

**2010 10th IEEE/IPSJ  
International Symposium on  
Applications and the Internet  
(SAINT 2010)**

**Seoul, South Korea  
19-23 July 2010**

**IEEE Catalog Number: CFP10214-PRT  
ISBN: 978-1-4244-7526-1**

# 2010 10th Annual International Symposium on Applications and the Internet

## *SAINT 2010*

## Table of Contents

|                                                       |        |
|-------------------------------------------------------|--------|
| Message from General Chairs .....                     | xiv    |
| Message from Technical Program Committee Chairs ..... | xv     |
| Welcome from Workshop Co-chairs .....                 | xvi    |
| Message from EUCASS 2010 Workshop Organizers .....    | xvii   |
| Message from C3NET 2010 Workshop Organizers .....     | xviii  |
| Message from NETSAP 2010 Workshop Organizers .....    | xix    |
| Message from MidArch 2010 Workshop Organizers .....   | xx     |
| Message from ITeS 2010 Workshop Organizers .....      | xxi    |
| Message from HSNCE 2010 Workshop Organizers .....     | xxii   |
| Message from CBuH 2010 Workshop Organizers .....      | xxiii  |
| Organizing Committee .....                            | xxiv   |
| Technical Program Committees .....                    | xxvii  |
| Steering Committee .....                              | xxxii  |
| Joint COMPSAC/SAINT 2010 Opening Session .....        | xxxiii |
| Joint COMPSAC/SAINT 2010 Keynote Abstracts .....      | xxxiv  |
| Joint COMPSAC/SAINT 2010 Panel Abstracts .....        | xxxvi  |

---

### Symposium Papers I: Applications

|                                                                                                                               |    |
|-------------------------------------------------------------------------------------------------------------------------------|----|
| Development of a High-Performance Olfactory Display and Measurement<br>of Olfactory Characteristics for Pulse Ejections ..... | 1  |
| <i>Ami Kadowaki, Daisuke Noguchi, Sayumi Sugimoto, Yuichi Bannai, and Kenichi Okada</i>                                       |    |
| Applying Double-Sided Combinational Auctions to Resource Allocation<br>in Cloud Computing .....                               | 7  |
| <i>Ikki Fujiwara, Kento Aida, and Isao Ono</i>                                                                                |    |
| Resisting Sybil Attack By Social Network and Network Clustering .....                                                         | 15 |
| <i>Ling Xu, Satayapiwat Chainan, Hiroyuki Takizawa, and Hiroaki Kobayashi</i>                                                 |    |

## Symposium Papers II: Security

|                                                                                                            |    |
|------------------------------------------------------------------------------------------------------------|----|
| Sensor in the Dark: Building Untraceable Large-Scale Honeypots Using Virtualization Technologies .....     | 22 |
| <i>Akihiro Shimoda, Tatsuya Mori, and Shigeki Goto</i>                                                     |    |
| Analysis & Detection of SQL Injection Vulnerabilities via Automatic Test Case Generation of Programs ..... | 31 |
| <i>Michelle Ruse, Tanmoy Sarkar, and Samik Basu</i>                                                        |    |
| Masquerade Detection in Network Environments .....                                                         | 38 |
| <i>Chris Strasburg, Sandeep Krishnan, Karin Dorman, Samik Basu, and Johnny S. Wong</i>                     |    |

## Symposium Papers III: Network Systems

|                                                                                                                          |    |
|--------------------------------------------------------------------------------------------------------------------------|----|
| A Tool for Computing the Visual Similarity of Web Pages .....                                                            | 45 |
| <i>María Alpuente and Daniel Romero</i>                                                                                  |    |
| An Adaptive Route Selection Mechanism per Connection Based on Multipath DNS Round Trip Time on Multihomed Networks ..... | 52 |
| <i>Yong Jin, Nariyoshi Yamai, Kiyohiko Okayama, and Motonori Nakamura</i>                                                |    |
| Lightweight Traffic-Aware Packet Classification for Continuous Operation .....                                           | 59 |
| <i>Shariful Hasan Shaikot and Min Sik Kim</i>                                                                            |    |

## Symposium Papers IV: Mobile and Wireless I

|                                                                                          |    |
|------------------------------------------------------------------------------------------|----|
| Optimizing User Interaction for Web-Based Mobile Tasks .....                             | 68 |
| <i>Dong Zhou, Ajay Chander, and Hiroshi Inamura</i>                                      |    |
| Design and Implementation of NEMO Based ZigBee Mobile Router for Healthcare System ..... | 77 |
| <i>Jin Ho Kim, Rim Haw, Eung Jun Cho, Choong Seon Hong, and Jongwon Choe</i>             |    |
| Energy-Efficient Location Logging for Mobile Device .....                                | 84 |
| <i>Choon-oh Lee, Minkyu Lee, and Dongsoo Han</i>                                         |    |

## Symposium Papers V: Mobile and Wireless II

|                                                                            |    |
|----------------------------------------------------------------------------|----|
| Dynamic Self-Reconfiguration Algorithms for Wireless Sensor Networks ..... | 91 |
| <i>Sungwook Kim and Ji-Hwan Kim</i>                                        |    |
| Reactive Programming Optimizations in Pervasive Computing .....            | 96 |
| <i>Chao Chen, Yi Xu, Kun Li, and Sumi Helal</i>                            |    |

## Symposium Short Papers I

|                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------|-----|
| Supporting Network Formation through Mining under Privacy Constraints .....                           | 105 |
| <i>Florian Skopik, Daniel Schall, and Schahram Dustdar</i>                                            |     |
| Software Architecture and Characteristic Functions in Learning Management System "NOBASU" .....       | 109 |
| <i>Nobuo Funabiki, Toru Nakanishi, Noriki Amano, Hiroki Kawano, Yuuki Fukuyama, and Megumi Isogai</i> |     |

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Basic Approach of Timing in Context Aware Architectures Verified<br>by Concrete Advantages .....                                                   | 113 |
| <i>Bernd Niklas Klein and Klaus David</i>                                                                                                          |     |
| Web-Based Intelligent Computational Argumentation Based Conflict<br>Resolution in Air Traffic Management .....                                     | 117 |
| <i>Xiaoqing Liu, Ravi Santosh Arvapally, Hojong Baik, and Rubal Wanchoo</i>                                                                        |     |
| <b>Symposium Short Papers II</b>                                                                                                                   |     |
| A Cloud Trust Model in a Security Aware Cloud .....                                                                                                | 121 |
| <i>Hiroyuki Sato, Atsushi Kanai, and Shigeaki Tanimoto</i>                                                                                         |     |
| A History-Based Job Scheduling Mechanism for the Vector Computing Cloud .....                                                                      | 125 |
| <i>Yoshitomo Murata, Ryusuke Egawa, Manabu Higashida, and Hiroaki Kobayashi</i>                                                                    |     |
| A Solution for Mail Forwarding Problem of SPF by Tracing Recipient<br>Addresses .....                                                              | 129 |
| <i>Takumi Seike, Yong Jin, Nariyoshi Yamai, Kiyohiko Okayama, Keita Kawano,<br/>and Motonori Nakamura</i>                                          |     |
| <b>Symposium Student Session I: Application</b>                                                                                                    |     |
| SPGF Search Places by Geographical Features all Around the World: Search<br>and Verification System Utilizing Huge Amounts of Satellite Data ..... | 133 |
| <i>Ryo Wakuta and Tomohiro Sonobe</i>                                                                                                              |     |
| Using the Model Checker Spin for Web Application Design .....                                                                                      | 137 |
| <i>Kei Homma, Satoru Izumi, Yuki Abe, Kaoru Takahashi, and Atsushi Togashi</i>                                                                     |     |
| <b>Symposium Student Session II: User Support</b>                                                                                                  |     |
| Intelligent Manipulation of Human Activities Using Cloud Computing<br>for u-Life Care .....                                                        | 141 |
| <i>Asad Masood Khattak, Zeeshan Pervez, Koo Kyo Ho, Sungyoung Lee, and Young-Koo Lee</i>                                                           |     |
| <b>Symposium Student Session III: Mobile &amp; Wireless</b>                                                                                        |     |
| A Study on Small Business Advertising Using E-mail Transmitting Screens<br>on Mobile Phones .....                                                  | 145 |
| <i>Feelhwan Park, Yoh Shiraishi, and Osamu Takahashi</i>                                                                                           |     |
| Reservation Based Reliability Control in Wireless Sensor Networks .....                                                                            | 149 |
| <i>Md. Obaidur Rahman, Muhammad Mostafa Monowar, Choong Seon Hong,<br/>and Young An Kim</i>                                                        |     |
| Supporting USB Devices for the Global Migration .....                                                                                              | 153 |
| <i>Hideobu Watanabe, Hajime Masaoka, Toshihiro Ohigashi, Tohru Kondo,<br/>Kouji Nishimura, and Reiji Aibara</i>                                    |     |

## **Symposium Student Session IV: Security**

|                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------|-----|
| An Enhanced Key Distribution Scheme for the Energy Consumption and the Security in the Wireless Sensor Networks ..... | 157 |
| <i>Hyeopgeon Lee, Kyoungghwa Lee, and Yongtae Shin</i>                                                                |     |
| A Proposal of Privacy Management Architecture .....                                                                   | 161 |
| <i>Yoshinori Osawa, Satoru Imamura, Atsushi Takeda, Gen Kitagata, Norio Shiratori, and Kazuo Hashimoto</i>            |     |
| Securely Hiding the Real Servers from DDoS Floods .....                                                               | 165 |
| <i>Mohamad Samir A. Eid and Hitoshi Aida</i>                                                                          |     |

## **Symposium Student Session V: Social Network**

|                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Differentiated Incentive Rewarding for Social Networking Services .....                                                                    | 169 |
| <i>Kazufumi Yogo, Ryoichi Shinkuma, Tatsuro Takahashi, Taku Konishi, Satoko Itaya, Shinichi Doi, and Keiji Yamada</i>                      |     |
| Incentive Rewarding Method for Information Propagation in Social Networks .....                                                            | 173 |
| <i>Yoshinori Takata, Ryo Hashimoto, Ryoichi Shinkuma, Tatsuro Takahashi, Naoki Yoshinaga, Satoko Itaya, Shinichi Doi, and Keiji Yamada</i> |     |
| Robust Estimation of Message Importance Using Inferred Inter-recipient Trust for Supporting Email Triage .....                             | 177 |
| <i>Sho Tsugawa, Kazuya Takahashi, Hiroyuki Ohsaki, and Makoto Imase</i>                                                                    |     |

## **Symposium Student Session VI: P2P**

|                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------|-----|
| A Metric of Search Efficiency and Preventability of Polluted Contents for Unstructured Overlay .....                             | 181 |
| <i>Hiroaki Yamanaka, Toru Fujiwara, and Shingo Okamura</i>                                                                       |     |
| An Overlay Authentication Network for Active Utilization of Private Information .....                                            | 185 |
| <i>Akihiro Nakarai, Akira Sakatoku, Atsushi Takeda, Gen Kitagata, Debasish Chakraborty, Kazuo Hashimoto, and Norio Shiratori</i> |     |

## **Management and Application of Ubiquitous Sensor Data (EUCASS 2010)**

|                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------|-----|
| Missing Data Imputation Using Regression Tree Model for Sparse Data Collected via Wide Area Ubiquitous Network ..... | 189 |
| <i>Yuka Higashijima, Atsushi Yamamoto, Takayuki Nakamura, Motonori Nakamura, and Masato Matsuo</i>                   |     |
| Resource & Configuration Management for WSN in the Future Internet .....                                             | 193 |
| <i>Muhammad Shoaib Siddiqui and Choong Seon Hong</i>                                                                 |     |
| Evaluation of B+Tree-Based Multi-dimensional Range Search Algorithm for P2P Networks .....                           | 197 |
| <i>Nobuhiko Matsuura, Hiroshi Mineno, Norihiro Ishikawa, and Tadanori Mizuno</i>                                     |     |
