# TABLE OF CONTENTS

## **SESSION: MOBILITY BEYOND FOSSIL FUELS**

*Session Chair: Weimin Gao*

|                                                                                 |           |
|---------------------------------------------------------------------------------|-----------|
| <b>Opportunities &amp; Challenges for Light-Weight and Safe Auto Body .....</b> | <b>1</b>  |
| <i>Won Suk Cho</i>                                                              |           |
| <b>Automotive Lightweighting Materials (Challenges and Opportunities) .....</b> | <b>26</b> |
| <i>Joseph Carpenter Jr., Michael Layne, Jake Jacanin</i>                        |           |

## **SESSION: BODY DESIGN AND ENGINEERING**

*Session Chairs: Tim Ling, Yongquan Liu, Simon Xu*

|                                                                                                                          |            |
|--------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Fully Integrated Automotive Body Development – A Synthesis Approach .....</b>                                         | <b>57</b>  |
| <i>Simon Xu</i>                                                                                                          |            |
| <b>The Application of Concept Design and FE Simulation Assessment in the Design of Pedestrian-Friendly Vehicle .....</b> | <b>68</b>  |
| <i>Miao Qiang, Gao Weimin, Wang Dazhi, Ma Meilin, Liu Junyong</i>                                                        |            |
| <b>BIW Concept Design in Virtual Testing Lab Applying Computation Grid Network.....</b>                                  | <b>74</b>  |
| <i>Nan Li, Yi Dai</i>                                                                                                    |            |
| <b>Power Train System Integration and Integration Frame Design for Fuel Cell Electric Vehicle.....</b>                   | <b>108</b> |
| <i>Qingwei Zhou, Tianjun Ling, Rubo Leng, Jian He, Feng Zhou</i>                                                         |            |
| <b>Aero-Acoustic Simulation of Sunroof Concept Design Applying Computation Grid Network .....</b>                        | <b>114</b> |
| <i>Kunpeng Zhang, Yi Dai</i>                                                                                             |            |
| <b>Body-in-White Durability Analysis Using RLD Data .....</b>                                                            | <b>136</b> |
| <i>Jin Haifeng, Cao Guangjun, Dai Yi, Tang Xiaodong</i>                                                                  |            |

## **SESSION: POWERTRAIN ENGINEERING**

*Session Chair: Klaus Pfeiffer*

|                                                                                                                                                                |            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Lifing of Automobile Structures and Drive Trains in Frequency Domain .....</b>                                                                              | <b>140</b> |
| <i>J.S. Rao, Narayan Rangarajan, Kang Zhao</i>                                                                                                                 |            |
| <b>Substituting a Combustion Engine by a PrimeMover – What are the Limitations.....</b>                                                                        | <b>203</b> |
| <i>Thomas Kirsch, Klaus Pfeiffer</i>                                                                                                                           |            |

| <i>Giancarlo Conti, Keith Moss, Paola Diglio, Valerio Cibrario, Davide DeStefanis, Francesco Sbarbati, Gennaro Lucignano</i>                                   |            |
| <b>Consistency During Engine and Powertrain Development and Testing .....</b>                                                                                  | <b>274</b> |
| <i>Charles Kammerer, Klaus Pfeiffer</i>                                                                                                                        |            |
| <b>Optimization of the Vibration and Microphones Measurements for the Calculation of the Acoustic Power Radiation of an Engine .....</b>                       | <b>294</b> |
| <i>Paola Diglio, Renaud Kenda, Gert Proost, Valerio Cibrario, Davide De Stefanis, Gennaro Lucignano, Marco Mancini, Massimo Martorelli, Francesco Sbarbati</i> |            |

## **SESSION: POWERTRAIN SYSTEMS**

*Session Chair: Thierry Seguelong*

|                                                                                                          |            |
|----------------------------------------------------------------------------------------------------------|------------|
| <b>Simulation and Measurement of Driveability on a Test Bed.....</b>                                     | <b>302</b> |
| <i>Josef Zehetner, Gernot Leitner, Klaus Pfeiffer</i>                                                    |            |
| <b>The Development of Second Generation Goengine 4 Inline VCR Engine.....</b>                            | <b>325</b> |
| <i>Bert De Gooijer</i>                                                                                   |            |
| <b>Non Rotational Induction Heat Treating of Crankshafts and Camshafts .....</b>                         | <b>350</b> |
| <i>Glen Desmier, Gary Doyon, Valery Rudnev, Don Loveless</i>                                             |            |
| <b>The Latest Development of Fuel-Borne Catalysts &amp; Added Value in the Automotive Industry .....</b> | <b>403</b> |
| <i>Laurent Rocher, Thierry Seguelong</i>                                                                 |            |

|                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The Active DPF System for Stop-And-Go Duty Cycles - Advanced Developments in SiC DPF Developments &amp; Thermal Managements.....</b> | 429 |
| <i>Jean-Claude Fayard, Francois Garcia</i>                                                                                              |     |
| <b>Borg-Warner DualTronic® Transmission Concepts for Efficiency, Cost and Robustness .....</b>                                          | 460 |
| <i>Alexander Moser, Viren Saxena, Paul McCrary</i>                                                                                      |     |

## **SESSION: VEHICLE ENGINEERING COMPLEMENTING TECHNOLOGIES**

*Session Chairs: Changqing Du, Guanlong Chen*

|                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------|-----|
| <b>Introduction to a Few Kinds of Typical Door Structure of Sedan and Corresponding Sealing System.....</b> | 481 |
| <i>Zhou Zhihong, Huang Yanmin</i>                                                                           |     |
| <b>Automotive Lightweighting - The R&amp;D of The Freedom CAR Materials Program.....</b>                    | 489 |
| <i>Joseph Carpenter Jr., Jake Jacanin, Michael Layne</i>                                                    |     |
| <b>Sound Insulation Performance of an Automotive Dash by Structure-sound Interaction Method.....</b>        | 512 |
| <i>Xin-Rui Chen, Zhi-yong Hao</i>                                                                           |     |
| <b>Application and Development Trend of New Lightweight Material in Automobile Body.....</b>                | 526 |
| <i>Diao Faxi, Zhang Peng</i>                                                                                |     |
| <b>Weld Design of Car Body .....</b>                                                                        | 537 |
| <i>Li Tiangi</i>                                                                                            |     |

## **SESSION: CRASHWORTHINESS & SAFETY**

*Session Chairs: Dan Tang, Wei Hong*

|                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------|-----|
| <b>Research of Sub-Model in Pedestrian Headform Impact.....</b>                                                      | 558 |
| <i>Yichuan Zhang, Qiang Miao, Dazhi Wang, Junyong Liu</i>                                                            |     |
| <b>Crashworthiness Design of Vehicle Structure for Side Impact based on European and American Requirements .....</b> | 566 |
| <i>Zhengqiang Tang, Liangping Wang, Xiaoke Shao, Ying Yang</i>                                                       |     |
| <b>An Overview of Automotive Side Door Impact Beam Development .....</b>                                             | 572 |
| <i>Ni Jianhua, Yang Jun, Ji Duowen, Min Junying</i>                                                                  |     |
| <b>Design Research on BIW Frontal Impact Load Path .....</b>                                                         | 580 |
| <i>Ye Yongliang, Jun Yang, Qiang Fu</i>                                                                              |     |
| <b>The Optimization of Front Armature Structure Based on CAE Analysis .....</b>                                      | 587 |
| <i>Huang Jun, Liu Nengquan</i>                                                                                       |     |
| <b>Structure Design of Front and Rear Bumper Beams.....</b>                                                          | 603 |
| <i>Pu Bin, Liu Nengquan</i>                                                                                          |     |
| <b>Coupling Simulation of Full Vehicle Side Impact with Madymo Dummy .....</b>                                       | 625 |
| <i>Lei Guo, Dazhi Wang, Fengjun Guo, Xiaodong Tang</i>                                                               |     |
| <b>Study of the Improvement Methods of Vehicle Side Safety Structure .....</b>                                       | 633 |
| <i>Li Zheng, Du Hanbin, Wang Dazhi, Tang Xiaodong</i>                                                                |     |
| <b>A Study on the Methods of Vehicle Structure Crashworthiness Design in Front Impact .....</b>                      | 638 |
| <i>Du Hanbin, Wang Dazhi, Zhang Fan, Tang Xiaodong, Li Zheng</i>                                                     |     |

## **SESSION: MATERIALS ENGINEERING**

*Session Chairs: Changqing Du, Di Tang*

|                                                                                                     |     |
