TABLE OF CONTENTS

TECHNICAL SESSION 1

Modeling Breakage Rates in Mills with Impact Energy Spectra and Ultra Fast Load Cell Data	1
<i>E. T. Tuzcu, R. K. Rajamani</i>	
Influence of Grinding Media Contact Points' Number in a Ball Mill on Disintegration Rate of Grains of Small Size	23
<i>T. P. Olejnik, A. Heim</i>	
Studies of the Effect of Tracer Activity on Positron Emission Particle Tracking Measurements on Tumbling Mills at PEPT Cape Town	32
<i>T. S. Volkwyn, I. Govender, A. Buffler, J.-P. Franzidis, A. J. Morrison, N. P. van der Meulen, C. Vermeulen</i>	
A New Method for Determination of Fine Particle Breakage	44
<i>D. Ekşi, H. Benzer, A. Sargin, Ö. Genç</i>	
Power Draw Estimations in Tumbling Mills using PEPT	52
<i>L. S. Bbosa, I. Govender, A. N. Mainza, M. Powell</i>	
Circulation Rate Modelling of Mill Charge using Position Emission Particle Tracking	68
<i>D. V. V. Kallon, I. Govender, A. N. Mainza</i>	
Time-Averaged Kinematics in Tumbling Mills using Positron Emission Particle Tracking	82
<i>A. J. Morrison, I. Govender, A. N. Mainza</i>	

TECHNICAL SESSION 2

Prediction of the Bond Work Index for Variability Analysis	99
<i>V. K. Alves, C. L. Schneider</i>	
Effects of Mixtures of Grinding Media of Different Shapes on Milling Kinetics	123
<i>K. P. Simba, M. H. Moys</i>	
Using DEM and SPH to Model Wet Industrial Banana Screens	133
<i>P. W. Cleary, J. W. Fernandez, M. D. Sinott, R. D. Morrison</i>	
Study of RTD (Residence Time Distribution) and Mill Hold Up for a Continuous Centrifugal Mill with Various G/D Ratios	154
<i>H. C. Cho, K. H. Kim, H. Lee, D. J. Kim</i>	
Classifying Best Access Points for Return of External Flows into Flowsheets	178
<i>P. Oghazi, B. Pålsson, K. Tano</i>	
Can Cyclones Improve Grinding?	192
<i>I. du Plessis</i>	

TECHNICAL SESSION 3

A Comparative Study between Cone Crushers and Theoretically Optimal Crushing Sequences	205
<i>E. Lee, C. M. Evertsson</i>	
Simulating Capacity and Breakage in Cone Crushers using DEM	219
<i>J. Quist, C. M. Evertsson</i>	
Real-Time Algorithm for Cone Crusher Control with Two On-Line Variables	235
<i>E. Hulthén, C. M. Evertsson</i>	
The Advantage of Half Scale to Full Scale HPGR Modelling	243
<i>F. Heinicke</i>	
Comparison of Open and Closed Circuit HPGR Application on Dry Grinding Circuit Performance	250
<i>O. Altun, H. Benzer, H. Dündar, N. A. Aydoğan</i>	
Investigation of the Breakage of Hard and Soft Components under High Compression: HPGR Application	265
<i>H. Benzer, N. A. Aydoğan, H. Dündar</i>	
Breakage of Waste Concrete for Liberation using Autogenous Mill	272
<i>K. H. Kim, H. C. Cho, D. J. Kim, J. W. Ahn</i>	
SAG kWh/T Measured using a Standard Test 53 Projects in 6 Years	288
<i>J. Starkey, P. Scinto</i>	

TECHNICAL SESSION 4

Optimization of the Sag Mill Circuit at Kinross Paracatu Brazil	298
<i>M. P. Gomes, L. T. Junior, E. S. Nunes Filho, J. Colacioppo, A. Jankovic, W. Valery</i>	
Monitoring of the Operational States of a Semi-Autogenous Mill	310
<i>J. Burchell, C. Aldrich, J. W. de V. Groenewald</i>	
Wear & Design Improvements in Discharge Cones for Large Sag/Ag Mills	321
<i>C. Faulkner</i>	
Energy Efficient Grinding Circuits from Operator's View Point	331
<i>M. Gao, R. Harvey</i>	
The Development of a Dry, Energy Efficient Grinding Circuit for Anglo American	345
<i>W. van Drunick, C. Gerold, N. Palm</i>	
Taking Advantage of Shapes of Rock to Reduce Comminution Energy	360
<i>R. Chandramohan, M. Powell, P. Holtham</i>	

TECHNICAL SESSION 5

Interpretation of Mill Vibration Signal using Wireless Sensing Technique	384
<i>S. P. Das, D. P. Das, S. K. Behera, B. K. Mishra</i>	
Ball Charge Optimization of Cement Mills	391
<i>P. Fleiger, S. Woywadt</i>	
Total Milling Cost Reduction by Improved Liner Design	403
<i>J. Dahner, A. van den Bosch</i>	
Milling Rate of Chosen Mineral Materials in a Ball Mill under Changing Apparatus – Process Conditions	417
<i>T. P. Olejnik</i>	
Modeling the RTD of an Industrial Overflow Ball Mill as a Function of Load Volume and Slurry Concentration	428
<i>A. B. Makokha, M. H. Moys</i>	
Coarse Grinding Applications using the Metso Vertimill®	444
<i>G. Davey</i>	
Comparison of the Overall Circuit Performance in the Cement Industry: High Compression Milling vs Ball Milling Technology	453
<i>N. A. Aydoğan, H. Benzer</i>	
Simulation Assisted Capacity Improvement of Cement Grinding Circuit: Case Study Cement Plant	463
<i>H. Dündar, H. Benzer, N. A. Aydoğan, O. Altun, N. A. Toprak, O. Ozcan, D. Ekşi, A. Sargin</i>	
Analysis of a Stator Earth Fault Protection System of a Grinding Mill Converter-fed Synchronous Motor	473
<i>J. Pontt, F. Rojas, W. Valderrama, R. Vargas</i>	
Synchronous Electric Drives for Grinding Mills	478
<i>M. Ploc, M. Clatworthy</i>	

TECHNICAL SESSION 6

Less Invasive Vibrations Measurement for Monitoring and Surveillance of Grinding Mills with Gearless Drives	488
<i>J. Pontt, U. Ramos, F. Rojas, W. Valderrama</i>	
Implementing Strategies to Improve Mill Capacity and Efficiency through Classification by Particle Size Only, with Case Studies	492
<i>N. J. Barkhuysen</i>	
DEM Modelling of Liner and Lifter Wear in Grinding Mills	502
<i>M. Powell, N. S. Weerasekara, S. Cole, R. D. LaRoche, J. Favier</i>	
Prediction of Mill Structure Behaviour in a Tumbling Mill	517
<i>P. Jonsén, B. Pålsson, K. Tano, A. Berggren</i>	
Is Fine Grinding an Appropriate Technology for the Optimal Extraction of Refractory Gold Ores?	530
<i>D. J. Capstick</i>	
Investigation on the Residence Time and Fine Grinding at Float Characteristic Test Rig	538
<i>F. Francis, J. Kabuba, E. Muzenda, M. Mollagee</i>	
The Effect of the Design of a Secondary Grinding Circuit on Platinum Flotation from a UG-2 Ore	547
<i>L. Maharaj, B. K. Loveday, J. Pocock</i>	

TECHNICAL SESSION 7

Towards a Mechanistic Model for Slurry Transport in Tumbling Mills	560
<i>I. Govender, G. B. Tupper, A. N. Mainza</i>	
Selection Criteria of Stirred Milling Technologies	573
<i>B. R. Knorr, J. Allen</i>	
Stress Model as Basis for Optimization and Scale-Up of Bead Milling Processes	590
<i>A. Kwade</i>	
Tracking the Motion of Media Particles Inside an IsaMill™ using PEPT	604
<i>A. van der Westhuizen, I. Govender, A. N. Mainza, J. Rubenstein</i>	
Fluidized Mill Media Selection Considerations	618
<i>M. Gallimore</i>	
Effect of Media Size and Mechanical Properties on Milling Efficiency and Media Consumption	634
<i>B. Y. Farber, B. Durant, N. Bedesi</i>	

TECHNICAL SESSION 8

Characterising Porosity of Multi-Component Mixtures in Rotary Mills	651
<i>K. Sichahwe, I. Govender, A. N. Mainza</i>	
Comparison of Flow Properties obtained from DEM-CFD Simulations and PEPT Measurements	664
<i>C. T. Jayasundara, R.Y. Yang, A.B. Yu, I. Govender, A. N. Mainza, A. Westhuizen, J. Rubenstein</i>	
Enlightened Circuit Design is Essential to the Take-Up of New Equipment	674
<i>M. Powell</i>
