

2nd IFAC Workshop on Dependable Control of Discrete Systems 2009

**Bari, Italy
10-12 June 2009**

Editors:

Maria Pia Fanti

Marigrazia Dotoli

ISBN: 978-1-61738-993-1

Printed from e-media with permission by:

CONTENTS

Keynote papers

| | |
|--|---|
| Real-time scheduling and control of cluster tools in semiconductor manufacturing | 1 |
| <i>MengChu Zhou</i> | |
| Model-based approaches for railway safety, reliability and security: The experience of Ansaldo STS | 2 |
| <i>Francesco Flammini</i> | |
| Model-based safety analysis | 3 |
| <i>Wolfgang Reif</i> | |

Scheduling and control of semiconductor manufacturing systems

| | |
|--|----|
| Live WS3PR | 4 |
| <i>Ding Liu, ZhiWu Li, and MengChu Zhou</i> | |
| Wafer sojourn time fluctuation caused by activity time variation in dual-arm cluster tools | 10 |
| <i>Naiqi Wu, MengChu Zhou</i> | |
| Redundant tasks in multitasking control of discrete event systems | 16 |
| <i>Klaus Schmidt, José Eduardo Ribeiro Cury</i> | |
| Design and verification of time-constrained workflow with multi-level security | 22 |
| <i>Awatef Hicheur, Kamel Barkaoui, and Hanifa Boucheneb</i> | |

Validation and verification of logic controllers

| | |
|--|----|
| Direct model checking of PLC programs in IL | 28 |
| <i>Bastian Schlich, Jörg Brauer, Jörg Wernerus, and Stefan Kowalewski</i> | |
| Verification and validation of safety applications based on PLC open safety function blocks using timed automata in Uppaal | 34 |
| <i>Doaa Soliman, Georg Frey</i> | |
| Neutral representation, visualization and verification of logic controllers represented by function block diagrams | 40 |
| <i>Stephan Fischer, Sven Lohmann, and Sebastian Engell</i> | |
| Verification of infinite-step opacity and analysis of its complexity | 46 |
| <i>Anooshiravan Saboori, Christoforos N. Hadjicostis</i> | |

Fault detection and isolation of discrete event systems

| | |
|---|----|
| Diagnosis of discrete event systems using labeled Petri nets | 52 |
| <i>Maria Paola Cabasino, Alessandro Giua, and Carla Seatzu</i> | |
| Part-whole hierarchical modularization of fault-tolerant and goal-based autonomic systems | 58 |
| <i>Luca Pazzi, Marco Pradelli</i> | |
| Monitoring of temporal requirements with stocharts observation patterns, application to a level crossing control system | 63 |
| <i>Mohamed Ghazel, Malek Masmoudi, and Armand Toguyéni</i> | |
| Discrete event model-based approach for fault detection and isolation of manufacturing systems | 69 |
| <i>Alexandre Philippot, Moamar Sayed-Mouchaweh, Véronique Carré-Ménétrier, and Bernard Riera</i> | |

Supervisor and controller synthesis

| | |
|---|----|
| Towards optimal supervisory control of probabilistic discrete event systems | 75 |
| <i>Vera Pantelic, Mark Lawford</i> | |

| | |
|---|----|
| Controller aggregation for distributed discrete-event supervisors on a shared-medium network..... | 81 |
| <i>Klaus Schmidt</i> | |
| Controllability of (max,+) formal power series | 87 |
| <i>Jan Komenda, Sébastien Lahaye, and Jean-Louis Boimond</i> | |
| Max-plus algebraic modeling and control of high-throughput screening systems | 93 |
| <i>Thomas Brunsch, Jörg Raisch</i> | |

Fault forecasting, diagnosis and identification of discrete event systems

| | |
|---|-----|
| Identification of DES unobservable behaviour by Petri nets | 99 |
| <i>Mariagrazia Dotoli, Maria Pia Fanti, Agostino Marcello Mangini, and Walter Ukovich</i> | |
| Determination of distinguishing input sequences for the diagnosis of discrete-event systems..... | 105 |
| <i>Jan Lunze</i> | |
| Online diagnosis of discrete events systems based on Petri nets and integer linear programming..... | 111 |
| <i>Francesco Basile, Pasquale Chiacchio, and Gianmaria De Tommasi</i> | |
| Algebraic expression of the structure function of a subclass of dynamic fault trees | 117 |
| <i>Guillaume Merle, Jean-Marc Roussel, Jean-Jacques Lesage, and Andrea Bobbio</i> | |

Applications

| | |
|--|-----|
| Real time estimation of supersonic projectile roll angle using magnetometers: In-lab experimental validation | 123 |
| <i>Sebastien Changey, Emmanuel Pecheur, and Pierre Wey</i> | |
| Toward improved verification and certification of legacy systems | 128 |
| <i>Timothy L. Johnson, Syed Suhaib</i> | |
| Introduction to model-based reliability evaluation of wireless sensor networks | 134 |
| <i>Claudia Jäggle, Jörg Neidig, Thomas Grosch, and Falko Dressler</i> | |
| A multi-criteria economic evaluation framework for control system configuration – Framework and case study | 140 |
| <i>Peng Zhao, Yan Lu, Mohsen Jafari, and Davood Golmohammadi</i> | |

Petri net based reliability, availability, maintainability and safety modelling I

| | |
|---|-----|
| Benefit of railway infrastructure diagnosis systems on its availability..... | 146 |
| <i>Lisandro Mariano Quiroga, Stefan Wegele, and Eckehard Schnieder</i> | |
| The use of Petri nets models in railway traffic applications | 151 |
| <i>Stefano Ricci</i> | |
| Analysis of the unavailability of I & C functions important to safety in a nuclear power plant..... | 157 |
| <i>Yongjian Ding, Jörg R. Müller</i> | |
| Application of extended coloured stochastic Petri nets for modelling and analysis of RAMS+C of production systems | 163 |
| <i>Steffen Nebel, Andrea Dieter, and Bernd Bertsche</i> | |

Applications to healthcare systems

| | |
|---|-----|
| Modelling and validation of alarm management workflow in healthcare integrating IHE-PCD profile and coloured Petri nets | 169 |
| <i>Sara Gaion, Maria Pia Fanti, Stefano Mininel, Walter Ukovich, and Federica Vatta</i> | |
| Agent-based architecture for the healthcare of patients at the emergency department..... | 175 |
| <i>Amani Daknou, Hayfa Zgaya, Slim Hammadi, and Hervé Hubert</i> | |
| A dynamic workflow modelling and performance analysis methodology for complicated clinical pathway with variations | 181 |
| <i>Gang Du, Zhibin Jiang, Xiaodi Diao, Yan Ye, Huiran Liu, and Yang Yao</i> | |

| | |
|---|-----|
| Dependable model for enzyme kinetics using Petri networks | 187 |
| <i>Radu Dobrescu, Stefan A. Popa, and Matei Dobrescu</i> | |

Petri net based reliability, availability, maintainability and safety modelling II

| | |
|---|-----|
| Improving system safety modelling in accordance to IEC 61508 by using Monte Carlo simulations | 193 |
| <i>Jörg R. Müller, Tobias Ständer, and Eckehard Schnieder</i> | |
| Conceptual foundation of dependable systems modelling..... | 198 |
| <i>Eckehard Schnieder, Lars Schnieder, and Jörg R. Müller</i> | |
| Dependability & safety modeling and calculation: Petri nets | 203 |
| <i>Jean-Pierre Signoret</i> | |

Bayesian networks in dependability I

| | |
|--|-----|
| Modeling cascading failure propagation through dynamic Bayesian networks..... | 209 |
| <i>Andrea Bobbio, Daniele Codetta-Raiteri, Stefania Montani, and Luigi Portinale</i> | |
| Bayesian networks applications on dependability, risk analysis and maintenance..... | 215 |
| <i>Gabriela Medina Oliva, Philippe Weber, Christophe Simon, and Benoit Iung</i> | |
| Dependability modelling of repairable systems using Bayesian networks | 221 |
| <i>Martin Neil, David Marquez</i> | |

Petri net based reliability, availability, maintainability and safety modelling III

| | |
|--|-----|
| Colored Petri net inversion for backward reachability analysis..... | 227 |
| <i>Mohamed Bouali, Pavol Barger, and Walter Schön</i> | |
| Controller synthesis with very simplified linear constraints in PN model..... | 233 |
| <i>Abbas Dideban, Maysam Zareiee, and Hassane Alla</i> | |
| On the optimal design of linear networked systems | 239 |
| <i>Vadim Azhmyakov, Rosalba Galvan-Guerra, Ruben Velazquez Cuevas, and Alex S. Poznyak</i> | |

Bayesian networks in dependability II

| | |
|--|-----|
| Maintenance planning of safety protective systems using dynamic Bayesian networks | 245 |
| <i>Takehisa Kohda, Hiroki Tokunaga</i> | |
| Modeling and troubleshooting with interventions applied to an auxiliary truck braking system | 251 |
| <i>Anna Pernestål, Håkan Warnquist, and Mattias Nyberg</i> | |
| Failure prognostic by using dynamic Bayesian networks..... | 257 |
| <i>Kamal Medjaher, Jean Yves Moya, and Noureddine Zerhouni</i> | |

Reconfiguration for discrete events control

| | |
|---|-----|
| Synthesis of restart states for manufacturing cell controllers | 263 |
| <i>Kristin Andersson, Bengt Lennartson, and Martin Fabian</i> | |
| Reconfiguration of a distributed information fusion system..... | 269 |
| <i>Éric Benoit, Marc-Philippe Huget, Patrice Moreaux, and Olivier Passalacqua</i> | |
| Verification of functional constraints for safe product driven control..... | 275 |
| <i>Pascale Marangé, David Gouyon, Jean-François Petin, and Bernard Riera</i> | |
| Functional safety of component-based embedded control systems | 281 |
| <i>Atef Gharbi, Mohamed Khalgui, and Hans-Michael Hanisch</i> | |

Test and diagnosis for dependability improvement

| | |
|--|-----|
| An algorithm for active diagnosis of hybrid systems casted in the DES framework..... | 287 |
| <i>Mehdi Bayouadh, Louise Travé-Massuyès</i> | |
| Active probing for diagnosis of emergent faults..... | 293 |
| <i>Timothy L. Johnson, Sahika Genc, and Stephen F. Bush</i> | |
| Test sequence construction from SFC specification | 299 |
| <i>Julien Provost, Jean-Marc Roussel, and Jean-Marc Faure</i> | |
| A residual inspired approach for fault localization in DES | 305 |
| <i>Matthias Roth, Jean-Jacques Lesage, and Lothar Litz</i> | |
