TABLE OF CONTENTS / TABLE DES MATIÈRES

Paper Machine Technology I: Advances in Papermaking Concepts / Technologie de la machine à papier I : Progrès technologiques dans les concepts de fabrication du papier

Papridry™: Continuous Operation of Two Pilot Units at Paprican

G. Gauthier, I. PIKULIK and J. Hamel 1

Energy-Saving Solutions for Paper Machine Wet End

D. LIARD, S. Ahmaniemi, H. Ilvespää, J. Jääskeläinen, R. Pihko, T. Pirinen, M. Puro, A. Puurtinen, M. Talonen, J. Vestola and M. Salenius 10

Pilot Papermachine Production of Newsprint Using High Filler Loads and Dry Strength Technologies

S. LAFRENIÈRE, J. Paradis and F. Brouillette 20

Bridging the Gap for Improved Productivity: Alberta Newsprint Uses LSZ Technology to Integrate Multiple Systems at Paper Machine and Winder!

R. Stevens, S. Keefe, W. Visser and S. LOEWEN. 25

Visual Inspection and Post Processing Tools Deliver Rapid ROI

J. ZYGLIS and B. Chiricosta 31

Mixing Dynamics in Cylindrical Pulp Stock Chests

L.K. HUI, C.P.J. Bennington and G.A. Dumont 33

Environment / Environnement

Production, Characterization and Application of Lignocellulosic Biomass-Derived Activated Carbon for Removal of Endocrine Disrupting Material

A.B. NAMAZI, C.Q. Jia and D.G. Allen. 45

Potential of Primary and Secondary Pulp and Paper Sludge from Three Pulping Processes for Binderless Fireboard Manufacturing

S. Migneault H. Nadji, B. Riedl, J. Deng, T. Zhang and A. KOUBAA 49

Reduction of Filamentous Growth in a Secondary Wastewater Treatment Plant with the Use of a Novel Soft Sensor Algorithm

M. Frith and V. KNOTT. 53

Comparative Life-Cycle Assessments for Different Feedstocks-to-Ethanol Production

M. Ranjbar, R. Samson and P.R. STUART 59

Critical Issues for the Pulp and Paper Industry Presented by North American Carbon and Energy Markets

A. LANDRY, T. Griset and S.A. Hudson 67

Spill Containment in the 21st Century

S. PARRAN 73

Fine and Coated Papers / Papiers fins et couchés

Formation of Pitch-Related Deposit in a TMP-Based Specialty Paper Mill Z. DAI, Y. Ni, G. Court and Z. Li	75
Precoat Effect on the Final Printability. Part III: Coating Structure and Deltac Results and Analysis D. MATTE, P.J. Mangin and C. Daneault.	81
Improving the Strength Properties of High-Yield Pulp (HYP) Containing Papers Using a Dry Strength Additive P. FATEHI, X. Liu, Y. Ni and H. Xiao.	93
On-Line Image Analysis Delivers Surface Fibre Orientation Measurement R. MacHATTIE and A. Paavola	98
An Enzymatic Solution to Vessel Picking R. COVARRUBIAS.	103
The Effect of CMC and PVOH on the Curtain Stability and Rheology of Curtain Coating Colours H.A. LEE, C.H. Kim and E.H. Choi.	107

PANEL : Mountain Pine Beetle I / Dendroctone du pin ponderosa I

MPB Alberta Update G. Smith	111
Development of Vision-Based Wood Blue Stain Measurement System for Management of Wood Chip Quality Variation Resulting from Utilization of Mountain Pine Beetle Attacked Pines W. LI, P. Pastushak, J. Woolley, T.M. Garver, H. Quinn, C. Gurney and G. Renaud.	116
Preparation of Thermomechanical Pulp (TMP) from Whole Pine Logs at Different Stages of Decay Resulting from Mountain Pine Beetle (MPB) Attack W. CHUTE, D. Henry, D. Rolheiser, J. Zhou, G. Smith and H. Freeman	120
Evaluation of MPB Furnish, Impact on Shoe Press Design and Influence on Paper Machine Operation M. YOUNG	121
Spruce Meter (Sniffer) Developments in GC-Based Wood Species Characterization for Management of Furnish Variation Due to Utilization of Mountain Pine Beetle Attacked Pine T.M. GARVER, M. Genest, J. Woolley, W. Li, P. Pastushak, C. Gurney and H. Quinn	128
Incorporated Wood Pitch as a Factor Contributing to Newsprint Strength Loss T.M. GARVER, P. Pastushak and M. Genest.	129
The Impact of MPB Infestation on Pulp Brightness and Bleachability D. WONG.	130

Paper Machine Technology II: Advances in Paper Machine Clothing and at the Paper Machine Dry End / Technologie de la machine à papier II : Progrès technologiques dans l'habillage et la partie sèche de la machine à papier

A New Method to Quantify the Drainage Property of the Forming Fabric

J. XU, R. Danby, D. Johnson, J. VanDerKolk and A. Cheverton 137

Nip Dynamics: Rolls and Press Felts Working Together

A. Bullerwell, E. Gustafson, M. McGuffey, G. Harvey, R. Goglick and R. MOORE 145

Uneven Winding and Slack Edges: Root Cause Problem Solving Finds a Surprising Culprit!

S.R. LOEWEN, G. Pépin, T. McQuoid and R.K. Stevens 150

Optimizing the Winder Operation

T. MUELLER 159

Energy / Énergie

Energy Consumption in Kraft Pulp Mills

S.K. SCHRODERUS and M. Davidovsky 165

Techno-Economic Model of the Novel Biodrying Process for the Drying of Pulp and Paper Industry Mixed Sludge and its Effect on the Efficiency of a Fluidized Bed Boiler

C. TCHORYK, P.R. Stuart and B. Tolnai 175

Energy Efficiency in Paper Production using Direct Steam Injection

D. DEGELAU 180

High Pressure Condensate Return Rearrangement

É. Allen and É. ÉMOND 185

Maximize Drying Rate at Minimum Cost

Y. DÉPAULT 187

Engineering and Maintenance / Ingénierie et maintenance

Bearing Currents on AC PM Motors

P. HENRI 191

Maintenance Management Through Indicators

F. DUSABLON 200

Pump Failure - An Unnecessary Expense

R. MACKAY 205

Supplier Showcase / "Showcase des fournisseurs"

Integrated Solutions to Increase Efficiency in the Paper Manufacturing Process C. HOPE	210
Modified Inorganic Particles as Deinking Aids T. Cotter, D. PREVIS, K. Hale and S. Rosencrance.	212
Direct Steam Injection for Pulp & Paper Production D. DEGELAU	215
Keeping Spills On-Site with Wireless Technology S. PARRAN	219
FORMEXX - New Shape of Machine Efficiency P. BRUNET.	222
Medallion Right Size - New Technology ASA D. DENOWSKI.	227
CentraFlow A. CHEVERTON	230
Document Management in a Data-Centric World - Don't be Content with just Containers M. DESROSIERS.	235
Fabric and Felt Cleaning Challenges Due to Increased Recycled Fibre Use M. EINWALLNER.	239
 Mountain Pine Beetle II: Moving Ahead - Managing Beetle-Killed Wood in Pulp and Paper Operations / Dendroctone du pin ponderosa II : Continuité - Gérer le bois tué par le dendroctone dans les opérations des pâtes et papiers	
The Mountain Pine Beetle in Western Canada – An Overview D. HARRISON	241
TMP from Dry, Beetle-Killed Lodgepole Pine Chips I. OMHOLT, K. Miles, M. Stacey and D. Dranfield.	247
A Cost-Effective Method for Overcoming the Brightness Ceiling of TMP Made from Mill Chips Containing Mountain Pine Beetle-Infested Lodgepole Pine T.Q. HU, C. Margetts, K. Morrow, M. Zhao, S. Johal and B. Yuen.	252
Canola Waste Fatty Acid Addition to Black Liquor to Decrease Tall Oil Soap Solubility and Increase Skimming Efficiency in Kraft Mills Pulping Mountain Pine Beetle Infected Wood V. ULOTH, E. Guy, R. van Heek and D. Shewchuk.	257
Whole Log Chipping of Mountain Pine Beetle-Killed Wood for the Pulp and Paper Industry B. Dalpke and P. BICHO	278

Process Control / Contrôle des procédés

Advanced Control of a TMP Refiner Line: A Simulation Study E. HARINATH, J. Yan and G.A. Dumont	289
Closed Loop Tuning vs Open Loop Tuning: Tuning all your Loops while the Process is Running is now Possible M. RUEL	293
Near Infrared Process Sensors for Pulp Mill Applications B. CURTISS, D. Campbell and T. Trung	300
Virtual Sensors N. HARDT	306
Advanced Controls Design and Implementation at Tembec Temiscaming using a First-Principles Steam Simulator A. Poitras, D. Bordeleau and B. JANVIER	313

Recycling / Recyclage

Modified Inorganic Particles as Deinking Aids T. Cotter, D. PREVIS, K. Hale and S. Rosencrance	319
Tracking Performance after Optimizing a Deinked Plant M. RUEL	322
Appication of Cationic PVA on OCC Pulp for Improving the Paper Strength P. FATEHI, T. McArthur and H. Xiao	326
New Development in Fibre Modification Enzyme Maximize 2530 - Tissue V. ROY and J. Morissette	331

Bleaching / Blanchiment

Minimizing Transition Pulp During Grade Changes by Improving Plug Flow in High Density Towers G. PAGEAU	333
Near-Neutral Final Chlorine Dioxide Brightening: Theory and Practice Z.-H. JIANG and R. Berry	339
Comparative Evaluation of Peroxide Explosion Hazards in Chemical and Mechanical Pulp Bleaching Systems P.W. HART and A.W. Rudie	350
Effect of Eucalyptus Kraft Pulp Enzyme Bleaching on Effluent Quality and Bio-Treatability M.T. Borges, C.M. SILVA, J.L. Colodette, L. Alves, G.R. Rodrigues and L. Lana	363

French Track / Montage des meilleures présentations en français

Effet de la variation du poids de couche sur l'imprimabilité du papier D. MATTE, P.J. Mangin et C. Daneault	367
Opportunités pour un avenir prometteur et durable de l'industrie canadienne des pâtes et papiers M. MARINOVA, E. Mateos-Espejel et J. Paris	378
Emballages bioactifs pour le contrôle de contaminations alimentaires T. JABRANE, M. Dubé et P.J. Mangin, CIPP-UQTR, Canada	382
Amélioration de la stabilité d'un procédé de cogénération B. JANVIER, M.-O. Guérin et D. Thivierge, Enero Solutions Inc., Canada	387

Mechanical Pulping I / Mise en pâte mécanique I

A Method for Estimating Chip Brightness and its Application T.Q. HU, M. Zhao, P. Bicho and P. Losier.	394
Mechanical Pulp Quality and Fractionation. Part I: Upgrading Newsprint TMP for Value-Added Grades R. AMIRI, Z. Yuan and S. Beaulieu.	399
Development of the Fibres Inside a High-Consistency Refiner I. OMHOLT	415
Saving Electrical Energy by Alkaline-Peroxide Pretreatment of TMP Prior to Low-Consistency Refining R. BEATSON, H. Chang, C. Bridges, D. Vu and D. Kuan	421

Research I / Recherche I

Bacterial Polyesters: Thermoplastic Granules for Paper Sizing R.H. MARCHESSAULT and R. Bourbonnais	428
Physicochemical Study of Factors Inducing Piling in Heatset Offset Lithography A.C. KHAZRAJI, P.J. Mangin and F. Brouillette	432
Effect of HYP Fines on Filler Retention and Paper Formation H. ZHANG, Z. He and Y. Ni	438
Water Uptake and Mechanical Characteristics of PE/Aspen Composites Reinforced with Organo-Nanoclays R. GU, B.V. Kokta and E. Bustamante.	443
Energy Analysis of a Canadian Kraft Pulp and Paper Mill J.-C. BONHIVERS and P.R. Stuart	454
Energy and Forces in Refining R.J. KEREKES.	458

Biorefinery I / Bioraffinage I

Status and Results of a Thermochemical Biorefinery Process Demonstration Unit E. CONNOR.	465
Formation of Acetic Acid from the Kraft-Based Dissolving Pulp Production Process H. LI, A. Saeed, S. Jahan, Y. Ni and A. van Heiningen.	468
Sugar Analysis on the Pre-Hydrolysis Kraft-Based Dissolving Pulp Production Process A. SAEED, H. Li, S. Jahan, Y. Ni and A. van Heiningen.	473
Production of Cellulose Nanofibres by TEMPO-Mediated Oxidation of Unbeaten Kraft Pulp R. GUIMOND, B. Chabot and C. Daneault	478

Energy Management, sponsored by Hydro-Québec / Gestion de l'énergie, commanditée par Hydro-Québec

"Energy Audit for Mechanical Pulp: A First Step for Diagnosis and Improvement of Performance" Alain Roche, Lahoucine Ettaleb, A. Poulin and L. Beaudoin	485
"Assessing Potential Specific Energy Reduction in a TMP Process: A Gateway to Refining Energy Saving" Kyarash Shahriari and Feng Ding.	492
"Energy Efficiency Opportunities for the Paper Machine" Jacques Perrault	496
"Continuous Measurement: A tool for Energy Savings Improvement" Éric Bordeleau and Bernard Bégin.	502

Annual Business Luncheon Keynote: Jacquelyn McNutt, Executive Director, Center of Paper Business & Industry Studies at Goergia Tech Conférencière invitée, dîner d'affaires annuel : Jacquelyn McNutt, Executive Director, Center of Paper Business & Industry Studies at Goergia Tech

"Imagine the Forest Products Industry of the Future"	509
--	-----

Bleaching Panel: ClO₂ Generation / Panel sur le blanchiment : Génération ClO₂

Maximizing the Production Capacity of Sub-Atmospheric ClO₂ Processes J. HOPMANS	Á FG
Conversion to Peroxide Chemistry and Dual Chemistry ClO₂ Plants M. MINDAY.	Á FJ
Advanced ClO₂ Generator Control at Howe Sound Pulp & Paper LP G. PAGEAU	525
Production of Neutral Saltcake in Sub-Atmospheric ClO₂ Plants P.F. EARL.	528

Research II / Recherche II

Response Surface Methodological Approach for Optimization of Chemicals for Highly PCC Filled Mechanical Grade Papers	
Y. SANG, P. Englezos and M. McQuaid	533
Polyvinylamine Boronate Adhesion to Wet Cellulose – Why Does it Stick	
R. PELTON and W. Chen	543
Self-Assembled Monolayers on Glass Beads for the Treatment of Paper Machine Process Waters	
K. JRADI, B. Chabot and C. Daneault	547
Adsorption of Model Whitewater Contaminants on Ion-Exchange Resins	
R. VALLERAND, C. Daneault and B. Chabot	555
Development of a Flow-Following Sensor Package for Application in Chemical Pulp Digesters	
T.C.M GRAHAM, E. Liu, N. Sadeghi, A.R. Mohammadi, E. Albadvi, S. Mirabbasi, M. Chiao, J. Madden and C.P.J. Bennington	562

Biorefinery II / Bioraffinage II

Kinetics and Mechanism of Autohydrolysis of Hardwood	
X. Chen, M. Lawoko and A. VAN HEININGEN	571
Repurposing of a Kraft Pulp and Paper Mill to the Production of Ethanol	
R. PHILLIPS, H. Jameel and T. Treasure	581
Simulation of a Kraft Pulp Mill for the Integration of Biorefinery Technologies and Energy Optimization	
E. MATEOS-ESPEJEL, M. Marinova, S. Peter and J. Paris	590
Critical Analysis of Emerging Process Technologies for the Forest Biorefinery (FBR)	
J. COHEN, V. Chambost, M. Janssen and P.R. Stuart	595

Mechanical Pulping II / Mise en pâte mécanique II

Development of Jack Pine Fibres during Selective Refining of Long Fibre Fraction after various Chemical Treatments	
Y. Lin and R. LANOUILLE	598
Using Optical Brightening Agent (OBA) to increase the Brightness of High Yield Pulps	
Q. Chen, H. Zhang, Z. He and Y. Ni	607
Low Consistency Refining of Mechanical Pulp: A Methodology to Relate Operating Conditions to Paper Properties	
A. LUUKKONEN, J. Olson and M. Martinez	614
New Fractionation Technology Gives Better Pulp Quality and Reduced Energy Consumption at Holmen Paper Braviken Mill	
C. SANDBERG and O. Shagaev	621
