International Conference on Noise and Vibration Engineering 2010

(ISMA 2010)

Including USD 2010

Leuven, Belgium
20 - 22 September 2010

Volume 1 of 7

Editors:

P. Sas **B. Bergen**

ISBN: 978-1-61782-277-3

KEYNOTE PAPERS

Keynote
Session KEY

Silent trains for the future - an industrial approach for low noise design 1
S. Leth, Bombardier Transportation, Sweden

Signal Decomposition for Symptom Enhancement : A journey from Fourier analysis through time/frequency analysis to blind source separation 15
R.B. Randall, University of New South Wales, Australia

ISMA2010 PAPERS

Acoustic testing
Session AT

Bayesian focusing: a unified approach to inverse acoustic radiation 35
J. Antoni, University of Technology of Compiègne, France

Determination of the acoustic damping characteristics of an annular tail-pipe 47
R. Boonen, P. Sas, E. Vandenbulck, K.U.Leuven, Belgium

Modal analysis of a grand piano soundboard 59
R. Corradi, Politecnico di Milano, Italy
P. Faziola, Fazioli Pianoforti, Italy
S. Marforio, A. Paluello, F. Ripamonti, G. Squicciarini, Politecnico di Milano, Italy

Noise characterization of pulsating hydraulic sources 73
G. Pavic, F. Chevillotte, INSA Lyon, France

Experimental analysis of the Very Near Field produced by different acoustic sources 85
L. Soria, V.C. Belgiovine, Politecnico di Bari, Italy
P. Aarnoutse, H. Van der Auweraer, K. Janssens, LMS International, Belgium

On the variations of acoustic absorption peak with particle velocity in Micro-Perforated Panels at high level of excitation 97
R. Tayong, T. Dupont, Ph. Leclaire, LRMA ISAT, France

Development and application of a new method for the in-situ measurement of sound absorption. 109
Y.H. Wijnant, E.R. Kuipers, A. de Boer, University of Twente, Netherlands

Development of sound quality stabilization method of multi function peripheral 123
M. Yamaguchi, S. Shirakata, N. Okubo, T. Toi, Chuo University, Japan

Active noise control
Session ANC

Smart materials to reduce noise radiated by a flat structure: Active and semiactive approaches 137
O. Adarraga, M. Seco, U. Morales, F.J. Estensoro, N. Murillo, INASMET-Tecnalia, Spain

On effectiveness of subarray adaptive beamforming for suppressing near-field moving noise 139
C. Bao, D. Si, J. Pan, University of Western Australia, Australia

Virtual sensors for local, three dimensional, broadband multiple-channel active noise control and the effects on the quiet zones 151
P.S. Booij, A.P. Berkhoff, TNO, Netherlands

Active Absorber with variable resonance frequency for acoustic control 167
O. Cherrier, V. Budinger, Institut Supérieur de l'Aéronautique et de l'Espace, France
F. Simon, ONERA, France

Review and future perspectives on Active Sound Quality Control 177
L.P.R. de Oliveira, University of Sao Paulo, Brazil

A novel design strategy for iterative learning control based on approximate fuzzy data model (AFDM) for active noise control: Theoretical background 193
M.D. Redel-Macias, D. Santamaría-García, A.J. Cubero-Atienza, University of Cordoba, Spain

An experimental investigation of a hybrid active/passive panel for increased transmission loss at low frequencies 201
D.A. Siviero, A. Goldstein, S. Souza, J.R.F. Arruda, L. Coser, Universidade Estadual de Campinas, Brazil

Active vibration control

Session AVC

Robust Control of a Two-Floors Building Model using Active Mass Driver 215
G.L.C.M. Abreu, V. Lopes Jr., Universidade Estadual Paulista, Brazil
M. Brennan, University of Southampton, United Kingdom

Dynamic characterisation of different magneto-sensitive natural rubbers for application in vibration isolation 227
A. Alberdi, N. Gil-Negrete, J. Vinolas, CEIT and TECNUN (University of Navarra), Spain
L. Kari, KTH, Sweden
F.J. Nieto, CEIT and TECNUN (University of Navarra), Spain

Theoretical and Experimental Analysis of a Tuneable Vibration Absorber using Acceleration and Displacement Feedback 233
N. Alujevic, I. Tomac, University of Split, Croatia
P. Gardonio, Universita degli Studi di Udine, Italy

Stability and performance limits for the active vibration isolation on a 2 DOF system using a reactive force actuator and velocity feedback 251
N. Alujevic, University of Split, Croatia
H. Wolf, University of Zagreb, Croatia
P. Gardonio, Universita degli Studi di Udine, Italy

Control laws for chatter suppression in milling using an inertial actuator 265
A. Bilbao-Guillerna, A. Barrios, I. Mancisidor, IDEKO, Spain
N. Loix, Micromega Dynamics, Belgium
J. Muñoa, IDEKO, Spain

A new method to optimize the Current Flowing technique to the purposes of semi-passive multi-modal vibration reduction 279
A. Cigada, S. Manzoni, Politecnico di Milano, Italy
M. Redaelli, Agusta Westland, Italy
M. Vanali, Politecnico di Milano, Italy

Modular Adaptronic Active 3DOF Stiffness/Damping Element: Design and Control 295
M. El-said, F. Al-Bender, H. Van Brussel, K.U.Leuven, Belgium

The Receptance Method in Partial Pole Placement of Structures 309
M. Ghandchi Tehrani, R.N.R. Elliott, J.E. Mottershead, University of Liverpool, United Kingdom

Discrete vs. distributed transducers for ASAC: a numerical study 319
D. Ghiglione, K.U.Leuven, Belgium
L.P.R. de Oliveira, University of Sao Paulo, Brazil
W. Desmet, K.U.Leuven, Belgium

Modeling and analysis of laminate composite plates with embedded active-passive piezoelectric networks 335
T.C. Godoy, M.A. Trindade, University of Sao Paulo, Brazil

Theoretical analysis and experimental validation of a switchable stiffness system for shock isolation. 351
D.F. Ledezma-Ramirez, Universidad Autónoma de Nuevo León, Mexico
N. Ferguson, M. Brennan, University of Southampton, United Kingdom

A Multichannel Active-Adaptive Vibration Control System applied to an Aeronautical Structure 367
J. Marra, P.J.P. Gonçalves, L.C.S. Goes, Instituto Tecnológico de Aeronáutica, Brazil

Pole Assignment for Asymmetric Systems Using State-feedback with Time Delay 383
H. Ouyang, University of Liverpool, United Kingdom
K.V. Singh, Miami University, United States

Iterative Learning Control of the filling phase of wet clutches 391
appears in MSSP vol. 24(7) - ISMA2010 special issue
G. Pinte, Flanders' Mechatronics Technology Centre, Belgium
B. Depraetere, K.U.Leuven, Belgium
W. Symens, Flanders' Mechatronics Technology Centre, Belgium
J. Swevers, P. Sas, K.U.Leuven, Belgium

LeCoPro - Learning Control for Production Machines 409
G. Pinte, W. Symens, Flanders' Mechatronics Technology Centre, Belgium
B. Stallaert, J. Swevers, K.U.Leuven, Belgium

Noise and vibration attenuation of a circular saw blade with applied piezoceramic patches and negative capacitance shunt networks 411
M. Pohl, Deutsches Zentrum für Luft- und Raumfahrt, Germany

Compensation filter for feedback control units with proofmass electrodynamic actuators 425
J. Rohlfing, S.J. Elliott, University of Southampton, United Kingdom
P. Gardonio, Universita degli Studi di Udine, Italy

Comparison of active and passive modes of piezoelectric patch actuators for scaled helicopter rotor blade vibration suppression 441
S. Shevtsov, South Center of Russian Academy, Russian Federation
D. Tsahalis, University of Patras, Greece
M. Flek, I. Samochenko, ROSTVERTOL Helicopter Production, Russian Federation

The concept of 'dynamic materials' and active control of vibrations of sandwich plates 457
S.V. Sorokin, Aalborg University, Denmark

Model Predictive Control of Motion and Vibration Suppression of Parallel Machine with Active Platform 467
P. Svatos, Z. Sika, J. Zavrel, M. Valasek, P. Steinbauer, T. Vampola, Czech Technical University in Prague, Czech Republic

A case study towards the application of NMPC to a continuously variable semi-active suspension 479
M. Witters, J. Swevers, K.U.Leuven, Belgium

Vibration Control of Flexible Aircraft with Respect to Passengers Comfort 495
P. Zuziak, Z. Sika, M. Valasek, T. Vampola, Czech Technical University in Prague, Czech Republic
T. Klimmek, Deutsches Zentrum für Luft- und Raumfahrt, Germany

Adaptronics
Session ADAP

Development of new lead-free piezoceramics for actuator applications 509
E.-M. Anton, W. Jo, Technische Universität Darmstadt, Germany
D. Damjanovic, EPFL, Lausanne, Switzerland
J. Rödel, Technische Universität Darmstadt, Germany

Modelling of an Active Mounted Plate by means of the Superposition of a Rigid Body and an Elastic Model 511
T. Bartel, H. Atzrodt, S. Herold, T. Melz, Fraunhofer Institute for Structural Durability and System Reliablity LBF, Germany

Adaptive multichannel control of time-varying broadband noise and vibrations 525
A.P. Berkhoff, TNO, Netherlands

An Approach to Control the Stability in an Active Load-Carrying Beam-Column by One Single Piezoelectric Stack Actuator 535
G.C. Enss, Technische Universität Darmstadt, Germany
R. Platz, Fraunhofer Institute for Structural Durability and System Reliablity LBF, Germany
H. Hanselka, Technische Universität Darmstadt, Germany

Implementation and Characterisation of the Dynamic Behaviour of a Three-dimensional Truss Structure for Testing Smart Devices 547
D. Flaschenträger, J. Thiel, Fraunhofer Institute for Structural Durability and System Reliablity LBF, Germany
J. Rausch, Technische Universität Darmstadt, Germany
H. Atzrodt, S. Herold, T. Melz, Fraunhofer Institute for Structural Durability and System Reliablity LBF, Germany
R. Wertschützky, H. Hanselka, Technische Universität Darmstadt, Germany

Active Sound Quality Control of Vehicle Interior Sound 559
M. Gallo, Y. Komiya, K. Janssens, J. Anthonis, H. Van der Auweraer, LMS International, Belgium
L.P.R. de Oliveira, University of Sao Paulo, Brazil

Electret transducers for measuring acceleration and structure-borne sound 571
J. Hillenbrand, S. Haberzettl, T. Motz, G.M. Sessler, Technische Universität Darmstadt, Germany

Approaches for distributed active and passive vibration compensation 581
D. Mayer, Fraunhofer Institute for Structural Durability and System Reliability LBF, Germany
S. Herold, M. Kauba, T. Koch, Fraunhofer Institute for Structural Durability and System Reliablity LBF, Germany

An Operational Modal Analysis approach for the performance assessment of passenger car active suspension systems 595
L. Soria, Politecnico di Bari, Italy
A. delli Carri, Università degli Studi di Brescia, Italy
B. Peeters, J. Anthonis, H. Van der Auweraer, LMS International, Belgium

Aeroacoustics and flow noise

Session AA

Single tone excitation techniques for determination of non-linear acoustic properties of perforates 597
H. Bodén, KTH, Sweden

Innovative Computational Aeroacoustic Approach for Automotive Exhaust Systems 611
J. Caradonna, O. Schwartz, Faurecia Emissions Control Technologies, France
P. di Francescantonio, STS, Scientific and Technical Software, Italy

Low frequency range response of a plate to different turbulent boundary layer excitation models 625
S. De Rosa, F. Franco, D. Gaudino, University of Naples "Federico II", Italy

Simplified exhaust pipe noise radiation modeling using DG and FPS techniques 639
M. Hornikx, W. De Roeck, W. Desmet, K.U.Leuven, Belgium

A Geometrical Near-Field Extension of Amiet's Theory for Incoming Turbulence Noise and Broadband Noise Scattering 655
K. Kucukcoskun, LMS International, Belgium
J. Christophe, C. Schram, Von Karman Institute for Fluid Dynamics, Belgium
J. Anthoine, ONERA, France
M. Tournour, LMS International, Belgium

Experimental study on the aeroacoustic characterization of exhaust muffers in the presence of mean flow 669
B. Vanelderen, W. De Roeck, D. Vandeun, Y. Mattheys, P. Sas, W. Desmet, K.U.Leuven, Belgium

Aeroacoustic sources identification using generalized inverse beamforming 685
P.A.G. Zavala, W. De Roeck, K.U.Leuven, Belgium
K. Janssens, LMS International, Belgium
J.R.F. Arruda, Universidade Estadual de Campinas, Brazil
P. Sas, W. Desmet, K.U.Leuven, Belgium

Civil applications

Session CIV

Study of the vibrating stationary state of a sheet pile during a vibratory pile driving 701
V. Hanus, A. Zuerbes, S. Maas, D. Waldmann, University of Luxembourg, Luxembourg

Comparison of linear and nonlinear static and dynamic behaviour of prestressed and non-prestressed concrete slab elements 717
J. Mahowald, V. Bungard, D. Waldmann, S. Maas, A. Zuerbes, University of Luxembourg, Luxembourg
G. De Roeck, K.U.Leuven, Belgium

Dynamic characterization of the Basilica of Maxentius in Rome 729
A. Pau, F. Vestroni, University of Rome "La Sapienza", Italy

Operational Modal Analysis in presence of dynamic interaction among adjacent buildings - an assessment 743
C. Rainieri, G. Fabbrocino, University of Molise, Italy
G. Manfredi, University of Naples "Federico II", Italy
M. Dolce, Department of Civil Protection, Italy

Finite element analysis of ground borne vibrations in sensitive buildings using inputs from free field measurements 759
T.N. Tuan Chik, J.M.W. Brownjohn, M. Petkovski, University of Sheffield, United Kingdom

Seismic Damage Assessment for a Residential Masonry Building Using Aftershock Monitoring of Wenchuan Earthquake 773
W. Zhou, H. Li, Harbin Institute of Technology, China
L. Mevel, M. Döhler, B.X. Lam, INRIA, France
C. Mao, China Earthquake Administration, China
J. Ou, Dalian University of Technology, China

Condition monitoring - damage detection
Session CMDD

Damage detection in time-varying systems by means of the PCA method 783
A. Bellino, L. Garibaldi, A. Fasana, S. Marchesiello, Politecnico di Torino, Italy

A modal approach to identify fatigue damage in threaded connections of large scale tubular structures. 795
T.T. Bui, G. De Roeck, K.U.Leuven, Belgium
J. Van Wittenberghe, P. De Baets, W. De Waele, Ghent University, Belgium

Damage detection in vibration signals using non parametric time-frequency representations 809
O. Cardona-Morales, Universidad Nacional de Colombia, Colombia
A. Orozco-Ángel, Universidad Tecnológica de Pereira, Colombia
G. Castellanos-Dominguez, Universidad Nacional de Colombia, Colombia

Multimodal statement networks for diagnostic applications 817
W. Cholewa, Silesian University of Technology, Poland

An approximate technique for damage identification in beams using shifts in natural frequencies 831
E. Ekinovic, University of Zenica, Bosnia and Herzegowina

EMA-FEA damage detection in motorcycle component 845
F. Garesci, University of Messina, Italy
F. Petrone, University of Catania, Italy

An Approach to Quantify the Influence of Uncertainties in Model-based Usage-Monitoring of Load-Carrying Systems 857
J.F. Koenen, Technische Universität Darmstadt, Germany
R. Platz, Fraunhofer Institute for Structural Durability and System Reliablity LBF, Germany
H. Hanselka, Technische Universität Darmstadt, Germany

Vibration based health monitoring for a lightweight truss structure: a comparative assessment of several statistical time series methods 867
appears in MSSP vol. 24(7) - ISMA2010 special issue
F.P. Kopsaftopoulos, S.D. Fassois, University of Patras, Greece

Detection, identification, and quantification of sensor fault 893
J. Kullaa, Aalto University, Finland

Vibration based structural health monitoring of a composite plate with stiffeners 909
R. Loendersloot, T.H. Ooijevaar, L. Warnet, A. de Boer, R. Akkerman, University of Twente, Netherlands

Health monitoring of off-shore wind energy power plant with use of adaptive modal filter 925
K. Mendrok, T. Uhl, AGH - University of Science and Technology, Poland

STFT and JTFA Analyses of Vibroacoustic Signal for the On-Line Combustion Process Assessment in Direct Injection Turbocharged Diesel Engines 939
J. Merkisz, M. Waligórski, Poznan University of Technology, Poland

Model of Turbomachine Casing Vibration and Its Application to Condition Monitoring 955
A. Mironov, P. Doronkin, D un D centrs, Latvia

Advanced Aspects of Mode-Selective Excitation of Ultrasonic Guided Waves 969
J. Moll, C.-P. Fritzen, University of Siegen, Germany

Comparison of subspace analysis methods for fault detection in industrial systems 985
V.-H. Nguyen, C. Rutten, J.-C. Golinval, University of Liège, Belgium

Statistical feature extraction of pre-lockup torsional vibration signals for condition monitoring of wet friction clutches 999
A.P. Ompusunggu, P. Sas, H. Van Brussel, F. Al-Bender, K.U.Leuven, Belgium
S. Vandenplas, Flanders' Mechatronics Technology Centre, Belgium

Damage location using added masses in a Piper Tomahawk aircraft wing. 1015
E. Papatheou, G. Manson, R.J. Barthorpe, K. Worden, University of Sheffield, United Kingdom

Vibrational techniques to assess the stability of spherical press-fitted implants : preliminary results 1029
L. Pastrav, Groep T, Belgium
S. Leuridan, K.U.Leuven, Belgium
K. Denis, Groep T, Belgium
H. Delport, AZ Waasland, Belgium
Ph. Debeer, UZ Pellenberg, Belgium
L. De Wilde, UZ Gent, Belgium
G. Van der Perre, W. Desmet, J. Vander Sloten, K.U.Leuven, Belgium

A piezoelectric paint thick-film strain sensor for vibration monitoring purposes 1045
I. Payo, University of Castilla La Mancha, Spain
J.M. Hale, University of Newcastle Upon Tyne, United Kingdom

Shaft crack detection in a steam turbine: experimental evidences and model-based simulations 1055
P. Pennacchi, A. Vania, Politecnico di Milano, Italy

Efficient frequency analysis for wireless structural health monitoring systems 1071
J.E.T. Penny, Aston University, United Kingdom
M.I. Friswell, Swansea University, United Kingdom
D.J. Inman, University of Bristol, United Kingdom

Crack Detection in Mistuned Repeating Structures 1083
A.U. Rehman, K. Worden, J.A. Rongong, University of Sheffield, United Kingdom

Identification of Dynamic Loads Generated by Trains in Motion using Piezoelectric Sensors 1099
K. Sekula, P. Kolakowski, Institute of Fundamental Technological Research, Poland

The Effect of Lateral Quasi-Static loading on Damage Indexes Based on Modal Parameters of Retrofitted RC Frame Model 1119
A. Vimuttasoongviriya, N. Kwatra, M. Kumar, Thapar University, India

Damage localisation using various signal filtering approaches 1135
T. Wandowski, P. Malinowski, W. Ostachowicz, Institute of Fluid-Flow Machinery PASci, Poland

Damping
Session D

Avoiding of clutch excited judder using an active clamping force control 1151
A. Albers, M. Meid, S. Ott, Karlsruhe Institute of Technology, Germany

Using modal damping for full model transient analysis. Application to pantograph/catenary vibration. 1167
J.-Ph. Bianchi, SDTools, France
E. Balmès, SDTools / Arts et Metiers ParisTech, France
G. Vermot des Roches, SDTools / Ecole Centrale Paris, France
A. Bobillot, SNCF, France

Experimental investigation of damping flexural vibrations using two-dimensional acoustic 'black holes' 1181
E.P. Bowyer, D.J. O'Boy, V.V. Krylov, Loughborough University, United Kingdom
F. Gautier, Université du Maine, France

Is damping additive? On the accumulated effect of interface damping and material damping. 1193
K. Dovstam, P. Göransson, KTH, Sweden

An internal damping in epoxy composite systems 1207
D. Kroisova, Technical University of Liberec, Czech Republic

Feasibility of nonlinear absorbers for transient vibration reduction 1219
F. Petit, M. Loccufier, D. Aeyels, Ghent University, Belgium

Identifying slip-slap forces in the contact interface using dual-mode excitation 1235
F. Pourahmadian, H. Ahmadian, H. Jalali, Iran University of Science and Technology, Iran (Islamic Republic of)

Friction dynamic with elasto-plasticity in transient behavior 1245
M. Ruderman, F. Hoffmann, T. Bertram, Technische Universität Dortmund, Germany

Damping Identification with Finite Integration Method Similar to the Continuous Wavelet Transform 1259
J. Slavic, M. Boltezar, University of Ljubljana, Slovenia

A rubber mount model. Application to automotive equipment suspension 1269
B. Thomas, VALEO, France
L. Manin, INSA Lyon, France
Ph. Goge, VALEO, France
R. Dufour, INSA Lyon, France

Design Procedure of a Nonlinear Vibration Absorber : Enhancement of the Amplitude Robustness 1285
R. Viguié, G. Kerschen, University of Liège, Belgium

Nonlinear static and dynamic properties of Metal Rubber dampers 1301
H. Wang, Beijing University of Aeronautics and Astronautics, China
J.A. Rongong, University of Sheffield, United Kingdom
G.R. Tomlinson, The University of Sheffield, United Kingdom
J. Hong, Beijing University of Aeronautics and Astronautics, China

Linear Friction Damper Consisting of Cylindrical Friction Block and Inclined Lever (Investigation of Fundamental Property) 1317
H. Yamaguchi, H. Yoshida, National Defense Academy, Japan

Dynamics of bridges

Session BRID

Ambient Vibration and Forced Excitation Tests of a Composite Bridge: Environmental influences and nonlinear effects on the dynamic properties 1329
V. Bungard, J. Mahowald, D. Waldmann, S. Maas, A. Zuerbes, University of Luxembourg, Luxembourg
G. De Roeck, K.U.Leuven, Belgium

Long-term monitoring and data analysis of the Tamar Bridge 1345
E.J. Cross, K.-Y. Koo, J.M.W. Brownjohn, K. Worden, University of Sheffield, United Kingdom

PI-57 bridge: monitoring the effects of temperature variation on modal parameters 1359
A. Cury, Laboratoire Central des Ponts et Chaussées, France
C. Cremona, Ministère de l'Écologie, de l'Energie, du Développement durable et de la Mer, France

Iterative procedures for the uncoupled analysis of vehicle-bridge dynamic interaction 1371
A. Feriani, Università degli Studi di Brescia, Italy
M.G. Mulas, L. Candido, Politecnico di Milano, Italy

Temperature Effects on Modal Variability of a Stress-Ribbon Footbridge under Operational Conditions 1387
W.-H. Hu, A. Cardoso, F. Magalhães, E. Caetano, A. Cunha, University of Porto, Portugal

Identification of suspension bridge parameters under operational loads 1403
J. Iwaniec, M. Iwaniec, P. Kurowski, AGH - University of Science and Technology, Poland

Continuous Dynamic Monitoring of an arch bridge: strategy to eliminate the environmental and operational effects and detect damages 1419
F. Magalhães, A. Cunha, E. Caetano, University of Porto, Portugal

The effect of deck parameters on out-of-plane vibrations of a stay-bridge cable 1435
M.R. Marsico, D.J. Wagg, S.A. Neild, University of Bristol, United Kingdom

Maximum resonance and cancellation phenomena in elastically-supported beams and its application to railway bridges under High-Speed traffic 1447
M.D. Martinez-Rodrigo, A. Doménech, Universitat Jaume I, Spain
P. Museros, Universidad de Granada, Spain

Damage Assessment of a Bridge under Varying Environmental Conditions 1463
V. Meruane, W. Heylen, K.U.Leuven, Belgium

Damage localization in bridges using multi-scale filters and large strain sensor 1477
G. Tondreau, A. Deraemaeker, Université Libre de Bruxelles, Belgium

Vibration serviceability of footbridges: a comparative study of 3 design methodologies 1491
K. Van Nimmen, K.U.Leuven, Belgium
P. Van den Broeck, B. Gezels, Katholieke Hogeschool Sint-Lieven, Belgium
G. De Roeck, K.U.Leuven, Belgium

Destructive testing of a bridge to compare the calculated response of the model to verify predictive capabilities 1507
K. Veggeberg, National Instruments, United States

The influence of temperature varying material parameters on the dynamic behaviour of short span railway bridges 1519
V. Zabel, M. Brehm, S. Nikulla, Bauhaus-University Weimar, Germany

Dynamics of rotating machinery
Session RMD

Accounting for rotation in a multi-stage cyclo-symmetric model – a case study 1531
E. Balmès, SDTools / Arts et Metiers ParisTech, France
I. Bucher, Technion - Israel Institute of Technology, Israel

Influence of rotor-shaft material damping on modal and directional frequency response characteristics 1543
M. Chouksey, S.V. Modak, J.K. Dutt, IIT, Delhi, India

Control of Flexible Rotor Vibration using Electromagnetic Actuator Based on Active Disturbance Rejection Technique 1559
A.S. Das, National Institute of Technology Rourkela, India
J.K. Dutt, IIT, Delhi, India

Dynamic Modeling of Reciprocating Compressors with Vertical Axis 1573
P.R.G. Kurka, Universidade Estadual de Campinas, Brazil
K.L.G. Paulino, Federal University in São Paulo, Brazil
J.H. Izuka, Universidade Estadual de Campinas, Brazil

On the identification of foundations in rotating machinery using modal parameters 1589
L.U. Medina, Universidad Simon Bolivar, Venezuela
N. Feng, E. Hahn, University of New South Wales, Australia

Reduced models identification from experimental modal analysis of non-self adjoint systems – rotordynamics, active control and vibroacoustics applications 1605
M. Ouisse, E. Foltête, FEMTO-ST Institute, France

Unbalance Compensation in a Rotor-Bearing System by Dynamic Stiffness Control And Acceleration Scheduling 1621
G. Silva-Navarro, F. Lopez-Medina, A. Cabrera-Amado, Centro de Investigacion y de Estudios Avanzados del I.P.N., Mexico

Modelling a Rotating Shaft as an Elastically Restrained Bernoulli-Euler Beam 1635
T.A.N. Silva, Instituto Superior de Engenharia de Lisboa, Portugal
N.M.M. Maia, Instituto Superior Tecnico, Portugal

A reduced order model based on sector mistuning for the dynamic analysis of mistuned bladed disks 1647
P. Vargiu, C.M. Firrone, S. Zucca, M.M. Gola, Politecnico di Torino, Italy

Dynamic testing: methods and instrumentation
Session DT

Identification of Piezo-electric Actuators Using a Simple Test Technique 1663
S. Alkhfaji, S.D. Garvey, University of Nottingham, United Kingdom

Correlation of airbag fabric material mechanical failure characteristic for Out of Position applications 1679
C. Bastien, M.V. Blundell, D. Stubbs, J. Christensen, Coventry University, United Kingdom
J. Hoffmann, M. Freisinger, Toyoda Gosei Europe NV, Germany
R. Van Der Made, Tass, Netherlands

Optical vibration measurement and frequency response analysis on large structures under multiple excitation load conditions 1693
H. Berger, M. Klein, GOM mbH, Germany
F. Lambert, GOM France SAS, France
B. Levadoux, ONERA, France

Using a Graphics Processor to Accelerate DSP Calculations 1703
J.R. Blough, Michigan Technological University, United States

Dynamic characterization of air spring for AVC applications 1717
L. Bregant, M. Spagnol, R. Moras, University of Trieste, Italy

Evaluation of the Vibration Test Severity by FDS and ERS 1725
D.H. Cho, Korea Aerospace Industries, LTD., Korea (Republic of)

Dynamics of constant intension of cable in lunar gravity simulation system 1737
S. Fan, J. Bing, M. Liu, Beijing Institute of Spacecraft Environment Engineering, China

Input Sensorless FRF Measurements by Laser Excitation System 1747
N. Hosoya, Shibaura Institute of Technology, Japan
I. Kajiwara, Hokkaido University, Japan
T. Hosokawa, Shibaura Institute of Technology, Japan

Derivation of shaker spectra for structural certification from helicopter flight test vibration measurements 1759
J.H. van Tongeren, R. Maas, National Aerospace Laboratory, NLR, Netherlands

Shock transmission within a coupled system 1775
K. Vijayan, J. Woodhouse, University of Cambridge, United Kingdom

Environmental noise mapping
Session ENM

Self Adaptive Grids for Noise Mapping 1785
C. Asensio, M. Recuero, M. Ruiz, M. Ausejo, I. Pavón, Universidad Politécnica de Madrid, Spain

Evironmental noise mapping using measuements in transit 1795
G. Bennett, E.A. King, J. Curn, V. Cahill, Trinity College Dublin, Ireland
F. Bustamante, Northwestern University, United States
H.J. Rice, Trinity College Dublin, Ireland

Evaluation of Noise Levels affecting Schools in Cairo - Egypt 1811
M. Kamal, R. Abdallah El-Rahman, S. Tawfiq, The Egyptian Environmental Affairs Agency, Egypt

Solving large area noise mapping tasks 1821
H. Stapelfeldt, Stapelfeldt Ing. GmbH / SoftNoise GmbH, Germany
D. Siepmann, Stapelfeldt Ingenieurgesellschaft mbH, Germany
A. Czerwinski, Bonn University, Germany
C. Hoar, NGIS China Ltd., China

Experimental dynamic substructuring
Session EDS

Uncertainty in Experimental/Analytical Substructuring Predictions: A Review with Illustrative Examples 1833
M.S. Allen, D.C. Kammer, University of Wisconsin - Madison, United States
R.L. Mayes, Sandia National Laboratories, United States

Problems in Using Experimental Data for Dynamic Substructuring of a Lumped Parameter System 1851
A. Culla, University of Rome “La Sapienza”, Italy
W. D’Ambrogio, Università dell’Aquila, Italy
A. Fregolent, A. Schiavone, University of Rome “La Sapienza”, Italy

The role of interface DoFs in decoupling of substructures based on the dual domain decomposition 1863
appears in MSSP vol. 24(7) - ISMA2010 special issue
W. D’Ambrogio, Università dell’Aquila, Italy
A. Fregolent, University of Rome “La Sapienza”, Italy

Characterization of Measurement Errors in Experimental Frequency Based Substructuring 1881
D. de Klerk, Müller-BBM VAS B.V., Netherlands
R. Visser, Delft University of Technology, Netherlands

Transfer Dynamics Cancellation in Dynamic Substructuring Tests 1891
J.L. du Bois, B. Titurus, N.A.J. Lieven, University of Bristol, United Kingdom

Dynamic substructuring in metal cutting machine chatter 1915
A. Liljerehn, Sandvik Coromant AB, Sweden
A. Johansson, T. Abrahamsson, Chalmers University of Technology, Sweden

Design Studies for the Transmission Simulator Method to Generate Experimental Dynamic Substructures 1929
R.L. Mayes, M. Arviso, Sandia National Laboratories, United States

A Substructuring Technique Based on Measured and Computed Impulse Response Functions of Components 1939
D.J. Rixen, Delft University of Technology, Netherlands

A Family of Substructure Decoupling Techniques Based on a Dual Assembly Approach 1955
S.N. Voormeeren, D.J. Rixen, Delft University of Technology, Netherlands

FP7 ITN MID-FREQUENCY - CAE methodologies for mid-frequency analysis

Session MHFITN

Application of the Wave Based Method for Mid-Frequency analysis on a Room Acoustics Case 1969
O. Atak, J. Huijssen, M. Rychtarikova, B. Pluymers, W. Desmet, K.U.Leuven, Belgium

Stochastic Wave Finite Element: Formulation, Validation and Generalisation 1985
M.A. Ben Souf, Ecole Centrale de Lyon, France
F. Bouchoucha, Ecole Nationale d'Ingenieur de Sfax, Tunisia
M. Ichchou, O. Bareille, Ecole Centrale de Lyon, France
M. Haddar, Ecole Nationale d'Ingenieur de Sfax, Tunisia

The analysis of random systems with combined parametric and non-parametric uncertainty models. 1997
A. Cicirello, R.S. Langley, University of Cambridge, United Kingdom

Application of WBT for unbounded acoustic radiation problems with an approach for substitution of complex boundary shapes 2011
I. Elbahnasy, T. Mócsai, P. Silar, H.-H. Priebsch, Virtual Vehicle (ViF), Austria

New insights of an energy flow visualization into vehicle design 2025
M.S. Lenzi, G. Stigliano, S. Donders, LMS International, Belgium
B. Pluymers, W. Desmet, K.U.Leuven, Belgium

Non resonant contribution and energy distributions using Statistical modal Energy distribution Analysis (SmEdA) 2039
R. Stelzer, N. Totaro, G. Pavic, J.-L. Guyader, L. Maxit, INSA Lyon, France

Inverse methods - load identification
Session INV

In-situ characterisation of structure borne sound from a building mounted wind turbine 2055
A.S. Elliott, A.T. Moorhouse, University of Salford, United Kingdom

Dynamic force identification by means of state augmentation: a combined deterministic-stochastic approach 2069
E.-M. Lourens, E. Reynders, G. Lombaert, G. De Roeck, G. Degrande, K.U.Leuven, Belgium

Vibration sources identification using vibratory measurements injected in a local Finite Element Model 2081
C. Renzi, INSA Lyon, France
C. Pézerat, Université du Maine, France
J.-L. Guyader, INSA Lyon, France

Estimation of the injected structure-borne sound power using inversely measured contact forces 2089
P. Schevenels, Belgian Building Research Institute, Belgium
P.J.G. van der Linden, Qsources BVBA, Belgium
G. Vermeir, K.U.Leuven, Belgium

Derivation of the force interaction within strongly coupled systems – application to diesel engine oil pumps 2103
M. Thivant, VIBRATEC, France
A. Carbonelli, Ecole Centrale de Lyon, France
P. Bouvet, VIBRATEC, France

Lightweight panels and structures
Session LW

Design and implementation of a transmission suite in order to characterise the vibro-acoustic properties of lightweight materials and structures 2117
C. Gonzalez Diaz, M. Vivolo, B. Pluymers, D. Vandepitte, W. Desmet, K.U.Leuven, Belgium

Static and dynamic testing of the full scale helicopter rotor blades 2131
M. Luczak, B. Peeters, K. Dziedziech, LMS International, Belgium

Lightweight metal to metal bonded Aluminum panels acoustic design 2145
G. Pagnozzi, M. Aversano, Piaggio Aero Industries S.p.A., Italy

Parametric analyses of lightweight metallic sandwich plates 2155
T. Polito, F. Franco, S. De Rosa, University of Naples “Federico II”, Italy

Modal and acoustic characterization of structural components for fuselage applications 2169
T. Polito, F. Marulo, University of Naples “Federico II”, Italy
A. Sollo, M. Aversano, G. Pagnozzi, Piaggio Aero Industries S.p.A., Italy

Numerical and experimental acoustical characterization of fuel pumps and tanks employed in the automotive field 2185
G. Scarselli, Università del Salento, Italy
L. Lecce, University of Naples "Federico II", Italy
F. Fortunato, L. Di Matteo, Elasis Scpa, Italy

An experimental-numerical study on the vibro-acoustic characterization of honeycomb lightweight panels 2197
M. Vivolo, B. Pluymers, D. Vandepitte, W. Desmet, K.U.Leuven, Belgium

Medium and high frequency techniques

Session MHF

Spatial energy decay and indirect couplings in statistical energy analysis 2213
M. Barbagallo, S. Finnveden, KTH, Sweden

An explicit Wave Based - Finite Element model as alternative to the DtN Finite Element Method 2229
B. Bergen, B. Van Genechten, D. Vandepitte, W. Desmet, K.U.Leuven, Belgium

A Floquet-Bloch decomposition of the elastodynamical equations for the computation of wave' dispersion in damped mechanical systems 2241
M. Collet, M. Ouisse, FEMTO-ST Institute, France
M. Ruzzene, Georgia Institute of Technology, United States
M. Ichchou, Ecole Centrale de Lyon, France

On the prediction of damping loss factor of fuselage panels with viscous-elastic materials using Periodic Structure Theory and Finite Element method 2257
J.A. Cordioli, G. Bratti, C. Stumpf, A. Lenzi, Federal University of Santa Catarina, Brazil
V. Cotoni, ESI R&D, United States

An efficient wave based method for 2D dynamic poroelastic problems with corner stress singularities 2267
E. Deckers, D. Vandepitte, W. Desmet, K.U.Leuven, Belgium

Application of the wave based prediction technique to building acoustical problems 2285
A. Dijckmans, G. Vermeir, K.U.Leuven, Belgium

Fast Multipole BEM Modeling of Head Related Transfer Functions of a Dummy Head and Torso 2301
P. Fiala, Budapest University of Technology and Economics, Hungary
J. Huijssen, B. Pluymers, K.U.Leuven, Belgium
R. Hallez, LMS International, Belgium
W. Desmet, K.U.Leuven, Belgium

Using the Wave Finite Element Method to Build Spectral Elements 2317
A. Goldstein, J.R.F. Arruda, P.B. Silva, F. Nascimento, Universidade Estadual de Campinas, Brazil

Simulation of pass-by noise of automotive vehicles in the mid-frequency range using Fast Multipole BEM 2331
J. Huijssen, K.U.Leuven, Belgium
P. Fiala, Budapest University of Technology and Economics, Hungary
R. Hallez, LMS International, Belgium
W. Desmet, K.U.Leuven, Belgium

Advanced Spectral Finite Element Method for Computational Acoustics in the Mid-Frequency Range 2351
A. Hüppe, M. Kaltenbacher, Alpen-Adria-Universität Klagenfurt, Austria

On hidden potentials of the wave based method. 2361
J. Jegorovs, Fraunhofer ITWM, Germany

Acoustic Design Sensitivity Analysis of 3D vibro-acoustic problems using the Wave Based Method 2371
K. Koo, GIST, Korea (Republic of)
B. Pluymers, W. Desmet, K.U.Leuven, Belgium
S. Wang, GIST, Korea (Republic of)

On some enhancement of the VTCR for mid-frequency acoustics and vibrations 2381
L. Kovalevsky, P. Ladevèze, H. Riou, Ecole Normale Supérieure de Cachan, France

The application of the Wave Based Technique for 3D free-field radiation calculation using a residual error controlled adaptive strategy 2393
T. Mócsai, Virtual Vehicle (ViF), Austria
F. Diwoky, AVL List GMBH, Austria
H.-H. Priebsch, Virtual Vehicle (ViF), Austria

Wave based technique for the analysis of fully coupled structural-acoustic unbounded problems 2407
J. Rejlek, H.-H. Priebsch, Virtual Vehicle (ViF), Austria

Acoustic Energy Distribution in Multi-component Structures - Dynamical Energy Analysis versus numerically exact results 2425
G. Tanner, D. Chappell, H. Ben Hamdin, S. Giani, University of Nottingham, United Kingdom
C. Seidel, F. Vogel, inuTech GmbH, Germany

On the use of a hybrid wave based-statistical energy approach for the analysis of vibro-acoustic systems in the mid-frequency range 2437
K. Vergote, W. Desmet, D. Vandepitte, K.U.Leuven, Belgium

Modal testing: methods and case studies
Session MTC

Solar Impulse - How to validate the numerical model of a superlight aircraft with A340 dimensions! 2451
M. Boeswald, Y. Govers, Deutsches Zentrum für Luft- und Raumfahrt, Germany
A. Vollan, AeroFEM GmbH, Switzerland
M. Basien, Solar Impulse SA, Switzerland

Modal Testing of an Inflatable, Self-Rigidizing Toroidal Satellite Component 2467
M. Danesh Pazhooh, M.A. Dokainish, S. Ziada, McMaster University, Canada

Flexible shaker excitation signals for improved FRF estimation and and non-linearity assessment 2475
M. Gatto, University of Rome “La Sapienza”, Italy
B. Peeters, LMS International, Belgium
G. Coppotelli, University of Rome “La Sapienza”, Italy

Correlation of Acoustic Fluid-Structural Interaction Method for Modal Analysis with experimental results of a Hydraulic Prototype Turbine Runner in Water 2489
B. Graf, Voith Hydro Holding GmbH & Co KG, Germany
L. Chen, Voith Hydro York, United States

Global static and dynamic car body stiffness based on a single experimental modal analysis test 2505
J. Helsen, K.U.Leuven, Belgium
L. Cremers, BMW AG, Germany
P. Mas, LMS International, Belgium
P. Sas, K.U.Leuven, Belgium

Simulation of Payne effect of elastomeric isolators with a harmonic balance method 2523
V. Jaumouillé, EADS, France
J.-J. Sinou, Ecole Centrale de Lyon, France
B. Petitjean, EADS, France

Practical Aspects of Shaker Measurements for Modal Testing 2539
M.A. Peres, R.W. Bono, The Modal Shop, Inc., United States
D.L. Brown, University of Cincinnati, United States

Archive Format Requirements for Long Term Storage of Dynamic Signal Data 2551
A.W. Phillips, R.J. Allemang, University of Cincinnati, United States

Noise Leakage Suppresion in Multivariate FRF Measurements Using Periodic Excitations 2559
R. Pintelon, G. Vandersteen, J. Schoukens, Y. Rolain, Vrije Universiteit Brussel, Belgium

Identification of elastic and damping properties of sandwich structures based on high resolution modal analysis of point measurements. 2577
M. Rébillat, X. Boutillon, LMS International, France

Experimental Modal Analysis in Submerged Cantilever Plate with Nearby Rigid Wall 2591
C.G. Rodriguez, F.G. Pierart, L.R. Contzen, University of Concepcion, Chile
E. Egusquiza, Technical University of Catalonia, Spain

A strategy for experimental investigation of machine tool dynamics N/A
C. Schedlinski, ICS Engineering GmbH, Germany
P.D. Scharpf, M. Weber, MAG IAS GmbH, Germany

Model updating and correlation

Session MU

Dynamic finite element updating based on the Hu-Washizu variational principle 2609
R. Castro, University of Cordoba, Spain
R. Gallego, University of Granada, Spain
D. Talaslidis, University of Thessaloniki, Greece
G. Rus, University of Granada, Spain

Identification of Parameters for a Simplified Model of Large Rotating Electric Machines Using Time Series and Updating Techniques 2623
S. da Silva, S.B. Shiki, F. Franzoni, Western Paraná State University (UNIOESTE), Brazil
G.C. Brito Jr., Itaipu Binacional, Brazil

Stochastic model updating of an aircraft like structure by parameter covariance matrix adjustment 2639
Y. Govers, Deutsches Zentrum für Luft- und Raumfahrt, Germany
M. Link, University of Kassel, Germany

Model Updating via Manifold Distance Minimization 2657
Y. Halevi, CNR - ITIA, Italy
D. Vilensky, Technion - Israel Institute of Technology, Israel
B.N. Datta, Northern Illinois University, United States

Model Updating Using Operational Data 2669
T. Lauwagie, Dynamic Design Solutions, Belgium
J. Guggenberger, Müller-BBM GmbH, Germany
J. Strobbe, E. Dascotte, Dynamic Design Solutions, Belgium

The impact of high-fidelity model geometry on test-analysis correlation and FE model updating results. 2679
T. Lauwagie, Dynamic Design Solutions, Belgium
F. Van Hollebeke, Hansen Transmissions, Belgium
B. Pluymers, K.U.Leuven, Belgium
R. Zegels, Materialise, Belgium
P. Verschueren, K.U.Leuven, Belgium
E. Dascotte, Dynamic Design Solutions, Belgium

Updating acoustical FE models: localization of unreliable physical data 2689
A. Progneaux, Université Libre de Bruxelles, Belgium
P. Ladevèze, Ecole Normale Supérieure de Cachan, France
A. Deraemaeker, Ph. Bouillard, Université Libre de Bruxelles, Belgium

Second order approximations in model updating 2701
B. Titurus, University of Bristol, United Kingdom
M.I. Friswell, Swansea University, United Kingdom

Extensions of the MAC criterion to complex modes 2713
P. Vacher, B. Jacquier, A. Bucharles, ONERA, France

Monitoring and diagnostics of rotating machinery
Session RMM

Comparison between angular sampling and angular resampling methods applied on the vibration monitoring of a gear meshing in non stationary conditions. 2727
H. Andre, Université de Lyon, France
Z. Daher, University of Orléans, France
J. Antoni, University of Technology of Compiègne, France
D. Rémond, Université de Lyon, France

An algorithm to diagnose ball bearings faults in servomotors running arbitrary motion profiles 2737
L. Bassi, Tetra Pak Packaging Solutions, Italy
M. Cocconcelli, C. Secchi, R. Rubini, C. Fantuzzi, University of Modena and Reggio Emilia, Italy

The Synchronous (Time Domain) Average revisited 2751
S. Braun, Technion - Israel Institute of Technology, Israel

An Online Intelligent Monitoring Algorithm for car gearboxes faults 2763
D. Crombez, Clemessy, France
H. Chafouk, G. Hoblos, IRSEEM, France

Estimation of the synchronous average under varying rotating speed condition for vibration monitoring 2779
Z. Daher, E. Sekko, University of Orléans, France
J. Antoni, University of Technology of Compiègne, France
C. Capdessus, L. Allam, University of Orléans, France

Reproduction of dynamic load cases on a 13.2 MW test facility for wind turbine gearboxes 2789
F. De Coninck, W. Desmet, P. Sas, K.U.Leuven, Belgium
J. Peeters, R. Huijskens, D. Leimann, Hansen Transmissions, Belgium

A novel approach for the cyclo-non-stationary analysis of speed varying signals 2801
G. D'Elia, Engineering Department University of Ferrara, Italy
Z. Daher, University of Orléans, France
J. Antoni, University of Technology of Compiègne, France

Vibro-acoustic signature analysis of the threshing process in harvesting machines 2815
S. Delvecchio, S. Fiorati, University of Ferrara, Italy
B. Misotten, CNH – R&D crop harvesting, Belgium
P. Sas, K.U.Leuven, Belgium

Geared System Condition Diagnostics Via Torsional Vibration Measurement 2831
M.S. El-Morsy, S.A. Abouel-seoud, E.-A. Rabeih, Helwan University, Egypt

Crack Identification in Rotating Machines with Active Bearings 2843
M.I. Friswell, Swansea University, United Kingdom
G. Litak, Lublin University of Technology, Poland
J.T. Sawicki, Cleveland State University, United States

Linear smoothing of FRF for aicraft engine vibration monitoring 2857
A. Hazan, Université Paris 1, France
M. Verleysen, Université Catholique de Louvain, Belgium
M. Cottrell, Université Paris 1, France
J. Lacaille, Snecma, France

Zebra Tape Butt Joint Correction Algorithm for Rotating Shafts with Torsional Vibrations 2869
K. Janssens, P. Van Vlierberghe, W. Claes, B. Peeters, T. Martens, Ph. D'Hondt, LMS International, Belgium

Identification of inner race defect in radial ball bearing using acoustic emission and wavelet analysis 2883
R. Kumar, Sant Longowal Institute of Engineering and Technology, India
D. Prakash Jena, Robert Bosch Car Multimedia, Germany
M. Bains, Haryana College of Technology and Management, India

Angular and temporal determinism of rotating machine signals : the diesel engine case 2893
appears in MSSP vol. 24(7) - ISMA2010 special issue
Q. Leclère, L. Pruvost, E. Parizet, INSA Lyon, France

Spiral vibrations in power units: modelling and experimental evidences 2905
P. Pennacchi, A. Vania, S. Chatterton, R. Ricci, Politecnico di Milano, Italy

Contactless Diagnostics of Blade Vibration of Low-Pressure Steam Turbine Stages 2921
P. Procházka, F. Vanek, Institute of Thermomechanics AS CR, Czech Republic

Non intrusive Technique for Monitoring Vibration of Operating Turbine Blades 2937
R. Rao, B.K. Dutta, Bhabha Atomic Research Centre, India

Natural roller bearing fault detection by angular measurement of true instantaneous angular speed 2949
appears in MSSP vol. 24(7) - ISMA2010 special issue
L. Renaudin, INSA Lyon, France
F. Bonnardot, IUT Roanne, France
O. Musy, SNR Roulements, France
J.-B. Doray, VOLVO 3P, France
D. Rémond, Université de Lyon, France

Failure diagnostics of a spiral bevel gearbox using EMD and HHT 2965
R. Ricci, P. Pennacchi, M. Lombardi, C. Mirabile, Politecnico di Milano, Italy

Multi-body dynamics and control
Session MB

On modelling and dynamical analysis of railway vehicles vibration 2981
M. Byrtus, V. Zeman, Z. Hlavac, University of West Bohemia, Czech Republic

Electromagnetic forces in elastic multibody systems 2995
M. Henger, R. Schroth, Robert Bosch GmbH, Germany

Active Control of Child Restraint System in Frontal Crash 3003
T. Koizumi, N. Tsujiuchi, Y. Noritou, Doshisha University, Japan

Geometrical Stiffness Matrix in Modal Space for Multibody Analysis of Flexible Bodies with Moderate Deformations 3013
D. Marinkovic, M.W. Zehn , TU Berlin, Germany

Reduced-Order-Model Interpolation for use in Global Modal Parameterization 3021
F. Naets, G. Heirman, W. Desmet, K.U.Leuven, Belgium

Gear noise evaluation through multibody TE-based simulations 3033
A. Palermo, D. Mundo, University of Calabria, Italy
A.S. Lentini, LMS International, Italy
R. Hadjit, P. Mas, LMS International, Belgium
W. Desmet, K.U.Leuven, Belgium

Component mode selection in flexible multibody dynamics with application to cranktrain modelling 3047
S. Ricci, M. Troncossi, A. Rivola, Università di Bologna, Italy

Non-linearities: identification and modelling
Session NL

Non linear dynamics of a whole vehicle FE Model using a Harmonic Balance Method 3061
F. Barillon, Renault, France
J.-J. Sinou, Ecole Centrale de Lyon, France
J.-M. Duffal, Renault, France
L. Jézéquel, Ecole Centrale de Lyon, France

Experimental evaluation of vibration energy harvest with non-linear oscillators 3075
A. Cammarano, S.G. Burrow, D.A.W. Barton, University of Bristol, United Kingdom

Measuring Dynamic Nonlinearities using the Frequency Response and the Hilbert Transform Methods 3087
A. Carrella, University of Bristol, United Kingdom
A. Cappellini, Politecnico di Milano, Italy
M. Feldman, Technion - Israel Institute of Technology, Israel

Study of Excitation Force by Refrigerant Flow in an Electromagnetic Valve of an Outdoor Air Conditioning Unit 3099
Y. Gallais, T. Sato, Tokyo Denki University, Japan
H. Ota, Hitachi Appliances Inc., Japan
H. Takeuchi, Tokyo Denki University, Japan

Prediction of Aeroelastic Response Including Geometric Non-Linearities 3109
Y. Harmin, J.E. Cooper, University of Liverpool, United Kingdom

Principal Component Analysis for Nonlinear Systems 3129
D. Hickey, S. Hoffait, J.I. Rothkegel, G. Kerschen, O. Bruls, University of Liège, Belgium

Comparing the Bispectrum, the Coherence Function and the Hilbert Transform as Methods of Nonlinear Identification. 3145
D. Hickey, University of Liège, Belgium
K. Worden, University of Sheffield, United Kingdom

Model updating of locally nonlinear systems based on Multiharmonic Extended Constitutive Relation Error 3159
I. Isasa, Orona EIC S. Coop., Spain
A. Hot, S. Cogan, E. Sadoulet-Reboul, FEMTO-ST Institute, France

Experimental Detection and Quantification of Structural Nonlinearity Using Homogeneity and Hilbert Transform Methods. 3173
K.A. Kragh, J.J. Thomsen, Technical University of Denmark, Denmark
D. Tcherniak, Bruel and Kjaer Sound and Vibration measurement, Denmark

Nonlinear dynamic interactions between a cable with no axial preload and its casing. Application to automotive gearshift command systems 3189
N. Levecque, Renault, France
L. Manin, T. Nouri-Baranger, R. Dufour, INSA Lyon, France
S. Todeschini, Renault, France

Identification and quantification of nonlinear stiffness and nonlinear damping in resonant circuits 3205
appears in MSSP vol. 24(7) - ISMA2010 special issue
M.L.D. Lumori, University of San Diego, United States
J. Schoukens, J. Lataire, Vrije Universiteit Brussel, Belgium

Modal Testing using Nonlinear Normal Modes: An Experimental Demonstration 3221
M. Peeters, G. Kerschen, J.-C. Golinval, University of Liège, Belgium

Modelling non linear effects in elastomer components, including uncertainties 3237
B. Petitjean, V. Jaumouillé, P. Saad, EADS, France

Identification of Parameters from an Experimental Nonlinear Beam System using Methods for Linear Time Periodic Systems 3247
M.W. Sracic, M.S. Allen, University of Wisconsin - Madison, United States

Operational modal analysis
Session OMA

Operational Modal Analysis of a Rotating Helicopter Blade 3249
A. Agneni, G. Coppotelli, C. Grappasonni, University of Rome "La Sapienza", Italy

Combined use of FRFs and transmissbility functions in an OMAX framework 3263
T. De Troyer, Erasmushogeschool Brussel, Belgium
C. Devriendt, P. Guillaume, Vrije Universiteit Brussel, Belgium
M. Runacres, Erasmushogeschool Brussel, Belgium

Using the Random Decrement Method for the Decentralized Acquisition of Modal Data 3275
A. Friedmann, M. Koch, D. Mayer, Fraunhofer Institute for Structural Durability and System Reliability LBF, Germany

On the separation of a measured structural response in a forced and an ambient part for OMAX testing. 3287
E. Reynders, G. De Roeck, K.U.Leuven, Belgium

On the use of the transmissibility concept for the evaluation of frequency response functions 3303
A.P.V. Urgueira, R.A.B. Almeida, Universidade Nova de Lisboa, Portugal
N.M.M. Maia, Instituto Superior Tecnico, Portugal

Output-only modal parameter identification on least square time-frequency analysis for time-varying structure 3317
S. Zhou, L. Liu, Beijing Institute of Technology, China

Parameter estimation and identification
Session PE

Survey of Modal Techniques Applicable to Autonomous/Semi-Autonomous Parameter Identification 3331
R.J. Allemang, D.L. Brown, A.W. Phillips, University of Cincinnati, United States

Model Parameter Estimation of Structures with Over-damped Poles 3373
M. El-Kafafy, P. Guillaume, Vrije Universiteit Brussel, Belgium

Complex modes identification via Hilbert transform 3391
S. Gabriele, University "Roma Tre" of Rome, Italy
D. Spina, Department of Civil Protection, Italy
C. Valente, A. De Leonardis, University "G. D'Annunzio" of Chieti-Pescara, Italy

Enhanced meta-modelling techniques for analysis of mode crossing, mode veering and mode coalescence in structural dynamics 3405
A. Gallina, L. Pichler, T. Uhl, AGH - University of Science and Technology, Poland

Frequency Response Function measurements using concatenated data records 3423
J. Schoukens, G. Vandersteen, R. Pintelon, Vrije Universiteit Brussel, Belgium

Railway dynamics and ground vibrations
Session RAIL

Calculating Ground-Borne Noise From Ground-Borne Vibration - A Comparison of Different Approaches 3431
K. Alten, H. Friedl, R. Flesch, AIT - Austrian Institute of Technology, Austria

A 3D time domain formulation for the analysis of train induced vibrations 3441
N. Correia dos Santos, J. Barbosa, R. Calçada, Á. Azevedo, R. Delgado, University of Porto, Portugal

Dynamic soil-structure interaction applying a hybrid ITM/FEM approach 3453
G. Frühe, G. Müller, Technische Universität München, Germany

Generation of Rayleigh-type edge waves by laser-initiated airborne shocks 3463
V.B. Georgiev, V.V. Krylov, Loughborough University, United Kingdom
Q. Qin, University of Hull, United Kingdom
K. Attenborough, The Open University, United Kingdom

Vibration dynamics of high speed train with Pareto optimized damping of bogie suspension to enhance safety and comfort 3477
A. Johnsson, V. Berbyuk, M. Enelund, Chalmers University of Technology, Sweden

Contribution of vehicle/track dynamics to the ground vibrations induced by the Brussels tramway 3489
G. Kouroussis, O. Verlinden, C. Conti, University of Mons, Belgium

Predictive maintenance by identification of suspension parameters from inline acceleration measurements 3503
S. Kraft, SNCF, France
G. Puel, Ecole Centrale Paris, France
C. Fünfschilling, SNCF, France
D. Aubry, Ecole Centrale Paris, France

Relating track parameter conditions to squat and corrugation initiation and growth 3519
M. Oregui, Z. Li, Delft University of Technology, Netherlands
R. Dollevoet, ProRail, Netherlands

Fully 3D analysis of HST-track-soil-structure dynamic interaction 3531
A. Romero, P. Galvín, J. Domínguez, Universidad de Sevilla, Spain

Ground motion induced by train passage in urban area 3547
M. Stupazzini, Munich RE, Germany
R. Paolucci, Politecnico di Milano, Italy

Development of a hybrid prediction method for railway induced vibration 3559
H. Verbraken, H. Eysermans, E. Dechief, S. Francois, G. Degrande, G. Lombaert, K.U.Leuven, Belgium

Rail Vehicle lateral comfort improvement of on curve negotiation by means of hold off devices 3573
J. Vinolas, A. Alonso, F.J. Nieto, CEIT and TECNUN (University of Navarra), Spain
J.G. Gimenez, CAF and TECNUN (University of Navarra), Spain

Self-excited vibrations
Session SEV

Bifurcation analysis of an airfoil undergoing plunge stall flutter oscillations in a wind tunnel 3587
N.A. Abdul Razak, Universite of Liège, Belgium
T. Andrianne, G. Dimitriadis, University of Liège, Belgium

Effect of damping on the propensity of squeal instability: A numerical investigation 3603
F. Cantone, F. Massi, INSA Lyon, France

Limit Cycle Oscillations of a Delta Wing in a Low Speed Wind Tunnel 3617
B. Korbahti, Istanbul University, Turkey
E. Kagambage, T. Andrianne, D. Watrin, G. Dimitriadis, University of Liège, Belgium

Application of PVDF foils for the measurements of unsteady pressures on wind tunnel models for the prediction of aircraft vibrations 3633
W. Luber, J. Becker, AEDS-MAS (Military Air System), Germany

Flight Flutter Testing and Clearance of the baseline Configuration of a Developmental Combat Aircraft 3653
R.V. Vaidyanathan, Aeronautical Development Agency, India
E. Hemalatha, Aeronautical Developement Agency, India

Damping identification in an non-linear aeroelastic structure 3667
G.A. Vio, M. Prandina, University of Liverpool, United Kingdom
G. Dimitriadis, University of Liège, Belgium

Smart structures
Session SMART

An energy harvesting mechanism travelling the human intestinal system 3677
N. Cohen, Technion - Israel Institute of Technology, Israel

Vibrational energy harvesting using a multi-degree-of-freedom device 3691
M. Dawson, D.A.W. Barton, University of Bristol, United Kingdom

Application of Multivariable Techniques to Design Experimentally a Flexible Satellite Attitude Control System 3705
J.V.C. de Castro, L.C.G. de Souza, INPE, Brazil

Hydrodynamic Bearing with Electromagnetic Actuators: Rotor Vibration Control and Limitations 3715
D.C. de Moraes, R. Nicoletti, University of Sao Paulo, Brazil

Aeroservoelastic flight control design for a military combat aircraft weapon system 3723
W. Luber, J. Becker, AEDS-MAS (Military Air System), Germany

An adaptive wing with a configuration of Fibre Bragg Grating sensors 3741
M. Mieloszyk, Institute of Fluid-Flow Machinery PASci, Poland
A. Zak, IFFM PASci, Poland
W. Ostachowicz, Institute of Fluid-Flow Machinery PASci, Poland

A hardware in-the-loop simulator of a backpack energy harvester. 3757
E. Papatheou, University of Sheffield, United Kingdom
S.G. Burrow, L.R. Clare, University of Bristol, United Kingdom
N. Sims, Sheffield University, United Kingdom

A Tubular Dielectric Elastomer Actuator: Fabrication, Characterisation and Active Vibration Isolation 3769
R. Sarban, Danfoss PolyPower A/S, Denmark
R. Jones, University of Southern Denmark, Denmark
B.R. Mace, E. Rustighi, University of Southampton, United Kingdom

Elastic travelling waves in multi-dimensional structures with application to self propulsion 3785
E. Setter, I. Bucher, Technion - Israel Institute of Technology, Israel

Substructuring and coupling
Session SC

Fixed interface based double modal synthesis for local damping optimization 3801
D. Brizard, LTDS, France
L. Jézéquel, Ecole Centrale de Lyon, France
B. Troclet, EADS, France

Modeling procedure of a machining center using updating techniques and substructure synthesis 3815
I. Garitaonandia, J. Albizuri, J.M. Hernández, M.H. Fernandes, I. Olabarrieta, University of the Basque Country, Spain
J. Muñoa, IDEKO, Spain

An explicit algebraic reduction technique, involving physical, generalized or modal coordinates 3829
J.-M. Lagache, Peugeot-Citroën, France
S. Assaf, ESTACA, France

Full-scale multibody modeling of a wind turbine based on experimental data 3845
S. Manzato, B. Peeters, A. Toso, LMS International, Belgium
R. Osgood, NREL, United States
Y. Lemmens, H. Van der Auweraer, LMS International, Belgium

Hybrid Reduction of MIMO Systems 3859
J. Stoev, Flanders' Mechatronics Technology Centre, Belgium
J. Mohring, Fraunhofer ITWM, Germany

Transfer path analysis and source identification
Session TPA

On the accuracy reciprocal and direct vibro-acoustic transfer-function measurements on vehicles for lower and medium frequencies 3873
C. Coster, LMS International, Belgium
D. Nagahata, LMS International, Japan
P.J.G. van der Linden, LMS International, Belgium

Estimation of transmitted forces using the transmissibility concept for multiple degree of freedom systems 3887
M. de Matos Neves, IDMEC-IST, Portugal

Open transfer path measurement round-robin using a simplified measurement object 3899
P. Dietrich, B. Masiero, M. Lievens, M. Vorländer, RWTH Aachen University, Germany
S. Bistafa, University of Sao Paulo, Brazil
S.N.Y. Gerges, Federal University of Santa Catarina, Brazil

Application of the Transmissibility Concept in Transfer Path Analysis 3909
appears in MSSP vol. 24(7) - ISMA2010 special issue
P. Gajdatsy, K.U.Leuven, Belgium
K. Janssens, LMS International, Belgium
W. Desmet, K.U.Leuven, Belgium
H. Van der Auweraer, LMS International, Belgium

Multiple coherence method in time domain for an analysis of the transmission paths of noise and vibrations with non stationary signals 3927
A. Gómez González, J. Rodríguez García, Universidad de Santiago de Compostela, Spain
X. Sagartzazu Sorazu, Ikerlan Research Center, Spain
A. Schuhmacher, Bruel and Kjaer Sound and Vibration measurement, Denmark
I. Isasa, Orona EIC S. Coop., Spain

Application of operational noise path analysis to systems with rotational degrees of freedom 3943
D. Tcherniak, Bruel and Kjaer Sound and Vibration measurement, Denmark

Tyre/road noise and experimental validation
Session TYR

Experimental review on interior tire-road noise models 3953
D.A. Bekke, Apollo Vredestein B.V., Netherlands
Y.H. Wijnant, A. de Boer, University of Twente, Netherlands

Operational Transfer Path Analysis: Theory, Guidelines & Tire Noise Application 3961
appears in MSSP vol. 24(7) - ISMA2010 special issue
D. de Klerk, Müller-BBM VAS B.V., Netherlands
A. Ossipov, Goodyear Innovation Center, Luxembourg

Investigation of stress-distribution in a car tyre with regards to rolling resistance 3977
C. Hoever, P. Sabiniarz, W. Kropp, Chalmers University of Technology, Sweden

Measurement of the tire dynamic transfer stiffness at operational excitation levels 3991
P. Kindt, F. De Coninck, P. Sas, W. Desmet, K.U.Leuven, Belgium

Vibration Analysis of Rolling Tire based on Thin Cylindrical Shell Theory 4003
T. Koizumi, N. Tsujiuchi, M. Matsubara, F. Nakamura, Doshisha University, Japan
K. Matsuyama, Toyo Tire & Rubber co., LTD., Japan

Influences on the vibration frequencies of tyre tread blocks 4015
M. Kröger, P. Moldenhauer, University of Technology Bergakademie Freiberg, Germany

Prediction of tyre hub force transmissibility using a shell model of belt and sidewalls 4023
C. Lecomte, University of Southampton, United Kingdom
W. Graham, University of Cambridge, United Kingdom
M. Dale, Land Rover, United Kingdom

Influence of material damping on the prediction of road texture and tread pattern related rolling resistance 4039
I. Lopez Arteaga, Eindhoven University of Technology, Netherlands

Noise reduction by absorbing road surfaces: destroying the horn effect 4053
B. Peeters, M+P - consulting engineers, Netherlands
I. Ammerlaan, Fontys University of Applied Sciences, Netherlands
A. Kuijpers, M+P - consulting engineers, Netherlands

Respective weight of tire vibration and air pumping in the road texture noise 4065
D. Rochoux, F. Biesse, Michelin, France

An implicit and explicit solver for contact problems 4081
J.H. Schutte, J.F. Dannenberg, Y.H. Wijnant, A. de Boer, University of Twente, Netherlands

Vehicle concept modelling

Session VCM

Multi-objective Optimization in Vehicle Concept Modeling 4095
M. Danti, M. Meneguzzo, R. Saponaro, I. Kowarska, Centro Ricerche Fiat SCpA, Italy

Non-linear dynamic vehicle model and its inverse for brake control 4109
E.J.H. de Vries, D.J. Rixen, Delft University of Technology, Netherlands

Conceptual and reduced vehicle models performances enhancement through parameter estimation and neural-networks coupling 4125
M. Gubitosa, T. Tsukano, S. Donders, LMS International, Belgium
W. Desmet, K.U.Leuven, Belgium

Noise control using input power at low and mid-frequencies: sensitivity to structural design changes 4141
A. Jund, L. Gagliardini, PSA - Peugeot Citroën, France

On the Improvement of Concept Modeling of Joints within Simplified Finite Element Models with Application to Structural Dynamics 4149
P. Mihaylova, A. Pratellesi, N. Baldanzini, M. Pierini, Università degli Studi di Firenze, Italy

NVH structural optimization using beams and shells FE concept models in the early car development phase at BMW 4163
A. Moroncini, L. Cremers, BMW AG, Germany
M. Kroiss, IABG, Germany

Advanced Vehicle Body Concept Modeling Approach Using Reduced Models of Beams and Joints 4179
G. Stigliano, LMS International, Belgium
D. Mundo, University of Calabria, Italy
S. Donders, LMS International, Belgium
T. Tamarozzi, K.U.Leuven, Belgium

Investigating the use of reduction techniques in concept modeling for vehicle body design optimization 4191
T. Tamarozzi, K.U.Leuven, Belgium
G. Stigliano, LMS International, Belgium
M. Gubitosa, LMS International, Italy
S. Donders, LMS International, Belgium
W. Desmet, K.U.Leuven, Belgium

Vehicle dynamics

Session VD

A multibody virtual dummy for vibrational analysis in car and motorcycle environments 4205
N. Cofelice, LMS International, Belgium
D. Locatelli, LMS International, Italy
R. Zanni, A. Toso, D. Moreno Giner, J. Kang, S. Donders, LMS International, Belgium

Physically explicit theory of standing waves in tyres at high vehicle speeds 4219
V.V. Krylov, O. Gilbert, Loughborough University, United Kingdom

Ride-comfort of an automobile equipped with colloidal dampers at its frontal suspensions 4233
C.V. Suciu, Fukuoka Institute of Technology, Japan

Effect of disc thickness variation on anti-lock braking system 4247
L. Zhang, P. Ming, Tongji University, China

A novel empirical model of rubber bushing in automotive suspension system 4259
L. Zhang, Z. Yu, Z. Yu, Tongji University, China

Vehicle noise and vibration (NVH)

Session NVH

Driving next generation Powertrain NVH Refinement thru Virtual Design 4275
T. Abe, M.J. Felice, Ford Motor Company, United States

Prediction of Vibro-Acoustic Response of Enclosed Spaces by Using Structural Modification Techniques 4293
Ö. Demirkan, Middle East Technical University, Turkey
I. Basdogan, Koc University, Turkey
H.N. Özgüven, M. Çaliskan, Middle East Technical University, Turkey

Component analysis of random road-noise's multiple loads, using orders analysis during a run-up on rollers 4307
L. Gagliardini, M. Boudin, PSA - Peugeot Citroën, France

NVH optimization methodologies based on bead modification analysis in vehicle body design 4319
A. Maressa, B. Pluymers, K.U.Leuven, Belgium
S. Donders, LMS International, Belgium
W. Desmet, K.U.Leuven, Belgium

Modern Tools and Methods for Low Noise Engine Development 4337
C. Nussmann, C. Steffens, FEV Motorentechnik GmbH, Germany
M. Atzler, RWTH Aachen University, Germany

Application of testing, modal analysis and numerical methods to the detection, prediction and avoidance of squeal noise in automotive brake systems. 4351
C. Parra, J.L. Olazagoitia, J. Biera, CITEAN, Spain

Implementation and performances of a GNSS based system for the determination of the pass-by noise produced by vehicles 4363
E.A. Piana, Università degli Studi di Brescia, Italy
G. Piana, Ariel Logic Srl, Italy

FRF prediction and durability of optical module and headlamp 4373
C. Roucoules, VALEO, France
F. Chemin, Matis, France
C. Cros, VALEO, United States

Design oriented Time/frequency analysis of contact-friction instabilities in application to automotive brake squeal 4383
G. Vermot des Roches, SDTools / Ecole Centrale Paris, France
E. Balmès, SDTools / Arts et Metiers ParisTech, France
R. Lemaire, T. Pasquet, Robert Bosch SAS, France

Approaches to analyse and predict sloshing noise of vehicle fuel tanks 4399
C. Wachowski, J.-W. Biermann, RWTH Aachen University, Germany
R. Schala, Audi AG, Germany

Noise Reduction in Gasoline DI Engines by Isolating the Fuel System 4415
A. Watanabe, Hitachi, Ltd., Japan
A. Hohkita, M. Soma, H. Saeki, T. Ishikawa, Hitachi Automotive Systems, Japan
J. Borg, Hitachi Europe, Germany

Noise Reduction in Vehicle Engineering: A Numerical Optimization Strategy for Car Body Panels 4423
B. Wiedemann, M. Schemat, Altair Engineering GmbH, Germany

Vibration and acoustic analysis for automotive seat structures including porous materials and metal frames 4429
T. Yamaguchi, Gunma University, Japan
T. Yamamoto, S. Maruyama, Nissan Motor Co., Japan
I. Shirota, M. Fujimoto, T. Fukushima, Graduate School of Gunma University, Japan

Vibration isolation and nano-positioning
Session VINP

Control-Structure Interaction in Active Optics of Future Large Segmented Mirrors 4437
R. Bastaits, B. Mokrani, A. Preumont, Université Libre de Bruxelles, Belgium

CLIC quadrupole stabilization and nano-positioning 4453
C. Collette, S. Janssens, K. Artoos, M. Guinchard, C. Hauviller, European Organisation for Nuclear Research, Switzerland

Numerical and experimental modal analysis of a 1-meter deformable mirror 4463
R. Gasmi, J.-L. Dournaux, GEPI, Observatoire de Paris, CNRS, France
R. Cousty, CILAS, France
D. Le Bihan, ONERA, France
B. Crépy, CILAS, France
P. Jagourel, GEPI, Observatoire de Paris, CNRS, France

Intelligent Segmented Deformable Mirrors for Adaptive Optics 4471
G. Rodrigues, R. Bastaits, A. Preumont, Université Libre de Bruxelles, Belgium

Vibro-acoustic modelling and prediction
Session VAM

Vibro-acoustic design of the stage floor reconstruction of a concert hall 4485
F. Augusztinovicz, T. Kimpián, Budapest University of Technology and Economics, Hungary

Structural effects in double porosity materials: analytical modeling and numerical validation 4491
F.-X. Bécot, Matelys - Acoustique & Vibrations, France
O. Dazel, Université du Maine, France
L. Jaouen, Matelys - Acoustique & Vibrations, France

Efficient method to avoid fictitious eigenvalues for indirect BEM 4505
R. D'Amico, A. Pratellesi, M. Pierini, Università degli Studi di Firenze, Italy
M. Tournour, LMS International, Belgium

Transient vibration analysis of spinning discs in centrifugal atomization 4521
H. Deng, H. Ouyang, University of Liverpool, United Kingdom

Analytical Modal Analysis for the stator system of a permanent magnet synchronous motor for hybrid vehicles and calculating of its natural frequencies 4535
Z. El Khawly, Daimler AG, Germany
D. Schramm, Universität Duisburg-Essen, Germany

Simulation of Sound Wave Propagation in Presence of Noise Barrier by using the Partition of the Unity Finite Elements Method : a comparison with analytical methods in 2D cases 4549
V. Everaert, A. Progneaux, Ph. Bouillard, Université Libre de Bruxelles, Belgium

Experimental Validation of an Efficient Procedure for Large Acoustic Radiation Problems 4557
M. Gustafsson, Volvo Powertrain, Sweden
J. Jacqmot, S. Caro, Free Field Technologies, Belgium

Let there be sound: virtual prototyping of GA-transducers. 4567
G.J. Hegemans, COMSOL BV, Netherlands

Integrated Vibro-acoustic Calculation for Composite Structures using Coupled Finite and Boundary Element Method 4577
W.A. Hufenbach, Technische Universität Dresden, Germany
D. Blanchet, Engineering System International GmbH, Germany
M. Gude, M. Dannemann, F. Kolbe, Technische Universität Dresden, Germany

Validated modelling of joints for the sound radiation simulation of gearboxes 4589
J. Neher, B. Wender, University of Applied Sciences Ulm, Germany

Prediction of noise transmission through anisotropic multilayered aircraft fuselage, using finite element models including porous, elastic and fluid domains 4605
M. Östberg, P. Göransson, KTH, Sweden

Microstructure - acoustic properties relationships: Application to membrane and bimodal pore-size distribution effects 4619
C. Perrot, M. Tan Hoang, G. Bonnet, Université Paris-Est, France
F. Chevillotte, INSA Lyon, France
F.-X. Bécot, L. Jaouen, Matelys - Acoustique & Vibrations, France
L. Gautron, R. Combes, Université Paris-Est, France
A. Duval, J.-F. Rondeau, Faurecia Acoustics and Soft Trim Division, France

Sound Transmission Loss of Composite Panels. Probabilistic Analysis and Experimental Results 4631
T. Polito, F. Marulo, University of Naples “Federico II”, Italy

Forced Response of Two-Dimensional Homogenous Media Using the Wave and Finite Element Method 4643
J.M. Renno, B.R. Mace, University of Southampton, United Kingdom

Sensitivity analysis for acoustic waves propagating through homogenized thin perforated layer 4659
E. Rohan, V. Lukes, University of West Bohemia, Czech Republic

Simulation of organ pipe transfer function by means of various numerical techniques 4673
P. Rucz, Budapest University of Technology and Economics, Hungary
J. Angster, Fraunhofer Institute for Building Physics, Germany
F. Augusztinovicz, P. Fiala, Budapest University of Technology and Economics, Hungary
A. Miklós, N.M. Ortiz, Fraunhofer Institute for Building Physics, Germany

Reduced iterative correction algorithm for coupled vibro-acoustic problems 4685
U. Tabak, D.J. Rixen, Delft University of Technology, Netherlands

Sound transmission analysis using the hybrid finite element - wave based approach for coupled vibroacoustic problems 4697
T. Takahashi, Japan Aerospace Exploration Agency, Japan
H. Kaneda, Research Center of Computational Mechanics, Inc, Japan
T. Aoyama, Japan Aerospace Exploration Agency, Japan
B. Pluymers, W. Desmet, K.U.Leuven, Belgium

Simulation of the vibro-acoustic coupling between structures and heavy fluids 4713
B. Van Antwerpen, G. Lielens, D. d’Udekem, Free Field Technologies, Belgium
C. Weissenborn, Germanischer Lloyd, Germany

Modeling acoustic diffuse fields: updated sampling procedure and spatial correlation function eliminating grazing incidences 4723
B. Van den Nieuwenhof, G. Lielens, J.-P. Coyette, Free Field Technologies, Belgium

Prediction of sound absorption coefficient of poroelastic media by a homogenization method 4737
T. Yamamoto, S. Maruyama, Nissan Motor Co., Japan
K. Terada, Tohoku University, Japan
K. Izui, S. Nishiwaki, Kyoto University, Japan

Applications
Session USDA

Managing uncertainties in aero-engine combustor design 4753
V. Cirillo, AVIO SpA, Italy
A. Izzo, University of Napels “Federico II”, Italy
F. Marulo, University of Naples “Federico II”, Italy
B. Palumbo, University of Napels “Federico II”, Italy

A low rank update theory for the vibration analysis of uncertain spot welded structures 4761
R.O. de Alba, B.R. Mace, N. Ferguson, C. Lecomte, University of Southampton, United Kingdom

Performance of linear and nonlinear resonant frequency energy harvesters under uncertain loading conditions 4775
P. Green, Sheffield University, United Kingdom
K. Worden, University of Sheffield, United Kingdom
K. Atallah, N. Sims, Sheffield University, United Kingdom

A sensitiviy analysis for the stabilization of the CLIC main beam quadrupoles 4791
S. Janssens, C. Collette, K. Artoos, P. Fernandez Carmona, C. Hauviller, European Organisation for Nuclear Research, Switzerland

Comparison of Linear and Nonlinear Energy Harvesting Strategies with Uncertainty 4801
B.P. Mann, Duke University, United States
D.A.W. Barton, University of Bristol, United Kingdom

Application of multiphysics approach to study variation of dynamic properties of MEMS structure 4811
A. Martowicz, T. Uhl, A. Klepka, AGH - University of Science and Technology, Poland

Application of Selected Uncertainty Analysis Methods to NVH Development of Motorcycle Engines 4825
H.D. Netzmann, BMW Motorcycles, Germany
M. Hanss, L. Gaul, University of Stuttgart, Germany

Modeling of Aerostatic Ceramic Porous Bearings Considering Material Permeability Distribution 4841
Z.C. Silveira, R. Nicoletti, University of Sao Paulo, Brazil

Uncertainty Quantification Study for a Comprehensive Electrostatic MEMS Switch Model 4849
M. Snow, A. Bajaj, Purdue University, United States

Robustness Analysis of Intentional Mistuning Patterns in Randomly Mistuned Bladed Disk Assemblies 4865
M.E. Yümer, E. Cigeroglu, H.N. Özgüven, Middle East Technical University, Turkey

Composite structures
Session USDCS

The influence of design parameter variability on the dynamic behaviour of honeycomb sandwich panels 4875
S. Debruyne, Katholieke Hogeschool Brugge Oostende, Belgium
L. Mehrez, D. Vandepitte, K.U.Leuven, Belgium
E. Debrabandere, M. Hongerloot, Katholieke Hogeschool Brugge Oostende, Belgium

Multi-scale stochastic method to perform a composite longitudinal bar 4889
L. Guj, Rieter Automotive Management AG, Switzerland
A. Culla, A. Sestieri, University of Rome "La Sapienza", Italy

A Validation Study of a Stochastic Representation of Composite Material Properties from Limited Experimental Data 4903
L. Mehrez, K.U.Leuven, Belgium
A. Doostan, University of Colorado, United States
D. Moens, D. Vandepitte, K.U.Leuven, Belgium

High frequency FRF bound prediction for uncertain symmetrically-laminated composite plates 4925
A. Seçgin, J.F. Dunne, L. Zoghaib, University of Sussex, United Kingdom

Damage modelling and detection
Session USDD

Fuzzy variable interaction models for damage detection 4941
O. Giannini, P. Casini, University of Rome "La Sapienza", Italy

Bayesian localisation of damage in a linear dynamic system 4953
C. Lecomte, B.R. Mace, J. Forster, N. Ferguson, University of Southampton, United Kingdom

Uncertainty Effects on Aeroelastic Performance Due to Damage on Composite Wings 4965
A. Manan, J.E. Cooper, University of Liverpool, United Kingdom

Uncertainty quantification in the vibration-based damage assessment of a reinforced concrete beam 4977
E. Simoen, G. Lombaert, E. Reynders, G. De Roeck, K.U.Leuven, Belgium

Fuzzy and interval methods
Session USDF

Fuzzy structural dynamics using high dimensional model representation 4993
S. Adhikari, R. Chowdhury, M.I. Friswell, Swansea University, United Kingdom

On the numerical solution of fuzzy elliptic PDEs by means of polynomial response surfaces 5007
S. Corveleyn, S. Vandewalle, K.U.Leuven, Belgium

Optimization study of a vehicle bumper subsystem subject to uncertainty 5015
L. Farkas, S. Donders, LMS International, Belgium
D. Schildermans, PUNCH Metals N.V., Belgium
D. Moens, D. Vandepitte, K.U.Leuven, Belgium

Numerical simulation of RC structures under impact loads – Ideas, models and examples to the consideration of uncertain data 5027
W. Graf, J.-U. Sickert, F. Steinigen, M. Kaliske, Technische Universität Dresden, Germany

An Inverse Fuzzy-Arithmetical Method for the Validation, Selection and Optimization of Models for Mechanical Systems 5043
T. Haag, M. Hanss, University of Stuttgart, Germany

Optimisation under uncertainty applied to a bridge collision problem 5057
K. Shariatmadar, R. Andrei, G. de Coonan, Ghent University, Belgium
P. Baekeland, Technum-Tractebel Engineering, Belgium
E. Quaeghebeur, E. Kerre, Ghent University, Belgium

Interval fields to represent uncertainty on input and output side of a FE analysis 5067
W. Verhaeghe, A. Rousounelos, W. Desmet, D. Vandepitte, D. Moens, K.U.Leuven, Belgium

Measurement uncertainty and variability

Session USDM

Robustness of the orthogonality checks on a satellite FEM using a SEREP Test Analysis Model 5079
G. Aglietti, S. Redi, S. Walker, University of Southampton, United Kingdom
A. Kiley, EADS, United Kingdom

An investigation on the uncertainty in spacecraft base-drive sine vibration test data 5093
A. Calvi, European Space Agency, Netherlands
S. Laborde, EADS, France

Measurement uncertainty in operational modal analysis of a civil structure 5103
A. Cattaneo, S. Manzoni, M. Vanali, Politecnico di Milano, Italy

Analysis of the natural frequency variability of a brake component by combining computer simulations with experimental testing 5117
A. Gallina, L. Pichler, W. Lisowski, AGH - University of Science and Technology, Poland
A. Stachowski, European Brake and Chassis Components, Poland
T. Uhl, AGH - University of Science and Technology, Poland

Measurement uncertainty propagation in frequency domain parameter identification of mechanical systems 5129
L.U. Medina, S.E. Diaz , I. LLatas, Universidad Simon Bolivar, Venezuela

Overview of an experimental and numerical approach to study the intra variability of the vibro-acoustic behaviour of a windscreen in free-free and real conditions 5143
R. Scigliano, M. Scionti, P. Lardeur, J.-M. Duffal, Renault, France

Probabilistic methods
Session USDPM

Model reduction based on Karhunen-Loève decomposition and smooth decomposition for random mechanical systems 5157
S. Bellizzi, CNRS, France
R. Sampaio, PUC Rio, Brazil

Probabilistic model of the human cortical bone with mechanical alterations in ultrasonic range 5173
C. Desceliers, C. Soize, S. Naili, Université Paris-Est, France
Q. Grimal, M. Talmant, Université Paris 6, France

Stochastic analysis for simple and computationally efficient models for tire non-uniformity investigation 5181
T.B. dos Santos, A.T. Fabro, J.R.F. Arruda, Universidade Estadual de Campinas, Brazil

A partitioning methodology of complex uncertain structural-acoustic systems in low and medium frequency ranges. 5195
L. Gagliardini, PSA - Peugeot Citroën, France
M. Kassem, PSA - Peugeot-Citroën / Université Paris-Est, France
C. Soize, Université Paris-Est, France

Bayesian Updating of Weight Values Uncertainty in Weighted Residual Methods for Model Updating and Response Predictions 5207
C. Papadimitriou, University of Thessaly, Greece

Numerical modeling of wave propagation in random anisotropic heterogeneous elastic media 5223
Q.-A. Ta, D. Clouteau, R. Cottereau, Ecole Centrale Paris, France

Uncertainty identification
Session USDUI

Construction and experimental identification of an uncertain model in computational dynamics using a generalized probabilistic approach of uncertainties 5239
A. Batou, C. Soize, Université Paris-Est, France
M. Corus, EDF R&D, France

Bayesian Treed Sensitivity Analysis of a Bifurcating Duffing Oscillator 5247
W. Becker, The University of Sheffield, United Kingdom
K. Worden, University of Sheffield, United Kingdom

An identification procedure for epistemic uncertainties using inverse fuzzy arithmetic 5261
appears in MSSP vol. 24(7) - ISMA2010 special issue
T. Haag, J. Herrmann, M. Hanss, University of Stuttgart, Germany

Interval Model Updating: Method and Application 5277
H. Haddad Khodaparast, J.E. Mottershead, K.J. Badcock, University of Liverpool, United Kingdom

Uncertainty propagation in rotor-model-based identification of foundations in rotating machinery 5291
L.U. Medina, Universidad Simon Bolivar, Venezuela
N. Feng, E. Hahn, University of New South Wales, Australia

Identification of Uncertain Structural Dynamics Via a Random Parameter Model Approach 5305
P.G. Michaelides, S.D. Fassois, University of Patras, Greece

Approach to validate the influences of uncertainties in manufacturing on using load-carrying structures 5319
R. Platz, Fraunhofer Institute for Structural Durability and System Reliablity LBF, Germany
S. Ondoua, K. Habermehl, T. Bedarff, T. Hauer, S. Schmitt, H. Hanselka, Technische Universität Darmstadt, Germany

Bayesian Approach of the skewed Kalman filter applied to an elastically supported structure 5335
K. Runtemund, G. Müller, Technische Universität München, Germany
