2010 AMOS CONFERENCE PROCEEDINGS

ORBITAL DEBRIS

Session Chair, Thomas Schildknecht, Astronomical Institute, University of Bern

AIUB Efforts to Survey, Track, and Characterize Small-Size Objects at High Altitudes 9
Thomas Schildknecht, Astronomical Institute, University of Bern

Optical Photometric Observations of GEO Debris 16
Patrick Seitzer, University of Michigan

Detection of Faint GEO Objects Using Population and Motion Prediction 23
Masahiko Uetsuhara, Kyushu University

Orbital Debris Observation via Laser Illuminated Optical Measurement Techniques 33
Makoto Tagawa, Kyushu University

NON-RESOLVED OBJECT CHARACTERIZATION

Session Chair, Matt Hejduk, SRA International

Satellite Attitude from a Raven Class Telescope 43
Daron Nishimoto, Pacific Defense Solutions, LLC

Noise-Tolerant Spectral Signature Classification in Non-Resolved Object Detection Using Adaptive Lattice Neural Networks 53
Mark Schmalz, Department of Computer and Information Science and Engineering, University of Florida

Surface Material Characterization from Multi-Band Optical Observations 61
Doyle Hall, Boeing LTS – AMOS

Investigation of Properties and Characteristics of High-Area-to-Mass-Ratio Objects Based on Examples of Optical Observation Data of Space Debris Objects in GEO-like Orbits 76
Carolin Fruh, Astronomical Institute, University of Bern

Catalogue-Wide Satellite Photometric Behavior Paradigms 83
Matt Hejduk, SRA International

Phase Angle: What is it good for? 93
Paul Kervin, Air Force Research Laboratory – Maui

Analysis of Unresolved Spectral Infrared Signature for the Extraction of Invariant Features 104
Anil Chaudhary, Applied Optimization, Inc.

INTEGRATING DIVERSE DATA

Session Chair, Kim Luu, Air Force Research Laboratory

Operational Impact of Improved Space Tracking on Collision Avoidance in the Future LEO Space Debris Environment 114
David Sibert, ExoAnalytic Solutions, Inc.

Monte Carlo Method for Collision Probability Calculations Using 3D Satellite Models 124
Willem de Vries, Lawrence Livermore National Laboratory

How the Space Data Center Is Improving Safety of Space Operations 134
T.S. Kelso, Center for Space Standards & Innovation

Global Space Situational Awareness Sensors 139
Brian Weeden, Secure World Foundation

Sharing Space Situational Awareness Data 149
Duane Bird, United States Strategic Command

ADAPTIVE OPTICS AND IMAGING

Session Chairs, Michael Hart, University of Arizona, Steward Observatory, CAAO and Glenn Tyler, The Optical Sciences Company

Multi-Conjugate Adaptive Optics Test-Bed for Horizontal Propagation 154
Sergio Restaino, Naval Research Laboratory

Exploiting Spectral Correlations for Segmentation and Shape Determination from Hyperspectral Datacubes of Rotating Satellites 162
Sudhakar Prasad, Department of Physics and Astronomy, University of New Mexico

Daytime Image Measurement and Reconstruction for Space Situational Awareness Applications 172
Michael Roggeman, Pacific Defense Solutions, LLC

Characterization of Atmospheric Turbulence Effects Over 149 km Propagation Path Using Multi-Wavelength Laser Beacons 185
Mikhail Vorontsov, School of Engineering, University of Dayton

Measurments of Tilt and Focus for Sodium Beacon Adaptive Optics on the Starfire 3.5 Meter Telescope 197
Robert Johnson, Air Force Research Laboratory, Directed Energy Directorate, RDS

Nonstationary EO/IR Clutter Suppression and Dim Object Tracking 205
Alexander Tartakovsky, Argo Science Corp. and University of Southern California

First Resolved Images of a Spacecraft in Geostationary Orbit with the Keck-II 10 m Telescope 215
Jack Drummond, Air Force Research Laboratory, Directed Energy Directorate, RDSAM

Recent Advances in High-Resolution MEMS DM Fabrication and Integration 221
Thomas Bifano, Boston University

Adaptive Optics at the World's Biggest Optical Telescope 229
Michael Hart, Steward Observatory, The University of Arizona

Differential Photometry in Adaptive Optics Imaging 239
Szymon Gladysz, European Organisation for Astronomical Research in the Southern Hemisphere

Improved Climatological Characterization of Optical Turbulence for Space Optical Imaging and Communications 249
Randall Alliss, Northrop Grumman Information Systems

ASTRODYNAMICS

Session Chair, Terry Alfriend, Texas A&M University

Object Correlation and Maneuver Detection Using Optimal Control Performance Metrics 259
Marcus Holzinger, University of Colorado at Boulder

Egdeworth Filters for Space Surveillance Tracking 269
Joshua Horwood, Numerica Corporation

Large-Scale Simulation of a Process for Cataloguing Small Orbital Debris 279
Alex Pertica, Lawrence Livermore National Laboratory

Almost-Optimal Sensor Tasking Using Auction Methods 288
Richard Hujsak, Analytical Graphics, Inc.

Dynamic Tasking of Networked Sensors Using Covariance Information 297
Kim Luu, Air Force Research Laboratory

Correlation and Initial Orbit Determination for Short-Arc Optical Observations 307
Kohei Fujimoto, Department of Aerospace Engineering Sciences, University of Colorado at Boulder

MODELING

Session Chair, Keric Hill, Pacific Defense Solutions

Integration of Space Weather into Space Situational Awareness 317
Geoffrey Reeves, Los Alamos National Laboratory

A Parallel, High-Fidelity Radar Model 326
Benjamin Fasenfast, Lawrence Livermore National Laboratory

Application of Parallel Discrete Event Simulation to the Space Surveillance Network 336
David Jefferson, Lawrence Livermore National Laboratory

A Bayesian Approach to Multi-Sensor Track Correlation 346
Matthew Horsley, Lawrence Livermore National Laboratory

Numerical and Probabilistic Analysis of Asteroid and Comet Impact Hazard Mitigation 356
Catherine Plesko, Los Alamos National Laboratory

Satellite Collision Modeling with Physics-Based Hydrocodes: Debris Generation Predictions of the Iridium-Cosmos Collision Event and Other Impact Events 363
H. Keo Springer, Lawrence Livermore National Laboratory

K_p Forecast Model Using Unscented Kalman Filtering 374
Charles Wetterer, Colorado Professional Resources, LLC

Real Time Polarization Light Curves for Space Debris and Satellites 384
John Stryjewski, CSC-ISTEF

SYSTEMS

Session Chair, Riki Maeda, Pacific Defense Solutions

Space Debris Characterization Using Thermal Imaging Systems 398
James Dawson, Dynetics, Inc.

An Overview of Wide-Field-of-View Optical Designs for Survey Telescopes 409
Mark Ackermann, Sandia National Laboratories

Optimizing Orbital Debris Monitoring with Optical Telescopes 428
James Shell, U.S. Air Force, Space Innovation and Development Center

Satellite Imaging and Characterization with Optical Interferometry 445
Anders Jorgensen, New Mexico Institute of Mining and Technology

Status and Progress in the Space Surveillance and Tracking Segment of ESA's Space Situational Awareness Programme 458
Emmet Fletcher, European Space Agency

Space Domain Awareness for Manned GEO Servicing 467
Travis Blake, DARPA/TTO

POSTER PRESENTATIONS

Session Chair, Bernie Klem, Arnold Engineering Development Center

Photon Sieve Space Telescope 484
Geoff Andersen, USAF Academy

Carbon Fiber Reinforced Polymer (CFRP) Optics Quality Assessment for Lightweight Deployable Optics 491
Jonathan Andrews, Naval Research Laboratory

Maui4: A 24 Hour Haleakala Turbulence Profile 499
William Bradford, PDS, LLC

Characterization of Orbital Debris Photometric Properties Derived from Laboratory-Based Measurements 517
Heather Cowardin, ESCG/Jacobs Technology

Test of Neural Network Techniques Using Simulated Dual-Band Data of LEO Satellites 527
Anthony Dentamaro, Boston College

Advances in Polarimetric Deconvolution 537
Kurtis Engelson, Air Force Institute of Technology

Fabra-ROA Baker-Nunn Camera at Observatori Astronomic del Montsec: An Instrument Update for Space Debris Observation 548
Octavi Fors, Observatori Fabra, Reial Academia de Ciencies i Arts de Barcelona, Barcelona, Spain / Department d'Astronomia i Meteorologia i Institut de Ciencies del Cosmos (ICC), Universitat de Barcelona (UB/IEEC)

Small Space Launch: Origins & Challenges 554
Thomas Freeman, USAF, Launch Test Squadron

Advanced Curvature Deformable Mirrors 557
Christ Ftaclas, Institute for Astronomy, University of Hawaii

SSA Image Quality Modeling 563
David Gerwe, Boeing

Novel Segmentation Technique to Enhance Detection of Fast Moving Objects with Optical Sensors 570
Oleg Gusyatin, MIT Lincoln Laboratory

Advances in Satellite Conjunction Analysis 577
Robert Hall, Analytical Graphics, Inc.

Information Theoretic Characterizations of Coded Imaging-Based Space Object Identification 587
Douglas Hope, Department of Physics and Astronomy, University of New Mexico

Fast PSF Reconstruction Using the Frozen Flow Hypothesis 594
Stuart Jeffries, Institute for Astronomy, University of Hawaii

A Scalable Visualization System for Improving Space Situational Awareness 603
Ming Jiang, Lawrence Livermore National Library

The Long Wavelength Array (LWA): A Large HF/VHF Array for Solar Physics, Ionospheric Science, and Solar Radar 613
Namir Kassim, Naval Research Laboratory

Discrimination of Closely-Spaced Geosynchrous Satellites – Phase Curve Analysis & New Small Business Innovative Research (SBIR) Efforts 623
Paul LeVan, Air Force Research Laboratory

ElectroDynamic Debris Eliminator (EDDE): Design, Operation, and Ground Support 628
Eugene Levin, Star Technology and Research, Inc.

Technical Analysis of Commercially Hosted Optical Payloads for Enhanced SSA 637
Jonathan Lowe, Analytical Graphics, Inc.

Pay Me Now or Pay Me More Later: Start the Development of Active Orbital Debris Removal Now 646
Darren McKnight, Integrity Applications Inc.

Preliminary Astrometric Results from the PS1 Demo Month and Routine Survey Operations 667
David Monet, U.S. Naval Observatory

Maximizing Multi-Core Performance of the Weather Research and Forecast Model Over the Hawaiian Islands 674
Kevin Roe, Maui High Performance Computing Center

Threat Assessment of Small Near-Earth Objects 680
Eileen Ryan, Magdalena Ridge Observatory, New Mexico Institute of Mining and Technology

Operational Impact of Improved Space Tracking on Collision Avoidance in the Future LEO Space Debris Environment 684
David Sibert, ExoAnalytic Solutions, Inc.

Cross Strip Readout Detectors for High Time Resolution Imaging in the 120nm to 900nm Wavelength Regime 694
Oswald Siegmund, Space Sciences Laboratory, University of California at Berkeley

Fawkes Information Management for Space Situational Awareness 703
Scott Spetka, ITT Corp. and SUNY Institute of Technology

Assessment of Spacecraft Operational Status Using Electro-Optical Predictive Techniques 711
Dave Swann, Arnold Engineering Development Center

Determination of Spin Axis Orientation of Geosynchronous Objects Using Space-Based Sensors: An Initial Feasibility Investigation 723
Brad Wallace, Defence Research and Development, Canada

Highly Efficient Screening for Point-Like Targets via Concentric Shells 731
Jan Wassenberg, Fraunhofer IOSB

APPENDIX

Air Force Maui Optical & Supercomputing Site Capabilities Tutorial 741

List of Participants 742

Conference Program 747
