TABLE OF CONTENTS

VOLUME 1

Opening Remarks 1
Graeme M. Burt

Keynote Address: Smart Grids: To Boldly Go! 7
John Scott

Adequacy Assessment of Composite Power Systems Through Hybridization of Monte Carlo Simulation and Artificial Immune Recognition System 27
Lingfeng Wang, Chanan Singh

Verification of a Probabilistic Model for a Distribution System with Integration of Dispersed Generation 34
Peiyuan Chen, Zhe Chen, Birgitte Bak-Jensen, Rasmus Waagepetersen, Stefan Sörensen

Active/Reactive Market Model Based on Adjustment Bids and Integrating Capacitor Banks and Transformer Taps 41
João Tomé Saraiva, Mário Helder Gomes

Transmission Network Expansion Planning Under Deliberate Outages 49
Natalia Alguacil, Miguel Carrión, José M. Arroyo

Composite-System Generation Adequacy Planning Using Stochastic Programming with Sample-Average Approximation 56
Panida Jirutitijaroen, Chanan Singh

Effects of Gas-Production Constraints Over Generation Expansion 62
Efraim Centeno, Juan José Sánchez, Julián Barquín, Álvaro López-Peña

A Tool for Reconfiguration of Large-Scale Distribution Networks 69
A. González, F.M. Echavarren, L. Rouco, T. Gómez

Optimal Zero Injection Considerations in PMU Placement: An ILP Approach 76
Sanjay Dambhare, Devesh Dua, Rajeev Kumar Gajbhiye, S.A. Soman

Advanced Tools in Emergency Control Systems 82
N.I. Voropai, D.N.Efimov, P.V. Etingov, E. Handschin, C. Rehtanz

The Feasibility Study of Ancillary Services Provision from Multiple Micro-Grids 89
Cherry Yuen, Alexandre Oudalov, Adrian Timbus

Impact of Prohibited Operating Zones of Generating Units on Locational Marginal Prices 98
Hossein Daneshi, Mohammad Shahidehpour, Ali Daneshi

The Assessment of Power System Vulnerability Induced by Lack of Reactive Power Resources Following Severe Contingencies 104
C. Genesi, P. Marannino, M. Montagna, F. Zanellini, M. Innorta

Influence of Price Forecasting on Short-Term Thermal Scheduling with Environmental Concerns 111
J. Catalão, S. Mariano, V. Mendes, L. Ferreira

A New Fault Location Algorithm for Use with Current Differential Protective Relays of Two-Terminal Line 117
Jan Izykowski, Eugeniusz Rosolowski, Murari Mohan Saha

Stability of the Power Systems in Case of Large Wind Penetration and Battery Application 123
Ervin Spahic, Arefeh Danesh Shakib, Gerd Balzer

Accurate Location of Faults on Three-Terminal Line with Use of Three-End Unsynchronised Measurements 129
Jan Izykowski, Eugeniusz Rosolowski, Rafal Molag, Przemyslaw Balcerek, Marek Fulczyk, Murari Mohan Saha

Exploiting Automated Demand Response, Generation and Storage Capabilities for Hierarchical Frequency Control in Islanded Multi-Microgrids 136
Nuno José Gil, J. Lopes

Application of Online Coordinated Voltage Control Using Optimal Power Flow to a Large-Scale Power Grid 143
M. Tanimoto, H. Morita, O. Takahashi, K. Sakamoto M. Usui, J. Ohtani

HOPF Bifurcations in the IEEE Second Benchmark Model for SSR Studies 149
Yasar Kucukefe, Adnan Kaypmaz

On the Frequency Stability of Power Systems and Its Statistic Characteristics 156
Y. Yu, H. Wu, H. Xin, D. Gan, Z. Han

Robust Controller Based on Thyristor-Controlled Phase Shifter 163
Sylwester Robak, Desire D. Rasolomampionona

Advanced Signal Processing Methods for Evaluation of Harmonic Distortion Caused by DFIG Wind Generator 170
Przemyslaw Janik, Zbigniew Leonowicz, Jacek Rezmer, Steffen Schostan, Detlef Schulz
Fault Ride-Through of DFIG-Based Wind Farms Connected to the Grid through VSC-Based HVDC Link 177
Christian Feltes, Holger Wrede, Friedrich Koch
Steady State Models of Low-Energy Consumption Light Sources 184
Charles Cresswell, Saša Djokic
Estimating the Probability of Cascading Outages in a Power Grid 191
Stephen T. Lee
Microelectronic Emulation for Power System Computation 197
Ira Nagel, Divitha Seetharamdoo, Laurent Fabre, R. Cherkaoui, Maher Kayal
Modeling of Aero and Structural Dynamics of Wind Turbines for Power System Studies 204
G. Ramtharan, N.D. Caliao, E. Bossanyi, N. Jenkins
Reliability Analysis for Protection Relays 210
Hideyuki Kameda, Koji Yamashita
Dynamic Stability Investigations of the Fault Ride-Through Capabilities of a Wind Farm 216
Arthur Ekwue, Oona Nanka-Bruce, Jhansi Rao, Damien McCool
Evaluating the Distance Towards 'Elf-Healing' Power Systems 223
Jacques Deuse, K. Karoui, Sébastien Grenard, M. Stubbe
A New Method for Treatment of Equality Constraints in Power System State Estimation 231
G.N. Korres
Simulating the Impact of Design-Stage Uncertainties on PV Array Energy Output Estimation 238
Bernard Bekker, Trevor Gaunt
A New Approach on Implementing Hybrid Dynamic Simulation Based on Wide Area Measurements 245
Dong Han, Jin Ma, Wenjin Sheng, Renmu He, Chengyan Yue, Jin Zhang, A. Germond
Probabilistic Load Flow with Wind Production Uncertainty Using Cumulants and Cornish Fisher Expansion 251
Julio Usaola
Comparative Evaluation of Discrete-Time Dynamic Models of TCSC 258
S.R. Joshi, A.M. Kulkarni
Template Based Engineering of Substation Automation Systems with the IEC 61850 Functional Naming Concept 265
H. Dawidczak, H. Englert
Large Scale Security Constrained Optimal Power Flow 271
K. Karoui, H. Crisciu, A. Szekut, M. Stubbe
On PV-PQ Bus Type Switching Logic in Power Flow Computation 278
Jinquan Zhao, Hsiao-Dong Chiang, Hua Li, Ping Ju
Optimal Operation of Hybrid PV/FUEL Cell System with Focus on Uncertainty Modelling 285
V.S.Pappala, I. Erlich
Power System Stabilizer by Using Supplementary Remote Signals 292
A.A. Hashmani, I. Erlich
On the Fairness of Centralised Decision-Making Strategies in Multi-TSO Power Systems 299
Yannick Phulpin, Miroslav Begovic, Marc Petit
Long Run Optimal Response to Real Time Pricing Rates 306
Chua-Liang Su, Daniel Kirschen
Dispersed Energy Resources Scheduling for the Intentional Islanding Operation of Distribution Systems 314
A. Borghetti, M. Bosetti, C.A. Nucci, M. Paolone
Long Term Dynamics of Islanded Coal Fired Station with Fluctuating Loads 322
J.E. Mayer, K.S. Smith
Fault Location for Underground Systems with Capacitive Current Compensation 328
André D. Filomena, Mariana Resener, Rodrigo H. Salim, Arturo S. Bretas
Enhanced Segmentation of Disturbance Records by Adaptive Thresholding 335
Philipp Stachel, Rastko Zivanovic, Peter Schegner
Determination of the Capacity and Performance of Battery Energy Storage Systems Used in Renewable Power Generation Schemes 342
D.L. Yao, S.S. Choi
A New Method for Pricing of Wind Power in Short-Term Power Markets 349
Mohsen Parsa Moghaddam, Ebad Talebi Ghadikolayi, Mustafa Mohamadian

Cultured Differential Computation Algorithm for Optimal Contracted Capacity of Power Consumer with Self-Owned Generating Units 356
Hong-Tzer Yang, Pai-Chun Peng, Shr-Ching Guo

Multi-End Traveling Wave Fault Location Based on Current Traveling Waves 363
Abdelsalam Elhaffar, Matti Lehtonen

A Novel Centralised Wind Farm Controller Utilising Voltage Control Capability of Wind Turbines 370
Jens Fortmann, Michael Wilch, Friedrich Koch, I. Erlich

Parallel Computation of Large Power System Network Solutions Using the Multi-Area Thévenin Equivalents (MATE) Algorithm 377
Marcelo A. Tomim, José R. Martí, Lei Wang

Hidden Failure Risk Assessment and On-Line Adaptive Relay Coordination Based on Risk Minimization 384
Boming Zhang, Ying Lv, Wenchuan Wu

Transient Stability Constrained Optimal Power Flow Using Evolutionary Programming 391
K. Tangpatiphan, A. Yokoyama

A Practical Time-Domain Fault Current Analysis Using EMTP 400
Ryuya Tanabe, Yasuyuki Tada

Strategies for the Efficient Integration of Wind Energy Into Electricity Markets 407
Daniel Waniek, Woldemar Schulz, C. Rehtanz, E. Handschin

Hysteretic Iron-Core Inductor for Transformer Inrush Current Modelling in EMTP 414
Nicola Chiesa, Hans K. Høidalen

A New Approach for Modeling Complex Power System Components in Different Simulation Tools 421
Per-Erik Bjorklund, Jiuping Pan, Chengyan Yue, Kailash Srivastava

A Grid Operation Model: Resource Demand for an Adequate Quality of Supply 427
Michael Guarisco, Catharina Friedrich, Marco Laumanns, Markus Zdrallek

Optimal Fault Analysis Formulation for Unbalanced Distribution Systems Considering Fault Resistance Estimation 433
André D. Filomena, Mariana Resener, Rodrigo H. Salim, Arturo S. Bretas

Model Quality in Large Interconnected Power Grids 440
Jay Britton, Kendall Demaree

Maximum Efficiency Point Tracking for Adjustable-Speed Small Hydro Power Plant 447
A. Borghetti, M. Di Silvestro, G. Naldi, M. Paolone, M. Alberti

Analysis of the Use of PTDF in the UCTE Transmission Grid 454
Christof Duthaler, Marc Emery, Goran Andersson, Martin Kurzidem

Total Transfer Capability Computation and Improvement in Interconnected Electric Power Systems 460
F.M. Echavarren, E. Lobato, L. Rouco

Investigation of Voltage Disturbances in a Typical Pharmaceutical Customer Facility 467
Sarat Chandra Vegunta, J.V. Milanovic

Short-Term Wind Power and Speed Forecasting Using Simultaneous Perturbation Stochastic Approximation Algorithm 474
Ying-Yi Hong, Huei-Lin Chang, Ching-Sheng Chiou

A Dynamic Power Flow Controller for Power System Stability Improvement and Loss Reduction 480
Nicklas Johansson, Lennart Ängquist, Hans-Peter Nee, Bertil Berggren

Identification of Coherent Generators Using PCA and Cluster Analysis 487
Abdulaziz M. Almutairi, Soon Kiat Yee, J.V.Milanovic

Using Frequency-Matched Numerical Integration Methods for the Simulation of Dynamic Phasor Models in Power Systems 493
Turhan Demiray, Goran Andersson

Optimized Fault Location Formulation for Unbalanced Distribution Feeders Considering Load Variation 500
Mariana Resener, Rodrigo H. Salim, André D. Filomena, Arturo S. Bretas

Integrated Pool/Bilateral/Reserve Electricity Market Operation Under Pay-as-Bid Pricing 507
Fabio Stacke, Pablo Cuervo

Is There a Need for Benchmarking Power System Stability Simulation Tools? 514
K.K. Kaberere, A.I. Petroianu, K.A. Folly

Evaluation of Transmission Line Fault-Locating Techniques Using Variance-Based Sensitivity Measures 521
Rastko Zivanovic

A Backstepping Control to Enhance the Performance of Transformer-Less Dynamic Voltage Restorers 527
Guo-Jie Li, T.T. Lie, Jia-Wei Hu

Using Cooperative Game Theory in Energy Supply Planning Tasks 533
V. Neimane, A. Sauhats, J. Inde, G. Vempers, G. Bockarjova
Impact of a SSSC-Based Power Flow Controller on SSR 541
R. Pillay Carpanen, B.S. Rigby
Self-Adaptive and Robust Method for Distribution Network Load and State Estimation 549
Jianzhong Wu, N. Jenkins
On-line Stable State Determination in Decentralized Power Grid Management 555
E. Handschin, C. Rehtanz, H.F. Wedde, O. Krause, S. Lehnhoff
Identifying Sources of Damping Issues in the Icelandic Power System 563
Douglas Wilson, Karine Hay, Patrick McNabb, J. Bialek, Zbigniew Lubosny, Nils Gustavsson, Ragnar Gudmansson
Condition Assessment of Power System Equipment the Impact of Ageing and Deterioration 571
Athanasios Krontiris, Gerd Balzer
Failure Distribution of Repairable Units Approximation Through Markov Chains 576
Athanasios Krontiris, Gerd Balzer
A Power Market Model for studying the Impact of Wind Power on Spot Prices 582
Thomas Trotscher, Magnus Korpas
Dynamic Behaviour of Single-Phase Induction Generators During Disconnection and Reconnection to the Grid 590
J.Ramachandran, G.A. Putrus
An Efficient Voltage and Reactive Power Control Simulation Using Long Term Dynamics Simulation 597
Masaki Nagata, Toshio Inoue
Opportunities for Managing Consumptions and the Interaction with Energy Networks 604
Diana Moneta, Giuseppe Mauri, Paolo Gramatica
Modelling of Network-Component-Technology Changes in Reliability-Centered Maintenance Planning 611
Gerhard Theil
Simplified Calculation of Voltage and Loss Sensitivity Factors in Distribution Networks 618
Qiong Zhou, J. Bialek
Analysis of Phase Angle Differences Application to Improve the SPS Complex Performance 624
Ekaterina Kosterina, Natalia Bondareva, R. Cherkaoui, A. Germond, Andrey Grobovoy
A Method for Balancing Supply and Demand in an Isolated System Consisting of Voltage Control Type QCCS in Friends 632
Mitsushiro Ako, Ryoichi Hara, Hiroyuki Kita, Jun Hasegawa
Monitoring and Estimation of Interarea Power Oscillation Mode Based on Application of Campuswams 640
Changsong Li, Kenichiro Higuma, Masayuki Watanabe, Yasunori Mitani
An Application of the Energy and Transmission Price Conjecture in an Oligopolistic Power Market 647
Martin Kurzidem, Goran Andersson
Decomposed Electricity and Natural Gas Optimal Power Flow 654
Michele Arnold, Goran Andersson
Identification of Circular Flows in Transmission Networks Using the Electricity Tracing Methodology 661
Stanislaw Ziemianek, J. Bialek
Technological Breakthroughs in System Integrity Protection Schemes 666
Vahid Madani, Damir Novosel, Roger King
Development of a Simulation Model for Secondary Control Performance Assessment with Significant Wind Power in a Market Environment 674
Bart C. Ummels, Madeleine Gibescu, Wil Kling, Gerardus C. Paap
Decentralized Unit Commitment and Dispatch for the Distribution Systems Using Intelligent Agents Approach 682
Elvira Kaegi , R. Cherkaoui, A. Germond
Fault Section Estimation in Electric Power Systems Using an Artificial Immune System Algorithm 690
Fábio Bertequini leão, Rodrigo A.F. Pereira, José R.S. Mantovani
Fault Location Algorithm for Primary Distribution Feeders Based on Voltage SAGS 697
Rodrigo A.F. Pereira, Mladen Kezunovic, José R.S. Mantovani
Quantitative Risk Assessment in Distribution System Maintenance Management Using Bow-Tie Modeling 704
Dag Eirik Nordgård
Fundamental Analysis of the Synchronous Generator – TCSC System Using the ICAD Framework 711
Carlos Ugalde, Enrique Acha, Eduardo Licéaga-Castro, Luigi Vanfretti

A Competitive Market Simulation Method for the Investigation of the Price Development in the European Market for Electrical Energy 718
T. Mirbach, B. Blaesig, P. Baltes, H-J. Haubrich

A Comparative Study of Two Forward Dynamic Programming Techniques for Solving Local Thermal Unit Commitment Problems 725
Maria Gabriela Martinez, Claudia Sagastizabal

A Stochastic Approach for Modeling Residential Interruption Costs 733
Karin Alvehag, Lennart Soder

Identification of Cascaded Generator Over-Excitation Tripping Events 740
Juan Li, Koji Yamashita, Chen-Ching Liu, Pei Zhang, Michael Hofmann

State-Space Transmission Line Model with Frequency-Dependency and Long-Line Effects Based on a Singular Approximation and Balancing-Free Square-Root Approach 748
Norberto Garcia, Enrique Acha

Coordinated Transmission and Generation Planning to Increase the Electricity Market Efficiency 755
C. Genesi, P. Marannino, I. Siviero, F. Zanellini, E.M. Carlini, P.P. Pericolo

Power System Modeling for a Fully Transparent Distribution Management System 762
Monika Ruh, Goran Andersson, Andreas Borer

An Accurate and Efficient Current Injection Method for the Determination of the System State During Line Outages 771
Gabriela Hug-Glanzmann, Goran Andersson

A Contribution to the Formulation of Production Cost Models of Liberalised Electricity Markets 778
David Martinez, Sven Filter, Bernhard Graeber

VOLUME 2

Reliability of the Protection System and Its Impact on the Reliability of Supply 788
Oddbjørn Gjerde, Gerd H. Kjølle, Jørn Heggset

Comparison of Practical Fault Ride-through Capability for MV-Connected DG-units 795
E. Coster, Anton Ishchenko, J. Myrzik, Wil Kling

Wide Area Voltage Regulation & Protection 801
Sandro Corsi

Including Thermal Unit Start-Up Costs in a Long-Term Hydro-Thermal Scheduling Model 808
Geir Warland, Arne Haugstad, Einar Ståle Huse

Integration of Distributed Generation in Distribution Networks: Regulatory Challenges 815
Pablo Frías, T. Gómez, Juan Rivier

Responsive Demand to Increase the Value of Wind Power 822
Vandad Hamidi, Furong Li

Impact of Voltage and Reactive Power Control Devices on the Reliability Assessment of Radial Distribution Networks 831
A. Coelho, A.B. Rodrigues, M.G. Da Silva, R.B. Prada

A Synchrophasor Measurement Algorithm Suitable for Dynamic Applications 836
Jacques Warichet, Tevfik Sezi, Jean-Claude Maun

Investigation of a Local Indicator of Voltage Emergency in the Hellenic Interconnected System 843
C. Vournas, N. Sakellaridis, G. Christoforidis, J. Kabouris, T. Van Cutsem

Assessment of the Need for Transmission in the Future All-Island System in Ireland 850
D.P. Nedic, K.R. Bell

Optimal Bidding Strategy for Mixed-Portfolio Producers in a Dual Imbalance Pricing System 858
Madeleine Gibescu, Erik W. van Zwet, Wil Kling

Efficient Secure AC OPF for Distributed Generation Uptake Maximisation 865
C.J. Dent, L.F. Ochoa, G.P. Harrison, J. Bialek

Experimetal Setup of a System for Damping Torsional Vibrations Caused by SSO 872
Thomas Zöller, T. Leibfried, Amir M. Miri

Harmonic Interactions and Resonance Problems in Large Scale LV Networks 879
M.C. Benhabib, P.R. Wilczek, J. Myrzik, J.L. Duarte

A Novel Phasor Estimation Algorithm Based on Taylor Expansion and Phasorlet 887
R. Mai, Z. He, B. Kirby, A. Edwards, Z. Bo, L. Fu

Prospects of an Improved Systemprotection Scheme Against Voltage Instability in the RTE System 894
F. Capitanescu, B. Otomega, H. Lefebvre, V. Sermanson, T. Van Cutsem

Topological Properties of Radial Networks with Application to Computer Aided Distribution Reconfiguration 902
Alena Kosfalova, Pedro M.S. Carvalho
Automated Analysis of Digital Fault Recorder Data in Power Generating Plants 909
Miguel Moreto, Jacqueline G. Rolim
Application of Metamodeling Techniques to Power Transfer Capability Analysis of Manitoba-Ontario Electrical Interconnections 916
Wenjie Zhang, Myrna Cavers, Songqing Shan, G. Gary Wang
Optimal Placement of Phasor Measurements for Enhanced State Estimation: A Case Study 923
Roozbeh Emami, Ali Abur, Floyd Galvan
A New Out-of-Step Protection Scheme Via Gpssynchronized Data 929
A.P. Meliopoulos, Vangelis Farantatos, George Cokkinides, Salman Mohagheghi, George Stefopoulos
Multi Evaluation Method of Distribution Network with Distributed Generators 936
Yasuhiro Hayashi, Shoji Kawasaki, Junya Matsuki, Shigekazu Sakai, Yoshiaki Fuwa, Kenjiro Mori
Determination of Optimal Control Parameters of Line Drop Compensator in Distribution Network with Distributed Generators 943
Yasuhiro Hayashi, Junya Matsuki, Kenjiro Mori, Yuji Hanai, Yoshiaki Fuwa
Development and Evaluation of Microgrids Islanded Operation Method with Demand Side Control 950
Seiji Tagami, Yuta Sasaki, Tatsuya Tsukada , Tsutomu Tokumoto, Junichi Ichimura, Yuji Watanabe, Hiroshi Asano, Shigeru Bando
An Innovative Modular Multilevel Converter Topology and Modulation Control Scheme for the First VSC-HVDC Project in China 957
Guanjun Ding, Ming Ding, Guangfu Tang
A Case Study of Application Service in Grid-Based Future Control Centers 965
H.F. Zhou, F.F. Wu
Calculation of Residential Interruption Costs Caused by Adverse Weather Using Monte Carlo Methods 972
Elin Brostrom, Karin Alvehag, Lennart Soder
Mid Size Energy Storages in Distribution Networks – Optimal Sizing and Management 979
Dirk Westermann, Steffen Nicolai, Peter Bretschneider, Steffen Schlegel
Combined Heat and Power Economic Dispatch by Augmented Lagrange Hopfield Network 986
Vo Ngoc Dieu, Weerakorn Ongsakul
Possibilities to Improve Reliability of Distribution Network by Intended Island Operation 993
Jussi Antikainen, Sami Repo, Pekka Verho, Pertti Järventausta
Fundamental Frequency Estimation Using the Difference Between the Magnitude Gains of Cosine and Sine Filters 1000
Soon-Ryul Nam, Joon-Ho Choi, Hae-Kon Nam, Sang-Hee Kang, Min Hur
A New Approach for an Earth Fault Distance Localisation Algorithm in Compensated Networks 1005
Georg Achleitner, Clemens Obkircher, Lothar Fickert, Manfred Sakulin
Switching Overvoltages in a 400-KV Cable System 1012
Mustafa Kizilcay
State Estimation of Radial Distribution Networks: A Novel Procedure for Measurement Siting 1018
Fabio Bignucolo, Roberto Caldon
A Multivariate Descriptor for Change Point Detection in Nonlinear Time Series 1025
P.P. Balestrassi, A.P. Paiva, A.C. Souza, J.B. Turrioni
Assessment of Decentralized Model Predictive Control Techniques for Power Networks 1032
Armand Damoiseaux, Andrej Jokic, Mircea Lazar, Alessandro Alessio, Paul van den Bosch, Ian Hiskens, Alberto Bemporad
State Space Estimation of Electric Arc Parameters Based on Maximum Likelihood and Kalman Filters 1041
Otto W. Ganvini Asencios, Antonio C.S. Lima
Dynamic Model Validation of the Icelandic Power System Using Wams-Based Measurement of Oscillatory Stability 1046
Patrick McNabb, Douglas Wilson, Karine Hay, J. Bialek
Real-Time Control of Power Systems Using Nodal Prices 1053
Andrej Jokic, Mircea Lazar, Paul van den Bosch
Bilateral Contracts Management in Hydrothermal Generation with Available Energy Risk 1060
Juan Carlos Mateus, Pablo Cuervo, Denis Perez Jannuzzi
Computation Dimensioning of a Sodium-sulphur Battery As a Backup of Large Wind Farm 1067
Arefeh Danesh Shakib, Ervin Spahic, Gerd Balzer
Optimal Investments in Generation Capacity Under Uncertainty 1073
Raquel García-Bertrand, Daniel Kirschen, Antonio J. Conejo

Dynamical Simulation of a Vacuum Switch with PSCAD 1080
T. Wenzel, T. Leibfried, D. Retzmann
Wavelets and Prony Method for Disturbance Detection in Wind Farms 1085
Tadeusz Lobos, Jacek Rezmer, Przemyslaw Janik, Hortensia Amarís, Carlos Álvarez, Diana Flórez
Probabilistic Evaluation of Reserve Requirements of Generating Systems with Renewable Power Sources: The Portuguese and Spanish Cases 1092
Manuel Matos, J. Lopes, Mauro Rosa, Ricardo Ferreira, Armando Leite da Silva, Warlley Sales, Leonidas Resende, Luiz Manso, Pedro Cabral, Marco Ferreira, Nuno Martins, Carlos Artaiz, Fernando Soto, Rubén López
Evaluating Investment Deferral by Incorporating Distributed Generation in Distribution Network Planning 1099
D. T-C. Wang, L.F. Ochoa, G.P. Harrison, C.J. Dent, A.R Wallace
Application of Evolutionary Multi Objective Optimization Algorithm to Optimal VAR Expansion and ATC Enhancement Problems 1107
Mehdi Eghbal, Naoto Yorino, Yoshifumi Zoka, E. El-Araby
Restoring Solution for Unsolvable Power Flow: An Approach Using the Augmented Lagrangian Algorithm 1114
Luciano V. Barboza, Juliano B. Francisco, Mário C. Zambaldi
A Holistic System Modelling Approach for Marine Power Systems 1121
J.D. Schuddebeurs, P.J. Norman, S.J. Galloway, C.D. Booth, G.M. Burt, J.R. McDonald, J. Apsley
A Scheme for Incentivizing Investments and Cost Sharing in Transmission Enhancements 1129
Javier Contreras, George Gross, Isabel Ruiz–Gómez, José M. Arroyo
An Equilibrium Model for Medium-Term Power Planning Considering Risk Averse Generation Companies 1139
Matteo Tesser, Narcis Nabona
Modelling and Analysis of the Enhanced TAPP Scheme for Distribution Networks 1147
Maciej Fila, Jonathan Hiscock, Gareth A. Taylor, Malcolm R. Irving, Peter Lang
Comparison of Measurement Placement Algorithms for State Estimation Based on Theoretic and Eigenvector Centrality Procedures 1154
Michael Hurtgen, Pavel Praks, Petr Zajac, Jean-Claude Maun
Advantages of Power System State Estimation Using Phasor Measurement Units 1161
Michael Hurtgen, Jean-Claude Maun
Long-Term Hydrothermal Scheduling Via Meta-Heuristics 1168
Alexandre F. Amendola, Alexandre P. Alves da Silva
Effect of Ancillary Service Market Design on Control Performance of Power Systems 1174
Jyotirmoy Roy, Anjan Bose, Jim Price
Operation and Control of NAS Batteries on a University Campus 1180
Kenji Iba, Kouji Tanaka, Kuniaki Yabe
Optimal Operational Strategies for Multi-Generation Systems 1188
Gianfranco Chicco, Pierluigi Mancarella
A Unified Approach for Bad Data and Topology Error Identification in Generalized State Estimation 1195
Elizete Maria Lourenco, Leandro Batista de Souza, Antonio Simões Costa
Pricing Electricity Flexible-Forward Contracts Considering Duties and Tributes 1202
Leticia Takahashi, Laura Keiko Gunn, Paulo B. Correia
Influence of the Emissions Trading Scheme on Market Clearing 1208
Ivana Kockar, Antonio J. Conejo, J.R. McDonald
Structural Vulnerability of Energy Distribution Systems; Incorporating Infrastructural Dependencies 1215
Arild Helseth, Arne T. Holen
Multi-Agent System for Short and Long-Term Power Market Simulations 1222
Jianhui Wang, Audun Botterud, Guenter Conzelmann, Vladimir S. Koritarov
Solving the Hydrothermal Unit Commitment Problem Via Lagrangian Relaxation and Augmented Lagrangian 1229
Rafael Nilson Rodrigues, Edson Luiz da Silva, Erlon Cristian Finardi
Multi-Scale Simulation of Multi-Machine Power Systems 1236
Feng Gao, Kai Strunz
Solving the Short Term Operating Planning Problem of Hydrothermal Systems by Using the Progressive Hedging Method 1243
Marcelo L.L. dos Santos, Edson Luiz da Silva, Erlon Cristian Finardi, Raphael E. C. Goncalves
Identification of Interacting Power System Dynamic Phenomena Via Continuation of Invariant Subspaces 1250
Cheng Luo, Venkataramana Ajjarapu
Measuring Reliability (OR RISK) Coherently 1257
Felix F. Wu, Hui Zhou, Yunhe Hou

Probability Distribution Functions of Generator Profit from Spot Market 1261
Yunhe Hou, Felix F. Wu
Linearisation of Non-Linear Loads by Phase Dependent Frequency Coupling Admittance Matrices 1267
Lance P. Frater, Alan R. Wood, Neville R. Watson
An Agent Technology Based Method for Power System Topology Verification with Use of Radial Basis Function Networks 1274
Robert Lukomski, Kazimierz Wilkosz
Assessing Load Forecast Uncertainty Using Extreme Value Theory 1281
Chinglai Hor, Simon Watson, David Infield
Frequency Scanning Techniques for Analysis of the Effect of Device Dependent Subsynchronous Oscillations on Subsynchronous Damping 1288
Tuomas Rauhala, Pertti Järventausta
Calculation of Grid Losses with the Aid of Stochastic Modeling of Wind Turbines and Loads 1295
P. Zonneveld, G. Papaefthymiou, E. Coster, L. van der Sluis
A Hybrid Approach for Modeling Electricity Price Series in the Medium Term 1302
Javier García-González, Julián Barquín, Pablo Dueñas
Evaluating the Capacity Value of Wind Generation in Systems with Hydro Generation 1308
Manuel J Castro, Anser A Shakoor, Danny Pudjianto, Goran Strbac
Long Term Optimization for Risk Oriented Asset Management 1316
E. Handschin, Ingo Jürgens, Claus Neumann, C. Rehtanz
Effects of Rogowski Coil and Covered-Conductor Parameters on the Performance of PD Measurements in Overhead Distribution Networks 1323
G. Murtaza Hashmi, Matti Lehtonen
A GPS Synchronized Current Differential Protection of Transmission Lines 1330
Sanjay Dambhare, S.A. Soman, M.C. Chandorkar
Islanding Detection and Smooth Shift to Independent Operation by Use of SMES 1336
Yasuyuki Shirai, Tanzo Nitta, Katsuhiko Shibata
A Stochastic Programming Approach to Quantifying Effects of Contingencies on Locational Marginal Prices 1342
Andrija T. Saric, Frederic H. Murphy, Allen L. Soyster, Aleksandar M. Stankovic
Long Term Nodal Pricing and Transmission Costing 1349
Nicolas Omont, Arnaud Renaud, Patrick Sandrin
Maximizing Reliable Service by Coordinated Islanding and Load Management in Distribution Systems Under Stress 1356
Marija Prica, Marija Ilic
Optimal Planning of Active Networks 1362
G. Celli, F. Pilo, G. Pisano, G.G. Soma
Reduction of Wind Farm Models Using the Coherency Approach 1370
Krzysztof Rudion
High-Speed Distance Protection Using Awavelet-Based Filtering Algorithm 1377
Kleber M. Silva, Benemar A. Souza, Washington L.A. Neves
Reliability of Aged Distribution Networks: Can the Automation Be the Solution in the Long Term? 1384
E. Ghiani, F. Pilo, S. Mocci
Improved Calculation of Geomagnetically Induced Currents in Power Networks in Low-Latitude Regions 1391
E.H. Bernhardi, T.A. Tjimbandi, P.J. Cilliers, C.T. Gaunt
Main Advantages and Limitations of the Interline Power Flow Controller: A Steady-State Analysis 1396
R.L. Vasquez-Arnez, F.A. Moreira
A Mixed-Integer Programming Model for Long Term Generation Expansion Planning of the Brazilian System 1402
M.L. Lisboa, L.G. Marzano, C.H. Sabóia, M.E. Maceira, A.C. Melo
The Influence of Operational Marginal Cost Simulation Methods on Electricity Contract Portfolio Strategies in Brazil 1409
F.A. Oliveira, A.R. Queiroz, J.W. Marangon Lima, P.P. Balestrassi
Ten Years of Application of Stochastic Dual Dynamic Programming in Official and Agent Studies in Brazil – Description of the NEWAVE Program 1416
M.E. Maceira, V.S. Duarte, D.D. Penna, L.A. Moraes, A.C. Melo
Reliability-Oriented Distribution System Expansion and DG Deployment Using a Dynamic Programming Based Method 1423
Joydeep Mitra, Mallikarjuna R. Vallem

Model of a VSC Transmission Scheme for Wind Farm Connection for Incorporation in Power System Stability Studies 1430
Ralph L. Hendriks, Ronald Volzke, Gerardus C. Paap, Wil Kling
Experimentation and Simulation of the Motion and UHF Signatures of Free Metallic Particle Contamination Within G.I.S. 1436
Richard Marchant, Tim Coombs
The Analysis of Information Impacts in Coordinating Defense Against Malicious Attacks for Interconnected Power Systems 1443
Ettore Bompard, George Gross, Roberto Napoli, Fei Xue
The Edge-Set Encoding in Evolutionary Algorithms for Network Reconfiguration Problems in Power Distribution Systems 1450
Francisco Rivas-Dávalos, Malcolm R. Irving
Use of System Tariffs for Distributed Generators 1457
A. González, Tomás Gómez San Román
Advanced Special Protection Modeling for On-Line Applications 1464
Fred Howell, Lei Wang, Kip Morison
Active and Reactive Observability Restoration Subproblems in Generalized Power System State Estimation 1470
Madson C. de Almeida, Ariovaldo V. Garcia, Eduardo N. Asada
Comparison of Three Linearization Methods 1478
Jonas Persson, Lennart Soder
Multi-Period Bidding Behavior of Power Producers in an Electricity Spot Market 1485
E.V. Beck, R. Cherkaoui, A. Germond
Reliability Analysis of Electric Power Systems Using an Object-Oriented Hybrid Modeling Approach 1492
Markus Schlapfer, Tom Kessler, Wolfgang Kroger
Definition of Single Price Areas Within a Regional Electricity System 1499
Luis Olmos, Ignacio J. Pérez-Arriaga
Electricity Market Integration in Europe 1505
Leonardo Meeus, Ronnie Belmans
Integration of the Central West European Electricity Market: A Discussion in the Light of the Third European Legislative Package 1510
Hanneke de Jong, Paul Giesbertz
First Price and Second Price Auction Modelling for Energy Contracts in Latin American Electricity Markets 1517
Rodrigo Moreno, Hugh Rudnick, Luiz Barroso
Survey Paper 1 : Integrated AC/DC Transmission Systems – Benefits of Power Electronics for Security and Sustainability of Power Supply 1525
Jochen Kreusel, D. Retzmann
Survey Paper 2 - Part 1: Integrated AC/DC Transmission Systems – Benefits of Power Electronics for Security and Sustainability of Power Supply 1527
Dusan Povh, D. Retzmann
Survey Paper 2 - Part 2: Integrated AC/DC Transmission Systems – Benefits of Power Electronics for Security and Sustainability of Power Supply 1537
Jochen Kreusel
Operation and Control Strategies for Networks with a High Degree of Renewable Generation 1543
Zbigniew A. Styczynski, Krzysztof Rudion, Peter B. Eriksen, Antje G. Orths, Thomas Schäfer, Walter Sattinger, L. Rouco, Arun Phadke
