

2009 International Conference on Electromagnetics in Advanced Applications

(ICEAA 2009)

**Torino, Italy
14-18 September 2009**

Pages 1-524

IEEE Catalog Number: CFP0968B-PRT
ISBN: 978-1-4244-3385-8

TABLE OF CONTENTS

Combined Electric and Magnetic Dipoles for Mesoband Radiation	1
<i>Carl E. Baum</i>	
Design of a Uniform Electromagnetic Dielectric Lens for Launching an Approximate Spherical TEM Wave.....	8
<i>S. Altunc, C. E. Baum, C. G. Christodoulou, E. Schamiloglu</i>	
High Frequency Scattering by a Cylindrically Curved Surface with Second-Order Generalized Impedance Boundary Condition.....	12
<i>Alinur Büyükaksoy, Gökhan Çinar</i>	
Beam Decomposition of Time-Harmonic Electromagnetic Waves	16
<i>Timor Melamed</i>	
2 D Simulation with the FDTD Method of GPR Modeling Applied to the Detection in Stratified Lossy Medium Using the Frequency Effect Pulse.....	20
<i>Tahar Ziani, Mohammed Laour, Xavier Dérobert, Malek Benslama</i>	
Review of the ECONAM Project Activities in the Area of Electromagnetic Characterization of Metamaterials	24
<i>C. R. Simovski, S. A. Tretyakov, A. Sihvola</i>	
Diffraction Corrections to the Kirchhoff Approximation in the Problem of Rough Surface Scattering	27
<i>I. Fuks</i>	
Automated Design of Single- and Dual-Band Electromagnetic Band Gap Surfaces by Genetic Algorithms	31
<i>P. Kovács Z. Raida</i>	
Analytical Modeling of Broadband Negative Refraction with a Crossed Wire Mesh	35
<i>Mário G. Silveirinha</i>	
Time Domain Versus Frequency Domain in Ultra Wideband	39
<i>W. Wiesbeck, E. Pancera, C. Sturm</i>	
Utilization of Elastic Wave Mode Conversion in Electromagnetic Diffraction Tomographic Imaging Schemes	43
<i>K. J. Langenberg A. Zimmer</i>	
Efficient EM Modeling Based on Conversion of Triangular Mesh into Quadrilateral Mesh	47
<i>B. M. Kolundzija, M. M. Kostic, B. Lj. Mrdakovic, D. S. Sumic</i>	
Estimation of the Threat of IEMI to Marine Equipment and EM Hardening Solutions.....	51
<i>R. Kanyou Nana, S. Dickmann, B. Schetelig, J. Kehie, F. Sabath</i>	
Mixed-Mode S-Parameter Design of Ultra-Wideband Coupled-Line Baluns	55
<i>Benjamin Sewiolo, Gabor Vinci, Georg Fischer, Robert Weigel</i>	
The Discrete Geometric Approach for Wave Propagation Problems	59
<i>L. Codecasa, R. Specogna, F. Trevisan</i>	
Recent Innovations in Antenna Design for Wireless Sensor Networks	63
<i>David V. Thiel, Amir Galehdar</i>	
Wire Lens Antennas with Near/Far Field Conjugation Properties	66
<i>Vincent Fusco, Oleksandr Malyuskin</i>	
Extremely Low-Profile Spiral Antenna with PEC and EBG Reflectors	70
<i>H. Nakano, H. Oyanagi, T. Igarashi, Y. Iitsuka, J. Yamauchi</i>	
Imaging of Scattering Screens Via Fast Methods	74
<i>W. K. Park, D. Lesselier</i>	
Design of Planar Inverted-F Antennas (PIFA) for Multiband Wireless Applications	78
<i>H. F. Abutarboush, R. Nilavalan, H. S. Al-Raweshidy, D. Budimir</i>	
Magnetostatic Analysis of a Field Assisted Switched Reluctance Generator	NA
<i>A. Siadatan, M. S. Toulabi, E. Afjei</i>	
Quantitative MillimeterWave Imaging of 2.5D Inhomogeneous Objects	82
<i>S. Van Den Bulcke, A. Franchois</i>	
Accurate Full-Wave Analysis of Micromachined Coplanar Waveguides.....	86
<i>P. G. Van Leuven, M. C. Van Beurden, A. G. Tijhuis</i>	
Theoretical Model of the Electromagnetic Disturbances Caused by Explosions in the Ionosphere	89
<i>I. Yu. Sergeev</i>	
Statistical Study of the Degradation of the Shielding Effectiveness of a Structure in the Presence of an Aperture.....	93
<i>I. Marziali, D. Boschetti, P. Elia, B. Audone</i>	
Network Based Hybridization of the TLM and the TWF Method	97
<i>N. Fichtner, S. Waney, D. Bajonz, P. Russer</i>	
Simplified Directional Ground-Plane Cloaks.....	101
<i>E. Kallos, C. Argyropoulos, Y. Hao</i>	
Diffraction of a Creeping Wave on an Elongated Perfectly Conducting or Coated Object by a Sharp Edge.....	105
<i>F. Molinet</i>	
Networks Methods for Wireless Resonant Energy Links (WREL) Computations.....	109
<i>Marco Dionigi, Mauro Mongiardo, Roberto Sorrentino, Cristiano Tomassoni</i>	
Lorentz Reciprocity and the Apparent Phase Centre of Ultra-Wideband Antennas	113
<i>J. Kunisch</i>	
Application of Jacobi-Davidson Algorithm to 2-D Eigenmode Problems in Printable Electronics	117
<i>R. Mäkinen, H. Sillanpää, K. Östman, V. Palukuru, V. Pynttäre, T. Kanerva, J. Hagberg, T. Lepistö, H. Jantunen</i>	

Terahertz Standoff Identification Under Real World Conditions	121
<i>M. Herrmann, C. Weigand, S. Wohnsiedler, J. Jonscheit, R. Beigang</i>	
Leader Derived Initial Conditions for a Lightning Return Stroke	125
<i>R. L. Gardner</i>	
Towards Automated Optimization, Multidimensional Parametrization, and Synthesis with Electromagnetic Solvers in Electronic Packaging and RF Circuit Design	128
<i>Vikram Jandhyala, Arun Sathanur, Ritochit Chakraborty</i>	
A Reduced Numerical Technique for the Determination of Input and Transfer Impedance	132
<i>K. A. Owusu, J. R. Ojha, B. K. Shah</i>	
A Broadband MLFMA Using Pseudospherical Harmonics	136
<i>I. Bogaert, F. Olyslager</i>	
Integral and Finite-Difference Formulations of the Contrast Source Inversion Method	139
<i>P. M. Van Den Berg, A. Abubakar, T. M. Habashy</i>	
Efficient Space-Domain Formulation for Integral Equation Modelling of Printed Metallizations on Coated Cylinders.....	143
<i>T. Bertuch, G. Vecchi</i>	
Efficient Computation of Mixed Potential Dyadic Green's Functions for a 1D Periodic Array of Line Sources in Layered Media	147
<i>Guido Valerio, Donald R. Wilton, David R. Jackson, Alessandro Galli</i>	
Beam-Based Back-Propagation Imaging.....	151
<i>T. Heilpern, A. Shlivinski, E. Heyman</i>	
Analytical Theory of Stacked Fish-Net Structures	157
<i>R. Marqués, F. Mesay, L. Jelinek, F. Medina</i>	
Microwave Breast Cancer Detection Via Flanged Parallel-Plate Dielectric Waveguide Probe	161
<i>H. Zhang, S. Y. Tan, H. S. Tan</i>	
Accelerated Symmetrical Condensed Node TLM Algorithms for NVIDIA CUDA Enabled Graphics Processing Units	165
<i>Filippo Rossi, Poman P. M. So</i>	
Susceptibility of a Generic CAN-Bus Network Against High-Power Electromagnetics (HPEM)	169
<i>F. Sonnemann, J. Mirschberger</i>	
Application of Multilevel Adaptive Cross Approximation (MLACA) to Electromagnetic Scattering and Radiation Problems	173
<i>Jose M. Tamayo, Alexander Heldring, Juan M. Rius</i>	
AGIBC Formulation for Lossy Conductor Modeling	177
<i>Zhi-Guo Qian, Mei Song Tong, Weng Cho Chew</i>	
C-Band Dual-Polarization Receiver for the Sardinia Radio-Telescope	181
<i>O. A. Peverini, R. Tascone, G. Virone, G. Addamo, A. Olivieri, R. Orta</i>	
High Frequency Electromagnetic Field Coupling to Small Antennas in Rectangular Resonator	183
<i>S. Tkachenko, H. G. Krauthäuser, F. Gronwald, J. Nitsch</i>	
Sensitivity of Dual Waveguide Probe Complex Permittivity and Permeability Measurement to Probe Lift-Off Error	187
<i>M. J. Havrilla, M. W. Hyde Iv</i>	
Analysis of Wavelength-Scaled Array Architectures Via Domain Decomposition Techniques for Finite Arrays.....	191
<i>R. W. Kindt, M. N. Vouvakis</i>	
The Time-Domain Method of Weighted Residuals (MWR): Moving from Grid-Based Methods to Node-Based Meshless Techniques	195
<i>Zhizhang (David) Chen, Yi-Qiang Yu, Michel M. Ney</i>	
Optical Circuits and Nanofilters Design	199
<i>A. Toscano, L. Vegni</i>	
Virtual Performance Evaluation of Automotive Radar Concepts in Realistic Traffic Environments	201
<i>C. Sturm, S. Knörzer, T. Zwick, W. Wiesbeck</i>	
Modeling the Broadband Resistive and Inductive Behavior of Polygonal Conductors.....	205
<i>T. Demeester, D. De Zutter</i>	
Conformal L-Notch Patch Antennas for Human Brain Monitoring Using the SAM Head Model.....	209
<i>N. P. Asimakis, I. S. Karanasiou, N. K. Uzunoglu</i>	
Fast 3D Power Synthesis for Antenna Arrays with Dynamic Range Ratio Reduction	213
<i>Massimiliano Comisso, Roberto Vescovo</i>	
Green Function for a Seeded Energy Chirped Free Electron Laser	217
<i>A. A. Lutman, R. Vescovo</i>	
Some Analytic Results on Sommerfeld Integrals with Branch Points.....	221
<i>L. Knockaert, D. Vande Ginste, D. De Zutter</i>	
Integral Equation Solvers and Their Applications in the Optical Regime	225
<i>E. Simsek, Q. H. Liu</i>	
Numerical Solution of Maxwell's Equations Using B-Splines.....	229
<i>R. Vázquez, R. Buffa</i>	
Radar Cross Section Reduction of Aircraft Wing Front End	232
<i>A. Motevasselian, B. L. G. Jonsson</i>	
Integration of Code Diversity and Long-Range Channel Prediction in Wireless Communication	236
<i>Yiyue Wu, Tao Jia, Robert Calderbank, Alexandra Duel-Hallen, Hans Hallen</i>	

Applications of Periodic Structures to Modern Antenna Designs	240
<i>J. Shaker, R. Chaharmir, A. Petosa, A. Ittipiboon, M. Cuhaci</i>	
Measurement and Analysis of Horn Antennas with Integrated High Impedance Surfaces	244
<i>Michael A. Forman</i>	
Computation Methods and Experimental Measurements of the Electric and Magnetic Field Distribution Inside High Voltage Substations.....	248
<i>C. Munteanu, V. Topa, A. Racasan, G. Visan, I. T. Pop</i>	
Reconfigurable Array Synthesis with Constraints on Near Field, Far Field and Dynamic Range Ratio	252
<i>G. Buttazzoni, R. Vescovo</i>	
Ultra Wideband CPW Bow-Tie Antenna	256
<i>Sawsan Sadek, Zahra Katbay</i>	
An Asymptotic Evaluation of Radiation Surface Integrals for High Frequency Wave Problems Which Reduces to the UTD Ray Format.....	259
<i>Giorgio Carluccio, Matteo Albani, Prabhakar H. Pathak</i>	
Microwave Deflectors for High Energy Beam Diagnostic	263
<i>M. Petronio, P. Craievich, R. Vescovo</i>	
Peculiar and Anomalous Cloaking Features of Plasmonic Materials	267
<i>A. Alù, N. Engheta</i>	
Overview Over Network Methods Applied to Electromagnetic Field Computation	271
<i>Peter Russer</i>	
Numerical Analysis of Impulse Regime Phenomena in Linear and Non-Linear Metamaterial Transmission Lines	275
<i>J. S. Gomez-Diaz, S. Gupta, A. Alvarez-Melcon, C. Caloz</i>	
A New Approach to the Generalized Optical Cross-Section Theorem in Electromagnetics	279
<i>Edwin A. Marengo</i>	
Experimental Investigation of Microstrip Patch Antennas on Ceramic Substrates.....	NA
<i>R. C. Filho, J. H. Araújo, M. F. Ginani, A. G. D'assunção, L. M. Mendonça</i>	
Complex Scatterer Reconstruction Using Multistatic Spherical Wave ISAR Fourier Template Matching.....	283
<i>D. G. Johnson</i>	
Polarimetric Measurements of the Extinction Cross Section	287
<i>Christer Larsson, Mats Gustafsson, Gerhard Kristensson</i>	
Circuit Theory Approach to the Design of Metamaterials	291
<i>M. Zedler, P. Russer</i>	
Vector Spherical Harmonics Antenna Description for IRUWB Ray Tracing Simulator	295
<i>Roxana Burghilea, Stéphane Avrillon, Bernard Uguen</i>	
Convergence and Oscillations in the Method of Auxiliary Sources.....	299
<i>G. Fikioris, I. Psarros</i>	
MEMS-4-MMIC: Innovative RF-MEMS MMIC Components for Agile RF-Frontends	303
<i>L. Baggen, R. Malmqvist, P. Frijlink, T. Vähä-Heikkilä, A. Gustafsson</i>	
Parallel Dispersive Finite-Difference Time-Domain Modeling of Three-Dimensional Electromagnetic Cloaking Structures	307
<i>Y. Zhao, Y. Haoy</i>	
Small Terminal Antennas : Analysis, Design and Performance Limitations	311
<i>A. K. Skrivervik, J. R. Mosig</i>	
Measurement of the E-Field Distribution of a WLAN Transmitter Inside and Outside a Control Console.....	315
<i>T. Pilsak, J. L. Ter Haseborg</i>	
MoM/BI-RME Modeling of Frequency Selective Surfaces with Thick Metal Patches	319
<i>Maurizio Bozzi, Maria Montagna, Luca Perregrini</i>	
Validating a High-Order Time Domain Hybrid Implicit/Explicit FEM Implementation	323
<i>N. Marais, D. B. Davidson</i>	
A Total Inverse Scattering Operator Formulation for Solving Large Structures with LEGO.....	327
<i>V. Lancellotti, B. P. De Hon, A. G. Tijhuis</i>	
EMC of Traction Drive with Permanent Magnet Synchronous Motor.....	NA
<i>R. Dolecek, O. Cerny, Z. Nemec</i>	
Tapped-Delay Line Beamforming in Spatial Diversity MIMO Noise Radar Using Conditional Generalized Likelihood Ratio Test	NA
<i>W. J. Chen, R. M. Narayanan</i>	
Path Length of Curved RF Trajectories Through Vertically Stratified and Isotropic Ionospheres	331
<i>Christopher A. Jeffery, Robert Roussel-Dupre, Patrick Colestock</i>	
Optical Cloaking with Cylindrical Plasmonic Implants	335
<i>S. Tricarico, F. Bilotti, L. Vegni</i>	
Design of a Modified Monopole Antenna for the Quadband Communication.....	339
<i>Sungtek Kahng, Eunchul Shin, Jaehoon Choi</i>	
Design and Analysis of Transmitting and Receiving Characteristics of a Small MIMO Array Antenna with a Matched Load	341
<i>Kenichi Kagoshima, Shigeki Obote, Atsuhiko Kagaya</i>	
Design of a Microstrip Patch Array Antenna for WCDMA Indoor Repeater Systems	345
<i>Y. K. Lee, J. P. Kim, J. G. Ha, J. H. Choi, S. U. Seo, Y. B. Lee, W. M. Seong</i>	
New Leaky-Wave Antennas Using Surface-Wave Launchers and Planar Metallic Grating Lenses.....	349
<i>Symon K. Podilchak, Al P. Freundorfer, Yahia M. M. Antar</i>	

Advanced Surface Integral Equation Methods in Computational Electromagnetics	353
<i>Pasi Ylä-Oijala, Matti Taskinen, Seppo Järvenpää</i>	
Design of a Novel Broadband Microwave Absorber Using a EBG Structure	357
<i>Dong-Uk Sim, Jong-Hwa Kwon, Sang-Il Kwak, Jae-Hoon Yun</i>	
Scattering of a Plane Wave by a Perfect Electromagnetic Conducting Elliptic Cylinder.....	NA
<i>A. K. Hamid, F. R. Cooray</i>	
GPU-Based Arnoldi Factorisation for Accelerating Finite Element Eigenanalysis	360
<i>E. Lezar, D. B. Davidson</i>	
Broadband, Circularly Polarized Patch Antenna Arrays.....	364
<i>I. Hertl, M. Stryček</i>	
Surface Integrated Field Equations Method for Computing 3D Static and Stationary Electric and Magnetic Fields	368
<i>Zhifeng Sheng, Patrick Dewilde, Rob Remis</i>	
Channel Measurements and MB-OFDM Performance Inside a Driving Car.....	372
<i>F. Bellens, F. Quittin, F. Horlin, P. De Doncker</i>	
On the Uniqueness of Electromagnetic Fields and Consequences for Inverse-Scattering Problems.....	376
<i>L. Klinkenbusch</i>	
Investigating Efficient Parallelization Techniques for the Characteristic Basis Function Method (CBFM)	380
<i>D. J. Ludick, D. B. Davidson</i>	
Convergence Analysis of Current Sampling Profiles for Antenna Design in the Presence of Electrically Large and Complex Platforms.....	384
<i>Hsi-Tseng Chou, Fang-Yao Kuo, Heng-Tung Hsu</i>	
Reconstructing Radiation Patterns Using Amplitude Measurements on Cylindrical Surfaces	388
<i>J. Puskely, Z. Nováček</i>	
Ray-Tracing Application to Mobile Localization in Multipath Indoor Environments	392
<i>Abdelhamid Tayebi, Josefa Gómez, Francisco Sáez De Adana, Oscar Gutiérrez</i>	
OFDM Channel Modeling for User Localization of Wireless Devices	NA
<i>Z. Nemec, R. Dolecek</i>	
A Novel Policy for EMC Antenna Calibration.....	396
<i>B. Audone, A. Gaggelli, S. Guidi, P. Masini, S. Neri</i>	
Scattering Cancellation Approach to Cloaking: Open Problems, Possible Solutions, and New Applications	400
<i>F. Bilotti, L. Vegni</i>	
Planar Implementation of the UWB Leaky Lens Antenna.....	404
<i>Andrea Neto</i>	
SAR Determination and Influence of the Human Head in the Radiation of a Mobile Antenna for Two Different Frequencies.....	408
<i>Pedro Pinho, Amélia Lopes, João Leite, João Casaleiro</i>	
Common-Mode Resonances in Ultra Wide Band Connected Arrays of Dipoles: Measurements from the Demonstrator and Exit Strategy	412
<i>D. Cavallo, A. Neto, G. Gerini</i>	
Design of Complex Surfaces for Power Transmission Enhancement Through Electrically Small Apertures	416
<i>L. Scorrano, F. Bilotti, L. Vegni</i>	
RCS Measurements and Predictions of Different Targets for Radar Benchmark Purpose	420
<i>R. Fernández-Recio, A. Jurado-Lucena, B. Errasti-Alcalá, D. Poyatos-Martínez, D. Escot-Bocanegra, I. Montiel-Sánchez</i>	
Performance Analysis of the Particle Swarm Optimization Algorithm When Applied to Direction Of Arrival Estimation.....	424
<i>B. Errasti, D. Escot, D. Poyatos, I. Montiel</i>	
Current Status of Closed-Form Green's Functions in Layered Media Composed of Natural and Artificial Materials.....	428
<i>M. I. Aksun, Aytac Alparslan, K. A. Michalski</i>	
Radio Noise Measurements in Medium Wave Band	432
<i>I. Landa, A. Arrinda, I. Eizmendi, I. Fernández, J. Morgade, G. Prieto, M. M. Vélez</i>	
Synthesis of Wideband Waveguide Diplexers	436
<i>G. Virone, R. Tascone, O. A. Peverini, G. Addamo, R. Orta</i>	
Azimuth Radiation Pattern Characterization of Omnidirectional Antennas Near a Human Body	438
<i>Lingfeng Liu, Stéphane Van Roy, Philippe De Doncker, Claude Oestges</i>	
Performances Improvement of MEMS Sensors and Energy Scavengers by Diamagnetic Levitation	442
<i>Giorgio De Pasquale, Chamila Siyambalapitiya, Aurelio Somà, Jing Wang</i>	
RSSI - Based Localization and Tracking Algorithm for Indoor Environments	446
<i>Ada Vittoria Bosisio</i>	
Closed-Form Green's Functions in Cylindrically Stratified Media for Method of Moments Applications.....	450
<i>S. Karan, V. B. Ertürk</i>	
Aperture Models in Domain Decomposition Method for Coupled-Cavity Systems	454
<i>Laurent Patier, Vincent Gobin, Pierre Bonnet, Françoise Paladian</i>	
Design of 2D TeraHertz Band-Gap Photonic Waveguides Using an Accelerated Integral Equation Technique	458
<i>D. Bogusevski, E. Degirmenci, C. Brennan, P. Landais</i>	
Analysis of X-pol Propagation in Microcellular Environment.....	462
<i>Enrico M. Vitucci, Veli-Matti Kolmonen, Vittorio Degli-Esposti, Pertti Vainikainen</i>	
The Wiener-Hopf Method Applied to Dielectric Angular Regions: the Wedge	466
<i>V. Daniele, G. Lombardi</i>	

Hybrid Numerical Scattering Field Analysis Embedded into Simulations of Complex Radio Based Systems - Examples, Capabilities and Limitations	470
<i>G. Greving</i>	
Different Techniques to Characterize EBG Structures for MM Wave Applications	474
<i>Yaser S. E. Abdo, M. R. Chaharmir, J. Shaker, Y. M. M. Antar</i>	
Towards Real-Time Active THz Range Imaging for Security Applications.....	478
<i>H. Quast, T. Löffler</i>	
Propagation of Optical Flat-Topped Gaussian Beams in Satellite Links.....	482
<i>Canan Kamacioglu, Serap A. Arpali, Yahya Baykal, Erdem Yazgan</i>	
Recent Enhancement in the Analysis of Wire-Surface Structures with the Method of Moments	486
<i>F. Vipiana, G. Vecchi, D. R. Wilton</i>	
Estimating Temporal Multipath Via Spatial Selectivity: Building Environmental Knowledge into Waveform Design for Radar-Embedded Communications	490
<i>Shannon D. Blunt Justin, G. Metcalf</i>	
Application of Ray Tracing to Derive Channel Models for Future Multi-Gigabit Systems	494
<i>Thomas Kürner, Martin Jacob</i>	
A Calder´on Preconditioned PMCHWT Equation.....	498
<i>K. Cools, F. P. Andriulli, F. Olyslager</i>	
Through-the-Earth Magnetic Field Propagation: Modelling for Underground Applications	502
<i>N. Ayuso, J. A. Cuchí, A. Muñoz, F. Lera, J. L. Villarroel</i>	
Path Loss Prediction Using a Modified 2D Finite-Difference Time-Domain Approach for a Below to Above Ground Channel	506
<i>Y. Wu, M. Lin, I. J. Wassell</i>	
Modeling Truncated Metamaterial Structures With Fine Features Using GEMS: A Parallelized General Purpose Electromagnetic Field Solver	510
<i>Raj Mittra, Lai-Ching Ma, Yanfei Li</i>	
Integral Equation Transient Analysis of Experiments on Electromagnetic Scattering from Sub-Wavelength Apertures	514
<i>N. Cinosi, S. P. Walker, M. J. Bluck</i>	
Frequency Diversity Evaluation Using Modified 2D Finite-Difference Time-Domain Technique for Tunnels and Below Ground Fire Hydrants.....	518
<i>Y. Wu, R. Liu, M. Lin, I. J. Wassell</i>	
Development of a Coolable 2-14 GHZ Eleven Feed for Future Radio Telescopes for SKA and VLBI 2010.....	522
<i>Per-Simon Kildal, Jian Yang, Yogesh Karandikar, Niklas Wadefalk, Miroslav Pantaleev, Leif Helldner</i>	
Work Exposure to Electromagnetic Fields.....	525
<i>M. Johansson, Y. Hamnerius, M. Persson</i>	
Semi-Intrusive Quantification of Uncertainties in Stochastic Electromagnetic Interactions: Analysis of a Spectral Formulation.....	529
<i>O. O. Sy , M. C. Van Beurden, B. L. Michielsen, A. G. Tijhuis</i>	
A Novel Layer Peeling Algorithm for the Synthesis of Microwave Microstrip Filters	533
<i>M. R. Pereira, H. M. Salgado, J. R. Pereira</i>	
UWB High-Contrast Robust Tomographic Imaging for Medical Applications.....	537
<i>M. Guardiola, S. Capdevila, S. Blanch, J. Romeu, L. Jofre</i>	
EMI-Inducted Failures in MOS Power Transistors	541
<i>C. Bona, F. Fiori</i>	
Experimentally Evaluated Propagation Model for Underground Mesh Networks	545
<i>M. M. Moutairou, G. Y. Delisle, H. Aniss</i>	
Electromagnetic Models for Exploiting Multi-Path Propagation in Through-Wall Radar Imaging	549
<i>R. J. Burkholder</i>	
Simplification Methodology of Complex EM Models of Small Airplanes	553
<i>Z. Reznicek, Z. Raida</i>	
Wideband, High-Amplitude, Pulsed Antennas for Medical Therapies and Medical Imaging	557
<i>K. H. Schoenbach, S. Xiao, J. T. Camp, M. Migliaccio, S. J. Beebe, C. E. Baum</i>	
An Ultra-Wideband SAGE Algorithm for Body Area Networks	561
<i>Stéphane Van Roy, Lingfeng Liu, Claude Oestges, Philippe De Doncker</i>	
Wideband, Lowloss, Low-cost, Quasi-TEM Metamaterial-Based Local Waveguides in Air Gaps Between Parallel Metal Plates	565
<i>Per-Simon Kildal, Eva Rajo-Iglesias, Esperanza Alfonso, Alejandro Valero, Ashraf Uz Zaman</i>	
3D Shape Reconstruction of PEC Scatterers by PO Vectorial Formulation	569
<i>Raffaele Solimene, Aniello Buonanno, Francesco Soldovieri, Rocco Pierri</i>	
Propagation Prediction in Rough and Branched Tunnels by the ADI-PE Technique	573
<i>R. Martelly, R. Janaswamy</i>	
Physical Bounds and Sum Rules in Scattering and Antenna Theory.....	577
<i>M. Gustafsson, G. Kristensson, S. Nordebo, C. Larsson, A. Bernland, D. Sjöberg</i>	
Realizing Artificial Ice in Superconducting and Colloidal Systems	581
<i>C. J. Olson Reichhardt, A. Libal, C. Reichhardt</i>	
Fundamental Properties of Canonical Soft and Hard Surfaces, Perfect Magnetic Conductors and the Newly Introduced DB Surface and their Relation to Different Practical Applications Including Cloaking	584
<i>Per-Simon Kildal</i>	

Beam Width Robustness of a 670 GHz Imaging Radar	588
<i>K. B. Cooper, N. Llombart, R. J. Dengler, P. H. Siegel</i>	
Interference Characterization and UWB Channel Measurements for Wireless Intensive Care Patient Monitoring	590
<i>Oliver Lauer, David Barrasy, Marco Zahner, Rüdiger Vahldieck, Heinz Jäckel, Jürg Fröhlich</i>	
An Efficient Nyström Scheme for Solving Volume Integral Equations	594
<i>M. S. Tong, Z. G. Qian, W. C. Chew</i>	
Diffraction by a Semi-Infinite Parallel-Plate Waveguide with Sinusoidal Wall Corrugation	598
<i>J. P. Zheng, K. Kobayashi</i>	
3-D and Package-Conformal UHF RFID Antennas with Enhanced Performance	602
<i>Feng Lu, Terry T. Ye</i>	
Use of Matrix Padé Approximation in the Analysis of Irregularly Shaped Patch Antennas with Multiport Network Model	606
<i>Goker Sener, Lale Alatan, Mustafa Kuzuoglu</i>	
An Algebraic Preconditioner Based on Properties of the Skew-Hermitian Part of the Linear Systems Arising from the Discretization of the E-Field Integral Equation.....	609
<i>G. Angiulli, P. Quattrone, S. Tringali</i>	
Stacked Reconfigurable Circular Patch Antenna for Adaptive MIMO Systems.....	613
<i>D. Piazza, M. Capacchione, J. Kountouriotis, M. D'Amico, Kapil R. Dandekar</i>	
A Multilevel Fast Direct Solver for EM Scattering from Quasi-Planar Objects	617
<i>E. Winebrand, A. Boag</i>	
Evaluation of Complex Permittivity of Materials with Deformed Cross-Section in Coaxial Line.....	621
<i>Yuya Sakemoto, Atsushi Harada, Kikuo Wakino, Yu-De Lin, Toshihide Kitazawa</i>	
Accuracy of Electromagnetic Analysis for a MMIC Lange Coupler.....	624
<i>T. Ciamulski</i>	
Using Best Neural Networks Structures in Modeling Microwave Low Noise Transistor	NA
<i>H. Yarmohammadi, Gh Moradi, A. Abdipour, M. Ahadi</i>	
Low-Profile CPW-Fed Slot Antenna with Parasitic Slot on Conductor-Backed Two-Layer Substrate	628
<i>J. P. Jacobs</i>	
Time-Domain S-Parameter Extraction for Waveguides Containing Low Loss Dielectrics.....	631
<i>T. Herzberg, T. Weiland</i>	
The One-and-Only Algorithm for EM-Field Computations Does Not Exist	635
<i>T. Weiland</i>	
Design and Simulation of an Electromagnetic Lens for a Half Impulse Radiating Antenna	639
<i>F. Vega, F. Rachidi, N. Mora, N. Peña, F. Roman</i>	
Signal Processing Techniques for Stabilization of Marching-on-in-Time Method	643
<i>J. Lacik, Z. Lukes, Z. Raida</i>	
Ray-Tracing and Multiple Reflections Inside Materials Applied to UWB Localization	647
<i>E. Plouhinec, B. Uguen</i>	
Electromagnetic Scattering from Obstacles in the Near Field Region of Electrically Large Arrays	651
<i>Ramazan Cetin, Ozlem Aydin Civi, Paolo Nepa, Giuliano Manara</i>	
Novel Ultra-Wideband Slot-line Antenna Designed by Adaptive Real Coded Genetic Algorithm.....	655
<i>Z. Lukes, J. Lacik, Z. Raida</i>	
A New Method for Computing Electromagnetic Induction Sounding Response Curves.....	659
<i>M. Parise, S. Cristina</i>	
A New Design of Compact Planar Microstrip Filter	663
<i>Biyun Ma, Anne Chousseaud, Serge Toutain</i>	
Accuracy of Multilayer Equivalent Models For Composite Laminated Materials.....	667
<i>S. Gona, V. Kresalek</i>	
A Uniform Geometrical Theory of Diffraction and its Extensions for a Curved Edge Illuminated by a Complex Source Point Beam	671
<i>Prabhakar H. Pathak, Youngchel Kim, Robert J. Burkholder</i>	
Correlation Properties of the Pulse Transmitted by UWB Antennas	674
<i>E. Pancera, W. Wiesbeck</i>	
Attempts for Bridging Circuits Geometrical Topologies with Equivalent Network Architecture Synthesis	678
<i>Sidina Wane, Damienne Bajon</i>	
Analytical Regularization Method for Hollow Waveguides Modelling.....	682
<i>Yu A. Tuchkin</i>	
METATOYs as Optical Elements Performing Light-Ray Transformations Without Wave-Optical Analog.....	686
<i>Bhuvanesh Sundar, Alasdair C. Hamilton, Johannes Courtial</i>	
New Formulations of the Characteristic Basis Function Method for the Analysis of Metamaterials	689
<i>Felipe Cátedra, Eliseo García, Iván Gonzalez, Carlos Delgado</i>	
Time-Domain Green's Functions for Waves on Simplicial Complexes.....	693
<i>J. M. Arnold</i>	
Microwave Imaging Using a Time-Reversal Radar System	696
<i>K. Belkebir, L. Bellomoy, S. Pioch, M. Saillard, P. C. Chaumet</i>	
Hierarchical Matrix Preconditioners for Eddy Current Problems	697
<i>F. Krämer, M. Bebendorf, J. Ostrowski, R. Hiptmair</i>	
Fully Overlapping Domain Decomposition Method for Modeling Fine Structures Embedded in Host Media	701
<i>T. Peng, K. Sertel, J. L. Volakis</i>	

A New Neural Network DOA Estimation Technique Based on Subarray Beamforming	705
<i>S. Caylar</i>	
Efficient Analysis of Periodic Structures Involving Finite Dielectric Material Based on the Array Scanning Method	708
<i>N. A. Ozdemir, C. Craeye</i>	
Electromagnetic Field Distribution as a Function of Building Materials – Revisiting the Standard Definition of Shielding Effectiveness.....	712
<i>C. A. Ropiak, M. McQuage, W. Padilla-Vargas</i>	
Application Of Microwave Reflectometry To Biphasic Flow Characterization	716
