Contents

Preface

Editorial Board

Railway Research: Vehicle Dynamics, Infrastructure Response and their Interaction
Special session organised by J. Pombo, L. Baeza and Z. Dimitrovová

1 Influence of Pantograph Components on the Contact Quality of the Overhead System for High Speed Trains 1
J. Pombo, J. Ambrósio and M. Pereira

2 Design of Pantograph-Catenary Systems by Simulation 23
A. Bobillot, J.-P. Massat and J.-P. Mentel

3 An Efficient Method for the Mechanical Study of Pantograph-Catenary Interaction 41
J. Benet

4 Passive Safety of Railway Interiors using a Multibody Approach 60
M. Carvalho and J. Ambrosio

5 Nonlinear Dynamics of a Vehicle with a Semi-Active Suspension 75
A. Mitura and J. Warminski

6 Formation of Railway Transition Curves based on Advanced Dynamic Vehicle Models 87
K. Zboinski and P. Woznica

7 Simulation of Degraded Wheel-Rail Adhesion Conditions on a Scaled Roller Rig for Railway Bogies: The Effect of Wheel-Roller Contact on Control Performance 107
M. Malvezzi, E. Meli and L. Pugi

8 Application of the Moving Shape Functions Method to Curved Railroad Tracks 124
R. Chamorro and J.L. Escalona

9 Finite Element Analysis of Contact Problems with Complicated Properties 144
M.I. Chebakov, V.I. Kolesnikov, E.M. Kolosova and A.V. Nasedkin

10 Vertical Dynamic Studies of an Indian Railway Vehicle Moving on a Straight Track 161
H. Kumar and C. Sujatha

11 Dynamic Response of a Coupled Vehicle-Track System to Real Longitudinal Rail Profiles 178
C. Vale and R. Calçada

12 The Influence of Track Modelling Options on the Simulation of Train-Track Interaction 196
S. Alfi, S. Bruni and E. Di Gialleonardo

13 The Impact of Structural Deformations of Wheelset and Rail on Wheel-Rail Contact 209
I. Kaiser

14 Development and Implementation of a Finite Element based Wheel-Rail Contact Model for Multibody Applications 229
S. Magheri, M. Malvezzi, E. Meli and S. Papini

15 A Quasistatic Approach for the Thermoelastic Rolling Contact Problem with Graded Materials 245
A. Chudzikiewicz and A. Myśliński

16 Tribological Transformations of Surface: A Thermo-Mechanical Modelling 260
G. Antoni, T. Désoyer and F. Lebon

17 Improving the Speed and Accuracy of the Frictional Rolling Contact Model "CONTACT" 274
E.A.H. Vollebregt

18 Dynamic Analysis of High Speed Railway Traffic Loads on Ballast and Slab Tracks 289
J.M. Goicolea, K. Nguyen, F. Galbadón and M. Bermejo

19 A Settlement Model for Ballast at Transition Zones 306
J.N. Varandas, P. Hölscher and M.A.G. Silva

20 Modeling and Analysis of Vehicle-Track Dynamic Behavior at the Connection between Floating Slab and Non-Floating Slab Track 324
L. Wu, Z.F. Wen, X.B. Xiao, W. Li and X.S. Jin

21 Reduced Models for Vibration Analysis of Sleepers in High Speed Rail Long Tracks 336
E. Leon, D.C. Rizos and J.M. Caicedo

22 High Speed Train-Track-Bridge Dynamic Interaction in Transition Zones 349
A. Roda, J. Martínez, P. Vila and J. Carballeira

23 Modeling the Dynamic Response of a Railway Bridge and Vehicle System 363
F.L.M. Beghetto and J.E. Abdalla Filho

24 Train Bridge Interaction: Problems and Models 383
G. Diana, S. Bruni, A. Collina, R. Corradi and S. Alfi

25 The Validity of Simplified Dynamic Analysis of the New Årsta Bridge Response to Moving Trains 403
I. González

26 Lateral Dynamic Response of Railway Vehicles on Bridges: Numerical Model and Applications 415
P. Antolín, J.M. Goicolea, M.Á. Astiz and A. Alonso

27 The Effect of Track Defects on the Dynamics of Wagons under Brake-Traction Torque 430
Z. Zhang and M. Dhanasekar

28 Analysis of the Dynamic Forces in the Crossing of Railway Turnouts 442
V.L. Markine, M.J.M.M. Steenbergen and I. Shevtsov

29 Detection of Fatigue Crack Initiation at Welded Joints of Railway Steel Truss Bridges under the Dynamic Action of Moving Trains 459
W. Qu, Z. He, J. Liu and Y.-L. Pi

30 A Dynamic Finite Element Model for a Wheel Passing a Crossing Nose 472
M. Pletz, W. Daves and H. Ossberger

31 Modeling Vehicle and Rail Vibrations caused by High Speed Trains using a Coupled Finite Element Methodology 486
L.A. Matthews, J.C. Caicedo and D.C. Rizos

32 An Explicit Domain Coupling Procedure for Vibration Analysis of High Speed Rail Systems 495
J. Mulliken, D.C. Rizos and J.M. Caicedo

33 Implementation of a Three-Dimensional Time Domain Formulation for the Prediction of Vehicle Induced Vibrations 504
N. Correia dos Santos, J. Barbosa, R. Calçada, A. Azevedo and R. Delgado

34 Induced Vibrations because of High-Speed Train Passage on Ballast and Non-Ballast Tracks 517
P. Galvín, A. Romero and J. Domínguez

35 Potential of Inter-vehicle Lateral Damper for Improving Riding Comfort of High-speed Train 542
K. Tanifuji and T. Toshimitsu

36 Critical Velocity obtained using Simplified Models of the Railway Track: Viability and Applicability 556
Z. Dimitrovová and A.F.S. Rodrigues

37 Generalized Beam Theory Dynamic Analysis of a Two-Track High-Speed Railway Bridge Deck 577
R. Bebiano, N. Silvestre and D. Camotim

38 Interaction of a Beam and Supporting Continuum under a Moving Periodic Load 597
J. Náprstek and C. Fischer

39 The Free Vibration Response of Elastically Supported Beams traversed by Moving Loads and its Application to Railway Bridges 617
M.D. Martínez-Rodrigo, E. Moliner and J. Nasarre

40 Effects of the Variability on the Dynamic Certification Criteria: Application to Contact Variability 637
C. Funfschilling, G. Perrin, T.M. Nguyen and P.E. Gautier

41 A Novel Approach to Extract Reference Trajectories from Measured Data Sets of Urban Light-Rail Systems 648
M. Tiefenbacher and M. Kozek

42 Prediction of Forced Self-Sustained Oscillations using Anticipating Synchronization 664
T. Pyragienė

43 Evaluation of the Dynamic Behaviour of Very High-Speed Railway Tracks and their Vibration 673
P.A. Ferreira and A. López-Pita

Damage Identification Methods
Special session organised by J.V. Araujo dos Santos and H.M.R. Lopes

44 An Advanced Genetic Algorithm for Structural Damage Detection 694
J.D. Villalba and J.E. Laier

45 Multiple Crack Identification in a Beam using a Genetic Algorithm 704
K. Kumar, A. Dutta and S.K. Deb

46 Parameter Identification using Discrete Wavelet Transform 723
T. Ohkami and S. Koyama

47 Vibration-based Damage Identification in Sandwich Beams using Artificial Neural Networks 737
M. Sahin

48 Damage Localization based on Modal Parameters using the Finite Element Method and Neural Networks 754
A. Garcia-Gonzalez, A. Gonzalez-Herrera and A. Garcia-Cerezo

49 A Comparison of Neural Networks and Model Updating Methods for Damage Localization 772
A. Garcia-Gonzalez, A. Gonzalez-Herrera, J.F. Velasco, A. Garcia-Cerezo and J.M. Diaz Santiago

50 Damage Evaluation using Reflection Intensity from Damage in Metallic and Carbon Fibre Reinforced Polymer Laminated Structures 792
N. Hu, H. Fukunaga, Y. Liu and Y. Li

51 Application of the Cross-Entropy Method to Estimate Stiffness Distribution in Plate-Type Structures 812
B.J. Walsh, A. González and D. Cantero

52 A Numerical-Experimental Method for the Damage Location in Composite Plates 827
D. Montalvão, A.M.R. Ribeiro and J. Duarte-Silva

53 An Improved Modal Strain Energy Method for Damage Assessment 843
B.L. Wahalathantri, D.P. Thambiratnam, T.H.T. Chan and S. Fawzia

54 Damage Localisation in Beams using the Ritz Method and Speckle Shear Interferometry 859
J.V. Araújo dos Santos, H.M.R. Lopes, J. Ribeiro, N.M.M. Maia and M.A. Pires Vaz

55 The Fourier Coefficient Method for Damage Detection in Beams 875
A. Morassi

56 The Complex Plane Representation Method for Structural Damage Detection 895
C. Valente, D. Spina, S. Gabriele and A. De Leonardis

57 On the Robustness of the Average Power Ratios in Damping Estimation: Application in the Structural Health Monitoring of Composites Beams 915
J. Morlier and H.P. Yin

58 Damage Analysis of Concrete Structures using Polynomial Wavelets 929
C.M. Silva and L.M.S.S. Castro

59 A Novel Plate Element with Kinematic Assumptions for Modelling Delamination 947
C. Fernández Casanova, J.L. Pérez-Aparicio and A. Gallego

60 A Neural Approach to Crack Identification in Shafts using Wave Propagation Signals 966
L. Rubio and B. Muñoz-Abella

61 Computational Simulation of a Non-Destructive Testing Technique for Steel Bar Sizing in Concrete Structures using Eddy Current Testing and Neural Networks 978
N.P. de Alcantara Jr, T. Marques, D.C. Costa, D. Guedes, G.P. Sanchis and P.S. da Silva

62 Evaluation of Structural Damage in Beam Structures using the Strain Energy Method 990
I. Štimac Grandić and D. Grandić

63 On the Effect of a Combination of Passive and Active Electric Potential Computer Tomography Methods using Piezoelectric Film for Crack Identification 1001
S. Kubo, T. Sakagami, S. Ioka and K. Tsuboi

64 A Parallel Implementation of the Sigma-Point Kalman Filter 1013
S. Eftekhar Azam, A. Ghisi and S. Mariani

65 Using the Digital Image Correlation Technique to Measure the Mode Shape of a Cantilever Beam 1028
M.H. Shih, W.P. Sung and S.H. Tung

66 Maximum Likelihood Estimation of Modal Parameters in Structures Using the Expectation Maximization Algorithm 1042
F.J. Cara, J. Carpio, J. Juan and E. Alarcon

Composite and Adaptive Structures: Modeling, Simulation and Testing
Special session organised by C.M. Mota Soares

67 A Simple C^0 Continuous Higher Order Hellinger-Reissner Type Element for the Analysis of Magneto-Electro-Elastic Plates featuring Continuous Interlaminar Stresses 1059
S.J. Hossain and S. Subhamoy

68 Finite Element based Simulation, Design and Control of Adaptive Lightweight Structures 1091
M. Fischer, F. Dieringer, G. Iosifelis, K.-U. Bletzinger and R. Wüchner

69 Modelling and Characterization of Shear Actuated Piezoelectric Fibre Composites 1110
M.A. Trindade and A. Benjeddou

70 A Constitutive Model for Unidirectional Plies: Implementation and Application in Finite Element Analyses 1130
Th. Flatscher and H.E. Pettermann

71 Mechanical Modelling of Hybrid Sandwich Composites 1140
C. Chambon and S. Diebels

72 A Finite Deformation Exact Geometry Four-Node Solid-Shell Element for Piezoelectric Composite Structures 1152
G.M. Kulikov and S.V. Plotnikova

73 Analytical Solution for the Transient Response of Symmetric Magnetoelectric Laminated Beams 1174
C. Orlando, A. Milazzo and A. Alaimo

74 A Smart Triangular Finite Element with Drilling Degrees of Freedom 1187
M.A. Neto, R.P. Leal and W. Yu

75 Nonlinear Dynamic Behaviour of Laminated Plates subjected to Localised Blast Loading 1207
Z. Kazancı and H.S. Turkmen

76 Analytical Approaches to Model the Stiffness Reduction in Multi-Layered Carbon Fiber Composites with Process-Induced Defects 1217
D. Chrupalla, D. Hartung and I. Khattab

77 Issues in Finite Element Modelling for Laminated Composites 1235
W.S. Chan, K.L. Lawrence and F. Alamgir

78 Optimization of Passive Vibration Damping of Rotor Blade Structures using Shunted Piezoelectric Elements 1244
J.-F. Deü, A. Sénéchal and O. Thomas

79 A Physically Motivated and Layer-based Fatigue Concept for Fiber-Reinforced Plastics 1256
H. Krüger and R. Rolfes

80 A Predictive Model for In-Plane Shear Behaviour of Fiber-Reinforced Cementitious Composites 1265
C.-G. Cho, M. Kwon, J.-S. Kim, C.-H. Cho, M.-H. Yoo, S.-J. Lee and Y.-S. Shin

81 Modelling and Testing of the Properties of Recovered Composite Material 1272
J. Kers, D. Goljandin, K. Tall, A. Aruniit, E. Adoberg, M. Saarna and J. Majak

82 On the Enhanced Impact Resistance of Damped Composites 1284
C. Toscano and F. Lenzi

83 Assessment of a Layerwise Mixed Least-Squares Model for Analysis of Multilayered Piezoelectric Composite Plates 1297
F. Moleiro, C.M. Mota Soares, C.A. Mota Soares and J.N. Reddy

84 Determination of Stochastic Properties of Carbon Nanotube-Epoxy Composites 1317
M.M. Shokrieh and R. Rafiee

85 Reliability Assessment of Composite Structures with Multiple Failure Modes 1326
C.A. Conceição António and L.N. Hoffbauer

86 Using the Finite Element Method to Analyze Asymmetric Double Cantilever Beam Specimens 1339
V. Mollón, J. Bonhomme, A. Argüelles and J. Viña

87 Damage Assessment in Carbon Fibre Reinforced Polymer Plates based on Dynamic Measurements with Fibre Bragg Grating Sensors 1346
J. Frieden, J. Cugnoni, J. Botsis and Th. Gmür

88 A Preliminary Study on Flutter Suppression Concepts for Aeronautical Components 1359
L.D. Paulo, A.P. Pereira, P.V. Gamboa and J.M.A. Silva

89 Multiphysics Analysis of a Functionally Graded Material Conductor with Spatial Variation of Material Properties 1377
J. Murín, V. Kutiš and J. Paulech

Modelling and Analysis of Concrete Structures
Special session organised by I. Paya-Zaforteza and J. Turmo-Coderque

90 Trends and Perspectives in Non-Linear Analysis of Concrete Structures under Complex Three-Dimensional Load Combinations 1392
J.M. Bairán, S. Mohr and A.R. Marí

91 A General Analytical Integration of Reinforced Concrete Sections subject to Axial Force and Biaxial Bending 1411
Z.G. Guan and J.Z. Li

92 Equilibrium Models for Lower Bound Limit Analyses of Reinforced Concrete Slabs 1425
E.A.W. Maunder and A.C.A. Ramsay

93 Shear-Transfer Capacity of Reinforced Concrete 1442
K.N. Rahal

94 Bending Moment-Shear Force Interaction for Elements without Stirrups: Improvement of the Eurocode 2 Shear Procedure 1453
A. Cladera, J.L. Pérez and F. Martínez-Abella

95 A Study of the Shear Behaviour of Reinforced Concrete Sections with Fibre Reinforcement 1466
C.S. Chin, R.Y. Xiao and Z.W. Gong

96 Calibration of Finite Element Models for Soil-Pile Interaction 1478
J.M. Mayoral, J.Z. Ramírez and S.F. Zaldivar

97 Modelling the Response of Reinforced Concrete Columns under Biaxial Bending, Shear and Axial Forces 1496
J.M. Bairán, E. Osorio and A.R. Marí

98 Modelling Columns Supporting Flat Slabs using Stiffened Shell Elements 1511
A.M. Nafie

99 On the Behavior of Slab-Column Connections under Lateral Loads 1524
E. El-Awady, M. Husian and M. Zaghlal

100 Numerical Study on the Influence of the Plate to Beam Eccentricity in Usual Building Slabs 1537
H.B.S. Silva, J.B. Paiva and J.S. Giongo

101 Imperfection Sensitivity Factor in the Buckling of Single and Double Curvature Concrete Shells 1550
A. Tomás, P. Martí and J.P. Tovar

102 On the Influence of Masonry Infills in Concrete Buildings 1565
J. Leite and P.B. Lourenço

103 Numerical Modeling and Calibration of Impact Testing of Reinforced Concrete Panels 1577
M. Abdel-Mooty and S. Shaabaan

104 An Iterative Form-Finding Method for Antifunicular Shapes in Spatial Arch Bridges 1588
J.J. Jorquera Lucerga

105 A Unified Model Connecting Structural Analysis and Reinforcement Design 1605
D. Xu, Y. Zhao and F.Y. Xu

106 A New Bridge over the River Palancia for the Motorway A-23 Sagunto-Somport 1616
F. Gonzalez-Vidosa, J. Alcalá, F.J. Martínez and C. Perea

Analysis and Design of Steel and Composite Structures
Special session organised by L.F. Costa Neves

107 Computational Modelling of Beams Curved In-Plan 1626
R.E. Erkmen and M.A. Bradford

108 Analytical Evaluation for Local and Overall Buckling Behaviour of Square Steel Tube Truss Members 1644
T. Ohtsuka and S. Motoyui

109 Material Composition of Bucket Foundation Transition Pieces for Offshore Wind Turbines 1655
A. Nezhentseva, L. Andersen, L.B. Ibsen and E.V. Sørensen

110 Tests and Ratings of Short-Span Railway Composite Bridges 1672
J. Benčat and D. Papán

111 Towards an Optimized Layout of Steel and Concrete Composite Building Structures 1684
C. Costa, L.F. Costa-Neves, L.R.O. de Lima and J.G.S. da Silva

112 Dynamic Analysis of Building Composite Floors Subjected to Human Walking 1698
A.V. de A. Mello, J.G. Santos da Silva, S.A.L. de Andrade, P.C.G. da S. Vellasco and L.R.O. de Lima

113 Vibration Analysis of a Production Platform induced by Mechanical Equipment 1709
B.D. Rimola, J.G.S. da Silva, A.C.C.F. Sieira, L.R.O. de Lima and L.F. da C. Neves

114 Distortional Buckling of Stiffened Cold-Formed Steel Channel Sections 1721
H.R. Naderian, M. Azhari and H.R. Ronagh

115 Computational Simulation of a Composite Flooring System under Fire Loading 1737
R.Y. Xiao, Z.W. Gong and C.S. Chin

116 A Finite Element Formulation to Account for Shear-Lag Effects in Composite Bridges with Complex Structural Arrangements 1748
M. Mursi, F. Gara, G. Ranzi and G. Leoni

Connections in Steel and Composite Structures
Special session organised by L.F. Costa Neves

117 Structural Behavior of Composite Beams Considering the Bond-Slip Effect 1760
H.G. Kwak and J.W. Hwang

118 Application of Model Updating to Determine the Stiffness of a Bolted Joint and its Validation using Dynamic Testing 1779
J. Abad-Blasco, J.M. Franco-Gimeno, M.P. González-Martínez, L. Lezáun-Martínez and J.L. Zapico-Valle

119 Introducing a Method to Enhance a Poor Rigid Connection 1799
M.A. Barkhordari, M. Foroughi, S.M. Aqaee and H. Varaee

120 Determination of Bending Stiffness in Bolted Joints by the Finite Element Method and Experimental Validation 1809
J. Abad-Blasco, J.M. Franco-Gimeno, M.P. González-Martínez, L. Lezáun-Martínez and J.L. Zapico-Valle

121 Advanced Steel Moment Connection Calculation using MS Excel and the Eurocode 3 Component Method 1827
L. Borges, M. Thomann and S. Bouron

122 An Approximate Method for the Ultimate Strength of Horizontally Curved Composite Plate Girders 1839
M. Basher, N.E. Shanmugam and A.R. Khalim

Non-Gradient Methods in Optimization
Special session organised by J.F. Aguilar Madeira and H. Pina

123 Pseudo-Adaptive Penalization to Handle Constraints in Particle Swarm Optimizers 1854
M.S. Innocente and J. Sienz

124 Global Optimization using Particle Swarm Optimization and a Comparison with Evolutionary Algorithms and an Artificial Immune System 1870
M. Szczepanik, A. Poteralski, W. Kuś and T. Burczyński

125 Optimum Stacking Sequence Design of a Blended Laminated Wing Structure using Permutation Genetic Algorithms (permGA) 1890
D. Liu, D.C. Barton, V.V. Toropov and O.M. Querin

126 A Cellular Genetic Algorithm for Structural Optimisation 1909
S. Gholizadeh and E. Salajegheh

127 Discrete Sizing and Continuous Shaping Optimisation of Space Trusses using a Hybrid Metaheuristic Method 1923
A. Csébfalvi

128 Multi-Objective Self-Adaptive Genetic Search for Structural Robust Design 1939
C.A. Conceição António

129 Multi-Objective Optimisation of Hot Forging Processes using a Genetic Algorithm 1953
C.F. Castro, C.C. António and L.C. Sousa

130 Optimum Design of Concrete Cantilever Retaining Walls using the Harmony Search Algorithm 1964
A. Akın and M.P. Saka

131 Optimum Detailed Design of Reinforced Concrete Continuous Beams using the Harmony Search Algorithm 1985
A. Akın and M.P. Saka

132 Evaluation of Recent Improvements in Harmony Search based Structural Optimization Algorithms 2005
M.P. Saka, İ. Aydoğdu and O. Hasaçebi

133 A Symbolic-Numerical Algorithm for Material Parameter Identification 2026
J. Majak, M. Pohlak, R. Küttner, M. Eerme, K. Karjust and J. Kers

134 Kriging Metamodel Based Statistical Global Optimization Technique 2040
T.H. Lee and S.K. Cho

135 Ductile Damage Material Parameter Identification: Numerical Investigation 2055
E. Roux, M. Thonnerieux and P.O. Bouchard

136 An Artificial Immune System in the Identification of Material Constants in Composites and Piezoelectrics 2065
A. Poteralski, M. Szczepanik, W. Kuś, W. Beluch, G. Dziatkiewicz and T. Burczyński

Assessment of Structures using Numerical Models
Special session organised by J.M. Adam and F.J. Pallarés

137 Seismic Reliability of Reinforced Concrete Structures including Soil-Structure Interaction 2080
J. Salajegheh, E. Salajegheh, M.J. Fadaee and M. Khatibinia

138 The “Rognosa” Tower in San Gimignano: Digital Acquisition and Structural Analysis 2095
M. Callieri, M. Corsini, M. Girardi, C. Padovani, A. Pagni, G. Pasquinelli and R. Scopigno

139 Numerical Modelling of Panel Joints 2113
J. Brozovsky and A. Materna

140 Analysis of the Traffic Induced Vibrations on a 19th Century Heritage Chapel using Finite Element Modelling 2123
P. Tamvakou, M.M. Paredes and R.C. Barros

141 Modelling Progressive Collapse of Structures 2139
D. O'Dwyer and V. Janssens

142 Strong Ground Motion Variability Effects in the Seismic Response of an Urban Bridge Design 2151
J.Z. Ramírez, J.M. Mayoral and F.A. Flores

143 Evaluation of Residual Strength of Pipelines Containing Corrosion Defects 2170
J.E. Abdalla Filho, R.D. Machado, R.J. Bertin and M.D. Valentini

144 On the Numerical Simulation of Impacts for the Investigation of Earthquake-Induced Pounding of Buildings 2188
P. Polycarpou and P. Komodromos

145 Damage Assessment of a Self-Weight Metallic Roof with Skylights using the Finite Element Method 2206
J.J. Del Coz Diaz, F.P. Álvarez Rabanal, P.J. García Nieto and A. Lozano Martínez-Luengas

146 Assessment of the Resistance of Steel K-joints between Rectangular Hollow Sections with Galvanizing Holes using the Finite Element Method 2220
J.J. Del Coz Diaz, C. López-Colina Pérez, M.A. Serrano López and F.P. Álvarez Rabanal

147 Investigation of the Gyroscopic Effect on a Wind Turbine Model with ANSYS 2232
X. Liu, K.R. Leimbach and D. Hartmann

148 Assessment of Masonry Arch Behaviour through Photogrammetric Models and the Finite Element Method 2248
J.C. Caamaño, A. Álvarez, J. Armesto and B. Riveiro

149 A New Damage Detection Method for Bridge Condition Assessment 2259
A. Miyamoto and Z.H. Yan

Computational Structural Stability
Special session organised by H.A. Mang

150 First Order Solutions of Cracked Timoshenko Columns 2280
G. Vadillo, J.A. Loya and J. Fernández-Sáez

151 Numerical Wrinkling Prediction of Thin Hyperelastic Structures by Direct Energy Minimization 2293
Y. Lecieux and R. Bouzidi

152 Implementation of a Direct Procedure for Critical Point Computations 2312
J. Mäkinen, R. Kouhia, A. Fedoroff and H. Marjamäki

153 Computational Probabilistic Design of Time-Dependent Stability of Steel Beams 2325
A. Kudzys, O. Lukoševičienė and A.K. Kvedaras

154 Optimisation of Stability-Constrained Geometrically Nonlinear Shallow Trusses using a Higher Order Path-Following Method 2340
A. Csébfalvi

155 Elastic-Plastic Buckling of Cones under Combined Loading 2354
J. Blachut

156 Compressional Stability Analysis of Composite Plates with Multiple Through-the-Width Delaminations by using Higher Order Shear Deformation Theory 2366
M. Kharazi, M. Taghizadeh and H.R. Ovesy

157 Criterion for Elastic Buckling Analysis 2386
R. Adman and M. Saidani

158 Post-Buckling Analysis of Composite Plates Containing Embedded Delaminations by using Higher Order Shear Deformation Theory 2396
H.R. Ovesy, M. Kharazi and M. Taghizadeh

159 A Semi Energy Finite Strip Method for Post-Buckling Analysis of Relatively Thick Laminates 2416
H.R. Ovesy, M. Hajikazemi and H. Assaee

160 Dynamic Stability of Functionally Graded Material Cylindrical Shells based on Higher-Order Theory using the Finite Strip Method 2434
H.R. Ovesy and J. Fazilati

161 A Dual Energy Criterion for the Stability Analysis of Geometrically Exact Three-Dimensional Frames 2449
H.A.F.A. Santos

Control of Vibration in Civil Engineering
Special session organised by R.C. Barros and A. Baratta

162 Analysis of Displacement Vibration Isolation of Nonlinearly Damped Multi-Storey Building Structures using an Output Frequency Response Function 2466
P.F. Guo, Z.Q. Lang and Z.K. Peng

163 Development of a Displacement-Dependent Damper for Base Isolated Structures 2475
M. Ikenaga, K. Ikago and N. Inoue

164 Optimum Seismic Response Control of Multiple Degree of Freedom Structures using Tuned Viscous Mass Dampers 2487
K. Ikago, Y. Sugimura, K. Saito and N. Inoue

165 Suppression of Plate Vibrations by using Attachments 2497
K.A. Alsaif and M.A. Foda

166 Semi-Active Control of Structures using a Combined Genetic Algorithm - Neural Network - Fuzzy Controller 2514
H. Ghaffarzadeh and V. Hamedi

167 Optimum Design of Active and Passive Cable Stayed Footbridges 2528
F.L.S. Ferreira and L.M.C. Simoes

168 Numerical Investigation of Potential Usage of Rubber-Soil Mixtures as a Distributed Seismic Isolation Approach 2547
E. Mavronicola, P. Komodromos and D.C. Charmpis

169 Semi-Active Vibration Control of a Three Degree-of-Freedom Scaled Frame with a Magneto-Rheological Damper 2558
M.B. Cesar and R.C. Barros

170 Optimization of Viscoelastic Dampers as described by the Fractional Rheological Model 2581
Z. Pawlak and R. Lewandowski

171 Seismic-Damper Robust-Design for Protection of Isolated Bridges against Near-Fault Excitations 2596
A.A. Taflanidis

Probabilistic Approaches to Structural Mechanics
Special session organised by A. Elhami

172 Numerical Modelling of Structures involving Random Spatial Variability 2616
D.L. Allaix and V.I. Carbone

173 Statistics of Uncertain Dynamical Systems 2628
R. Croquet and E. Souza de Cursi

174 Propagation of Uncertainties using the Method of Moments 2643
M. Beckers and U. Naumann

175 Reliability-Based Design Optimization under Eigen-Frequency Constraints using a System Reliability Approach 2655
Y. Aoues and A. El-Hami

176 Reliability-based Design Optimization of Soil Tillage Machines while considering Fatigue Life Performance 2672
A. Abo Al-Kheer, Y. Aoues, A. El-Hami and M. Eid

177 Integration of Economical Requirements into the Probabilistic Approach for the Design of Soil Tillage Machines 2686
A. Abo Al-kheer, Y. Aoues and A. El-Hami

178 Optimization of the Tube Hydroforming Process using Probabilistic Constraints on Failure Modes 2698
A. Ben Abdessalem, A. El Hami and A. Cherouat

179 A Vector-Space Approach for Stochastic Finite Element Analysis 2714
S. Adhikari

180 Reliability Based Geometry and Topology Optimization of Truss Structures 2734
A.J. Torii, R.H. Lopez, F. Biondini and A. El-Hami

181 A Bilevel Approach to treat the Decomposed Topology Optimization Problem 2752
A. Makrizi, B. Radi and A. El Hami

Eigenvalues of Continuous Systems
Special session organised by S. Ilanko

182 Eigenvalues of Continuous Systems 2763
S. Ilanko

183 Free Vibration of Beams Carrying Spring-Mass Systems: A Dynamic Stiffness Approach 2782
J.R. Banerjee

184 Karhunen-Loéve Decomposition and Model Order Reduction applied to the Non-Linear Dynamics of an Extensible Cable 2793
M.R. Escalante, C.P. Filipich and M.B. Rosales

185 Buckling in Corrugated Paperboard Structures by Analytical and Numerical Methods 2813
C. Kueh, N. Navaranjan and M. Duke

186 Theory and Compact Program for the Sturm-Liouville Problem on Homogeneous Trees 2825
W.P. Howson and A. Watson

187 On the Material Coupled Motion of a Composite Bar 2842
W.P. Howson, A. Watson and B. Rafezy

188 The Boundedness of Gorman's Superposition Method for Free Vibration Analysis 2860
Y. Mochida

189 Natural Frequencies of Tapered Cylindrical Shells by Wittrick-Williams Algorithm 2873
N. El-Kaabazi and D. Kennedy

190 The Rayleigh-Ritz Method to solve Vibration Problems of Complex Structures 2892
L.E. Monterrubio

191 The Superposition Method for Computing Free Vibration Eigenvalues of Elastic Structures 2911
D.J. Gorman and S.D. Yu

Slender Structures: Analysis and Design
Special session organised by I. Doltsinis and V. Dias da Silva

192 Numerical Modelling of Normal and High Strength Concrete Slender Columns 2931
A.C. Barrera, J.L. Bonnet, M.L. Romero and M.A. Fernández

193 Numerical Simulation of Transient Vibrational Power Flows in Slender Heterogeneous Structures 2948
É. Savin

194 LTB-UC: A Finite Element Tool for Lateral-Torsional Buckling Analysis of Tapered I-Beams 2967
A. Andrade, P. Providência, D. Camotim and A.H. Duarte

195 Three-Dimensional Frames subject to Large Rotations 2989
V. Dias da Silva

196 Local, Distortional and Global Post-Buckling Analysis of Frames using Generalised Beam Theory 3009
C. Basaglia, D. Camotim and N. Silvestre

197 About the Numerical Non-Linear Modelling of Steel Fiber Reinforced Concrete Structures 3033
L. Vanalli, M.R. Scoaris, D.L. Araújo, R.R. Paccola and H.B. Coda

198 Nonlinear Three-Dimensional Elasto-Plastic Analysis of Slender Steel Arches 3048
Y.-L. Pi, M.A. Bradford and W. Qu

199 High Accuracy Post-buckling Analysis of Box Section Struts using Three Different Versions of Finite Strip Method 3064
S.A.M. Ghannadpour, H.R. Ovesy and M. Nassirnia

200 Refined Beam Models for Static and Dynamic Analysis of Wings and Rotor Blades 3078
E. Carrera, E. Giorcelli, G. Mattiazzo and M. Petrolo

Structural Optimization and Optimal Structural Control under Uncertainty
Special session organised by K. Marti, G.I. Schuëller and T. Vietor

201 Stochastic Analysis in Parametric Finite Element Modelling 3090
J.G. Sanchez, K. Kirchner and T. Vietor

202 Sensitivity Analysis and Optimization of Sandwich Plates with Metallic Foam Cores in the presence of Uncertain Parameters 3101
M. Corradi, N. Daina, M. Di Sciuva, M. Gherlone and M. Mattone

203 Plastic Behaviour and Stability Constraints in the Reliability based Shakedown Analysis and Optimal Design of Skeletal Structures 3121
J. Lógó, M. Movahedi Rad and M. Hjiaj

204 Ship Structure Design with Optimization under Uncertainty 3135
J.M. Vasconcellos and G. Cury

205 Stochastic Mechanics for the Assessment of Ancient Masonry Constructions 3145
A. Baratta and O. Corbi

206 Optimal Structural Control under Stochastic Uncertainty: Stochastic Optimal Open-Loop Feedback Control 3165
K. Marti

207 Robust Performance Optimization of Linear Controlled Stochastic Systems 3185
A.A. Taflanidis, J.T. Scruggs and J.L. Beck

208 Robust Control in Smart Structures using the $\mathbf{H_{infinity}}$ Criterion and m-Analysis 3205
A. Moutsopoulou, G.E. Stavroulakis and A. Pouliezos

209 Convergence of Successive Regression Approximations for Solving Noisy Equations 3226
I. Deák

Smart Structure Theories motivated by Continuum Physics Formulations
Special session organised by H. Irschik

210 Control of Plate Vibrations with Piezo Patches using an Infinite Dimensional Port Controlled Hamiltonian System with Dissipation Formulation 3249
T. Rittenschober and K. Schlacher

211 Finite Element Modeling for Coupled Electromechanical Behavior of Nonlinear Piezoelectric Shells as Material Surfaces 3263
Yu. Vetyukov and A. Belyaev

212 The Multiplicative Decomposition in Continuum Mechanics applied to Smart Structures 3282
A. Humer

213 Piezoelectric Vibrations of Elastic Structures with Spatial Local Nonlinearities 3297
R. Heuer

214 Piezoelectric Actuator and Sensor Networks for Active Control of Continuous Structures 3308
M. Krommer, D. Huber, M. Zellhofer and Y. Vetyukov

215 A Continuum Mechanics Approach for Smart Beams: Applications 3325
C. Zehetner and J. Gerstmayr

216 A Continuum Mechanics Approach for Geometrically Nonlinear Shear-Deformable and Smart Beams 3337
H. Irschik and J. Gerstmayr

217 A Three-Dimensional Continuous Material Model for a Pile of Thin Sheets and Frictional Contact 3348
J. Gerstmayr, A. Pechstein and L.G. Aigner

New Trends in the Simulation of Multi-Body Systems with Contact
Special session organised by S. Dumont and F. Lebon

218 The Influence of Contact Model, Friction and Lubrication on the Dynamics of Cylindrical Clearance Joints 3368
C. Pereira, P. Flores, A. Ramalho and J. Ambrósio

219 Efficient Simulation of Structural Failure of Large Scale Complex Structures by using Multibody Dynamics 3388
T. Sikiwat, M. Breidt and D. Hartmann

220 Simulation of Energy Absorption Effects during Helmet Collision with a Hard Obstacle 3398
Č. Mitrović, N. Trišović, T. Lazović and A. Marinković

221 Numerical Modelling of Thermomechanic Couplings in Frictional Contact: Application to Tire Rolling 3408
A. Kongo Kondé, I. Rosu, F. Lebon, N. Cocheteau and L. Seguin

222 Non Smooth Contact Dynamics Approach for Cohesive Multi-Contact Systems 3426
H. Haddad, M. Guessasma and J. Fortin

223 Multiscale Approach for Modelling the Behaviour of Contact Interfaces 3439
H. Hamza, S. Dumont, M. Guessasma and J. Fortin

224 Numerical Simulations of Controlled Collapse Considering Uncertainty 3449
A. Piotrow and W. Graf

Numerical Modelling of Steel and Steel-Concrete Composite Structures
Special session organised by M.L. Romero

225 Non-Linear Analysis of High Performance Steel Plate Girders subjected to Weak Axis Bending 3461
A.N. Gergess and R. Sen

226 Numerical Modelling of the Mechanical Behaviour of Steel Pipes subject to Combined Loads 3477
H.A. Sánchez Sánchez, M.J. Pérez de la Cruz and V. Flores Cobos

227 Residual Stress Measurement and its Numerical Calibration in Welded Steel Plate Girders 3497
J. Néző, L. Dunai and B.H.V. Topping

228 Stability of Stiffened Cold-Formed Steel I-Sections using the Bubble Finite Strip Method 3531
H.R. Naderian, M. Azhari and H.R. Ronagh

229 Finite Element Modelling and Parametric Study of Three-Dimensional Semi-Rigid Composite Joints 3545
B. Gil, R. Goñi and E. Bayo

230 Prediction of the Fire Resistance of Slender Concrete Filled Tubular Columns using a Three-Dimensional Numerical Model 3554
A. Espinos, M.L. Romero, C. Ibañez and A. Hospitaler

231 Shear Test based Identification of the Hardening Behaviour of Stainless Sheets after the Onset of Necking using Cubic Spline Interpolation 3568
M. Vrh, M. Halilovič and B. Štok

Built Heritage Strengthened with Composite Materials
Special session organised by D. Oliveira and C. Pellegrino

232 Nonlinear Finite Element Analysis of Strengthened Masonry Buildings subject to Seismic Action 3586
C. Maruccio, Z.X. Chen, D.V. Oliveira, G. Monti and P.B. Lourenço

233 In-Plane Behavior of Tuff Masonry Panels Strengthened with Fibre-Reinforced Plastic Cross Layout 3600
G. Marcari, D.V. Oliveira, G. Fabbrocino and P.B. Lourenço

234 Seismic Upgrading Works carried out with Composite Materials on Historic Constructions 3613
A. Borri, G. Castori, M. Corradi and A. Giannantoni

235 Twenty Years of Fiber Reinforced Polymer Applications in Italy for Restoration, Strengthening and Seismic Upgrade of Historical Structures: Materials and Case Studies 3633
P. Casadei and E. Agneloni

236 Comparisons between Numerical and Experimental Results for Fibre-Reinforced Polymer Strengthened Concrete Elements 3650
G. Mazzucco, V. Salomoni, C. Pellegrino and C. Majorana

237 A Thermo-Hygro-Chemo-Mechanical Numerical Approach to Prevent Problems of Repair of Concrete Structures 3662
G. Sciumè and B.A. Schrefler

Simulations of Human and Robotic Movements
Special session organised by A. Eriksson

238 Finite Element Formulations for Fast Computation of Large and Moderately Large Deformations 3679
D. Marinković and M. Zehn

239 Dynamic Interaction between Human Gait and Footbridges 3699
J. Máca, M. Valášek, J. Machač and T. Vampola

240 Non-Linear Finite Element Modelling of a Test System for a Maintenance Robot 3712
H. Marjamäki, J. Mäkinen and P. Pertola

241 Free-Time Optimization of Targeted Movements based on Temporal Finite Element Approximation 3725
R. Pettersson, A. Nordmark and A. Eriksson

Differential Quadrature, Generalized Methods and Related Discrete Element Analysis Methods
Special session organised by C.N. Chen

242 An Element-by-Element Iteration Procedure for the Solution of Discrete Algebraic Systems of DQ-Related Discrete Element Analysis Methods 3742
C.N. Chen

243 A Vectorial Approach for the Formulation of Finite Element Beams in Finite Rotations 3763
S. Lopez and G. La Sala

244 Nonuniform Shear Deformable Axisymmetric Orthotropic Circular Plates Resting on a Two-Parameter Elastic Foundation Solved using the DQEM with a DQ Model 3779
C.N. Chen

Timber Structures
Special session organised by P.H. Kirkegaard

245 Robustness Analysis of a Wide-Span Timber Structure with Ductile Behaviour 3790
P.H. Kirkegaard, J.D. Sørensen, D. Cizmar and V. Rajčić

246 Finite Element Modelling of Shear Walls using Connector Shear Elements based on Continuum Plasticity 3805
U.A. Girhammar, P.J. Gustafsson and B. Källsner

247 A Numerical Study on the Influence of Natural Varying Humidity on the Moisture State of Structural Timber Members 3825
T. Hozjan, G. Turk and S. Svensson

Vibrations of Continuous Systems
Special session organised by A.V. Singh

248 Bi-Linear Reduced Order Models 3834
A. Saito and B.I. Epureanu

249 Identification of Fixed-Free Double-Walled Carbon Nanotube-Based Mass Sensor 3850
C. Versaci, G. Muscolino and I. Elishakoff

250 An Analytical Approach to the Computation of the Frequency Response Function 3866
M. Lázaro, J.L. Pérez-Aparicio and J.J. Gómez-Hernández

Meshless Methods

251 A Local Radial Basis Function Interpolation Model to Simulate Time-Domain Acoustic Wave Propagation 3882
L. Godinho, C. Dors, D. Soares Jr. and P. Amado-Mendes

Finite Element Modelling

252 Comparison of Different Finite Element Models for the Simulation of the Ring-Ball on Ring Test 3893
J. Barredo, L. Hermanns, I. del Rey, A. Fraile and E. Alarcón

253 Comparison of Different Finite Element Models for the Transient Dynamic Analysis of Laminated Glass for Structural Applications 3911
J. Barredo, M. Soriano, L. Hermanns, A. Fraile, M. López and M.S. Gómez

Finite Element Technology

254 Special Finite Element Formulations based on Asymptotic Thin Layer Models 3926
C. Sussmann and D. Givoli

255 A Co-Rotation Shell Element with Material Nonlinearities 3936
J. Xu, K.H. Tan, Z.X. Li and C.K. Lee

Extended Finite Element Method

256 Accurate Stress Recovery for the Two-Dimensional Fixed Grid Finite Element Method 3956
E. Nadal, S. Bordas, J.J. Ródenas, J.E. Tarancón and M. Tur

Discrete Element Methods

257 Discrete Elements in the Evaluation of the Cracking Process in Concrete Beams 3976
M.A.M. Shzu and G. Doz

258 The Distinct Element Method Simulation of Trap Performance of Check Dams used for Wood Contained Debris Flow 3993
S. Katsuki and H. Shibuya

Graph Techniques

259 Canonical Forms and Graph Theory for Calculating the Eigenfrequencies of Symmetric Space Frames 4013
A. Kaveh and L. Shahryari

260 Regular Graphs Factorization for Partitioning 4037
M. Mahdavinia and Y. Navabzadeh Esmaeely

261 Eigensolution of Locally Modified Regular Structures using the Shifted Inverse Iteration Method 4050
A. Kaveh and H. Fazli

Augmented Lagrangian Method

262 An Augmented Lagrange Method to Solve Large Deformation Three-Dimensional Contact Problems 4065
M. Tur, J. Albelda, E. Giner and J.E. Tarancón

Microstructures

263 Hybrid Computing Model for Decomposed Partial Differential Equation Systems arising from Microstructural Three-Dimensional Problems 4077
K. Schrader and C. Könke

Nanotechnology

264 Numerical Analysis of Complex Systems Evolution with Phase Transformations at Different Spatial Scales 4092
R.V.N. Melnik, R.P. Dhote, J. Zu, O.I. Tsviliuk and L.X. Wang

265 Electrospun Nanofiber Structures for Advanced Nanocomposites 4104
L.Yu. Kossovich and Y. Salkovskiy

Modelling Discontinuities

266 Two Fields Formulations for the Implementation of an Extrinsic Cohesive Law 4113
F. Cazes, M. Coret and A. Combescure

267 Progress in the Formulation of Finite Elements with Embedded Discontinuities to Model Failure in Solids 4132
F. Armero and J. Kim

Concrete Modelling

268 Mesh Size Dependency and Related Aspects of Lattice Models 4143
M. Vořechovský and J. Eliáš

269 Crack Prediction in Local and Non-Local Finite Element Models for Reinforced Concrete 4163
S. Chan, A.D. Jefferson and R.J. Lark

270 Multi-Scale Modelling of Concrete Degradation such as Effloresecence and Laitance 4170
L. Jendele, I. Smid and J. Cervenka

Composites: Damage

271 Discrete Element Method Simulation of the Damage Evolution in Cross-Ply Laminate under Tensile Loading 4184
D.M. Yang, J.Q. Ye, Y.Q. Tan and Y. Sheng

272 Simulating the Effect of Porosities on Stiffness and Strength of Composite Materials 4198
R. Rolfes, S. Czichon, M. Vogler and E. Jansen

Composite Materials

273 On Selected Cost Functionals for Laminated Composites 4211
P. Procházka and Š. Pešková

274 The Development of a Program to Aid the Design of Composite Structures 4224
A. Ramsaroop and K. Kanny

275 Numerical Analysis and Optimisation of Tubular Adhesive Joints under Tensile Loading 4236
J.Y. Cognard, H. Devaux and L. Sohier

Modelling of Foam Composites

276 Evaluation of the Stress State in Aluminium Foam Sandwiches 4251
F. Palano, V. Dattoma, R. Nobile and F.W. Panella

Composite Plates

277 Dynamic Response of a Laminated Composite Plate with Viscoelastic Stiffeners subject to Blast Load 4267
O. Acar Ezer, D. Kececi Balkan, H.S. Türkmen and Z. Mecitoğlu

278 Dynamic Behaviour of the Laminated Sandwich Plate with a Stepwise Graded Viscoelastic Core 4284
E. Tengiz, D.K. Balkan, H.S. Türkmen and Z. Mecitoğlu

279 An Analysis of Buckling Delamination of Composite Rectangular Thick Plates with an Inner Rectangular Crack 4298
S.D. Akbarov, N. Yahnioglu and E.E. Karatas

Non-Linear Materials

280 Explicit Nonlinear Formulation of Bridge Bearings with the Mullins Effect 4313
M.H.B.M. Shariff

Layered, Functionally Graded and Piezoelectric Composite Laminates

281 A Reduced Order Model for Structural-Acoustic Internal Problems with Piezoelectric Shunt Damping 4327
W. Larbi, J.-F. Deü and R. Ohayon

282 Some Finite Element Approaches with Symmetric Matrices for Modelling of Porous Piezocomposite Devices subject to Acoustic and Electric Loads 4344
G. Iovane and A. Nasedkin

283 The Effects of Aspect Ratio on Postbuckling Behavior of Rectangular Plates of Functionally Graded Materials 4364
H. Assaee, H.R. Ovesy, M. Hajikazemi and M.H. Sadr Lahidjani

284 Dynamic Equations for an Orthotropic Piezoelectric Plate 4377
K. Mauritsson and P.D. Folkow

285 A Theoretical Investigation on the Free Vibration of Functionally Graded Beams 4391
N. Wattanasakulpong, B.G. Prusty, D.W. Kelly and M. Hoffman

286 Thermal Buckling Analysis of Functionally Graded Plates using the Finite Strip Method 4404
S.A.M. Ghannadpour, H.R. Ovesy and M. Nassirnia

287 A Higher-Order Exact Geometry Solid-Shell Element undergoing Finite Rotations 4424
S.V. Plotnikova and G.M. Kulikov

Plate and Shell Structures

288 A New Accurate yet Simple Shear Flexible Triangular Plate Element with Linear Bending Strains 4439
L. Damkilde and R.R. Pedersen

289 Cross-Stiffened Circular Plates: An Elasto-Plastic Large Deflection Analysis 4453
G.J. Turvey and M. Salehi

290 Dynamic Behaviour of Tapered Plates subjected to Blast Loading 4470
S. Susler, Z. Kazancı and H.S. Turkmen

291 Geometrical and Material Non-Linear Analyses of Model Submarine Pressure Hulls 4481
C.T.F. Ross, C. Bull, M. Al-Enezi and A.P.F. Little

Metal Forming

292 The Stress in Thickness Direction in Simulations with Shell Elements 4494
St. Kugler, P.A. Fotiu and J. Murin

293 An Experimental and Numerical Study of Ductile Damage for Cold Metal Forming Applications 4510
P.O. Bouchard, S. Fanini and U. Ziarsolo

Boundary Element Method

294 Inelastic Nonuniform Torsion of Bars using the Boundary Element Method 4521
E.J. Sapountzakis and V.J. Tsipiras

295 Sound Emission from a Three-Dimensional Enclosure with an Opening using a Boundary Element Method 4541
L. Godinho, E.G.A. Costa, P. Amado-Mendes, J. Santiago and A. Pereira

296 Boundary Element Formulation for Contact Analysis using a Tangent Operator 4557
E.D. Leonel and W.S. Venturini

297 Nonlinear Analysis of Timoshenko Beams on a Tensionless Three-Parameter Foundation 4572
E.J. Sapountzakis and A.E. Kampitsis

Boundary Integral Methods

298 The Boundary Integral Equation Solution of Elastic Time-Harmonic Problems for Soil-Structure Interaction with an Intermediate Layer 4591
M.Y. Antes, Y.S. Karinski and D.Z. Yankelevsky

Hybrid Element Methods

299 Hybrid-Trefftz Displacement Elements for Incompressible Biphasic Media 4609
J.A. Teixeira de Freitas and M. Toma

300 Hybrid-Mixed Stress Finite Element Models for the Dynamic Analysis of Reinforced Concrete Frame Structures 4629
M.R.T. Arruda and L.M.S.S. Castro

301 Hybrid Computational Modelling of Heterogeneous Materials 4649
J. Novák, Ł. Kaczmarczyk, P. Grassl and C.J. Pearce

302 A Hybrid Finite Element-Scaled Boundary Finite Element Method for Multiple Cohesive Crack Propagation 4660
E.T. Ooi and Z.J. Yang

303 Time Integration Procedures with Hybrid-Mixed Stress Finite Elements 4671
M.R.T. Arruda and L.M.S.S. Castro

304 A Hybrid Finite Element-Scaled Boundary Finite Element Method for Reinforced Concrete Modelling 4691
E.T. Ooi and Z.J. Yang

305 Hybrid Displacement Finite Element Models for the Physically Nonlinear Analysis of Three-Dimensional Concrete Structures 4706
J.M.A. Martins and L.M.S.S. Castro

306 Hybrid-Mixed Stress Finite Element Models for the Physically Non-Linear Analysis of Concrete Three-Dimensional Structures 4725
C.S.R. Garrido and L.M.S.S. Castro

Elasto-Plasticity Problems

307 Consistently Linearized Implicit Algorithm for Orthotropic Elasto-Plasticity with Mixed Hardening 4742
M.A. Caminero and F.J. Montáns

308 Mixed Finite Elements with Enhanced Plastic Behavior 4758
A. Bilotta, G. Garcea and L. Leonetti

309 Strategies for the Analysis of the Non-Linear Behaviour of an Adhesive in Bonded Assemblies 4771
R. Créac'hcadec and J.Y. Cognard

310 The Finite Cell Method for Elasto-Plastic Problems 4788
A. Abedian, J. Parvizian, A. Düster, H. Khademyzadeh and E. Rank

Structural Design

311 Design of Submarine Pressure Hulls under External Hydrostatic Pressure 4807
C.T.F. Ross, T. Whittaker and A.P.F. Little

Re-Analysis of Structures

312 Reanalysis of Nonlinear Structures using a Reduction Method of Combined Approximations 4827
M. Guedri, T. Weisser and N. Bouhaddi

Structural Optimization

313 A Bi-level Method for Shape and Member Sizing Optimization of Frame Structures 4842
F. Flager, A. Adya and M. Fischer

314 Efficient Global Optimization of a Structural Frame 4861
B. Horowitz, L.J.N. Guimarães and S.M.B. Afonso

315 Cost Optimum Design of Reinforced Concrete Simply Supported One-way Slabs 4877
I. Merta and S. Kravanja

Topology Optimization

316 Topology Optimization for Chiral Elastic Bodies 4886
D. Veber and A. Taliercio

317 Conceptual Layouts and Angles of DiaGrid for Building Frames using Topological Optimization 4897
D.K. Lee, J.H. Kim, I.H. Chang, U. Starossek and S.M. Shin

318 A Consistent and Efficient Unconstrained Multicriterion Approach for Topology Optimization 4907
Y.-H. Chou and C.-Y. Lin

319 Reliability-Based Topology Optimisation of Space Structures using Ant Colony Optimisation 4918
M.J. Fadaee, E. Salajegheh, J. Salajegheh and M. Mashayekhi

320 Heuristic Features of the Co-SIMP Algorithm in Topology Optimization: Numerical Examples 4935
V. Pomezanski

Crashworthiness

321 The Dynamic Simulation of Crashworthy Landing Gear 4946
T.U. Kim, S.C. Kim and I.H. Hwang

Vehicle Safety

322 Safety Requirements and Crashworthiness for an Unbelted Occupant 4954
B. Alzahabi

323 Optimum Design of a Rack and Pinion Gear Pair using the Taguchi Method 4962
W.S. Chung, D.H. Jung, H.S. Song and Y.K. Seo

Uncertainties in Stochastic Systems

324 Frequency Response of Stochastic Dynamic Systems: A Modal Approach 4970
S. Adhikari and B. Pascual

325 Stochastic System Identification using Kalman Filtering 4990
S. Eftekhar Azam and S. Mariani

Seismic Engineering

326 Corrected Ground Motion Functions in the Case of a Near-Fault Earthquake 5007
J. Györgyi

327 Impact of Seismic Design Criteria on Progressive Collapse Investigation 5017
O.A. Mohamed, A.N. Najmal and O.F. Abbas

328 Inelastic Time History Analysis of Steel Moment Frames subjected to Pulse-like Ground Motions 5028
S. Yaghmaei-Sabegh

329 Evaluation of the Seismic Behaviour of Steel Transmission Towers with Different Boundary Conditions 5038
T. Mazda, M. Matsumoto, N. Oka and N. Ishida

330 Probabilistic Study of the Seismic Behaviour of Structures 5047
A. Yazdani

331 Numerical Analysis of Panel Buildings subject to Seismic Loading 5058
J. Brozovsky and A. Materna

332 Implementing Modal Analysis Software on Multi-Core Computers: With Application to Seismic Analysis of Space Trusses 5067
R.I. Mackie

Dynamics: General

333 Using a Rotational Periodicity Method for the Calculation of the Natural Vibration of a Turbine Blade of Progressive Design 5081
P. Polach

334 The Finite Strip as a Spectral Element for Moving Load Analysis 5094
I. Kožar, N. Torić and Ž. Jeričević

Non-Linear Dynamics

335 Positional Finite Elements for Geometrical Non-Linear Dynamics of Shells 5104
H.B. Coda

336 Nonlinear Dynamics of a Support Excited Portal Frame Structure 5124
R.M. Brasil and L.M. Orbolato

Dynamics: Human Motion

337 A Topology Design of a Composite Dance Hall Roof 5132
P. Rosko

338 A Spectral Method for Predicting Floor Vibration Produced by Rhythmic Crowd Loads 5143
T. Ji and T. Zheng

Penalty Methods

339 The Bipenalty Method for Explicit Time Integration 5157
H. Askes, M. Caramés-Saddler and A. Rodríguez-Ferran

340 Introducing Negative Penalty Functions in Least Square Optimisation 5165
S. Ilanko and G.K. Bharathy

Damping

341 Bending Vibrations of Euler-Bernoulli Beams Treated with Non-Local Damping Patches 5182
S. Gonzalez-Lopez and J. Fernandez-Saez

342 On Damping Experimental Estimation 5197
C. Rainieri, G. Fabbrocino and E. Cosenza

Engineering Simulation

343 Spatial Motion Analysis of a Floating Crane and a Cargo with Elastic Boom based on a Three-Dimensional Beam 5215
K.P. Park, J.H. Cha and K.Y. Lee

Engineering Analysis and Design

344 Static Modal Formulation of Aeroelastic Effects in Overall Aircraft Loads Models 5223
I. Ruiz Juretschke, M. Calvo Blanco, J.M. Román García and J. López-Díez

345 Design and Analysis for a Drum Type Washing Machine with a Fixed Tub Structure 5236
K.J. Kim, H.S. Seo, J.W. Kim, J.W. Chang, S. Jeon and H.T. Lim

Masonry Structures

346 Numerical Modelling of Unreinforced Masonry Walls using Contact Elements 5245
A.H. Akhaveissy

347 Analysis of Masonry Panels using the No-Tension Approach 5256
A. Baratta and I. Corbi

348 Seismic Design of Masonry Walls subject to Out-of-Plane Bending 5266
L. Reindl, J. Park, H. Norda and C. Butenweg

349 Evaluation of Nonlinear Behaviour of Historical Masonry Structures subject to Wind Load using Finite Element Analysis 5278
A. Mutoh

350 Investigation of the Seismic Behaviour of Masonry Infilled Frames 5286
M. Foroughi, M.A. Barkhordari and S.M. Aqaee

351 A Nonlinear Multimodal Procedure for Masonry Buildings 5298
H. Norda, L. Reindl and K. Meskouris

352 Structural Assessment of Cantilevered Stone Stairs 5307
D. O'Dwyer and O. Bashorun

353 Assessment of Masonry Arch Bridge Behaviour subject to Service and Flood Loads 5322
M. Afraz Habibi and M.T. Ahmadi

354 A Numerical Study of Non Structural Masonry Walls with Bed Joint Reinforcement subject to Flexure 5333
E.A. Oliveira, R.M. Silva and P.B. Lourenço

Structural Mechanics

355 An Improved Third-Order Mass Matrix for Timoshenko's Flexural Wave Propagation 5350
J.-E. Laier

356 Estimation of the Critical Flutter Load of a Non-uniform Double-beam subjected to a Follower Force 5362
I. Takahashi

357 An Innovative Timoshenko Beam Element 5378
M. Memari and R. Attarnejad

Cable, Truss and Space Structures

358 Dynamic Analysis of Cable Roofs under Turbulent Wind using a Frequency Domain Approach 5391
S.A. Ghafari Oskoei, G. McClure and I. Mahmoudzadeh Kani

359 Seismic Reliability of Double-Layer Grid Space Structures 5410
E. Salajegheh and I. Mansouri

360 Influence of Joint-Rigidity on the Behaviour of Single-Layer Square Plan Structures 5422
A.M. Altuna, A.L. Arancibia and I. Puente

361 Complex Nonlinear Analysis of a Cable Roof Structure based on Diagnostics and Tests 5437
S. Kmet and M. Tomko

362 The Behaviour of Cable Structures subject to Supporting System Deformation 5458
V. Kulbach and J. Idnurm

363 A Modular Truss System for Pedestrian Traffic and a Computer Implementation of an Algorithm for Creating the Truss Structure 5469
M. Zawidzki

Tall Buildings

364 Dynamic Analysis of Non-Planar Coupled Shear Walls with Stiffeners using a Continuous Connection Method
C.D. Turkozer, O. Aksogan, E. Emsen and R. Resatoglu 5483

Symbolic Computing

365 Software Supported Implementation of Efficient Solid-Shell Finite Elements 5503
S. Mattern and K. Schweizerhof
