# TABLE OF CONTENTS

|                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------|-----|
| <b>Reducing Carbon Emissions from the UK's Non-domestic Buildings</b> .....                              | 1   |
| <i>S. Farmer</i>                                                                                         |     |
| <b>Challenges and Opportunities for Intelligent Buildings in the 21st Century: An Energy Focus</b> ..... | 17  |
| <i>D. Clements-Croome</i>                                                                                |     |
| <b>Renewable Solar, Wind and Water Technologies</b> .....                                                | 103 |
| <i>A. Wilson</i>                                                                                         |     |
| <b>Rethinking Refurbishment</b> .....                                                                    | 131 |
| <i>J. O'Brien</i>                                                                                        |     |
| <b>Off Grid PV: Lessons from the Developing World</b> .....                                              | 152 |
| <i>J. Devine</i>                                                                                         |     |
| <b>ICT Applications in Intelligent Buildings</b> .....                                                   | 183 |
| <i>R. Price</i>                                                                                          |     |
| <b>Determining the Return on an Initial Installation Investment</b> .....                                | 196 |
| <i>P. Smyth</i>                                                                                          |     |
| <b>Reducing the Carbon Footprint of Construction</b> .....                                               | 232 |
| <i>B. Gill</i>                                                                                           |     |
