RILEM PUBLICATIONS – PRO 67

Repairs Mortars for Historic Masonry, January 26th-28th, 2005 – Delft, The Netherlands

Caspar Groot

Table of Contents

Preface <i>C. Groot</i>	pp. 1 - 1
1. Roman cement - key historic material to cover the exteriors of buildings <i>G. Adamski, L. Bratasz, R. Kozlowski, N. Mayr, D. Mucha, M. Stilhammerova, J. Weber</i>	pp. 2 - 11
2. The influence of craftsmanship on the inner structures of lime plaster <i>K. Balksten, K. Klasén</i>	pp. 12 - 19
3. A classification of structures and masonries for the adequate choice of repair <i>L. Binda, G. Cardani, A. Saisi</i>	pp. 20 - 34
4. The role of mortar joints in the mechanical behaviour of masonry structures <i>L. Binda, C. Tedeschi, G. Cardani</i>	pp. 35 - 46
5. A comparative study of mechanical and physical properties of mortars prepared using lime putties, sands and metakaolin from different sources <i>V. Bokan Bosiljkov, J. Valek</i>	pp. 47 - 62
6. Compatibility of repair mortars at the archaeological site of Villa Domizia on Giannutri Island, Italy <i>A. Bonazza, C. Sabbioni, A. Sardella, O. Favoni, P. Rendini, R. Sabelli</i>	pp. 63 - 72
7. Approach for compatible mortars for restoration purposes; stone reparations of the Roman amphitheatre of Arles (France) <i>P. Bromblet, G. Martinet, F. Martin</i>	pp. 73 - 81
8. Microstructure and weathering mechanisms of natural cements used in the 19th century in the French Rhône-Alpes region <i>E. Cailleux, E. Marie-Victoire, D. Sommain, E. Brouard</i>	pp. 82 - 93
9. Conservation of ancient mortars from Sagalassos - Turkey <i>J. Elsen, G. Mertens, P. Degryse, M. Waelkens</i>	pp. 94 - 98

10. Resistance to salts of lime and pozzolan mortars pp. 99 - 110
P. Faria Rodrigues
11. Compatibility of rendering systems with salt loaded ordinary masonry walls pp. 111 - 122
T. Díaz Gonçalves, J. Delgado Rodrigues
12. Bridging theory and practice pp. 123 - 131
R. Hayen, K. Van Balen
13. Historic trass - lime mortars with expansive reactions: characterization and repair strategies pp. 132 - 142
R.P.J. Van Hees, T.G. Nijland, J.A. Larbi, T.J. Wijffels, H. Brocken
14. Challenges and perspectives of replacement mortars in architectural conservation pp. 143 - 161
F.M.A. Henriques
15. Compressive and flexural strength testing of brick masonry panels constructed with two contrasting traditionally produced lime mortars pp. 162 - 177
J.J. Hughes, A.K. Taylor
16. Lime mortar for renders: is there a relationship between finishing technique and properties? Preliminary results pp. 178 - 186
A. Jornet, M. Somaini, A. Romer
17. A new freeze-thaw test method for mortars used in Nordic climates pp. 187 - 195
P. Kokko, M. Pentti
18. Theory transformed in practice and the results from practice distorting theories. Experiences from masonry restoration at the fortress of Suomenlinna in Finland pp. 196 - 206
T. von Konow
19. Investigations of soluble salt contents in modern hydraulic lime mortars - Test method and first results pp. 207 - 213
K. Kraus, K. Droll
20. Condition investigations of rendered facades pp. 214 - 223
J. Lahdensivu
21. Sub-hydraulic binders in historic mortars pp. 224 - 230
J.E. Lindqvist, S. Johansson
22. The performance of a restoration plaster in the field: investigation and monitoring of two case studies pp. 231 - 241
B. Lubelli, R.P.J. van hees, C.J.W.P. Groot
23. Repair mortars for the conservation of cultural heritage: a multilayer render system with mass water-repelling to be applied in facings with high moisture and salts pp. 242 - 265
M.P. Luxán, F. Dorrego, J. Dorrego

24. Preliminary evaluation of the freeze-thaw resistance of hydraulic lime mortars pp. 266 - 277
A.H.P. Maurenbrecher, K. Trischuk, M.I. Subercaseaux, G.T. Suter
25. Reverse engineering: a proper methodology for compatible restoration of mortars pp. 278 - 291
A. Moropoulou, A. Bakolas, P. Moundoulas, E. Aggelakopoulou
26. Design and manufacture of repair mortars for interventions on monuments and historical buildings pp. 292 - 304
I. Papayianni
27. Characteristics of repair mortars for historic buildings concerning quantified hygric requirements pp. 305 - 315
M. Rosário Veiga
28. Monitoring of the moisture and salt load in restoration plasters in St.-Babara's church in Culemborg pp. 316 - 327
M.M. Sanders, R.P.J. Van Hees
29. Historic mortars revived; developing local materials and crafts for restoration pp. 328 - 338
E. Sandström Malinowski
30. The role of compaction in the quality of repair mortars pp. 339 - 344
M. Stefanidou
31. Optimised microstructure of calcium sulphate-based mortars for the restoration of historic masonry pp. 345 - 353
V. Tesch, B. Middendorf
32. Key considerations in the development of ASTM standard specification for mortar for historic structures: materials, test procedures and properties pp. 354 - 361
M.L. Thomson, J.M. Wathne
33. Development of lime-pozzolan-cement compositions for the repair and strengthening of historic structures pp. 362 - 373
E.E.E. Toumbakari, C.B. Malami, C.E. Adami, E.N. Vintzileou
34. Tests on lime and metakaolinite mortars intended for application on historic buildings pp. 374 - 381
J. Válek, Z. Slízková
35. Requirements for the choice of mortar and grouts for consolidation of three-leaf stone masonry walls pp. 382 - 397
