

2010 21st Australian Software Engineering Conference

(ASWEC 2010)

**Auckland, New Zealand
6-9 April 2010**

IEEE Catalog Number: CFP10134-PRT
ISBN: 978-1-4244-6475-3

21st Australian Software Engineering Conference

ASWEC 2010

Table of Contents

Message from the ASWEC 2010 General Chairs	viii
Message from the ASWEC 2010 Research Programme Chairs	ix
Message from the ASWEC 2010 Industry Programme Chairs	x
Steering Committee	xi
Organising Committee	xii
Research Programme Committee	xiii
Industry Programme Committee	xiv
Additional Reviewers	xv
Sponsors	xvi
Keynote Presentations	xix

Software Evolution

Studying Software Evolution for Taming Software Complexity	3
<i>Steve D. Suh and Iulian Neamtii</i>	
A Systematic Review on Architecting for Software Evolvability	13
<i>Hongyu Pei Breivold and Ivica Crnkovic</i>	
Model-Centered Customizable Architectural Design Decisions Management	23
<i>Lianping Chen, Muhammad Ali Babar, and Haiqi Liang</i>	

Web and Security

Modelling Enterprise System Protocols and Trace Conformance	35
<i>Cameron Hine, Jean-Guy Schneider, Jun Han, and Steve Versteeg</i>	
Non-Monotonic Model Completion in Web Application Engineering	45
<i>Jevon M. Wright and Jens B. Dietrich</i>	
Security Metrics for Object-Oriented Designs	55
<i>Bandar Alshammari, Colin Fidge, and Diane Corney</i>	

Graphics and User Interfaces

A Reduction of Grid-Bag Layout to Auckland Layout	67
<i>Gerald Weber</i>	
Scenario-Based Validation: Beyond the User Requirements Notation	75
<i>Dave Arnold, Jean-Pierre Corriveau, and Wei Shi</i>	
X3D-UML: 3D UML Mechatronic Diagrams	85
<i>Paul McIntosh and Margaret Hamilton</i>	

Service-Oriented Systems

Support for Business Process Flexibility in Service Compositions: An Evaluative Survey	97
<i>Malinda Kapuruge, Jun Han, and Alan Colman</i>	
A Model Transformation Method in Service-Oriented Domain Modeling	107
<i>Zhouxuan Sun, Jian Wang, Keqing He, Shujuan Xiang, and Dunhui Yu</i>	
An Architectural Approach to Composing Reputation-Based Trustworthy Services	117
<i>Suronapee Phoomvuthisarn, Yan Liu, and Jun Han</i>	

Software Process and Testing

Managing Structure-Related Software Project Risk: A New Role for Project Governance	129
<i>Paul L. Bannerman</i>	
Waste and Lead Time Reduction in a Software Product Customization Process with Value Stream Maps	139
<i>Shahid Mujtaba, Robert Feldt, and Kai Petersen</i>	
Application of Artificial Bee Colony Algorithm to Software Testing	149
<i>Surender Singh Dahiya, Jitender Kumar Chhabra, and Shakti Kumar</i>	

Education and Visualisation

Automated Feedback for Quality Assurance in Software Engineering Education	157
<i>Rachel Cardell-Oliver, Lu Zhang, Rieky Barady, You Hai Lim, Asad Naveed, and Terry Woodings</i>	
The Significance of Learning Style with Respect to Achievement in First Year Programming Students	165
<i>Vivian Campbell and Michael Johnstone</i>	
In Situ Software Visualisation	171
<i>Matthew Harward, Warwick Irwin, and Neville Churcher</i>	

Middleware

A Statistical Method for Middleware System Architecture Evaluation	183
<i>Jacky W. Keung, Yan Liu, Kate Foster, and Thong Nguyen</i>	
Assessing the Performance Impact of Service Monitoring	192
<i>Garth Heward, Ingo Müller, Jun Han, Jean-Guy Schneider, and Steven Versteeg</i>	
Middleware for Social Networking on Mobile Devices	202
<i>Daniel Brooker, Thomas Carey, and Ian Warren</i>	

Programming

Supporting Domain-Specific Programming in Web 2.0: A Case Study of Smart Devices	215
<i>Navid Ahmadi, Francesco Lelli, and Mehdi Jazayeri</i>	
Modeling Multigrid Algorithms for Variational Imaging	224
<i>Isabel Dietrich, Reinhard German, Harald Koestler, and Ulrich Ruede</i>	
On the Use of Properties in Java Applications	235
<i>Markus Lumpe, Samiran Mahmud, and Rajesh Vasa</i>	

Author Index	245
