# Technical Papers

## 1. Agriculture, Mining and Rural Industries

**Development of Agricultural Vehicle Navigator:** Yasuyuki Hamada, Eiji Makino, Keiji Hanawa, Yosuke Matsuo, Takashi Yamashita, *National Agriculture and Food Research Organization, Japan*----- 1

## 2. Atmospheric Effects

**An Evaluation of the practicability of current mapping functions using ray-traced delays from JMA Mesoscale Numerical Weather Data:** Ryuichi Ichikawa, Thomas Hobiger, Yasuhiro Koyama, *kashima Space Research Center, NICT, Japan*, Tetsuro Kondo, *NICT, Japan*, Department of Space Survey and Information Technology, *Ajou University, Korea* ----- 5

**Climatological study of GPS total electron content variations caused by medium-scale traveling ionospheric disturbances:** Yuichi Otsuka, *STEL, Nagoya Univ., Japan*, Nobuki Kotake, *Mitsubishi Electric Corporation, Japan*, Tadahiko Ogawa, *STEL, Nagoya Univ., Japan*, Takuya Tsugawa, *NICT, Japan*, Akinori Saito, *Kyoto Univ., Japan* ----- 13

**Correlation Between L-band Scintillation and HF-band Doppler at the Time of Daytime Es Occurrence Over the Kanto Area in Japan:** Ichiro Tomizawa and Takashi F. Shibata, *Sugadaira Space Radio Observatory, The University of Electro-Communications, Japan* ----- 14

**Efficient ionospheric model using wavelet for geomagnetic storm:** Kyoungso Sohn, Ho Yun and Changdon Kee, *Seoul National University, Korea* ----- 15

**Feasibility of Using Regional Ionosphere Maps in Single Frequency Precise Point Positioning: A Case Study in Australia:** Suelynn Choy, Kefei Zhang, David Silcock, Lucas Holden, *RMIT University, Australia* ----- 16

**GPS Near-Real-Time Determination of Water Vapor Distribution over the South Korea:** Jihyun Ha, Kwan-Dong Park, *Inha University, Korea* ----- 26

<b>GPS Signal Fading due to Scintillation &amp; Multipath and its Impact on Satellite Geometry and Positioning over the Appleton Anomaly Region:</b> Surendra Sunda, <i>Airports Authority of India, India</i> , B. M. Vyas, <i>Dept. of Physics, M. L. S. University, India</i> , P.V.Khekale, <i>Space Application Centre (ISRO), India</i> -----	<b>27</b>
<b>Ionospheric Disturbances Observed by Ground-Based GPS Receivers in Japan and the World:</b> Takuya Tsugawa, <i>NICT, Japan</i> , Yuichi Otsuka, <i>STEL, Nagoya Univ., Japan</i> , Akinori Saito, Michi Nishioka, <i>Kyoto Univ., Japan</i> , Mamoru Ishii, <i>NICT, Japan</i> -----	<b>35</b>
<b>The Effect of Ionospheric Peculiarities on dGPS:</b> Mardina Abdullah, Siti Sarah Nik Zulkifli, Mahamod Ismail, <i>Universiti Kebangsaan Malaysia, Malaysia</i> -----	<b>36</b>
<b>Kashima Ray-tracing Service (KARATS) - On-line provision of total troposphere slant delay corrections for East Asian sites:</b> Thomas Hobiger, Ryuichi Ichikawa, Yasuhiro Koyama, <i>Kashima Space Research Center, NICT, Japan</i> , Tetsuro Kondo, <i>NICT, Japan, Department of Space Survey and Information Technology, Ajou University, Korea</i> -----	<b>40</b>
<b>MSAS Performance Evaluation in the Severe Ionospheric Condition:</b> Nyo Mi Saw, Nobuaki Kubo, Akio Yasuda, <i>Funai Laboratory of Satellite Navigation, Tokyo University of Marine Science and Technology, Japan</i> -----	<b>45</b>
<b>Plasma bubble monitoring by HF transequatorial propagation and its use for GNSS:</b> Susumu Saito, <i>Electronic Navigation Research Institute, Japan</i> , Takashi Maruyama, Mamoru Ishii, Minoru Kubota, <i>National Institute of Information and Communications Technology, Japan</i> , Guanyi Ma, Jinghua Li, Yanhong Chen, <i>Chinese Academy of Sciences, China</i> -----	<b>46</b>
<b>PPP Algorithms with Tropospheric Delay Estimation Based on GR Models:</b> Seigo Fujita, Kazuhiro Nishikawa, Yukihiro Kubo, Sueo Sugimoto, <i>Ritsumeikan University, Japan</i> -----	<b>47</b>
<b>Retrieving Vertical Electron Density (VED) Profile with Combined Tomography and Abel Inversion Techniques:</b> Gary Ouyang, Jinling Wang, <i>University of New South Wales, Australia</i> -----	<b>56</b>
<b>Southeast Asia low-latitude ionospheric network (SEALION) for monitoring ionospheric irregularities:</b> Jyunpei Uemoto, Mamoru Ishii, Minoru Kubota, Takashi Maruyama, Jin Hidekatsu, Takuya Tsugawa, <i>National Institute of Information and Communications Technology, Japan</i>	

**TEC Determination over Single GPS Receiver Station Using PPP Technique:** Mardina Abdullah, Siti Aminah Bahari, Baharudin Yatim, *Universiti Kebangsaan Malaysia, Malaysia.* ----- 64

### **3. Crustal Deformation Measurement and Earthquake Prediction**

**Crustal Deformation Measurement and Earthquake Prediction Characteristics of Crustal Strain in the Western Kanagawa Prefecture, Japan:** Masatake Harada, *Hot Springs Research Institute of Kanagawa Prefecture, Japan*, Makiko Iwakuni, *Japan Weather Association, Japan*, Toshikazu Tanada, *Hot Springs Research Institute of Kanagawa Prefecture, Japan* ----- 69

**Contribution of thermal expansion of monument and nearby rock to observed GPS height changes:** Wu Chen, Haoming Yan, Yaozhong Zhu, *Chinese Academy of Sciences, China*, Hong Kong Polytechnic University, China ----- 78

**Determination of the inter-seismic crustal deformations in the south Longitudinal Valley, southeastern Taiwan:** Horng-Yue Chen, Min-Chien Tsai, Shui-Bei Yu, Shi-sheng Yao, *Institute of Earth Sciences, Academia Sinica, Taiwan* ----- 84

**Development of crustal monitoring support system:** Basara Miyahara, Masayoshi Ishimoto, Hiroshi Koshimizu, Nobuhiro Ishikura, Satoshi Kawamoto, Tomomi Amagai, Isao Ueda, *Geographical Survey Institute, Japan* ----- 94

**First experience on automated processing of Thai permanent GPS observations for ground deformation monitoring and earthquake study:** Chalermchon Satirapod, *Chulalongkorn University, Thailand*, Horng-Yue Chen, *Institute of Earth Sciences, Academia Sinica, Taiwan*, Somchai Kriengkraiwasin, *Chulalongkorn University, Thailand*, Phuwieng Prakhammintara, *Seismological Bureau, Thai Meteorological department, Thailand* ----- 98

**GPS has detected sub-mm level displacement The short-term slow slip in the Tokai by using dense GPS observation net:** Mikio Satomura, Hiroe Hama, *Faculty of Science, Shizuoka University, Japan*, Seiichi Shimada, *National Research Institute for Earth Science and Disaster Prevention*, Teruyuki Kato, *Earthquake Research Institute, University of Tokyo, Japan*, Keizo Sayanagi, *Ocean Research Institute, Tokai University, Japan* ----- **104**

**Monitoring of hydrothermal intrusions at Hakone Volcano inferred from GPS observations:** Satoshi Kawamoto, *Geographical Survey Institute, Japan* ----- **105**

**Real-time kinematic GPS analysis of the 2008 Iwate-Miyagi inland earthquake using by 1Hz data:** Kazutoshi Sato, Hiroataka Obata, Akira Wada, Masayuki Kanzaki, *Nippon GPS Solutions Corporation, Japan*, Tetsuya Iwabuchi, Christian Rocken, *GPS Solutions Inc USA*, Teruyuki Kato, *Earthquake Research Institute, University of Tokyo, Japan* ----- **110**

**Systematic analysis of the present-day crustal deformation in Shanghai based on the multi-epoch GPS measurements:** Jianqing Cai, *Institute of Geodesy, Stuttgart University, Germany*, Jichang Wu, Yi Lin, Jiexian Wang, *Tongji University, China*, Erik Grafarend, *Institute of Geodesy, Stuttgart University, Germany* ----- **111**

**Few-Millimeter-Precise Reduction of Short-Term Noise in Dual-Frequency Carrier-Phase GPS Positioning Applied to 1-Hz Measurement of Seismic Displacement:** Kentaro Kondo, *Fujitsu Limited, Japan* ----- **119**

#### **4. Inertial Systems for Positioning & Orientation**

**Allan Variance Analysis on Error Characters of MEMS Inertial Sensors for an FPGA-based GPS/INS System:** Xin Zhang, Yong Li, Peter Mumford, Chris Rizos, *University of New South Wales, Australia* ----- **127**

**Data Wipe off Method Using Carrier Phase Discriminator for Deeply Coupled GPS/INS Integration Navigation Systems:** Ho Cheol Jeong, Hee Won Kang, Dong-Hwan Hwang and Sang Jeong Lee, Chan Sik Park, *Chungbuk National University, Korea*, Jeong Won Kim, *Korea Aerospace Research Institute, Korea*, Tae Gyoo Lee and Ki-Won Song, *Agency for Defense Development, Korea* ----- **134**

**Identification of IMU Sensor Error Models for GNSS/INS Hybrid Systems:** Makoto Tanikawara, Hitachi Industrial Equipment Systems Co.,Ltd. Japan, Sueo Sugimoto, Yukihiro Kubo, Ritsumeikan University, Yutaka Shimogaki, Hitachi Ltd, Japan ----- **139**

**Information Fusion Algorithm for Damping Attitude of Strapdown Inertial Attitude and Heading Reference System Based on Fault Diagnosis:** Jianye Liu, Yanhua Zhu, Rongbing Li, Ping Yang, Qinghua Zeng, Navigation Research Center, Nanjing University of Aeronautics and Astronautics , China ----- **148**

**Investigating on the Calibration Method of IMU Based only Accelerometers:** Wu Junwei, Lin Zhiqiang, Automation College, Harbin Engineering University, China ----- **155**

**Magnetic Compass Fault Detection Method for GPS/INS/Magnetic Compass Integrated Navigation Systems:** Sul Gee Park, Ho Cheol Jeong, Kishor P. Vitalkar, Chungnam National University, Korea, Jeong Won Kim, Korea Aerospace Research Institute, Korea, Dong-Hwan Hwang, Chungnam National University, Korea, Sang Jeong Lee, Chungnam National University, Korea ----- **159**

**Performance Improvement of MEMS INS/GPS during GPS Outages using Magnetometer:** Takeshi Fujiwara, Hiroshi Tomita, Toshiaki Tsujii, Masatoshi Harigae, Japan Aerospace Exploration Agency, Japan ----- **165**

**Nonlinear Filter Technique & Application in SINS/GPS Integrated Navigation System:** Jizhou Lai, Jianye Liu, Jian Xiong, Yongrong Sun, Nanjing University of Aeronautics and Astronautics, China -- **173**

**The Implementation a Simulation Platform for INS/GNSS Integrated Systems:** Chih-Yu Hu, Kai-Wei Chiang, National Cheng Kung University, Taiwan ----- **179**

**The Use of GPS and INS for Centimetre Positioning Accuracy during Long GPS Outages:** Ahmad Adnan Taha, Craig Hancock, Gethin Roberts, Xiaolin Meng, The University of Nottingham, United Kingdom ----- **180**

## 5. Intelligent Transport Systems

**Inter-Vehicle Positioning System Based on Ad Hoc Wireless Network:** Bing Wei, Wu Chen, Xiaoli Ding, *The Hong Kong Polytechnic University, China* ----- **190**

## 6. Location Based Services

**Empirical Study on RTT Measurement for Authentication Scheme in a DRM System:** Arjule John P. Berena, Yusuke Kojima, Takahiro Tsuchiya, Masami Kihara, *Nihon University, Japan* ----- **196**

**Enhanced Authentication Scheme based on Network Location for a DRM System:** Arjule John P. Berena, Takahito Murofushi, Kanami Kaiho, Masami Kihara, *Nihon University, Japan* ----- **204**

## 7. Machine Automation and UAVs

**Low-Cost Miniature GPS/INS for Small UAVs with Reduced Order Kalman Filter:** Rui Hirokawa, Naoyuki Kajiwawa, Ryusuke Ohata, *Mitsubishi Electric Corporation, Japan*, Taro Suzuki, *Waseda University, Japan* ----- **211**

## 8. Marine, Land and Aviation Applications

**A Minimum MEMS Approach to the Inertial Elements of an Integrated Car Navigator:** Xin Zhang, Chuanrun Zhai, Hongliang Xu, Yanhua Zhang, Xingqun Zhan, *Institute of Aerospace Science and Technology, Shanghai Jiao Tong University, China* ----- **221**

**Experiments of GPS/INS Based Integrity Monitoring Using MSAS Differential Correction Data:** Toshiaki Tsujii, Hiroshi Tomita, Takeshi Fujiwara, Masatoshi Harigae, *Japan Aerospace Exploration Agency (JAXA), Japan* ----- **226**

**Extracting the Assessment of Environmental Changes from Satellite Image:** Nang Mya Mya Nwe, *Mandalay Technological University, Myanmar*, Myint Myint Sein, *University of Computer Science, Myanmar* ----- **234**

**GPS signal tracking loop design for a satellite launcher:** Su Bae Jeon, Il Kyu Park, Seok Bo Son, Se Hwan Kim, Young Baek Kim, *Hanyang Navicom R&D Center, Korea.* ----- **240**

**GRAIL: Introduction of GNSS in the Rail Sector:** Alvaro Urech, María J. García-Prieto, *NECO-TIFSA, Spain* ----- **244**

**Improvement of small drifting buoy equipped with GPS and result of the operation:** Hiroki Irie, Yuji Kamikubo, Ikuo Saito, *Yatsushiro national College of Technology, Japan*, Nagahisa Mita, *Kumamoto University, Japan* ----- **251**

**Experimental Evaluation of Novel Attitude Determination Algorithm Utilizing Single Frequency GPS/GLONASS Receiver:** Wenrui Jin, Chuanrun Zhai, Yanhua Zhang, Xingqun Zhan, *Institute of Aerospace Science and Technology, Shanghai Jiao Tong University, China* ----- **259**

**Observations of Current Direction and Speed by Shipboard ADCP and GPS Reference Data:** Hajime Chiba, Sho-ichi Furuyama, Koji Yokoi, Emi Kanayama, *Toyama National College of Maritime Technology, Japan* ----- **264**

**The Wireless System for Marine Sensor Networks:** Masashi Yoshida, *Salesian Polytechnic, Japan*, Harumasa Hojo, *Sensor Comm Co., Ltd., Japan*, Akio Yasuda, *Tokyo University of Marine Science and Technology, Japan* ----- **269**

**The World's Only Certificated GPS-based Precision Approach System - The Way from the Decision to the Operational System:** Börje Forssell, *Norwegian University of Science and Technology, Trondheim, Norway*, Steinar Hamar, *Avinor, Oslo, Norway* ----- **277**

## **9. Navigation Systems and Applications**

**A Low-Cost Integrated Navigation System Based on IMU/Magnetic Compass/Velocity Log/Altimeter:** Ping Ye, Chuanrun Zhai, Haowen Wu, Yanhua Zhang, Xingqun Zhan, *Institute of Aerospace Science and Technology, Shanghai Jiao Tong University, China* ----- **284**

**Accuracy Evaluation of MEMS INS/GPS for small UAVs:** Masaru Naruoka, Hiroki Taniguchi, Takeshi Tsuchiya, *The University of Tokyo, Japan* ----- **291**

**Algorithms for prediction of INS estimated Doppler in Ultra-tight Integration:** Ravindra Babu, *Aerospace, Defense and Satellite, Wipro Technologies, India*, Jinling Wang, *School of Surveying & Spatial Info, UNSW, Australia*, Gottapu Rao, *ECE, College of Engg, Andhra University, India* ----- **300**

**Applications of Robust Kalman Filtering Schemes in GNSS Navigation:** *Jinling Wang, University of New South Wales, Sydney, Australia*. Changhui Xu, Jian Wang, *China University of Mining and Technology, China* ----- **308**

**Artificial Jam-resistant Integrated Navigation System for Unmanned Helicopter:** Mikhail N. Krasilshchikov, Dmitry A. Kozorez, Kirill I. Sypalo, *Moscow Aviation Institute (State Technical University), Russia* ----- **317**

**Concept of a Secure and Safety Tracking System for Goods using QZSS and RF-ID:** Koichi Chino, Dinesh Manandhar, Ryosuke Shibasaki, *Center for Spatial Information Science, The University of Tokyo, Japan* ----- **321**

**Correcting atmospheric and ionospheric delay in KAGUYA VLBI observations using GPS technique:** Qinghui Liu, Fuyuhiko Kikuchi, Sander Goossens, Koji Matsumoto, Yoshiaki Tamura, Yuji Harada, Natalia Petrova, Yoshiaki Ishihara, Hideo Hanada, Kazuyoshi Asari, Toshiaki Ishikawa, Seiitsu Tsuruta, Nobuyuki Kawano, Sho Sasaki, Hiroto Noda, *National Astronomical Observatory, Japan*, Jingsong Ping, Xian Shi, *Shanghai Astronomical Observatory, China* Takahiro Iwata, *JAXA, Japan*, Noriyuki Namiki, *Kyushu University, Japan* ----- **327**

**Development of Cognitive Software Receivers for the Multi-GNSS Satellite:** Shota Ishikawa, Ryuei Yamada, Yuki Ito, Takuya Shinno, Fujinobu Takahashi, *Yokohama National University* ----- **328**

**Development of Software GNSS Signal Generator:** Jae-Eun Lee, Tae-Hee Kim, Sanguk Lee, Jaehoon Kim, *Electronics and Telecommunications Research Institute (ETRI), Koera* ----- **332**

**Flight Evaluation of a GPS Attitude Determination Algorithm:** Dr. Nelson Paiva Oliveira Leite, *Grupo Especial de Ensaios em Vôo (GEEV), Brazil*, P Fernando Walter, *Instituto Tecnológico de Aeronáutica (ITA), Brazil* ----- **338**

**Future GNSS Constellation Design Considering Compatibility and Interoperability:** Wei Liu, Chuanrun Zhai, Yanhua Zhang, Xingqun Zhan, *Institute of Aerospace Science and Technology, Shanghai Jiao Tong University, China* ----- **347**

**Fuzzy Strong Tracking Unscented Kalman Filter Design for Integrated Navigation:** Dah-Jing Jwo, Shih-Yao Lai, *National Taiwan Ocean University, Taiwan* ----- **353**

**GNSS, RFID and INS Integration for Pedestrian Navigation:** Guenther Retscher, Qing Fu, *Vienna University of Technology, Austria* ----- **363**

**HARDWARE-IN-THE-LOOP TEST FOR FORMOSAT-5 GPS RECEIVER:** Ming-Yu Yeh, Wei-Ting Wei, Ying-Wen Jan, *National Space Organization (NSPO), Taiwan* ----- **374**

**High Fidelity Simulation of GPS measurements for Space-based Navigation System Design:** Liduan Wang, Chuanrun Zhai, Xin Zhang, Xingqun Zhan, *Shanghai Jiao Tong University, China* ----- **380**

**Hybrid of Support Vector Machines and Kalman Filter for GPS/INS Integration:** Zhenkai Xu, *Southeast University, Nanjing, China*, Yong Li, Chris Rizos, *University of New South Wales, Australia*, Xiaosu Xu, *Southeast University, Nanjing, China* ----- **389**

**Improvement of GPS Capabilities by QZSS in Asia and Oceania Region:** Satoshi Kogure, *Japan Aerospace Exploration Agency, Japan* ----- **395**

**Integrity Monitoring-Oriented Researches for Satellite Navigation System:** Jing Zhang, Wei Wang, Xiaofeng Fu, *National University of Defense Technology, China* ----- **402**

**Low Cost IF/RF Navigation Validation Platform with Integrated Traffic Message Channel Simulation:** Ilie I., Fortin D., Leblanc A., *Averna Technologies inc. Canada* Fortin M.-A., *École de Technologie Supérieure, Canada* -----407

**Monitoring the Degree of Observability in Integrated GPS/INS Systems:** Songlai Han, Jinling Wang, *University of New South Wales, Australia* -----414

**On the Availability of DGPS System Based on Terrestrial Digital One-segment Broadcasting:** Masashi Kawai, *Toyama National College of Maritime Technology, Japan*, Takeyasu Sakai, *Electronic Navigation Research Institute, Japan* Minoru Yamamoto, *Kitanihon Broadcasting Co. LTD., Japan*, Hideki Kadomura, *Toyama National College of Maritime Technology, Japan* Akio Yasuda, *Tokyo University of Marine Science and Technology, Japan* -----422

**Performance Evaluation of an Enhanced software GNSS IF signal generator:** Liu Meilin, Deok Won Lim, Sang Jeong Lee, Chansik Park, *Chungnam National University, Korea* -----428

**Patent Pools for Personal Navigation Devices:** Bill Geary, *MPEG LA, LLC, USA* -----433

**The UKF and CDKF for Low-cost SDINS/GPS In-motion Alignment:** Qin Wang, *Beijing Institute of Technology, China*, University of New South Wales, Australia, Yong Li, Chris Rizos, *University of New South Wales, Sydney, Australia*, Shiyi Li, *Beijing Institute of Technology, China* -----441

## 10. New Products and Applications

**GNSS Testing for a Multi-GNSS, Multi-Sensor World:** John Pottle, Steve Hickling, *Spirit Communications plc, United Kingdom* -----449

**GPS Expansion with GEO Satellites:** Osamu Ichiyoshi, *Human Network for Better 21 Century, Japan* -----450

**IMES for Mobile Users Social Implementation and Experiments based on Existing Cellular Phones for Seamless Positioning:** Dinesh Manandhar, Seiya Kawaguchi, Masayuki Uchida, Makoto Ishii, Hideyuki Torimoto, *GNSS Technologies Inc., Japan* -----455

**Low Cost, Low Power Geotagging Solution for Digital Cameras:** Alison Brown, Jim Dalrymple, *NAVSYS Corporation, USA*, Peter Brown, *NAVSYS Lt, USA*, Frank Ricotta, *TIDGET Technologies Inc. USA* ----- **461**

**magicGNSS: Quality Data, Algorithms and Products for the GNSS User Community:** Álvaro Mozo, Ricardo Píriz, Miguel M. Romay Merino, Ignacio Alcantarilla, *GMV, Spain* ----- **466**

**Performance Evaluation of a Software GPS Receiver for Mid-End Host Platforms:** T. Jokitalo, H. Kuusniemi, S. Söderholm, H. Naukkarinen, *Fastrax Ltd, Finland* ----- **476**

**Performance Evaluation of the Multi-Constellation and Multi-Frequency GNSS RF Navigation Constellation Simulator NavX@-NCS:** Guenter Heinrichs, Markus Irsigler, and Robert Wolf, *IFEN GmbH, Germany*, Guenther Prokoph, *Work Microwave GmbH, Germany* ----- **483**

## **11. Non-Satellite Positioning, Pseudolite and Indoor application**

**A Multipath Mitigation Method for IR-UWB Location System:** Seung-Hun Song, Chan-Bock Song, Wangrok Oh, Tae-Kyung Sung, *Chungnam National University, Korea*, Mi-Kyung Oh, Jae-Young Kim, *Electronics and Telecommunications Research Institute, Korea*, ----- **488**

**Comparisons of Error Characteristics between TOA and TDOA in Presence of Range Bias Errors:** Ji-Hee Park, *Korea*, Ji-Won Park, Tae-Kyung Sung, *Chungnam National University, Korea*, Jee-Hwan Ahn, *Electronics and Telecommunications Research Institute, Korea* ----- **494**

**Development of an FLAOA Location Method for Indoor Mobile Robots:** Ji-Won Park, Hyun-Ja Im, Tae-Kyung Sung, *Chungnam National University of Korea, Korea*, Sung-Ho Lee, *LIGNex1, Korea* -- **500**

**Development of Seamless Location Based Service and System based on IMES:** Takamasa Kawaguchi, Shinya Yoshihara, Tomoichi Ebata, Yoko Morii, *Hitachi Ltd., System Development Lab., Japan*, Yutaka Shimogaki, *Hitachi Ltd., Information & Telecommunication Systems* ----- **505**

**Indoor GPS receiver for mobile robot navigation:** Haruhiko Niwa, Kenri Kodaka, Yoshihiro Sakamoto, and Shigeki Sugano, *Waseda University, WABOT-HOUSE Laboratory, Japan*, Takuji Ebinuma, *Tokyo University of Marine Science and Technology, Japan* ----- **511**

**Development of Assisted GNSS for Seamless Positioning Using IEEE 802.15.4a Data-link:**

Yong-Soo Kim, Gyu-In Jee, *Department of Electronics Engineering, Konkuk University, Korea*,  
Chan-Gook Park, *Department of Mechanical and Aerospace Engineering, Seoul National University, Korea*

----- 517

**Low-cost GPS Pseudolite:** Hongliang Xu, Chuanrun Zhai, Xin Zhang, Yanhua Zhang, Xingqun Zhan,

*Institute of Aerospace Science & Technology, Shanghai Jiao Tong University, China* ----- 521

**Novel Time-Sharing Scheme for Virtual Elimination of Locata-WiFi Interference Effects:** Faisal A.

Khan, Chris Rizos, Andrew G. Dempster, *University of New South Wales, Australia* ----- 526

**Pedestrian Navigation System with Fall Detection and Energy Expenditure Calculation for the**

**Elderly:** Deok Hee Han, Chansik Park, En Jong Cha, *Chungbuk National University, Korea*, Sang Jeong

Lee, *Chungnam National University, Daejeon, Korea* ----- 531

**Performance Evaluation of a Singularity-free Positioning Algorithm in 3D WSN:** Seung Beom Kim,

*Chungnam National University, Korea*, Chansik Park, *Chungbuk National University, Korea*, Sang Jeong

Lee, *Chungnam National University, Korea* ----- 538

**Three Dimensional Positioning System Using a Single Pseudolite:** Hironori Kawano, Minoru Kawano,

*Radio Communication Systems Ltd., Japan*, Yasunori Takeuchi, *Chugoku Electric Power Co., Inc, Japan*

----- 544

## **12. Novel Applications**

**A Marine Information Management System Utilizing Ship LAN:** Yi Sun, Chunming Fan, Kimihiko

Ueno, Masao Nemoto, *Tokyo University of Marine Science and Technology, Japan*, Zhixing Liu, *National*

*Institute of Informatics, Japan*, Akio Yasuda, *Tokyo University of Marine Science and Technology, Japan*

----- 548

**Entrepreneurship: A Highway from University to the Market:** Getulio K. Akabane, Odair Farias,

*Catholic University of Santos PPGN, Brazil* ----- 552

**How hybrid GPS-based surveying techniques can further assist with structural design and construction:** Xiaojing Li, *University of New South Wales, Australia* Akihito Yoshida, Yukio Tamura, *Tokyo Polytechnic University, Japan* Chris Rizos, Linlin Ge, *University of New South Wales, Australia*, Ryuji Imai, *Urban Renaissance Agency, Japan* ----- **553**

**Validations of GNSS Radio Occultation Technique over Australia:** Kefei Zhang, Falin Wu and Erjiang Fu, *RMIT University, Australia*, Xiao Xu, *Wuhan University, China*, Anthony Rea, Gary Weymouth, Bertukan Biadeglne, Yuriy Kuleshov, *Australian Bureau of Meteorology, Australia* ---- **563**

### **13. Positioning Trends & New Technologies**

**An Empirical Approach to Study the Effects of A Priori Observations Sigma Ratio in Single Frequency Precise Point Positioning:** Sue Lynn Choy, Kefei Zhang, David Silcock, Lucas Holden, *RMIT University, Australia* ----- **572**

**Certification of RF Simulator Performance for System and Application Testing:** John Pottle, Darren Fisher, Stuart Smith, *Spirent Communications plc, United Kingdom* ----- **584**

**Development of Ultimate Seamless Positioning System for Global Cellular Phone Platform based on QZSS IMES:** Dinesh Manandhar, Kazuki Okano, Makoto Ishii, Masahiro Asako, Hideyuki Torimoto, *GNSS Technologies Inc., Japan*, Satoshi Kogure, *Japan Aerospace Exploration Agency (JAXA), Japan*, Hiroaki Maeda, *Lighthouse Technology and Consulting, Japan* ----- **585**

**Grey Relational Analysis-Aided  $H_{\infty}$  Filtering for GPS Navigation:** Dah-Jing Jwo, Hsin-Hsu Lin, *National Taiwan Ocean University, Taiwan* ----- **590**

**Performance Evaluation and Test Results of a Single-Frequency Mass Market GNSS Receiver:** M. Ammann, A. Somieski, *u-blox AG, Switzerland* ----- **600**

**Signal Definition of QZSS IMES and its Analysis:** Dinesh Manandhar, Kazuki Okano, Makoto Ishii, Masahiro Asako, Hideyuki Torimoto, *GNSS Technologies Inc., Japan*, Satoshi Kogure, *Japan Aerospace Exploration Agency (JAXA), Japan*, Hiroaki Maeda, *Lighthouse Technology and Consulting, Japan* - **609**

**Ultra Wideband –Based Indoor Positioning System:** Wang Jin, Lu xiaochun, *National Time Service Center, the Chinese Academy of Sciences, China* ----- **614**

## **14. Precise Timing**

**A Precision Time Transfer Scheme Using the Maritime DGPS Signal:** Ik Jun Choi, Mi Young Shin, Sang Jeong Lee, *Chungnam National University, Korea*, Sung-Hun Yang, Chang-Bok Lee, *Korea Research Institute of Standards and Science, Korea*, Chansik Park, *Chungbuk National University, Korea* ----- **620**

**Current status of time management system of QZSS:** Shin'ichi Hama, Yasuhiro Takahashi, Jun Amagai, Miho Fujieda, *National Institute of Information and Communications Technology (NICT), Japan* ----- **625**

**Development Status of Software T&F Receiver for GNSS Common Views:** Ryuei Yamada, Fujinobu Takahashi, Yuki Ito, Shota Ishikawa, Takuya Shinno, *Yokohama National University, Japan* ----- **631**

**Effects of ionospheric delay correction on 1PPS accuracy improvement by using L1C/A and L2C:** Naomi Fujisawa, Hiraku Nakamura, Yoji Goto, Katsuo Yamada, Hitoshi Kondo, *Furuno Electric Co., Ltd., Japan* ----- **634**

**Evaluation of Timing Performance by GGTO Depending on Number of Unknown Parameters:** Mi Young Shin, Sang Jeong Lee, *Chungnam National University, Korea*, Sung-Hoon Yang, Chang-Bok Lee, Seung-Woo Lee, Young-Kyu Lee, *Korea Research Institute of Standards and Science, Korea*, Dong-Hui Yu, *Catholic University of Pusan, Korea*, Gabriele Mocci, *Telespazio, Italy* ----- **640**

**Generation of Measurement Data Set for the GGTO simulation:** Sung-Hoon Yang, Chang-Bok Lee, Seung-Woo Lee, Young-Kyu Lee, *Korea Research Institute of Standards and Science, Korea*, Sang-Jeong Lee, *Chungnam National University, Korea*, Dong-Hui Yu, *Catholic University of Pusan*, Gabriele Mocci, *Telespazio, Italy* ----- **646**

**Ground Station Control for Remote Synchronization of Onboard Crystal Oscillators of Quasi-Zenith Satellites:** Toshiaki Iwata, Takashi Matsuzawa, Yuji Hashibe, Satoshi Fukushima, *National Institute of Advanced Industrial Science and Technology (AIST), Japan*, Masato Fukui, *University of Tokyo, Japan*, Yasuhiro Takahashi, Miho Fujieda, *National Institute of Information and Communications Technology (NICT), Japan*, Satoshi Kogure, Hidemi Hase, *Japan Aerospace Exploration Agency (JAXA), Japan* ----- **651**

**Integrated Monitoring System of Space-born Clocks at KRISS:** Chang-Bok Lee, Sung-Hoon Yang, Young-Kyu Lee, Seung-Woo Lee, Yong-Hyun Kim, *Korea Research Institute of Standards and Science, Korea* ----- **658**

**Precise Time Transfer and Ranging Experiment Result between Ground and ETS-VIII:** Yasuhiro Takahashi, Fumimaru Nakagawa, Hiroo Kunimori, Jun Amagai, Shigeru Tsuchiya, Ryo Tabuchi, Shin'ichi Hama, *National Institute of Information and Communications Technology, Japan*, Hiroyuki Noda, *Japan Aerospace Exploration Agency, Japan* ----- **659**

## **15. Receiver Design and Signal Processing**

**A Self-adaptive Code Tracking Loop Design for Galileo BOC(1,1) Signal:** Dongkai. Yang, Weiqiang. Li, Qishan. Zhang, *Beihang University, China* ----- **664**

**Algorithm of the IF Signal Generation in the Software-Based IF GNSS Signal Simulator:** Tae-Hee Kim, Jae-Eun Lee, Sanguk Lee, Jae-Hoon Kim, *Satellite Ground Control Research Team, ETRI, Korea* ----- **669**

**Analysis of Land and Sea Reflected GPS Signal:** Dinesh Manandhar, Ryosuke Shibasaki, *Centre for Spatial Information Science, The University of Tokyo, Japan* ----- **675**

**Architecture and Benefits of an Advanced GNSS Software Receiver:** Mark G. Petovello, Cillian O'Driscoll, Gérard Lachapelle, Daniele Borio, Hasan Murtaza, *Position, Location and Navigation (PLAN) Group, University of Calgary, Canada* ----- **681**

**Cross-correlation Performance Comparison of L1 & L2C GPS Codes for Weak Signal Acquisition:**

Sana Ullah Qaisar<sup>1</sup> and Andrew G. Dempster, *The University of New South Wales, Australia* ----- **692**

**Digital combining technique for processing multiple GPS antennas signals:**

Il Kyu Park, Seok Bo Son, Se Hwan Kim, Young Baek Kim, *Hanyang Navicom R&D Center, Korea*, Sang Jeong Lee, *Chungnam National University, Korea* ----- **701**

**Efficient Algorithms for Improving the Performance of Weak Signal Acquisition on the Real-Time**

**Software GNSS Receiver:** Sung-Hyuck Im, Gyu-In Jee, *Department of Electronics Engineering, Konkuk University, Korea* ----- **706**

**GIOVE-B E1-B Signal Processing Assisted E1-C Range Code Only:**

Byung-Hyun Lee, Gyu-In Jee, *Konkuk University, Korea* ----- **711**

**GNSS/Pseudolite Signal Re-Acquisition with the aid of INS in Short Signal Blockage Scenarios:**

Peng Li, Jinling Wang, *The School of Surveying and Spatial Information Systems, The University of New South Wales, Australia*, Zhenming Feng, *The Department of Electronic Engineering, Tsinghua University, China* ----- **716**

**GPS Receiver with Enhanced User Positioning Time:**

Seung-Hyun Yoon, Ji-Woon Jung, Su-Bong Kim, Hyun-Chang Shin, Jae-Hyang Lee, Kyu-Yun Lee, and Hyo-Sun Shim, *Digital Media R&D Center, Samsung Electronics, Korea* ----- **722**

**Implementation of FPGA-Based Acquisition of Weak GPS Signals:**

Jun Xu, Xuchu Mao, *Department of Instrument Science & Engineering, Shanghai Jiao Tong University, China* ----- **727**

**Vector Tracking Loop based GPS/INS Deep Integration using Combined Kalman Filter:**

Jong-Hwa Song, Kwang-Hoon Kim, Gyu-In Jee, *Department of Electronic Engineering, Konkuk University, Korea* ----- **732**

**Performance analysis of a Galileo E1 weak signal acquisition algorithm:** Soon Lim, Deok Won Lim, Dong-Hwan Hwang, Sang Jeong Lee, *Department of Electronics Engineering, Chungnam National University, Korea*, Seung Wook Moon, *Hanyang Navicom Co. Ltd, Korea*, Chansik Park, *School of Electrical and Computer Engineering, Chungbuk National University, Korea* ----- **736**

**Performance Analysis of Composite PRN Code Acquisition Methods for GNSS Signal:** Li-Ta Hsu, Chih-Cheng Sun, Shau-Shiun Jan, *Department of Aeronautics and Astronautics, National Cheng Kung University, Taiwan* ----- **741**

**Performance Analysis of the GIOVE-B/CBOC Signal:** Masatoshi Matsumoto, Katsuo Yamada, *Furuno Electric Co., Ltd., Japan* ----- **749**

**Performance Evaluation of Tracking Loops in a Galileo BOC (1, 1) Receiver:** Deok Won Lim, Sung Lyong Cho, Soon Lim, Dong-Hwan Hwang, Sang Jeong Lee, *Department of Electronics Engineering, Chungnam National University, Korea*, Seung Wook Moon, *Hanyang Navicom Co.Ltd, Korea*, Chansik Park, *School of Electrical and Computer Engineering, Chungbuk National University, Korea* ----- **757**

**Rotation Demodulation Method of GNSS Receivers for Spinning Vehicles:** Hee Won Kang, Liu Meilin, *Department of Electronics Engineering, Chungnam National University, Korea*, Jeong Won Kim, *Korea Aerospace Research Institute, Korea*, Dong-Hwan Hwang, Sang Jeong Lee, *Department of Electronics Engineering, Chungnam National University, Korea* ----- **762**

**Acquisition Scheme for a High Sensitivity Assisted GPS Receiver Considering Apply Scenarios:** Zhixing Liu, *National Institute of Informatics, Japan*, Chunming Fan, *Tokyo University of Marine Science and Technology, Japan*, Shoichiro Asano, *National Institute of Informatics, Japan*, Kimihiko Ueno, Masao Nemoto, Akio Yasuda, *Tokyo University of Marine Science and Technology, Japan* ---- **767**

**The Vector Tracking Loop Design based on the Extended Kalman Filter:** Kwang-Hoon Kim, Jong-Hwa Song, Gyu-In Jee, *Department of Electronic Engineering, Konkuk University, Korea* ----- **773**

**Two Signal Processing Algorithms Used in Galileo E1 Receiver:** Yun Qiao, Shinji Oda, Tadimitsu Hirai, Harumi Mizuno, Koichi Washizu, *Japan Radio Co., Ltd., Japan* ----- **781**

**USB2.0 Based GPS Software Receiver: Implementation and Some Initial Results:** Zhe He, Chuanrun Zhai, Yanhua Zhang, Xingqun Zhan, *Institute of Aerospace Science and Technology, Shanghai Jiao Tong University, China* ----- **786**

**Weak GPS Signal Tracking Using Square Root Filter Algorithm:** Guangyu Zhou, Xuchu Mao, *Department of Instrument Science & Engineering Shanghai Jiao Tong University, China* ----- **792**

## **16. RTK-GPS and ambiguity resolution**

**A Search and Shrink Approach for the Baseline Constrained LAMBDA Method: Experimental Results:** G. Giorgi, P.J.G. Teunissen, P.J. Buist, *Delft University of Technology, The Netherland* ---- **797**

**A Simple Sequential Method for Integer Ambiguity Resolution in Real-Time GNSS Positioning:** Shaocheng Zhang *School of Geodesy and Geomatics, Wuhan University, China*, Samsung Lim and Chris Rizos, *School of Surveying and Spatial Information Systems, University of New South Wales, Australia* -  
----- **807**

**A Study on Improvement of Positioning Accuracy for GPS L1 Users using GPS Network:** Byung K. Choi, Jong U. Park, Sung K. Cho, *Korea Astronomy and Space Science Institute, Korea*, Sang J. Lee, *Chung-Nam National University, Korea* ----- **815**

**Accuracy Assessment of GPS Kinematic Positioning based on Densified Observables:** C. C. Chang, *Ching-Yun University, Korea*, H. Y. Lee, *Jet-Link Technology Inc., Korea* ----- **819**

**An Investigation of Performance Difference of Regional Atmospheric Models for Network RTK - A Case Study in Victoria:** Suqin Wu, Kefei Zhang, David Silcock, *RMIT University, Australia* ----- **828**

**Comparison of Accuracy of the RTK Solution and Initialization Time with Fixed and Roving Antenna:** Tatsunori Sada, *College of Science and Technology, Nihon University, Japan*, Shigeyuki Murayama, *Techno Vanguard, Japan* ----- **838**

**Development of a new tsunami monitoring system using a GPS buoy:** Teruyuki Kato, *Earthquake Research Institute, the University of Tokyo, Japan*, Yukihiro Terada, *Kochi National College of Technology, Japan*, Toshihiko Nagai, Katsuyoshi Shimizu, Takashi Tomita, *Port and Airport Research Institute, Japan*, Shun'ichi Koshimura, *Graduate School of Engineering, Tohoku University, Japan* -- **846**

**Evaluation of RTK-GPS Performance with Low-cost Single-frequency GPS Receivers:** Tomoji Takasu, Akio Yasuda, *Tokyo University of Marine Science and Technology, Japan* ----- **852**

**Instantaneous Multi-Baseline Ambiguity Resolution with Constraints:** P.J. Buist, P.J.G. Teunissen, G. Giorgi, S. Verhagen, *Delft University of Technology, The Netherlands* ----- **862**

**Instantaneous RTK Positioning Based on User Velocity Measurements:** Nobuaki Kubo, *Tokyo University of Marine Science and Technology, Japan* ----- **872**

**Network-RTK GPS Positioning in Japan:** Yohta Kumaki, *Promotion Council of Real Time Positioning Using GPS-based Control Stations, Japan / Senshu University, Japan* ----- **882**

**New Method for Graphically Representing Residual Error in an RTK Network in Real Time:** Neil Brown, Paul Alves, *Leica Geosystems, Switzerland*, ----- **885**

**Performance evaluation of precise positioning with HD video camera and image processing:** He Jiang, Tomoji Takasu, Akio Yasuda, Takuji Ebinuma, *Tokyo University of Marine Science and Technology, Japan* ----- **892**

**Double Differencing Position Domain Hatch Filter Generating Robust Float Solutions For Short-Baseline RTK:** H. S. Kim, H. K. Lee, *Korea Aerospace University, Korea* ----- **898**

**Statistical property of the GNSS carrier phase observations and the related hypothesis testing with the bootstrap methods:** Jianqing Cai, *Institute of Geodesy, Stuttgart University, Germany*, Congwei Hu *Dept. of Surveying and Geo-Informatics, Tongji University, China*, Erik Grafarend, *Institute of Geodesy, Stuttgart University, Germany* ----- **903**

## 17. Signal Interference and Multipath

**A Novel Beamforming Architecture with Software GNSS Receiver Implementation:** Min Li, *National University of Defense Technology / University of New South Wales, Australia*, Feixue Wang, *National University of Defense Technology, China*, Asghar Tabatabaei Balaei, Andrew G. Dempster, Chris Rizos, *University of New South Wales, Australia* ----- **904**

**Analysing the Effectiveness of Wavelet Transform for Mitigating C/A Code Multipath at GPS Reference Stations:** Thilantha L. Dammalage, *School of Engineering and Technology, Asian Institute of Technology, Thailand*, Chalermchon Satirapod, *Department of Survey Engineering, Faculty of Engineering, Chulalongkorn University, Thailand*, Seishiro Kibe, *School of Engineering and Technology, Asian Institute of Technology, Thailand* ----- **910**

**Analysis of the effect of channel-mismatch for GPS anti-jamming algorithms:** Sang Wook Hwang, Sung Lyong Cho, Geon Woo Lee, Dong-Hwan Hwang, Sang Jeong Lee, *Department of Electronics Engineering, Chungnam National University, Korea*, Chang Won Lee, *Agency for Defense Development, Korea*, Chansik Park, *School of Electrical and Computer Engineering, Chungbuk National University, Korea* ----- **919**

**Design of a TOA-based Anti-Spoofing Method for GPS Civil Signal:** Sung Lyong Cho, Mi Young Shin, Soon Lim, Dong-Hwan Hwang, Sang Jeong Lee, *Department of Electronics Engineering, Chungnam National University, Korea*, Chansik Park, *School of Electrical and Computer Engineering, Chungbuk National University, Korea* ----- **925**

**Detection, Identification And Mitigation of Outliers in Receiver Autonomous Integrity Monitoring (RAIM ) by Solving Observation Equations:** Hiroshi Isshiki, *School of Naval Architecture and Ocean Engineering, University of Ulsan, Korea* ----- **932**

**Differential Early Late Phase for Multipath Detection at Critical Doppler Offsets:** Omer Mohsin Mubarak, Andrew G Dempster, *The University of New South Wales, Australia* ----- **939**

**Ionospheric disturbances observed by the PALSAR onboard ALOS satellite:** Masanobu Shimada, *Earth Observation Research Center, Japan Aerospace Exploration Agency, Japan*, Yasushi Muraki, *Department of Physics, Konan University, Japan*, Yuichi Otsuka, *Solar-Terrestrial Environment Laboratory, Nagoya University, Toyokawa, Japan* ----- **947**

**Modified High Resolution Correlator Scheme for Improving the Performance of Short Delay Multipath Mitigation:** Hyoungmin So, Ghangho Kim, Taikjin Lee, Sanghoon Jeon, S Changdon Kee, *eoul National University, Korea* ----- **953**

**Multipath Mitigation Performance Comparison of Strobe Correlators in GNSS Receivers:** Jinghui Wu, Andrew G Dempster, *The School of Surveying and Spatial Information Systems, University of New South Wales, Australia* ----- **963**

**On GPS Signal Multipath Modeling for Environments with Mobility:** Slobodan Nedic, *Nedics Associates, USA* ----- **973**

**Phase calibration and attitude determination of a 2 by 2 phased arrayGNSS antenna:** Asghar Tabatabaei Balaei, *University of New South Wales, Australia*, Min Li, *University of Defense Technology, China*, Andrew G. Dempster, *University of New South Wales, Australia* ----- **983**

**Tests with Practical Multivariate Statistical Multipath Detection Methods Using Multiple-Frequency GNSS Phase Data:** Lawrence Lau, Paul Cross, *Department of Civil, Environmental and Geomatic Engineering, University of College London, United Kingdom* ----- **990**

## **18. Space Based & Ground Based Augmentation**

**Study of Applying Data Mining Approach to Detect Anomalous Event for GBAS:** Kazushi Suzuki, Takayuki Kaneso, Takeshi Ono, *NEC Corporation, ATC/NAV Systems Department, Japan*, Takayuki Nakata, Kenji Aoki, *NEC Corporation, Data Mining Research Group, Common Platform Software Research Lab., Japan* ----- **1005**

**A Study on the Error Modeling of Differential GPS Correction:** Jin-Kyu Choi, Sang-Hyun Park, Deuk-Jae Cho, Won-Seok Jang, Sang-Hyun Suh, *GNSS Research Center, Maritime and Ocean Engineering Research Institute, Korea Ocean Research and Development Institute, Korea* ----- **1014**

**Blending of MSAS and GAGAN for Regional SBAS Implementation:** Jyh-Ching Juang and Yung-Fu Tsai, *Department of Electrical Engineering, National Cheng Kung University Tainan, Taiwan* ----- **1019**

**Design of RSIM Architecture for Performance Enhancement of Maritime DGPS:** Deuk Jae Cho, Sang Hyun Park, Hyun Suh, *GNSS Research Center, Maritime and Ocean Engineering Research Institute, Korea Ocean Research & Development Institute, Korea* ----- **1025**

**LCNSS: A New Approach to the Navigation Satellite Systems:** Maria D. Lainez, Miguel M.Romay, , *GMV Aerospace and Defence S.A., Spain* ----- **1030**

**GPS POSITIONING USING MSAS RANGING SIGNAL:** In-Cheol Yeom, Jun-Hyuck Im, Sung-Hyuck Im, Gyu-In Jee, *Konkuk University, Korea,* ----- **1040**

**Shanghai GNSS Multi-Mode Augmentation & Precise Positioning Service System:** C.R. Zhai, X.Q. Zhan, *Shanghai GALILEO Industries Ltd, China/Institute of Aerospace Science and Technology, Shanghai Jiaotong University, China,* J.N. Liu, *Shanghai GALILEO Industries Ltd, China* ----- **1044**

## **19. Status of GNSS (GPS, GLONASS, Compass, and QZSS)**

**Application of Modified Jones 3-D Ray Tracing Program to Developed Ionospheric Delay Model:** Norsuzila Ya'acob, Mardina Abdullah, Mahamod Ismail, *Department of Electrical, Electronic and Systems Engineering, Universiti Kebangsaan Malaysia, Malaysia* ----- **1049**

**C-Band User Terminal Aspect for Bandwidth Efficient Modulation Schemes in European GNSS Evolution Programme:** J-H. Won, Jose Angel Avila Rodriguez, Stefan Wallner, Bernd Eissfeller, *University of FAF Munich, Germany,* Jean-Jacques Floch, Andreas Schmitz-Peiffer, *EADS-Astrium, Ottobrunn, Germany,* Enrico Colzi, *ESA-ESTEC, Noordwijk, Netherlands* ----- **1056**

**Evaluation of an Algorithm to solve Multipath Effect in DGPS/GLONASS:** Hideki Yamada, Tomoji Takasu, Nobuaki Kubo, Akio Yasuda, *Tokyo University of Marine Science and Technology, Japan* -----  
----- **1057**

**Hardware Simulation of Remote Synchronization with Ground Station Equipment:** Masato Fukui, Akira Iwasaki, *Department of Aeronautics and Astronautics, The University of Tokyo, Japan*, Toshiaki Iwata, Takashi Matsuzawa, *National Institute of Advanced Industrial Science and Technology, Japan* -----**1062**

**Mission Analysis for Navigation Satellite with Constraints:** Yang Hui, Zhao Jun, Han Zhigang, *China Academy of Space Technology, China* ----- **1071**

**Present Status of a Highly-Accurate Positioning Experiment System Using QZSS at ENRI:** Ken Ito, Takeyasu Sakai and Sonosuke Fukushima, *Electronic Navigation Research Institute, Japan* ----- **1079**

**Simulation study of the impact of QZSS on land survey:** Munekane Hiroshi, Yuki Kuroishi, Yuki Hatanaka, *Geographical Survey Institute, Japan*, Hisashi Miyazaki, *Japan Association of Surveyors, Japan* ----- **1087**

**C-Band User Terminal Aspect for Bandwidth Efficient Modulation Schemes in European GNSS Evolution Programme:** Jong-Hoon Won, Jose-Angel Avila-Rodriguez, Stefan Wallner, Bernd Eissfeller, *The Institute of Geodesy and Navigation, University FAF Munich, Germany*, Jean-Jacques Floch, Andreas Schmitz-Peiffer, *Business Unit Navigation, EADS-Astrium GmbH, Ottobrunn, Germany*, Enrico Colzi, *Vega Group PLC, RF Payload System Division, ESA/ESTEC, Noordwijk, The Netherlands* -----**1159**

## **20. Surveying, Mapping and Geodesy**

**Availability Analysis of Integrated GNSS Using 3D GIS Model of Urban:** Hye-In Kim, *Inha University, South Korea*, Kwan-Dong Park, *Inha University, Korea* ----- **1096**

**Development of a GPS Augmentation Technique Utilizing QZSS Broadcasting:** Yuki Hatanaka, Yuki Kuroishi, Hiroshi Munekane, *Geographical Survey Institute, Japan*, Akira Wada, *Nippon GPS Solutions Co. Japan* ---- **1097**

**Development of a Low-Cost POS for Monitoring Skyscrapers Using Fast Fourier Transform:** Chia-Yuan Li, Yun-Wen Huang, Kai-Wei Chiang, *Department of Geomatics, National Cheng-Kung University, Taiwan* ----- **1104**

**Developments in Real Time Precise Positioning Technique:** Yongqi Chen, *The Hong Kong Polytechnic University, China* ----- **1111**

**EMD-Based Wavelet Model for Dynamic Deformation Signal Denoising:** Nanshan Zheng, *China University of Mining and Technology, China/Kyoto University, Japan*, Jian Wang, Jingxiang Gao, Shubi Zhang, *China University of Mining and Technology, China* ----- **1112**

**GEONET -GPS Earth Observation System-:** Takashi Toyofuku, Basara Miyahara, Hiroyuki Nakagawa, Koh Nitta, Takashi Saito, Hideo Amemiya, Yukiko Kimura, Masayuki Yamanaka *Geographical Survey Institute, Japan* ----- **1116**

**GPS/Galileo Long Baseline Computation: Method and Performance Analysis:** Ming Yang, Feng-Yo Chu, *National Cheng Kung Univ. Taiwan* ----- **1121**

**Identifying the Frequencies of a Twin Steel Box Girder Viaduct By GPS Monitoring:** Oluropo Ogundipe, Gethin W. Roberts, *The Institute of Engineering Surveying and Space Geodesy(IESSG), University of Nottingham, United Kingdom*, Chris Brown, *School of Engineering and Design, Brunel University, United Kingdom* -----**1122**

**Landmark Update of GPS/INS for Mobile Mapping System using a nearly horizontal single camera and 3D Point-Cloud:** Naoyuki Kajiwara, Jun-ichi Takiguti, Rui Hirokawa, Yoshihiro Shima, *Mitsubishi Electric Corporation Kamakura works* ----- **1130**

**New Analysis Strategy of GEONET:** Hiroyuki Nakagawa, Basara Miyahara, Chimako Iwashita, Takashi Toyofuku, Kyoko Kotani, Masayoshi Ishimoto, Hiroshi Munekane, Yuki Hatanaka, *Geographical Survey Institute, Japan* ----- **1139**

**Precise Point Positioning Performance of Low-Cost OEM and Geodetic Receivers Using Online Processing Service:** Reha M. Alkan, *ITU, Geodesy and Photogrammetry Engineering Department, Istanbul, Turkey* ----- **1144**

**Verifications of absolute antenna phase characteristic models in GEONET:** Tomoaki Furuya, Takashi Toyofuku, Yuko Noguchi, Hiroyuki Nakagawa, Basara Miyahara, Yuki Hatanaka, *Geographical Survey Institute (GSI), Japan* ----- **1155**

**CGSIC-IISC Meeting**  
**Plenary Session**  
**Special Speech**  
**Closing Session**
