Table of contents

Copyright notice	I
Preface	II
ISSW-27 Committees	IV
Table of contents	VI
Abstracts	1
Plenary Lectures	1
INTENSE SHOCK AND DETONATION WAVES FOR NONIDEAL PLASMAS <i>Acad. V.E.Fortov</i>	2
Measuring techniques in uid mechanics applied to shock tube research at ISL <i>F. Seiler</i>	3
Ground based testing and numerical modelling of supersonic combustion flow paths <i>Klaus Hannemann</i>	4
High-delity numerical simulations of shock/turbulence and shock/vortex interactions <i>A. Hadjadj</i>	5
SHOCK TUBE INVESTIGATIONS OF THE INSTABILITY OF A TWO-GAS INTERFACE ACCELERATED BY A SHOCK WAVE <i>E.E. Meshkov</i>	6
From explosions to drug delivery - changing paradigms of shock wave research <i>G. Jagadeesh, Rakesh S.G., P.K.Barhai</i>	7
Collisionless Shocks in High Energy Astrophysics and Cosmology <i>Andrei M. Bykov</i>	8
Condensation induced waves and wave induced condensation <i>M.E.H. van Dongen, V. Holten, X. Luo</i>	9
Blast Waves	10
Experimental investigation of a shocked door dynamic opening <i>L. Biamino, C. Mariani, G. Jourdan, L. Houas, A.-Massol</i>	11
The effect of blast wave re-focusing on the lifetime of a laser-generated plasma <i>S. Brieschenk, S. O'Byrne, H. Kleine</i>	12
SHOCK-WAVE DYNAMICS DURING OIL-FILLED TRANSFORMER EXPLOSION <i>V.P. Efremov, A.V. Utkin, M.F. Ivanov, A.D. Kiverin, E.M. Apfelbaum, V.S. Iorish, K.V. Khishchenko, V.E. Fortov</i>	13
The Negative Phase of Spherical Explosions Revisited <i>J. Falcovitz, Y. Kivity</i>	14
Blast waves ignition delay times for hydrogen-air mixtures at relatively lowtemperature and elevated pressure <i>B.E. Gelfand, S.P. Medvedev, S.V. Khomik</i>	15
Micro-Blast waves <i>G. Jagadeesh, K. Kontis</i>	16
An experimental simulation of Tornado-terminator by vortex-center explosion <i>L. H. Wang, F. Wu, T. Long, J. M. Yang and X. Luo</i>	17
Debris Translation and Accumulation by Blast Waves <i>C. Needham</i>	18
Blast wave attenuation through composites of varying layer distribution <i>O.E. Petel, S. Savov, F.X. Jett'e, M. Cairns, S. Goroshin, D.L. Frost</i>	19
TNT blast wave generation and its propagation to far field <i>T. Saito, M. Hirota</i>	25
Blast wave propagation in cavitating liquid <i>A. Chernyshev, E. Kumzerova, A. Schmidt</i>	26

Study of "green" explosion using phase transformation model and revolutionary laser experiment	27
<i>J. J. Yoh, K. H. Kim, H. H. Lee, A. B. Gojani</i>	
Explosive driven micro-blast wave interaction inside a 2D ejector	28
<i>H. Zare-Behtash, N. Gongora-Orozco, K. Kontis, G. Jagadeesh</i>	
A study on the dynamics of conduit flow and fragmentation induced by underwater explosion	29
<i>Yujian Zhu, Dai Kikuchi, Mingyu Sun</i>	
Chemically Reacting Flows	30
Oxidation of normal- and iso-butane over a broad range of stoichiometry, pressure, and temperature	31
<i>C. J. Aul, B. Rotavera, N. Donato, and E. L. Petersen, H. Curran, G. Bourqu</i>	
Thermal Decomposition of 2-chloroethanol: Single-pulse Shock Tube and ab Initio Studies	32
<i>Chakravarty H. K., Amit Pathak, K. P. J. Reddy, E.Arunan</i>	
Analytical Study of a Weak Shock Wave in Ionised Gas	33
<i>S. Goekce, R. Sobbia, P. Leyland</i>	
Chemical reactions in non-equilibrium gas mixtures and mass action law breakdown	38
<i>E. Kolesnichenko, Yu. Gorbachev</i>	
Numerical investigation on the reacting muzzle flow	39
<i>X. Jiang, Z. Chen, H. Li</i>	
A Collisional Radiative Code for Computing the Air Plasma in High Enthalpy Flow	41
<i>Y. Ogino and N. Ohnishi</i>	
Study of heterogeneous processes on the different types of heat shield materials by quantum mechanics and molecular dynamics methods	42
<i>V.L.Kovalev, A.A.Krupnov, M.Yu.Pogosbekian, L.P.Sukhanov</i>	
Decay of heavy molecule Mo(CO) ₆ behind shock wave front in Ar	43
<i>V.S. Ziborov, V.P. Efremov, V.V. Shumova, V.E. Fortov</i>	
Detonation and Combustion	44
Three-Dimensional Numerical Simulation of Detonation Waves: Head-on Pattern	45
<i>H.-S. Dou, B. C. Khoo</i>	
EXPLOSIVE MIXTURE COMPOSITION INFLUENCE ON FLAME EVOLUTION	46
<i>M.F. Ivanov, A.D. Kiverin, V.A. Galburt</i>	
Superequilibrium increase of a chemical reaction rate in the detonation front and other effects in detonation wave initiated by a shock wave	47
<i>S.V. Kulikov</i>	
Formation of the temperature gradient due to a preheated zone ahead of propagating flame as the mechanism underlying the deflagration-to-detonation transition	52
<i>M.A. Liberman, M. Kuznetsov, A.V. Ivanov, I. Matsukov</i>	
Experimental and Numerical Investigation of Multi-Stage Injection in a Supersonic Model Combustor	58
<i>D. Maier, S. Kirstein, A. Hupfer, H.-P. Kau</i>	
Computational simulation of detonation transition using a detailed chemical Reaction Model	59
<i>Van Bo Nguyen, Hua-Shu Dou, Boo Cheong Khoo</i>	
Supersonic gas-flow chamber of hydrogen detonation combustion	60
<i>O.P.Shatalov, Yu.V.Tunik</i>	
Simulation of laser-induced detonation in combustible gas-particle mixture with aluminium particles	61
<i>V. Emelyanov, K. Volkov</i>	
A thermally summarized reaction model for stoichiometric acetylene-oxygen detonations	62
<i>Yujian Zhu, Jiming Yang, Mingyu Sun</i>	

Facilities, Diagnostics and Flow Visualisation	63
Temperature measurements of light emission of an imploding polygonal shock <i>M. Kjellander, N. Tillmark, N. Apazidis</i>	64
On the effectiveness of the semi-closed blast inhibitors <i>B.E. Gelfand, M.V. Silnikov, M.V. Chernyshov</i>	65
Visualization and Quantitative Diagnostics in Shock Wave and Detonation Research <i>N. Fomin, O. Penyazkov</i>	66
Femtosecond laser shock wave velocity and density measurements around a spherical shock wave in air <i>W. Garen, V. Braun, W. Neu, E. Sarchen, U. Teubner</i>	71
High Mach number/high total pressure flow conditions for scramjet testing <i>D.E. Gildfind</i>	73
Implosion-Driven Hypervelocity Launcher <i>A.J. Higgins, D. Szirti, J. Loiseau, V. Tanguay, F. Zhang</i>	74
Performance study of the improved JF10 high-enthalpy shock tunnel with a FCD driver <i>Z. Jiang, J. Lin and W. Zhao</i>	75
Application of Particle Image Velocimetry and the Background Oriented Schlieren Technique in the High Enthalpy Shock Tunnel Gottingen HEG <i>T.Kirmse, A. Schroder, J. Martinez Schramm, S. Karl, K. Hannemann</i>	76
High-speed digital cinematography for force and moment measurement in hypersonic facilities <i>S.J. Laurence, H.G. Hornung</i>	77
Post Flight Experiments of the SHEFEX I Configuration in the High Enthalpy Shock Tunnel Gottingen (HEG) <i>Jan Martinez Schramm and Tarik Barth</i>	78
CARS rotational/vibrational temperature diagnostics behind hypervelocity shock wave at Mach number range from 12 to over 15 <i>T. Osada, Y. Endo, C. Kanazawa, M. Ota and K. Maeno</i>	79
Computed tomographic density measurement in supersonic wind tunnel by colored grid background oriented schlieren (CGBOS) technique <i>M. Ota, K. Maeno, K. Hamada, N. H. B. Zulkifli</i>	83
Application of particle image velocimetry in high speed compressible flows <i>F.F.J. Schrijer, F. Scarano</i>	84
A high-explosive device for isentropic compression experiments <i>A. Sollier, J-B. Maillet, C. Voltz, V. Bouyer</i>	86
Development of a Detonation-Driven Gas Gun Capable of 3~km/s Projectile Velocity <i>J. Verreault, P. Batchelor, A.J. Higgins</i>	87
Hypersonic Flows	91
Stagnation flow phenomena at cylinders and spheres in hypersonic non- equilibrium flow <i>N. Belouaggadia, K. Takayama, R. Brun, H. Olivier</i>	92
Experimental and numerical investigation of high-enthalpy flows in a channel with gas supply <i>M.A. Goldfeld, N.N. Fedorova, I.A. Fedorchenko, Yu.V. Zakharova</i>	93
Experimental investigation of the influence of the flow structure on the aerodynamic coefficients of the IXV vehicle <i>Gawehn, T., Neeb, D., Gulhan, A., Dormieux, M., Binetti, P., Walloschek, T.</i>	94
Experimental and numerical investigation of a hypersonic shock tunnel flow past a blunted cone <i>R. Hruschka, G. Park, N. Deepak, S. O'Byrne, H. Kleine</i>	95
CFD modeling of high speed re-entry flows including gas radiation <i>S. Karl, K. Hannemann</i>	100
The Hypersonic Mach Number Independence Principle for Inviscid and Viscous Flow <i>D. Kliche, Ch. Mundt, E.H. Hirschel, C. Weiland</i>	101

Supersonic Drag Reduction Using Repetitive Laser Pulses <i>Y. Sekiya, J. Kim, R. Rizal, A. Matsuda, T. Sakai, and A. Sasoh</i>	102
Scaling Experiments in a Hypersonic Radiating Flow <i>R.G. Morgan</i>	103
Flow Features on Supersonic Bodies with Camber, Dihedral and Fillets <i>P. Naidoo, B. W. Skews</i>	104
Impact of the Rarefied Gas Effects on the Aerobraking Flight with Magnetic Flow Control <i>H. Otsu, D. Konigorski, H. Katsurayama, T. Abe</i>	109
An investigation of the aerothermodynamics behind a blunt body in air and CO ₂ -N ₂ at superorbital speeds <i>G. Park, S. L. Gai, A. J. Neely</i>	110
NONEQUILIBRIUM GAS DISCHARGE PLASMA SUPERSONIC FLOW AROUND BODY <i>A.V.Erofeev, T.A.Lapushkina, S.A.Ponyaev, S.V.Bobashev</i>	111
Mach-4.5-cross-flow/side-jet-interference on an actual cylindrical missile configuration <i>F. Seiler, B. Sauerwein, J. Srulijes, F. Leopold, K. Weinand, K. Dahlem, P. Hennig, D. Stern</i>	113
Study of the Effect of Telescopic Aerospike on Drag and Heat Transfer Rates for a Large Angle Blunt Cone Flying at Hypersonic Mach Numbers <i>S. Srinath and K.P.J. Reddy</i>	114
Heat transfer on a cone in a supersonic flow at $M=3.5$ <i>J. Srulijes, F. Seiler, P. Hennig, P. Gleich</i>	115
Structure and Oscillation Phenomena of the Pseudo-Shock Waves in Supersonic Rectangular Ducts at Mach 4 <i>H. Sugiyama, T. Honma, T. Bunya</i>	116
Numerical investigation of shock waves interaction in the unsteady flow after the start-up of a hypersonic shock tunnel <i>A. Verevkin, Yu. Tsirkunov</i>	117
Hypersonic Flow around Flare-type Membrane Aeroshell with Torus Frame <i>Kazuhiko Yamada, Takashi Abe, Yuka Kato</i>	122
Impact and Compaction	123
Modelling of shock and explosive destruction of constructional element: three-dimensional statement and probabilistic approach <i>A. Gerasimov, S. Pashkov</i>	124
Investigation of a Twice-Shocked Density Inhomogeneity <i>N. Haehn, C. Weber, J. Oakley, M. Anderson, R. Bonazza</i>	125
High-Speed Impact on Titanium Nitride Coated Magnesium Alloy at Low Temperature <i>R. Kubota, A. Shimamoto, D.Numata, K.Takayama</i>	126
Effects of a Shock Wave on the Morphology of Aluminum Particles <i>G. Schloffel, H. Albers, F. Seiler, F. Zhang, Ch. Mundt</i>	134
Ignition	135
Shock-Tube ignition data and kinetics modeling discrepancies in the low-temperature, high-pressure regime for natural gas blends <i>C.J. Aul, N. Donato, E.L. Petersen</i>	136
Thermal Oxidation of Ethanol: Experimental and Numerical Analysis of Ignition Chemistry of Ethanol-Air Mixtures in Shock-Heated Gases <i>L.R. Cancino, A.A.M. Oliveira, M. Fikri, C. Schulz</i>	137
Determination of ignition delay times of different hydro-carbons in a new high pressure shock tube <i>K. A. Heufer, H. Olivier</i>	143
Experimental investigation of spontaneous ignition of hydrogen jetting into tube <i>T. Bazhenova, S. Golovastov, D. Baklanov, V. Golub, K. Ivanov, V. Volodin</i>	144

Medical, Biological and Industrial Applications	145
Experimental study of shock wave attenuating layers for tissue protection during strong shock wave application	146
<i>S.H.R. Hosseini, K. Takayama, T. Saito, H. Akiyama</i>	
Study on the relationship between apple and underwater shock wave	147
<i>A. Oda and S. Itoh</i>	
Explosive decompression of viscous magma : wave field structure and features of boundary layer development in a volcano channel	149
<i>V. Kedrinskiy, V.Davydov</i>	
A study on performance of pulse detonation turbine engine	150
<i>S. Ohyagi, T. Tsuji, T. Obara, T. Yoshihashi</i>	
Micro Blast Wave Assisted Bacterial Cell Transformation	151
<i>Rakesh S.G., K.N. Nataraja, P.K.Barhai, G. Jagadeesh</i>	
Multiphase Flows	152
Parametric Study of a Micro Jet Excited by Shock/Interface Interaction by Numerical Simulation	153
<i>H. Chen, C.-Y. Wen</i>	
Experimental study of formation of detonation wave of condensation	154
<i>J. Deppe, A. Emelianov, A. Eremin, V. Fortov, A. Makeich, H. Jander, H.Gg. Wagner</i>	
Detonability of aluminum particles in water vapor and carbon dioxide	155
<i>F. Zhang, K. B. Gerrard, G. Schllffel, R. C. Ripley</i>	
Investigation on the dispersion of solid particles by high explosive	156
<i>Yann Gregoire, Michel-Olivier Sturtzer, Boris A. Khasainov, Bernard Veysièere</i>	
Experimental study of laser ablation induced vapor plume expansion	163
<i>A. B. Gojani, J. J. Yoh</i>	
Investigation of shock wave passing through a cloud of water droplets	165
<i>G. Jourdan, L. Biamino, C. Mariani, C. Blanchot, E. Daniel, J. Massoni, L. Houas, R.Tosello, D.Praguine</i>	
Drag-Force in Supersonic Dense Gas-Solid Flow	166
<i>T. Xu, H. Ji, F.S. Lien, F. Zhang</i>	
Acceleration of solid particles in explosive dispersal	167
<i>R. C. Ripley, J. Leadbetter</i>	
Particle Entrainment in Supersonic Flow	168
<i>Z. Zarei, D.L. Frost, E.V. Timofeev</i>	
Nozzle Flows and Jets	169
Numerical Predictions for Transverse Injection Flows	170
<i>E. Erdem, K. Kontis</i>	
Experimental and Numerical Analysis of the Structure of Pseudo-Shock Systems in Laval Nozzles with Parallel Side Walls	176
<i>Gawehn T., Gulhan A., Al-Hasan N.S. and Schnerr G.H.</i>	
Shock-initiated flow in a reflected nozzle	177
<i>L.G. Gvozdeva, I.N. Ryzhkina, N.W. Tarusova</i>	
New explanation of noise production by supersonic jets with "gas dredging"	179
<i>H. Oertel sen., F. Seiler, J. Srulijes</i>	
Oscillation flow induced by underwater supersonic gas jets	180
<i>Hong-Hui SHI, Chao WANG, Xiao-Gang WANG, Qiang GUO, Ruo-Ling DONG, Li-Te ZHANG, Hui-Xia JIA</i>	
Numerical Methods	181
Numerical simulation of complex interaction flow over vehicle with multi lateral jets	182
<i>CHEN Jian-qiang , ZHANG Yi-feng, JIANG Ding-wu, MAO Mei-liang</i>	
Computation of the radiative power in a shock layer	183
<i>N. Bedon, M.-C. Druguet, P. Boubert</i>	

Non-linear theory of conservation laws of solid medium <i>V. G. Grudnitsky</i>	184
Shock Polar Theory for Convex Equations of State <i>Henderson L.F.</i>	185
On the HLLC Riemann solver for interface interaction in compressible multi-fluid flow <i>X. Y. Hu and N. A. Adams</i>	190
Hybrid ART for laser interferometric computed tomography measurement of discharged shock waves from two parallel cylindrical nozzles <i>T. Inage, S. Tsuchikura, M. Ota, K. Maeno</i>	191
Shock wave propagation in viscous gas in a long tube <i>D. Khotyanovsky, A. Kudryavtsev, M. Ivanov</i>	192
DNS of transonic flows using optimized WENO schemes <i>I. Klioutchnikov, H. Olivier</i>	193
Realization of Riemann Problem at Gas - Plasma Boundary Formed by Shock Wave <i>I. Znamenskaya, D. Koroteev, A. Lutsky</i>	194
Recent Development of AUSM and Applications to High Speed Flows <i>Meng-Sing Liou</i>	195
Calculation of steady Mach reflection in nonuniform flow by an unstructured shock-fitting solver <i>F. Nasuti, R. Paciorri, F. Sabetta, A. Bonfiglioli</i>	196
Collision of a solar wind shock wave with the Earth's bow shock: Three-dimensional magnetohydrodynamic model <i>E. A. Pushkar</i>	198
Development and validation of a simulation code for predicting shock-induced motion of solid objects <i>Y. Sakamura, A. Nishino, K. Nakayama</i>	199
PULSED LASER DEPOSITION OF THIN FILMS DIRECT MONTE CARLO SIMULATION OF THE PLUME BEHAVIOUR <i>Z. A. Walenta, Z. Szymanski</i>	200
Plasma	201
Ionization Rate for Breakdown Waves Propagating into a Pre-ionized Medium <i>M. Hemmati, R. Peden, N. Rasul</i>	202
Shock Tunnel Investigation of Electrodynamic Heatshield Effect in Reentry Plasma <i>Yuka Kato, Hirota Otsu, Katsumi Wasai, Tetsuya Tanifuji, Detlev Konigorski, Tomoyui Komuro, Kzauo Sato, Hiyuki Tannno, Katsuhiro Ito, Takashi Abe</i>	208
Comparison of different models for non-equilibrium CO ₂ flows in a shock layer near a blunt body <i>E. V. Kustova, E. A. Nagnibeda, Yu. D. Shevelev, N. G. Syzranova</i>	212
Numerical solution of the Boltzmann equation for the shock wave in a gas mixture <i>A. A. Raines</i>	213
Computer simulation of shock wave structure in a gas with excited rotational and vibrational energy levels <i>F. Tcheremissine</i>	214
Richtmyer-Meshkov Instability	215
Experimental and computational investigation of Richtmyer-Meshkov turbulence in fluid layers after reshock <i>B. J. Balakumar, C. Zoldi-Sood, G. C. Orlicz, D. Ranjan, C. D. Tomkins, K. P. Prestridge</i>	216
Experimental and theoretical study of shock wave instability in polyatomic gas and in glow discharge in different gases <i>A. S. Baryshnikov, I. V. Basargin, M. V. Chistyakova</i>	217
Experimental and numerical investigation of the Richtmyer-Meshkov instability under re-shock conditions	218

<i>O. Sadot, E. Leinov, L.A. Levin and G. Ben-Dor, G. Malamud, Y. Elbaz and D. Shvarts</i>	
Investigation of the Richtmyer-Meshkov instability with 3D stereolithographed interfaces	219
<i>C. Mariani, L. Biamino, G. Jourdan, L. Houas, M. Vandenboomgaerde, D. Souffland</i>	
SPECIAL FEATURES OF RICHTMYER-MESHKOV INSTABILITY GROWTH ON OBLIQUE SHOCK ARRIVAL AT A FREE SURFACE OF A CONDENSED MATERIAL	220
<i>V.V. Igonin, S.E. Kuratov, A.I. Lebedev, M.O. Lebedeva, I.Yu. Myshkina, O.V. Ol'khov, A.A. Polovnikov, E.A. Polovnikov, E.E. Meshkov, G.B. Krasovsky</i>	
Richtmyer-Meshkov instability at a gas interface accelerated by a Mach 10 shock wave	221
<i>D. Ranjan, K. P. Prestridge, M. Andrews, R. Gore, M. Marr-Lyon, and F. Merrill</i>	
Experimental Study of the Richtmyer-Meshkov Instability on a Low Atwood Number Interface After Reshock and Rarefactions	222
<i>C. Weber, N. Haehn, J. Oakley, M. Anderson, R. Bonazza</i>	
Shock Wave/Boundary Layer and Shock wave/Vortex Interactions	223
Computation of hypersonic shock boundary layer interaction on a double wedge using a differential Reynolds Stress Model	224
<i>A. Bosco, B. Reinartz, S. Muller</i>	
The Ultimate Patterns of Shock-Vortex Interaction	230
<i>K. S. Chang and H. Barik, S. M. Chang</i>	
UFAST PROJECT - UNSTEADY EFFECTS IN SHOCK WAVE INDUCED SEPARATION	235
<i>Piotr Doerffer</i>	
Evaluation of Shear Stress Transport Turbulence Model for Flows with Shock Wave / Turbulent Boundary Layer Interaction	236
<i>Mikhail S. Gritskevich, Pavel E. Smimov</i>	
Investigation of the bow shock / vortex wake interaction	242
<i>A.A. Davidov, A.B Karagichev, A.E. Lutsky, A.M. Kharitonov, A.M. Shevchenko</i>	
Generation and Propagation of Compressible Coaxial Vortex Rings	243
<i>R. Mariani, K. Kontis</i>	
Three-Dimensional Shock Wave/Boundary Layer Interactions	245
<i>S. P. Mowatt, B. W. Skews</i>	
Unsteady three-dimensional compressible vortex flows	250
<i>J. O. Reeves, B. W. Skews</i>	
Shock Wave Propagation and Reflection	256
Neumann Reflection over Curved Bodies in Shock Tubes	257
<i>Atsushi Abe, Kazuyoshi Takayama</i>	
Interaction of micro-bubbles with a micro-explosion induced shock wave in a narrow gap	258
<i>Akihisa Abe, K. Ohtani, K. Takayama</i>	
Viscous simulation of shock reflection hysteresis in conical and ideal planar nozzles	259
<i>E. Shimshi, G. Ben-Dor, A. Levy</i>	
Experimental study of the shock propagation in a micron-scale channel	260
<i>G. Mirshekari, M. Brouillette</i>	
Mach reflection of a strong shock wave at the transition to regular reflection	261
<i>V.P. Fokeev</i>	
Organised motions in an asymmetric supersonic mixing layer	262
<i>Sudhir L. Gai and Luke Janicke</i>	
Comparison between numerical and experimental results on the micro scale shock wave propagation	263
<i>Y. Butrschell, J. Giordano, J.-D. Parisse, P. Perrier and I.A. Graur</i>	

Weak shock wave reflections from concave curved surfaces <i>S. Gruber, B. W. Skews</i>	264
On the shock generated by colliding plates in a gas <i>H. G. Hornung, D. S. Cohen</i>	269
Shock tube experiments on the mitigation of a shock wave through a system of plates <i>G. Jourdan, C. Mariani, L. Biamino, L. Houas, A. Massol, O. Igra</i>	270
Shock wave propagation in gas mixtures <i>J. Falcovitz, O. Igra, D. Igra</i>	271
Dynamic transition of strong shock reflection at atmospheric pressure <i>S. Kobayashi, T. Adachi, T. Suzuki</i>	272
Interaction of a Freely Flying Body with the Blast Area <i>A.N. Berezkin and P.I. Kovalev</i>	273
Classification of the pseudo - steady shock wave reflection types <i>A.N. Semenov, M.K. Berezkina and I.V. Krassovskaya</i>	274
Numerical investigation of interaction between a shock wave and small flow disturbances <i>A. N. Kudryavtsev, A. Yu. Ovsyannikov</i>	275
Perturbed wave patterns in the flow behind a shock reflecting off a porous wall <i>C. Law, B.W. Skews</i>	276
Influence of relaxation effects on shock wave propagation in gases <i>Lipnitsky Yu.M., Panasenko A.V.</i>	277
Theoretical formulas characterizing different regimes of perfect-gas three-shock theoretical solutions of pseudo-steady Mach reflections <i>Jong-Jian Liu</i>	279
Shock wave mitigation by particulate foams <i>A. Britan, M. Liverts, H. Shapiro, G. Ben-Dor</i>	280
Particulate foams, shock resistance to shattering <i>A. Britan, M. Liverts, G. Ben-Dor</i>	281
Cavity Shape Effects on Shock-Induced Pressure Distributions <i>D.A. MacLucas, B.W. Skews</i>	282
Asymmetric Shock Reflection Studies in High Total Enthalpy Flows <i>M. McGilvray</i>	288
Experimental investigation of dynamic shock wave reflection phenomena <i>K Naidoo, B W Skews</i>	289
Acoustic Wave Generation from Shock Waves in a Supersonic Jet Impinging on an Inclined Flat Plate <i>Y. Goto and T. Nonomura, K. Fujii</i>	295
An experimental study of reflection of underwater conical shock waves <i>N. Nagayasu, S. Yamashita, K. Ohtani, K. Takayama</i>	296
Expansion wave propagation and cavitation bubble generation near the water surface <i>K. Ohtani, K. Takayama, T. Hashimoto</i>	297
Shock Wave Interaction with Pulse Surface Energy Deposition Area <i>I. Znamenskaya, D. Orlov, I. Ivanov, I. Krukov</i>	298
Computation of weak steady shock reflections through a unstructured shock-fitting solver <i>M. Ivanov, A. Bonfiglioli, R. Paciorri, F. Sabetta</i>	299
Internal structure of three shocks intersection <i>A. Sakurai and M. Tsukamoto, D. Khotyanovsky and M. Ivanov</i>	301
Numerical Study of Three-Shock Intersection at Von Neumann Paradox Conditions <i>G. Shoev, D. Khotyanovsky, Ye. Bondar, A. Kudryavtsev, M. Ivanov</i>	302
Traces of mechanism which overcomes the impasse that afflicts transition from regular to extraordinary Mach reflection <i>Alfred Siegenthaler, Harald Kleine</i>	308
A new diagnostic approach to shock wave reflection <i>B.W. Skews, H. Kleine</i>	314

Gasdynamic structures of forerunner type for interaction of a shock with temperature inhomogeneities <i>P. Yu. Georgievskiy, V.A. Levin, O.G. Sutyurin</i>	320
Shock wave reflection from a circular cylinder <i>E. Timofeev, A. Hakkaki-Fard, Y. Su</i>	321
The complex structure of supersonic patches in the steady Mach reflection of the weak shock waves <i>E.I. Vasilev, M.L. Olhovskiy</i>	322
Poster Presentations	323
Numerical Analysis of H_2/O_2 Detonation at High Pressure in 90-degree Bent Pipe <i>S. Adachi, N. Tsuboi, A.K. Hayashi, E. Yamada, M. Uchida, T. Fujimori</i>	324
Models for vibration-dissociation non-equilibrium boundary layers <i>N. Belouaggadia, I. Armenise, M. Capitelly, R. Brun</i>	325
Study on the multi-mode Richtmyer-Meshkov instability utilizing advanced PLIF diagnostic and numerical simulation <i>O. Sadot, A. Formoza, L.A. Levin and G. Ben-Dor, G. Malamud, Y. Elbaz and D. Shvarts</i>	326
Experimental and Numerical Investigations of Shock Waves Attenuation over Obstacles <i>O. Sadot and G. Ben-Dor, A. Hadjadj</i>	327
Numerical Study of Detonation in Narrow Channel by the DSMC Method <i>Ye.A. Bondar, A.V. Trotsyuk and M.S. Ivanov</i>	328
Accounting for the Boltzmann Correction to the Faraday Induction Law for Flows with Shock Waves <i>V. Borsch</i>	329
Computational Fluid Dynamic Simulation of a Non-reactive Propagating Shock Wave in a Shock Tube <i>L.R. Cancino, A.A.M. Oliveira, M. Fikri, C. Schulz</i>	333
The interaction of Prandtl-Meyer wave with the oblique shock of the same direction <i>V.N. Uskov, M.V. Chernyshov</i>	339
Gas flow in a shock tube output section with insert <i>A.S. Chizhikov</i>	340
Supersonic Air-Intake Studies with Combined Bleed and Bent Cowl <i>S. Das and J. K. Prasad</i>	341
SST model performance for simulation of shock wave / turbulent boundary layer interactions <i>N.N. Fedorova, I.A. Fedorchenko</i>	342
Physical and mathematical modeling of ignition of small magnesium particles <i>A.V. Fedorov, A.V. Shulgjin, D.A. Tropin</i>	343
Modification of Mach reflection by pulse gas discharge <i>V.P. Fokeev, Yu.I. Grin, V.A. Levin</i>	344
Ablation experiments of SiC-based materials in air plasma freejets <i>M. Funatsu, M. Ozawa, H. Shirai, F. Takakusagi</i>	345
Method for prevention of spontaneous self-decomposition of acetylene <i>S. Golovastov, D. Baklanov, V. Golub, I. Laskin, A. Mikushkin, V. Volodin</i>	346
Experimental Study of Shock Wave propagation through 90 degree junction with grooves <i>N. Gongora-Orozco, H. Zare-Behtash, K. Kontis</i>	347
A Study on the Unsteady Aerodynamics of Projectiles in Overtaking Blast Flow Fields <i>G. Rajesh, H.D. Kim</i>	348
Impingement of a plane shock wave on an acoustic wave in a viscous heat-conducting gas. <i>E. S. Grischechkin, F. V. Shugaev</i>	349
Numerical investigation of viscosity and heat-losses effects on shock propagation and detonation in narrow channels <i>D. Ngomo, A. Chinnayya and A. Hadjadj</i>	350

Multiphase equation of state for ice <i>D. Hebert, JM. Chevalier, I. Bertron, O. Heuze</i>	351
Surface morphological study of shock heated chromium film coated as drag reduction element on hypersonic test model <i>G. M. Hegde, V. Kulkarni, M. Nagaboopathy and K.P.J. Reddy</i>	352
Electro-fluid dynamics simulations of exploding wires <i>V. Holzwarth, A. Klomfass</i>	353
Reflection of a High Explosive (HE)-Driven Blast Wave in the High Pressure Regime <i>W. M. Howard, A. L. Kuhl</i>	354
New experimental data on oxygen kinetics behind a strong shock wave front <i>L.B. Ibragimova, O.P. Shatalov, Yu.V. Tunik, I.E. Zabelinskii</i>	355
Fragmentation of a Cylindrical Water Column due to Shock Wave Impact <i>D. Igra, M. Sun</i>	356
Experimental investigation of non-catalytic wall reactions using the interaction of SiO ₂ and Si ₃ N ₄ thin films with shock heated test gases <i>V. Jayaram and K P J Reddy</i>	357
Heat transfer measurements on a hypersonic waverider at Mach 6 in Shock Tunnel <i>K. Nagashetty, R. Ramesh Babu, S. Saravanan, G. Jagadeesh and K. P. J. Reddy</i>	358
Disk gas-phase magnet-hydrodynamic accelerator with non-equilibrium conductivity <i>S. S. Katsnelson, G. A. Pozdnyakov</i>	359
Investigation of shock wave effects under high velocity impact of long projectiles having angle of nutation <i>V. Gorelski, I. Eremin, I. Khorev</i>	360
Numerical construction of realistic shadowgraph and schlieren images <i>D. Kikuchi, K. Fujita and M. Sun</i>	361
Interaction between weak shock wave and turbulent shear flow <i>J.H. Kim, A. Matsuda and A. Sasoh</i>	362
Numerical simulation of shock waves propagation in micro channels <i>Yu.Yu. Kloss, P.V. Shuvalov, F.G. Tcheremissine</i>	363
Shock Tube Study on Nitromethane Pyrolysis behind Reflected Shock Waves <i>T. Koike, K. Yasunaga, Y. Hidaka</i>	364
Paradoxes of the Strong Diverging Blast Waves in Air <i>L.S. Evterev, S.I. Kosyakov</i>	365
Effect of Impact Breakup of Solid or Liquid Particles on Two-Phase Supersonic Flow about Solids <i>I. A. Dukhovskii and P. I. Kovalev</i>	368
Measurement of Gas Flow Parameters in the Vicinity of Bodies with the Front Stalling Zone <i>P. I. Kovalev and S. G. Tomson</i>	369
Study of interaction of shock wave with a wedge under the von Neumann paradox conditions <i>A.N. Semenov, M.K. Berezkina and I.V. Krassovskaya</i>	370
Hysteresis phenomenon at the interaction of bow shock waves from cylinder bodies <i>D. B. Epstein, A. N. Kudryavtsev</i>	371
Simulation of forming a shock wave in the shock tube on the molecular level with consideration of internal degrees of freedom and behavior of the end of a shock-heated gas. <i>S.V. Kulikov</i>	372
Phase-Velocity Explosively Imploded Tubes as a Means to Generate Extremely Strong Shock Waves <i>J. Loiseau, D. Szirti, A.J. Higgins, V. Tanguay, F. Zhang</i>	373
Numerical investigation of homogeneous condensation in Prandtl-Meyer expansion flows <i>X. Luo, W. Cheng, J. Yang</i>	374

On Richtmyer-Meshkov instability induced by converging shock waves <i>J. Huang, H. Jia, Z. Zhai, X. Luo, J. Yang</i>	375
Diaphragmless shock wave generators for industrial applications of shock waves <i>M.S. Hariharan, Janardhanraj .S, S. Saravanan and G. Jagadeesh</i>	376
Experimental investigation on the effect of concentrated energy deposition on the cowl/ramp shock interaction process <i>D. Mahapatra, G. Jagadeesh</i>	382
Application of infinitely thin detonation model in investigation of detonation engines <i>V.A. Levin, I.S. Manuylovich, V.V. Markov</i>	383
Comparison of thrust of Levin-Tarasov rezonator and Laval nozzle <i>V.A. Levin, V.V. Markov, N.E. Afonina, V.G. Gromov, A.N. Khmelevskiy, G.D. Smekhov</i>	384
Numerical Simulation Of Shock Wave Diffraction Over a Sphere <i>S.N. Martyushov, O. Igra and T.Elperin</i>	385
Restoring of blast wave after interaction with detached obstacle <i>S.P. Medvedev, E.P. Tyrnov, S.V. Khomik, B.E. Gelfand, M.V. Silnikov, A.I. Mikhailin</i>	386
Numerical Investigation of the Influence of Different Physical Boundary Conditions on the Thrust of a Scramjet-Nozzle <i>J.H.Meiss, W. Schreoder</i>	387
Simulation of ignition between a contact surface and a shock <i>J. Melguizo-Gavilanes, N. Rezaeayan, L. Bauwens</i>	388
SPECIFIC FEATURES OF RICHTMYER-MESHKOV INSTABILITY GROWTH WITH 2D AND 3D INITIAL PERTURBATION GEOMETRY <i>V.V. Igonin, S.E. Kuratov, A.I. Lebedev, M.O. Lebedeva, I.Yu. Myshkina, O.V. Olkhov, A.A. Polovnikov, E.A. Polovnikov, E.E. Meshkov, G.B. Krasovsky</i>	389
Density measurements using the background oriented schlieren for shock waves and vortex ringses <i>T. Mizukaki</i>	390
Shock wave structures depending on the wave speed and the nonequilibrium degree of vibrationally excited gas <i>R.N. Galimov, N.E. Molevich</i>	391
Heat Transfer Prediction in Hypersonic Flows Using Energy Relaxation Method <i>S. P. Nagdewe, H. D. Kim</i>	392
Computational study of shock wave control by pulse energy deposition <i>N. Ohnishi, M. Tate, and Y. Ogino</i>	395
Prevention of an arc prolongation in a fuse by means of shock wave focusing: Preliminary study of wire explosion <i>T. Umeda, K. Ohtani, K. Takayama</i>	396
Numerical solution of 2D heterogenous mediums problems with singularities and intense absorption of energy <i>A.V. Ostrik</i>	397
Elastic blast-protective chambers on the basis of heterogeneous composite materials <i>B. Palamarchuk, A. Malakhov, A. Manchenko, A. Cherkashin, L. Vyshniakov, L. Vishnevsky</i>	398
Interaction of Hydrogen with Carbonaceous End-Wall <i>C. Park, S. Y. Hyun, and K. S. Chang</i>	399
Comparitive Evolution of Non-Axisymmetric and Axisymmetric Vortex Loops Behind Accelerating Plates <i>R.T. Paton, B.W. Skews</i>	400
Shock Hugoniot Measurements in Two-Phase (Solid-Liquid) Suspensions <i>O.E. Petel, A.J. Higgins</i>	401
Amplitude and frequency of Mach' disk vibrations upon supersonic jet normal interaction with the surface having the orifice <i>A.N. Bazhenov, S.V. Bulovich, R.L. Petrov</i>	402

High-speed high frequency valve and some of its applications <i>S.V. Bulovich, V.V. Grigor'ev, S.N. Isakov, V.Yu. Mityakov, R.L. Petrov, S.V. Yurkin</i>	403
Hypersonic shock layer perturbed by acoustic disturbances <i>A.N. Kudryavtsev, T.V. Poplavskaya, I.S. Tsyrulnikov</i>	404
Combustion initiation of the gas fuel in a supersonic stream by volumetric plasma action <i>M.A. Goldfeld, A.I. Golubov, S. S. Katsnelson, G. A. Pozdnyakov</i>	405
Influence of dispersion for gas mechanics with great gradients <i>V.A. Kononenko, E.V. Prozorova, A.V. Shishkin</i>	406
Effect of localized surface heating on hypersonic flow over a flat plate at zero angle of incidence <i>R. Sriram, M.S. Hariharan, Janardhanraj .S, S. Saravanan, G. Jagadeesh, K.P.J. Reddy</i>	408
Richtmyer-Meshkov Instability: Reshock Study <i>D. Ranjan, B. J. Balakumar, G. C. Orlicz, K. P. Prestridge, and C. D. Tomkins</i>	409
Analytical and Numerical Design Studies on Supersonic Hydrogen Ejector <i>Srisha Rao M V, G. Jagadeesh</i>	410
SHOCK WAVE PROFILES ON A TRANSONIC WING DURING ACCELERATION <i>H. Roohani, B.W. Skews</i>	411
Kinetics of the penetration of shaped charge jets in brittle materials <i>B. Rummyantsev</i>	416
Studies on forming of thin metal foils for bio-medical applications of shock waves <i>Nagaraja S.R, Rakesh S.G., J.K. Prasad, P.K.Barhai, G. Jagadeesh</i>	417
Experimental and numerical analyses of high-speed fracture behaviors in glass bottles by using underwater shockwave <i>H. Sakamoto, Y. Ohbuchi, H. Kuramae, S. Kawabe</i>	418
Square-bore ballistic range for launching three-dimensional projects <i>A. Sasoh, K. Kikuchi, K. Shimizu, A. Matsuda</i>	419
Numerical Simulation and Analysis of the Comparability law on Hypervelocity Impact with SPH Method <i>SHEN Yan-ming, CHEN Jian-qiang</i>	420
On unsteady regimes in wing wake / bow shock interaction <i>A.M. Shevchenko, A.S. Shmakov</i>	421
Aerodynamic characteristics of solid particles acceleration by shock waves <i>Hong-Hui SHI, Li-Te ZHANG, Xiao-Na ZHANG, Shu-Yuan YUE, Chao WANG, Ruo-Ling DONG, Hui-Xia JIA</i>	422
Influence of a propagating plane shock wave on grid turbulence <i>F. V. Shugaev, L. S. Shtemenko, O. I. Dokukina, E. N. Terentiev</i>	423
Kinetic Theory Analysis of Laser Ablation of Carbon <i>M. Shusser</i>	425
Correlation Study in Shock Wave / Turbulent Boundary Layer Interaction <i>P.A. Polivanov, A.A. Sidorenko, A.A. Maslov</i>	426
Investigation of Hypersonic Boundary Layer transition on a Cone Model <i>Tarandeep Singh, K Nagashetty, Ramesh Babu, Reddy KPJ, Sengupta TK, D Das</i>	427
Modeling of ignition and combustion of hydrogen-oxygen mixtures behind the front of the shock wave <i>Smekhov G.D., Shatalov O.P.</i>	428
Experimental investigation of heat transfer characteristic on secondary injection surface with injection angle <i>J. Song, H.H. Cho, M.S. Yu, J.J. Yi, J.C. Bae</i>	430
Continuously Rotating Detonation Waves in an Annular Chamber <i>Tae-Hyeong Yi, Jing Lou, and Cary Turangan</i>	431
Shock-tube studies on the reactions of some aromatic compounds with chain carriers in combustion <i>K. Takahashi, K. Kondo, R. Cho, S. Inoue</i>	432

Development of a diaphragmless driver section for a narrow channel shock tube <i>S. Udagawa, T. Inage, M. Ota, W. Garen, K. Maeno</i>	433
Heat Transfer and Force Measurements on a Scramjet engine configuration in Hypersonic Shock Tunnel <i>V. Hima Bindu, S. Saravanan and K. P. J. Reddy</i>	434
An experimental study on focusing of underwater micro shock waves induced by Q-switched Ho : YAG laser <i>H. Yamamoto, K. Takayama, H. Shimokawa, T. Hashimoto</i>	435
On the primary breakup of axisymmetrical dissemination of Liquid in motion <i>Yang Lei, Huang Zhongwei</i>	436
Propagation of explosive driven micro-blast wave over grooved surfaces <i>N. Gongora-Orozco, H. Zare-Behtash, K. Kontis, G. Jagadeesh</i>	437
Loading of plane target by thin concave impactor <i>E. B. Zaretsky, M. Mayseless, E. Muzychuk</i>	438
Mathematical simulation of liquid with high volume of gas phase <i>M. N. Davydov, V. K. Kedrinskii</i>	439
