhou

RGB Based Crowded Pedestrian Counting in Red Light Time ........................................................................ 590

G. Y. Zhang, Q. Zhao, Z. W. Luo, H. Wei

Impact of Posted Speed Limits on Operating Speed in Urban Expressways ..................................................... 597

H. Wang, X. Sun, B. Li, Y. He

Nonparametric Analysis of Timely Distribution of Traffic Crash ..................................................................... 605

Yaping Zhang, Xiang Lun, Ke Zhang, Lihua Liu, Xi Yao

Evaluation of Fire Risk at Highway Tunnels ..................................................................................................... 611

Jing Huang, Shao Yun Ren, Wei Zhang

The Analysis of Rural Road Safety and Its Strategies ....................................................................................... 618

Feng Sun

A Traffic Accident Reconstruction Study on Continuous Collision of Three Cars .............................................. 624

Qiang Yu, Lang Wei, Tao Chen

Study on the Preventive Maintenance Time for Asphalt Pavement ................................................................. 630

Binghui Ying, Ting Wu, Lijuan Wang, Zhaoguang Hou

Wavy Road Elevation Measurement Based on the Principle of Inertia ............................................................... 637

Y. Han, H. Wang

Investigation of Relationship between Level of Service and Safety ................................................................. 643

Xuesong Wang, Hangfei Lin, Xiaohong Chen

Research and Application of Graphic-Attributes Integration Based on Web GIS in Aviation Accident Investigation ... 650

Rui-shan Sun, Ding Yuan, Zhi-nan Xie

Study and Implementation on JPEG Image Enhancement System of Tire Mark .............................................. 656

Tao Chen, Lang Wei

Analysis of Characters and Causes of Road Traffic Accident ............................................................................ 662

Chengwu Jiao, Manjuan Yang, Yubo Hao

A Time-Varying Route Optimization Model for Urban Hazmat Transportation .............................................. 669

Yunpeng Wang, Wencai Sun, Shouli Li, Weiyouan Sun, Jingjing Tian, Haiwei Wang, Hai Wang, Yi Chen, Gang Cao

A Speed Limit Model of Vehicle for Urban Road Hazmat Transportation ....................................................... 676

Yunpeng Wang, Wencai Sun, Shouli Li, Gannu, Yujing Li, Jingjing Tian, Hai Wang, Wangji Chen

Risk Assessment of Road Operation Environment under Atrocious Weather Condition .................................... 683

Yan Ma, Zhong-ye Guo, Hua Guo, Yong-gang Xu

Study on Accident Reconstruction Model Based on Reverse-Reasoning Method ............................................. 693

Lili Zheng, Tongqiang Ding, Jianfeng Xi, Jian Sun, Jiang Li

Lili Zheng, Tongqiang Ding, Jianfeng Xi, Jian Sun, Jiang Li
A Study on Multifactorial Prediction Model for the Road Traffic Accidents ................................................................. 927
Zhao-hua Liu

Case Studies for Shaking Table Tests on Seismic Soil-Pile Group-Bridge Structure Interaction in Liquefiable Ground .................................................................................................................................................. 934
Liang Tang, Xianzhang Ling, Pengju Xu, Xia Gao, Liquan Wu

CT Scan on Frozen Roadbed Soil under Dynamic Triaxial Test Condition of Beilu River Section, Qinghai-Tibet Railway of China .......................................................................................................................... 942
Linxia Wang, Xianzhang Ling, Feng Zhang, Yibin Pu, Liquan Wu

Freeze-Thaw Stability of Slopes in Seasonally Frozen Regions of the Northeast China .................................................. 951
Lina Wang, Xianzhang Ling, Feng Zhang, Xiu Guo, Liquan Wu

Stability and Reinforcement Methods of a High Slope at the Hang-Yong Natural Gas Pipeline in China .......................... 958
Liquan Wu, Feng Zhang, Xianzhang Ling, Huoming Yu, Tianhong Chen, Wei Liu

Stability of Slope with the Weak Structural Plane Based on 2-D Nonlinear Finite Element Method .............................. 965
Feng Zhang, Liquan Wu, Xianzhang Ling, Zhanyuan Zhu, Lina Wang

Vibration Characteristics of Permafrost Embankment Induced by Passing Trains in Qinghai-Tibet Railway in Winter ............................................................................................................................................. 973
Zhanyuan Zhu, Xianzhang Ling, Lina Wang, Feng Zhang, Shijun Chen, Liquan Wu

A Nonlinear Model for Decision-Making for Container Slot Chartering and Allocation under Liner Shipping Method ........................................................................................................................................... 1014
W. Liu, H. Pan, X. Pi

A Comprehensive Bus Line Evaluation Method Based on Fuzzy C-Means Clustering Algorithm ........................................ 1034
Sapting Chen, Xuewu Chen, Min Yang

A Nonlinear Model for Decision-Making for Container Slot Chartering and Allocation under Liner Shipping Alliance ....................................................................................................................................... 1041
Ji-hong Chen, Hong Zhou

Study on the Model of Hub Location under Earthquake Conditions ........................................................................... 1048
Shi An, Lei Ye, Candong Wang

Empirical Correlation Analysis of Parking Arrival and Departure Rates for Urban Parking Facilities ........................ 1056
Jun Chen, Huanhuan Chao, Hua Bai

Transit Network Optimization Method Based on BRT Attracting Region: A Case Study of Changzhou ........................ 1063
Zem Li, Xuewu Chen, Xiaoping Liu

Efficiency Evaluation of Urban Transit Terminals Based on the Cloud Model ................................................................. 1070
Shijun Yu, Xingchun Liu, Yongneng Xu

Travel Mode Choice in Large Cities of China Based on Loss Aversion Theory ............................................................. 1077
Xuemei Zhou, Yan Meng, Di Di

Topological Properties of Public Transport Networks: A Temporal Perspective ................................................................. 1084
Xiao-Yong Yan, Ming-Sheng Wang

Conventional Bus Stop Capacity in Peak .......................................................................................................................... 1090
Haijun Bai, Wenguan Li, Baizhuang Dong

Inhabitant Trip Behavior Similar to Quantum Transition ................................................................................................ 1097
Rong-Han Yao Dian-Hai Wang

Study and Simulation of Behavioral Decision-Making Model of Through Bicycles Passing Vehicles at Signalized Intersection .................................................................................................................... 1104
Xing-qiang Zhang, Shen Wang, Ying-hui Liang

An Optimization Model for Bus Rapid Transit ........................................................................................................... 1111
Bo Yan, Yonglei Jiang, Bin Yu, Zhongzhen Yang

A Model of Mixed Land Use and Trip Production by BP Neural Network ................................................................. 1117
Yue Zhao, Chunfui Shao, Zhihua Xiong

Assessment Methodology for Road Network Travel Time Reliability under Ice and Snowfall Conditions ................ 1124
Junqiang Leng, Yuaping Zhang, Yuquan Leng

Multi-Section Short-Term Traffic Flow Prediction Based on Multi-Dimensional Time Series ..................................... 1131
Gangliang Chen, Lin Cheng
Research on Dynamic Characteristics of Road Network in Snowy Conditions ................................................................. 1378
Xiaoqiang Ren, Longhai Yang, Xiaofang Wang, Dongyan Fan
A Study on the Headway Distribution of the Xueyuan Roundabout ............................................................................. 1385
Ping Han, Dian-hai Wang
Study on Intersections with Median BRT Stations: Focused on Pedestrian Street-Crossing Characteristics ......................... 1392
Ruhua Zhang, Xinyuan Zhu, Li Lei
The Analysis of Transportation Demand Generation Mechanisms of the Urban Agglomerations in China ........................ 1400
Zhi Dong, Bing Wu, Linbo Li
Study on Residential Daily En-Route Travel Choice Behavior with Traffic Information: Application of RP/SP Joint Survey and Disaggregate Model .............................................................. 1406
Yi Zhang, Meiying Yan, Xiaoguang Yang
A Particle Swarm Optimization Algorithm for Bilevel Programming Models in Urban Traffic Equilibrium Network Design ................................................................................................................................. 1412
Hai Hu
Study on Inter-regional Transportation Infrastructure Integration Planning in China ......................................................... 1419
Chaoyang Li, Yi Zhang
Repositioning of Empty Containers in the Transpacific Market: A Case Study ............................................................. 1425
Yu Zhang, Cristiano Facanha

Volume 3

Further Development of the German Highway Capacity Manual (HBS2011) .................................................................. 1439
Ning Wu
Operational Performance Evaluation of Different Exit Ramps on Florida’s Freeways by Considering Number of Lane Change ........................................................................................................................................ 1445
Jian John Lu, Linjun Lu, Tangyi Guo
Strategic Transport Model of Beijing and Application to City Centre Transport Policies Evaluation .................................... 1453
Rui Zhang, Haiyan Wu

EMERGENCY RESPONSE SYSTEMS AND TECHNOLOGIES

Real-Time Monitoring System Architecture of Hazardous Goods Logistics Based on RFID .................................................. 1459
Ming He
Public Transport Incident Prediction Method by Road Traffic Delays ............................................................................. 1465
H. Z. Gao, Y. Han, L. L. Zeng, C. Xu, H. N. Wu
The Application of the Maximal Coverage and Partial Coverage Model in the Shelter Location Problem ..................... 1472
Xiao-Qiang Ren, Jian Chen, Gao Guo, Wen-Ping Cai
A Framework of the Traffic Organization Simulation System for Freeway Emergency Response ......................................... 1479
Shaowu Cheng, Xiaofei Ye, Shi An, Tingting Tang
Application of Locating Technology in the Highway Emergency Response System .............................................................. 1484
Huantao Zhao, Yangpeng Wang, Shiwu Li, Hongyan Mao
Accident Prevention and Inducement Strategy in Highway Tunnel .................................................................................... 1490
Heng Ding, Xiao-yan Zheng, Wei-hua Zhang, Zhong-jie Zhao
Qingping Gao, Yu Luo, Qipeng Yan, Yu Lin
Test and Analysis of Rail Break Emergency Treatment Device for Railway Switches .......................................................... 1504
Xianqiao Li, Mingzhen Wang, Yunpeng Zhang, Chao Ma, Minxiong Li
Capacity Reliability of Road Network under Adverse Weather Conditions Based on Fuzzy Theory .................................. 1510
Xi-qiao Zhang, Shi An, Yan-hong Tang, Hong-fei Sheng
Real-Time Dispatching and Routing for Emergency Vehicles after Earthquake Disasters ................................................. 1516
Wen-Ping Cai, Lei He, Gao Guo
Establishment of Construction Safety Early-Warning System for Mountainous Freeways ................................................. 1523
Kaijing Wang, Xiaodong Zhang, Xiaohuang Wang, Jianyi Yu, Sheng Yi
A Study of Vehicle and Materials Depot Location Problems for Winter Road Maintenance ................................................... 1530
W. P. Cai, G. Liu, W. S. Cao
Analysis of City Transportation Networks’ Travel Time Reliability during Adverse Weather ............................................. 1536
Jian Wang, Guanlin Sun, Xiaowei Hu
A Study of Transit Evacuation Route Planning Based on Time-Expanded Network ............................................................ 1543
D. L. Zhang, J. X. Cui, G. Liu
Integrated Arterial Signal and Access Control Strategy under Non-Notice Emergency Evacuation: Modeling and Simulation-Based Analysis ............................................................................................................. 1550
Heng Wei, Harikrishna Perugs, Qiangyi Ai, Xiaokuan Yang
Xin Shi
INTELLIGENT TRANSPORTATION SYSTEMS

Car-Following Criteria at a Signalized Intersection in Beijing
Q. Yu, J. Liu, J. Rong ................................................................. 1570

Study of Driver’s EEG and Application in Intelligent Transportation Systems
Junqiang Peng, Pingdong Wu .................................................. 1576

Short-Term Forecasting of Uncertain Traffic States
Zhixun Xiong, Zhicheng Yao, Chunfu Shao .......................... 1584

Dynamic Model of Transit Signal Priority on Colored Time Petri Net
Ciyan Lin, Zhaosheng Yang, Bowen Gong ............................... 1590

Bus Location Display System Based on GPRS
Song Gao, Ling-yong Zhang, Lei Zhong ................................. 1597

Short-Term Traffic Flow Prediction Based on EMD and Artificial Neural Network
Xianglong Lao, Guosheng Niu, Qianjiuo Wu ......................... 1605

The Research of Signal Phase Sequences Based on the Conglomeration of Pedestrians and Bicycles
Jin-guang Liu, Qian Yu, Jian Rong, Xiao-ming Liu .................. 1611

Effects of Lane Changing in Heterogeneous Traffic Flow
Fa Zhang, Qiao-xia Zhao .......................................................... 1618

Detecting the Type of Multi-Fractality in Traffic Time Series
J. Yu, D. Liu, P. Shang, Z. Wang, L. Guan ............................... 1624

Link Average Speed of Traffic Flow Estimation Method Based on Floating Car
W. Zhu, A. Chang, C. Jiang, W. Zhang ..................................... 1631

A “Reality Vision” Navigation Technique Based on Sequence Geo-Referenced Image Databases
Qingwu Hu, Shoujun Liu, Kai Mao ........................................... 1637

Signal Timing and Coordination—An Art of Engineering
Z. Tian .................................................................................. 1648

Highway Traffic Parameters Estimation by Using Cell Dwell Time
H. Wang, Y. Han, Z. Liang ....................................................... 1656

Real-Time Optimization Model of Intelligent Public Transport Network and Its Algorithm
S. Bao, Y. Han, L. Wang ............................................................. 1662

Frequency Optimization Model for a Public Traffic Scheduling System
C. Xu, F. Wu, Y. Han, H. Gao, Y. Zhang, Z. Li ....................... 1669

Mixed Traffic Micro-Simulation of Urban Branch Roads
W. Li, Q. Li, X. Wang ............................................................... 1676

Track Access Technology of Traffic Accident Vehicles Based on Video
B. Liu, X. Wang, W. Li, X. Wang ................................................ 1682

Collision Avoidance among Multiple Ship Agents
M. Pan, F. Yan, L. Zhao, M. Inaishi ......................................... 1688

Traffic Signal Control Optimization of Urban Arterials Based on a Method of Main Intersection Control
Strategies ............................................................................. 1695

An Interval-Varying Floating Car Data Clustering Approach Based on Self-Organizing Maps
Q. Li, J. Cao, Y. Yue ................................................................. 1701

A Route-Based Model for Determining Interconnection of Isolated Traffic Signals
W. Ma, Y. Lin, X. Yang ............................................................ 1707

Optimal Setting of the VMS’s Future Range Based on the Characteristics of Driving Speed
T. Wang, J. Chen .................................................................. 1713

Urban Road Travel Speed Estimation Based on Low Sampling Floating Car Data
Y. Yue, H. X. Zuo, Q. Q. Li ....................................................... 1719

Experimental Study on Sound Countermeasures against Driver Fatigue
R. Fang, X. Zhao, K. Mao, J. Ron, X. Liu ................................. 1726

The Evaluation of Level of Service for Expressway in Operating Stage
Hong-qing Li, Yu-long Pei ........................................................ 1734

Vehicle Detection from Videos Containing Complex Background Based on Bayesian Statistical Modeling
Yong-hong Li, Yi-li Liu, Yi-qi Pang, Yu-rui Yin .......................... 1741

An Improved Ant Colony Algorithm for the Shortest Path Problem in Time-Dependent Networks
Hai Gao, Yongqiang Liu, Qing Chang, Huagang Xiong ........... 1748

Intelligent Emergency Traffic Evacuation Spatial Decision Support System for Urban Disasters
Zhichong Zou, Yaowu Wang .................................................... 1755

Estimation of Original-Destination Matrices for Public Traffic Passenger Flow
Jian Zhang, Wenguan Li, Jinhuaan Zhao ................................. 1762

New Methods for Research in Multi-Agent Traffic Signal Control
Qian-jiao Wu, Rong Lan .......................................................... 1769

An AHP-Based Performance Evaluation Model of Transportation Control System: The Experience from West
Liaohe Rd., Dalian ................................................................. 1776

Jianmei Ding, Changhoug Wang

An Optimized Signal Control Method for a Freight Arterial Transport System
Changhong Wang, Jianmei Ding ............................................. 1783
A Reserve Capacity Model of Optimal Traffic Lane Allocating ................................................................. 1790
Peng Zhang, Wen-quan Li
Side Road Traffic Considered in Transit Signal Priority Control .......................................................... 1797
Jia Xu, Hangfei Li
Short-Term Traffic Flow Prediction with ACD and Particle Filter .......................................................... 1804
G. Y. Zhang, Q. Zhao, Z. W. Luo, H. Wei
ALINEA-Based Urban Expressway On-Ramp Metering Strategy ......................................................... 1811
Fei Zhang, Yuchuan Du, Lijun Sun
An Active Parking Guidance Information System Based on Dynamic Agent Negotiation ...................... 1819
Lingfei Wang, Hong Chen, Yang Li
Research on Vehicle Information Extraction from High-Resolution Satellite Images ......................... 1825
Qi Sun, Yanping Liang, Qulin Tan, Sulan Zhang
Map Matching Algorithm of a Center Terminal Based on the Road Network Topological Structure .... 1832
Zhaosheng Yang, Zhijian Wang
An Improved A* Algorithm for the Intelligent Transportation System .................................................. 1839
Yan Li, Yang Gao
Study of the Parking Guidance Reliability of Urban Parking Variable Message Signs ......................... 1846
Dongxing Li, Kefei Yan, Xiaotian Cui
Study on Signal Timing Methods of Optimizing Urban Transportation Network Efficiency ................ 1855
Xianmin Song, Dianhai Wang, Ying Peng
The Prediction of Urban Bus Travel Time ................................................................................................. 1863
Rui Li, Wenquan Li
A New Cellular Automaton Traffic Flow Model for an Off-Ramp Junction of a Chinese Urban Expressway 1870
Yuanchao Li, Lina Wu, Yalong Pei, Xianzheng Ling
A Manual Calibration Method for Simulation of a Freeway Weave Section ......................................... 1877
Jiaguo Dai, Jian Sun, Keping Li
Efficient Link Travel Time Estimation for Signalized Link by Small Size Probe Reports ....................... 1884
Qiang Li, Tomio Miwa, Taka Morikawa
Phase and Timing Optimization at Actuated-Coordinated Signal Control Intersection ............................. 1892
Chengquan Mao, Yulong Fei
Signal Intersection Optimal Control Model of Small Region Based on Traffic Equilibrium Theory .... 1898
Wei Liu, Hai-xian Jiao, Wei-yong Geng
A Novel Real-Time Road Shape Describing and Parameter Obtaining Method ...................................... 1904
Meng Wu, Yang Gao, Peng He
Adaptive Control Method of Multi-Phase Intersection Based on Traffic Status Identification ................ 1910
Wenchen Yang, Zhaosheng He, Ningting Chen
A Collaborative Software Framework Design in Supporting GLITS I-75 Integrated Freeway and Arterial 1920
Operation Project ........................................................................................................................................
Investment and Finance for the Intelligent Transportation System in China ............................................ 1927
Mingquan Wang, Yali Zhao, Dongyuan Yang, Xiaofa Shi, Ying Hui
Advanced Traveler Information Impact on Truck Route Choice ............................................................... 1934
Xiao Qin, Junhao Han, Bruce X. Wang
Identifying Alternative Routes with Integration of ITS into Traffic-Diversion Strategies ....................... 1946
Heng Wei, Yinbai Wang, Abi Mogharabi, Qingyan (Ken) Yang
An EEG Predictor of Driving Fatigue ........................................................................................................ 1958

Conservative Relationship of Asphalt Mixture for Finite Element Method ................................................................. 2201
Shaowei Wu, Hong Wang, Yao Tao
Limit Value of Railway Bridge for Traffic Safety ..................................................................................................... 2207
Zhihui Zhou, Wenzhao Qin, Jun Zhang, Qingyan Zeng
Finite Analysis on Shear-Lag Effect in Curved Continuous Box Girder with Corrugated Steel Webs
Gang Zhang, Shu-er Zhao, Xing Ma, Lei Wang

Nonlinear Analysis of Time-Dependent Effect for Reinforced Concrete Thin-Wall Box Girders Exposed to Fire
Zhiyong Zhu, Xiao Chen, Ting Wu, Zhiyong Zhang

Construction Control of Cable-Stayed Bridges Based on ANN and GA Hybrid Algorithm
Ronghua Ying, Xiao Chen, Ting Wu, Zhiyong Zhang

Experimental Investigation of the First Precast Bi-Pre-Stressing Simple Girder Concrete Bridge
Minjun Zhou, Nan Wang

Study on Long-Term Behavior and Ultimate Strength of CFST Columns
Xiaoan Zhuo, Guohai Cao, Hui He, Xiangrong Liu

Observation and Theoretical Analysis of the Temperature Field on the Cross Section of Concrete Filled Steel Tubes
Hang Sun, Honglei Sheng, Yan Li, Jianglong Li

Influencing Factor Analyses of Section Types on Vehicle-Bridge Interaction of Concrete Box Girder with Corrugated Steel Webs
Zhihong Li, Pengfei Li, Liangxiang Xue

Model Test Study of System Transformation for Jiangdong Bridge
Runlei Chen, Dongchun Qi, Maoxin Tang, Yong Yan

Experimental Study on Performance of the Bridge Deck Pavement of SF-PFSC
Rui Chen, Xiaowei Wang, Shuling Guo, Mingjie Zhou, Xiaoyan Zhao, Erlong Zhang

Study on Experiment of Concrete Mixed with II Degree Flyash under the Corrosion of Freeze Thawing
Lihua Lu, Shi Chen, Xiating Feng, Haitu Sun

Experimental Research on the Shear Strength Deterioration between the Freezing and Thawing Surface of Melting Soil Slope in Seasonal Frozen Regions
Yong-chun Cheng, Qi Ge, Yan He

Design and Construction of Overlay with Mechanical Joint Element on Used Concrete Pavement
Mingjie Zhou, Xiaoyan Zhao, Wenling Tian, Xiaowei Wang, Xinxue Xu

Resilient Modulus of the Graded Aggregate Material under Long-Term Dynamic Repeat Load
Long Wang, Xiaoguang Xie, Bin Xu

Prediction of the Soft Roadbed Deformation Based on a Creep Damage Model
Ruibo Ren, Hiwen Li, Zheren Wang

Research on Relationship between Fine Aggregate Angularity and Asphalt Mixture’s Anti-Shear Ability
Y. L. Wang, Y. Wang

Application of High Performance Concrete Mixed with Steel Slag Powder in Concrete Pavements
Li Xiong, Liying Jiang, Shijun Huang

Mechanical Characteristics of Reinforced Gravity Oblique High U-Shaped Abutment
Xintian Li, Guiwei Liu

Application of Thermal Stress Controlling in Construction of Large Bridge Cushion Cap
Wei Xu, Jianwen Zou, Huixing Ren

Impact of Gradation Types on Freeze-Thaw Performance of Asphalt Mixtures in Seasonal Frozen Region
Decheng Feng, Junyan Yi, Lei Wang, Dongsheng Wang

Study on Shear Properties for Adherence of New and Old Concrete and Its Practical Calculation
L. Li, Z. L. Wang

Research on Flame-Resistant Technique in Application of Asphalt Pavement in Highway Tunnel
Lin Bi, Yuqu Tan, Guoqiang Qi, Zhengjin Chen

Fracture Mechanics Analysis of Cracking in Asphalt Pavement Widening
Jun-hui Zhang, Jian-long Zheng, Bao-shan Huang

Sensitivity Analysis of the Dynamical Parameters on Road Materials
Liu-cheng Li, Han-bing Liu, He-feng Zhang, Chang-yu Li

Dynamic Effects of Moving Vehicular Loads on Continuously Reinforced Concrete Pavements on Winkler Foundation
Rui Ren, Huiwen Li, Zheren Wang

Seismic Hybrid Simulation of a Multi-Span Bridge
Yao-jun Cai, Shi-zhu Tian

Experimental Study on Behavior of Geotextile-Reinforced Soil
You-chang Hu, Hai Song, Zhongjun Zhao

Study on the Frost Resistance Test Method of Lime-Fly Ash Stabilized Material Base Course
Zhiqun Chen, Zhenren Wang, Xiuxi Wang, Yufeng Zhao

Computer-Aided Error Detection of Horizontal and Vertical Alignment in Highway Construction
Su Liu, Yaping Zhang, Lu Yu

An Estimate Method for Accuracy of Fitting Horizontal Alignment in Old-Highway Based on Fitting Normal Error
Su Liu, Yaping Zhang, Yuqin Feng

Effects of Layer Interface Conditions on Fatigue Behavior of Asphalt Pavements with Semi-Rigid Bases
Xianyan Zhuo, Guohai Cao, Hui He, Xiangrong Liu

Damage Model Analysis of SBS Modified Asphalt Mixture
Ronghua Ying, Xiao Chen, Ting Wu, Zhiyong Zhang
Flutter Derivatives Identification of Aeroelastic Model of Hangzhou Bay Bridge ................................................................. 2444
A Discontinuous Numerical Method for Asphalt Mixture .......................................................... 2450
Changhong Zhou, Yanqing Zhao, Zheren Wang
A Safety Evaluation Method of Existing Flexible Suspension Bridge with Double Cable .............. 2456
Li-Xia Lin, Ya-Ping Wu, Nan-Hong Ding
Relation of Stability Coefficient to Design Parameters for Curved Continuous Rigid Frame Bridges with Long-Span and High-Pier ................................................................. 2463

Volume 5

Study on the Structure of Digitized Transport Networks and Evaluation of Some Logistics Policies .......................................................... 2858
ZhongDing Yang, Yonglei Jiang, Lianjie Jin

Research on Optimization of Crew Scheduling of the Passenger Dedicated Line Based on a Genetic Ant Colony Algorithm ...................................... 2866
Z. Tian, S. Ni, T. Chen, Q. Song

Analysis for Principal-Agent Relationship between Owner and Construction Agent of Agent-Construction Project ...................................... 2873
Wenyi Zhao, Xuancai Wang, Ting Zhan

Research on Calculation of Important Parameters of Freeway Financial Post-Evaluation .......................................................... 2878
Y. Wang, S. Zhu, H. Wang, W. Xie, M. Li

Empirical Research on Applicable Principle for Toll Mode of Highway .................................................................................. 2886
Ying Zhang, Guang Yang

Research on Travel Behavior Changes under Vehicle-Use-Restricution Measures during the Olympic Games ...................................... 2893
Chun Yan Li, Sheng Yang Sun, Ji Fu Guo

Study on Congestion Pricing Model of Bus Lane Mixed Use by Carpool Vehicles .................................................................................. 2900
Dawei Pan, Wei Deng, Renjie Qian

Principle Analysis and State Evaluation on Coordinated Development among Transportation Modes ................................................ 2906

Evaluating the Equity Impacts of Rural Road Investment Projects on Household Welfare Based on a Quantile Regression Approach: Evidence from Fujian Province .................................................................................. 2913
Y. Tian, Y. Li, X. Chen

Study on Using OD Traffic Flow to Identify the Special Boundary of the Expressway Influence Zone .................................................. 2920
Li-Ying S itu, Shan-Ying Zhu, Hong Wang

Transport Strategy for Sustainable Development of Jiao Dong Economic Region .................................................................................. 2927
S. Wang, S. Zhang, L. Ren

Research of Road Transportation Sustainable Development Based on Ecological Footprint Model ..................................................... 2935
Xiao-xia Wang, Lei Fang, Xiao-xia Wang, Jian-feng Lu

A Study on Signal Timing Optimization of Individual Intersections Based on an Ant Colony Algorithm .................................................. 2942
Ling-jie Li, Xiao-kuang Yang, Zhi Xu

Study on the Optimization of Vessel Scheduling Design Based on Soft Time Windows under Voyage Charters .................................................. 2951
Ming Sun, Feifei Fei, Xuefeng Wang

Congestion Pricing Revenue Redistribution Strategy Based on Traffic Behavior .................................................................................. 2957
Investment and Financing Influence Analysis and Countermeasures for Highway Construction in the Period of China’s 11th Five-Year Plan .......................................................................................... 2963
Ruoqi Zhang, Minglan Chen, Xiaorong Cai, Fang Liu

A Study on the Financing Mode of Assets Securitization in Port Project .................................................................................. 2969
Su Yu

Study on the Capacity of Right-Turn Movement under Pedestrians’ Influence at Signalized Intersections .................................................. 2976
Wanchao Zhang, Xiaokuan Yang, Zhi Xu

Ramp Metering Strategies in a Corridor Network .......................................................................................... 2983
Qiong Tian, Haijun Huang, Hai Yang

Efficiency Loss of the Multiclass, Multicriteria Stochastic User Equilibrium Traffic Assignment against Stochastic System Optimization .......................................................... 2990
Xiaoju Yuan, Haijun Huang, Tianliang Liu

The Application of TUXEDO Middleware in a Network-Based Train Working Diagram Compilation System .................................................. 2997

Analyzing the Effects of the Growth of Maritime Industries on the Regional Economy with Dynamic Inverse Matrix .......................................................................................... 3004
Yajun Li, Zhongchen Yang

Optimization Theory of Regulation on Rural Transit Market Based on Rule of Transport Equality .................................................. 3011
Changan Zhang, Maocheng Li, Qisen Zhang

Analyzing the Motivation of Queue-Jumping Driving-Action on Transportation Systems by Prospect Theory .................................................. 3019
Maozeng Li, Qingfeng Zhang, DaFeng Chen

Modeling Passenger Choice Behavior in Chinese Multi-Airport Regions .................................................................................. 3028
Jiangtao Liu

Design and Realization of Decision-Making and Analysis Assistant System on National Integrated Transportation Information .................................................. 3034
J. Zhang, C. Shao, C. Zhang, Z. Ma

Pricing Model for Expressway with Elastic Demand .......................................................................................... 3042

Research on Conversion Coefficients between Bicycle, Electric Bicycle, and Pedestrian on Urban Road Intersection .................................................. 3049
Ai-Zeng Li, Xin-Sheng Song, Wei Wang, Wen-Quan Li

Simulation Analysis of Merging Area on Urban Expressway in Alternate Rules Based on Cellular Automata Model .......................................................................................... 3055
Shun Fang, Xiaoning Zhang, H. M. Zhang
A Study on the Bus Delay Model at Bus Stops........................................................................3062
Zhi Xu, Vincent Kwami Akpalu, Xiao-Arun Yang

A Google-Map Integrated Web-Based Stated Preference Survey for Modeling Personal Mobility ..........................................................3072
Kai Liu, Yasuo Asakura

Evaluation of Supervision Engineer’s Control over Investment Based on AHP ..........................................................3079
T. Lu, Q. Li

Technical Efficiency of Container Terminals in China Using a Multi-Activity Data Envelopment Analysis Model ..........................3086
Ying Li, Lixin Miao

Expressway Operation Financial Benefit Evaluation under Uncertainty ..........................................................3093
Liye Zhang, Chang Li

Research on the Differences in Regional Economy and Transportation among the Three Regions in China .........3099
Kechao Sun, Qingnian Zhang, Xinxie Zhang

Evaluation and Optimization of Public Transport Subsidies for Alternative Energy ..........................................................3105
Yuan Fang, Xiqiu Chen, Xinmiao Yang

Study on the Control Strategy of Gas Injection of Gas Engines ..........................................................3112
Zhe Gao, Yu-ming Li, Ling-yong Ling

LOGISTICS

Design of Intelligent Decision Module for Storage Location Assignment in AS/RS ..........................................................3118
Yanru Zhu, Guiliang Zhou, Lina Mao

Optimization of Open Vehicle Route to Reduce Fuel Consumption Based on Genetic Algorithm ..........................................................3124
Yong Peng, Haiying Zhu

Research on Location of Railway Logistics Center ..............................................................................3131
Xionghuan Jin, Huibing Xie, Bo Jiang, Lai Xu

Study on Logistics Center Location Bi-Level Programming Model and Algorithm Based on Competition ..........................................................3137
Xiaojun Guan, Xifu Xu, Caihua Wang, Yana Yan

A Model and Heuristic Algorithm for Inventory Routing Problem in Emergency Logistics ..........................................................3147
Binglei Xie, Xiaoming Hu

Study on Multi-Dimensional Structure Model for Agricultural Products Logistics Organization in China ................................................................3154
Xionghuan Yin, Guoqiang Yi, Jianhua Qiu, Jianguang Wei, Shuxi Fang

Mean-CVAR Model of Wholesale Price Contracts and Dual Purchase Contracts in the Supply Chain ..........................................................3160
Y. G. Mu, Q. Mei, Z. B. Zhao, Y. F. Feng

Structure System Model of Modern Logistics ..............................................................................3167
Lijun Chen, Xuewu Chen

Multi-Objective Interval Number Model of Intermodal Transport under Uncertain Environment ..........................................................3174
Longhai Tang, Xiaorei Hu, Jian Wang

A Model on Risk Evaluation for Emergency Guarantee Mechanism of Food Logistics ..........................................................3180
Xiongqian Hu, Ruhe Xie

Logistics Distribution Information System Based on 3rd Generation Mobile Communication Technology ..........................................................3187
Zhongwei Wang, Hongbo Wang, Yan Pang

Theory Study on Correlation Stability and Profit Allocation of Supply Chain ..........................................................3197
Hai Hu, Chuantao Wang

Optimal Dynamic Substitution Policy for Components in an Assemble-to-Order System ..........................................................3204
Yongqiang Liu, Qing Chang, Xiaohong Zhang, Hui Gao

Coordination Policies of Supply Chain Where Deterioration Begins at a Random Time Point ..........................................................3210
Yongqiang Liu, Qing Chang, Xiaohong Zhang, Hui Gao

Grey Correlation Analysis on Logistics Energy Consumption ..............................................................................3216
Zhiyi Leii

Research on Taboo Simulated Annealing Combinatorial Optimization Algorithm of Location Routing Problem with Pickups and Deliveries ..........................................................3222
Dawei Hu, Dengjian Xuan, Huigang Lin, Xiaofen Guo

Electrical Appliance Reversion Logistics Network Planning ..........................................................3229
Gang Zhao, Xi Nan, Kezhong Lu

A New Organizational Structure Pattern of Owners Based on Multi-Project ..........................................................3236
Qiaoqiang Dong, Yingming Shen, Huijun Li, Zhijun Chen

Dynamic Alliance of Road Logistics Enterprise Based on Ant Colony Algorithm ..........................................................3243
Xiaobo Liao, Tamin Huo

Optimization of Emergency Material Dispatch Problem Based on Adaptive Genetic Algorithm ..........................................................3249
Xiaojun Feng, Qingying Zhang, Wei Wang

An Algorithm for Vehicle Routing Problem with Soft Time Windows Using Tabu Search ..........................................................3257
Li Xin, Zhang, Huimin Niu

Research on Dynamic Safety Stock Based on Short-Term Weather Forecasting ..........................................................3263
Wei Liu, Shuzhi Zhao, Wei Wang, Bo Peng

Study of Operational Characteristics of HAZMAT Vehicles Based on GPS Data ..........................................................3269
Zhenguo Liu, Xiaofa Shi, Ying Hui
Risk Evaluation Model for Construction of a Logistics Park Based on Principal Component Analysis .......................................................... 3276
Yachun Wang, Qing Huang, Bin Chen, Dewu Liu

VEHICLE OPERATIONS TECHNOLOGIES

Parameter Sensitivity Analysis of Accident Reconstruction Model Based on Orthogonal Design .......................................................... 3283
Tiefang Zou, Zhi Yu, Ming Cai, Jike Liu

Study on the Key Technology of Captive Model’s Numerical Test ........................................................................................................ 3289
Xiao Wang, Bing Xiao, Bo Yang, Anguo Shi

Simulation and Analysis for Stick-Slip Vibration of Locomotive with Hollow-Shaft Drive System ...................................................... 3299
Jiansun Liu, Huaqun Zhao, Wening Zhai

Fatigue Life Prediction of Rubber Nodes .............................................................................................................................................. 3306
Haichao Wu, Pingbo Wu, Qingquan Lan

Application Research of GPS Based on Google Earth Platform ......................................................................................................... 3312
Zhen-Bo Wang, Rui-Xiang Chen, Niandong Jiang, Hui Zhang, ZhiRen Sha

A Study of the Fuzzy PID Control Over the Hydraulic Semi-Active Suspension in Consideration of Automotive
Engine and Passenger-Seat System .................................................................................................................................................. 3318
Xiang Chen, Guo-fang Li, En-yong Wang, Xin-jia Jiang

Study on Power Control of Electric Power Steering System ............................................................................................................. 3327
Chunyan Mu, Jingtuo Yu, Wansheng Zhao, Jianxiao Liu

RAIL AND TRANSIT SYSTEMS

Simulation of Wheel/Rail Noise of High Speed Train Running on the Slab Track .................................................................................. 3333
Xinwen Yang, Caiyun Yan

Study of Influence of Subway Station Excavation on Existing Metro Deformation ............................................................................. 3339
Yun-Peng Li, Zhi-Yun Wang

Influence of Longitudinal Connection Mode of Ballastless Slab Track on Vibration Characteristic of Train-Ballastless Slab Track-Subgrade System ...................................................................................................................... 3346
Qing-Yuan Xu, Zhi-Ping Zeng

Vehicle Semi-Active Suspension System Simulation with Variable Structure Control Method ............................................................... 3354
Zongli Li, Huanyun Dai

Structural Noise of Longitudinal Stiffened Concrete Cylindrical Shell .................................................................................................. 3361
Weiping Xie, Liangming Sun

Research on Greedy Train Rescheduling Algorithm .......................................................................................................................... 3368
Z. He, H. Li, J. Miao, L. Meng, B. Mao

Impact on Regularity of Track from Pile Underpinning of Light Railway Bridge ................................................................................... 3378
Xiangguo Li, Hailong Wang, Quan Zhou, Jianquing Bu, Musong Li

Train-Carried Rail Signal Parameters Test System Based on Spectrum Correction Method and Virtual
Instrumentation .................................................................................................................................................................................. 3387
Y. Guo, G. Cheng, S. Sha

Study on Style Protection and Urban Traffic Planning of Harbin Jingyu Street .................................................................................. 3393
X. Yao, Y. Zhang, Y. Liu

Study on the System Design and Optimal Models of Urban Rail Transit Traction Calculation System .......................................................... 3399
Hongbo Liu, Hongxia Lu, Miaomiao Lu, Jie Zhang

Characteristic Analysis of Urban Rail Transit Network Considering Demand and Operation: A Case on Shanghai ................................................. 3406
C. Yang, Y. Wang

Adaptability Assessment and Maintenance Technology Research of Existing Railway Line Speed Increases to 200
km/h ........................................................................................................................................................................................................ 3413
Ping Wang, Rong Chen, Xiaoping Chen

Analysis on Mechanical Performances of High-Speed Railway Transition Curves .................................................................................... 3420
Xiangguo Li, Musong Li, Chao Ma, Jianqiu Bu, Liangliang Zha

Research on Dynamic Measuring System and Model of Novel High Speed Railway Vehicle Bogie ............................................................. 3428
X. Wang, J. Su, Y. Liu, D. Zhou

Empirical Research on Urban Rail Transit Operation Performance Based on FCE—AHP ........................................................................... 3435
Xinlong Jiao

The Application of Functionally Gradient Material to Problems of Wheel-Rail Contact .............................................................................. 3443
Jun Zhang, Liping Su, Shengwu Wang, Xuesong Jin

Analysis about Business Investing and Financing Models of Urban Rail Transit ....................................................................................... 3449
Xiao Tian, Cui Hui Xie

Characteristics of Fundamental Data for Railway Maintenance and the Construction of Integrated Data Platform .............................................................................. 3456
Faitian Wang, Mei Sun, Jianglin Zhou

Track Structure Vibration Characteristic Analysis Based on FEM 3D Model ......................................................................................... 3463
Linyu Liu, Zhaoming Lu Lu

Measurement and Simulation Study on Ground Subsidence Induced by Shield Tunneling in Sandy Stratum ............................................. 3469
Haixia Sun, Wen Zhao, Lihua Lu
