# TABLE OF CONTENTS

## Volume 1

|                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Drought and Production Capacity of Meat: A System Dynamics Approach</b> .....                                                  | 1   |
| <i>Atefeh Adl, Jamshid Parvizian</i>                                                                                              |     |
| <b>Russian-Ukrainian Gas Conflict Case Study</b> .....                                                                            | 14  |
| <i>Ainara Alvarez, José Torres, Ana Lauge, Jose Mari Sarriegi</i>                                                                 |     |
| <b>On Modeling Some Essential Dynamics of the Subprime Mortgage Crisis</b> .....                                                  | 26  |
| <i>Lianjun An, Dharmashankar Subramanian, Alan King</i>                                                                           |     |
| <b>ScriptsMap: A Tool for Designing Multi-Method Strategy Workshops</b> .....                                                     | 43  |
| <i>David Andersen, George Richardson, Colin Eden, Fran Ackermann</i>                                                              |     |
| <b>Using Stakeholder Goals and Dynamics to Surface Feedback Loops</b> .....                                                       | 44  |
| <i>David Andersen, George Richardson, Colin Eden, Fran Ackermann</i>                                                              |     |
| <b>Panel Discussion: Distributed Talent Management: Planning, Metrics and Oversight</b> .....                                     | 45  |
| <i>Edward Anderson, Pablo Azar, Daniel Goldsmith, Jonathan Hibbard, Nitin Joglekar</i>                                            |     |
| <b>Modeling Insurgencies and Counter Insurgencies</b> .....                                                                       | 46  |
| <i>Edward Anderson</i>                                                                                                            |     |
| <b>Economic Growth Accounting: Policy Analysis of Transitional Dynamics</b> .....                                                 | 77  |
| <i>John Ansah, Stefan Groesser</i>                                                                                                |     |
| <b>System Dynamics and Laboratory Experiments</b> .....                                                                           | 78  |
| <i>Santiago Arango, Yris Olaya, Jaime Andrés Castaneda Acevedo</i>                                                                |     |
| <b>A System Dynamics Model for the World Coffee Market</b> .....                                                                  | 94  |
| <i>Santiago Arango, Felipe Abaunza Osorio</i>                                                                                     |     |
| <b>Capacity Utilization in Electricity Market Behavior: An Experimental Analysis</b> .....                                        | 115 |
| <i>Santiago Arango, Jaime Andrés Castaneda Acevedo</i>                                                                            |     |
| <b>Energy Management in Residential Buildings: a system dynamics approach</b> .....                                               | 153 |
| <i>Stefano Armenia, Diego Falsini, Giulia Oliveri</i>                                                                             |     |
| <b>System Dynamics Italian Chapter (SYDIC) Poster Presentation and Annual Meeting</b> .....                                       | 182 |
| <i>Stefano Armenia</i>                                                                                                            |     |
| <b>A History of Making Energy Policy</b> .....                                                                                    | 183 |
| <i>George Backus, Jeff Amlin</i>                                                                                                  |     |
| <b>A System Dynamics Model of the Mauritian Power Sector</b> .....                                                                | 210 |
| <i>Kailash Balnac, Chandradeo Bokhoree, Prakash Deenapanray, Andrea Bassi</i>                                                     |     |
| <b>Energy Special Interest Group Poster Presentation, Annual Meeting, and Roundtable</b> .....                                    | 222 |
| <i>Andrea Bassi, Luc Van Den Durpel</i>                                                                                           |     |
| <b>Examining the Role of Simulation Models in Health Planning</b> .....                                                           | 223 |
| <i>Bayer, Steffen with Sally Brailsford</i>                                                                                       |     |
| <b>Reports from the Field: Assessing the Art and Science of Participatory Environmental Modeling</b> .....                        | 230 |
| <i>Allyson Beall, Andrew Ford</i>                                                                                                 |     |
| <b>Environmental Special Interest Group Poster Presentation, Annual Meeting, and Roundtable</b> .....                             | 252 |
| <i>Allyson Beall,</i>                                                                                                             |     |
| <b>How to Easily Get Your Vensim, Powersim, or iThink simulation on the Web using Forio</b> .....                                 | 253 |
| <i>Michael Bean,</i>                                                                                                              |     |
| <b>K-12 (1): How 6-year Olds Learn System Dynamics Abc's (accumulations, Behavior-over-time, Circular Causality)</b> .....        | 254 |
| <i>Tracy Benson, Anne LaVigne</i>                                                                                                 |     |
| <b>Model the Interaction Between Leaders and Society During Conflict Situations</b> .....                                         | 255 |
| <i>Michael Bernard</i>                                                                                                            |     |
| <b>Dynamic Simulation of a Thermal Water Quality Trading Program and Implications for Policy Design</b> .....                     | 263 |
| <i>Asmeret Bier</i>                                                                                                               |     |
| <b>Student Chapter Poster Presentation</b> .....                                                                                  | 289 |
| <i>Asmeret Bier</i>                                                                                                               |     |
| <b>Implementing a sustainable CSR Strategy through a System Dynamics Perspective: evidences from a Colombian case-study</b> ..... | 290 |
| <i>Enzo Bivona, Sonia Herrera Daza</i>                                                                                            |     |
| <b>You Meant What? Socially Constructing Meaning with on Going Interactions</b> .....                                             | 313 |
| <i>Laura Black, Don Greer</i>                                                                                                     |     |
| <b>The Validity and Utility of Participatory Research Strategies</b> .....                                                        | 338 |
