5th National Conference on Computational Mechanics 2009

(MekIT 2009)

Trondheim, Norway
26-27 May 2009

Editors:

Bjorn Skallerud **Helge I. Andersson**

ISBN: 978-1-61738-864-4

Printed from e-media with permission by:

Curran Associates, Inc.

Table of contents MekIT09

Esau, I (**invited**)
Large-eddy simulations of geophysical turbulent flows with applications to planetary boundary layer research **7**

Holmås, T (**invited**) and Hansen M O
Design of floating wind turbines **37**

Irgens, F (**invited**)
Non-linear continuum mechanics and constitutive modelling **47**

Ristinmaa, M (**invited**) and Harryson M
Texture evolution in large strain plasticity. **77**

Barri, M, Andersson H I, El Khoury G K and Pettersen B
Massive separation in one-sided expansion channel **89**

Bastani, A F and Aukrust, T
FEM simulations of temperature evolution in aluminum extrusion: Identification of numerical problems in Altair HyperXtrude. **103**

Bihs, H and Olsen N R
Three dimensional numerical modeling of complex surface flow over a backward facing step **111**

Bjøntegaard, T and Rønquist E
Accurate interface-tracking for arbitrary Lagrangian-Eulerian schemes **121**

Dahl, S K, Vierendeels, J, Degroote, J, Annerel, S, Skallerud, B and Hellevik L R
Implicit interaction of two rigid mitral leaflets in a partitioned fluid-structure approach **135**

Elboth, T, Wasberg, C E, Helgeland, A, Andreassen, Ø, and Reif, B A P
Flow noise simulation around a cylinder **151**

Fossum, H, and Reif, B A P
Predicting particle deposition in the human airways with RANS turbulence modeling **169**

Grue, J
Time-integration of nonlinear internal waves over bathymetry **187**

Haga, J B, Langtangen, H P, Nielsen, B F and Osnes, H
On the performance of an algebraic multigrid preconditioner for the pressure equation with highly discontinuous media. **191**

Hoang, N-H, Porcaro, R, Langseth, M and Hanssen, A-G
Self-piercing riveting of two aluminium alloy sheets using an aluminium rivet **205**

Holmedal, L E and Myrhaug, D
Wave-induced steady streaming and net sediment transport in ocean bottom boundary layers **215**

Jøsendal, H B and Thorvaldsen, T
A study of ballistic protection mechanisms in composite shields **229**

Kvarving, A M, Bjøntegaard, T and Rønquist, E
Fast tensor-product solvers for partially deformed three-dimensional domains **249**

Larsson, M and Muller, B
Numerical simulation of fluid-structure interaction in human phonation **261**

Leinan, P R, Hellevik, L R, Prot, V, Kiserud, T and Skallerud, B
On modelling of the umbilical vein **281**

Narasimhamurthy, V D and Andersson, H I
Turbulent flow simulation in a rotating rough channel **297**

Nygård, F and Andersson, H I
Numerical simulation of swirling flow **309**

Ong, M C, Utnes, T, Holmedal, L E, Myrhaug, D and Pettersen, B
Numerical simulation of flow around a marine pipeline close to a flat seabed at high Reynolds numbers **323**

Pacio, J and Dorao, C A
Application of high order methods for the simulation of heat exchanger models **341**

Panjawi, B, Ertesvåg, I S, Gruber, A and Rian, K E
Large eddy simulation of backward facing step flow **353**

Pettersen, S H, Aamodt, A, Foss, O A and Skallerud, B
Subject specific finite element analysis of callus distraction – a preliminary study **371**

Pierre, B and Gudmundsson, J S
Modelling of pressure wave propagation in pipelines: steady-state and transient friction **385**

Ruspini, L C, Dorao, C A and Fernandino, M
Solving thermo-hydraulic models using a high order method **399**

Selim, K and Logg, A
Simulating heart valve dynamics in FEniCS. **411**

Skeie, G and Rusten, T
What is the future shell analysis?. **421**

Tutkun, M, Reif, B A P, Johansson, P B V and Werne, J
Proper orthogonal decomposition of velocity and scalar fields in shear generated turbulence **433**

Valen-Sendstad, K, Mortensen, M, Langtangen, H P, Reif, B A P and Mardal, K-A
Implementing a k-ε turbulence model in the FEniCS finite element programming environment **445**

Vartdal, M and Reif, B A P
Numerical modeling of aerosol dispersion inside a rotating aerosol chamber **459**

Verschaeve, J C G
A new immersed boundary condition for the lattice Boltzmann method **471**

Vik, T and Reif, B A P
Large eddy simulations of the evaporation from a liquid pool beneath a turbulent air flow **483**

Wilbers, I M, Langtangen, H P and Ødegård, Å
Using Python to speed up numerical python programs **495**

Wingstedt, E and Reif, B A P
Unsteady RANS modelling of pollutant dispersion in an idealized urban area **513**

Zhao, L H, Andersson, H I, Gillissen, J J J and Boersma, B J
Simulation of fibre suspension flow by an Eulerian-Lagrangian approach **527**
