

# **2011 International Conference on Electric Information and Control Engineering**

**(ICEICE 2011)**

**Wuhan, China  
15 - 17 April 2011**

**Volume 1  
Pages 1 - 951**

**IEEE Catalog Number: CFP1162K-PRT  
ISBN: 978-1-4244-8036-4**

# Table Of Content

## Volume 1

|                                                                                                                |    |
|----------------------------------------------------------------------------------------------------------------|----|
| 3D Model Generation of Complex objects from Multiple Range Images.....                                         | 1  |
| <i>Ruifang ZHAI, Chengda LIN</i>                                                                               |    |
| A 10 GB/s CMOS Transimpedance Amplifier with Adaptive Gain.....                                                | 5  |
| <i>Jia Xu, Zhenghao Lu</i>                                                                                     |    |
| A 20-GHz 4.8-dB NF Low Noise Amplifier.....                                                                    | 8  |
| <i>Kang Yang, Na Yan</i>                                                                                       |    |
| A 25-GHz 9-dB Distributed Amplifier in CMOS Technology.....                                                    | 12 |
| <i>Hua Dang, Shun'an Zhong, Yueyang Chen, Qian Zhang</i>                                                       |    |
| A 512 bits Phase Change Memory Embedded IP based on 0.18- $\mu$ m CMOS process.....                            | 16 |
| <i>Sheng Ding, Zhitang Song, Houpeng Chen</i>                                                                  |    |
| A car steering rod fatigue analysis based on user conditions.....                                              | 20 |
| <i>WANG Lian-lei, GUO Zhi-ping, LI Bao-zong, ZHANG Chao, ZHOU Wei, LI Wen-liang, DONG Xuan</i>                 |    |
| A Comparative Study of A-star Algorithms for Search and rescue in Perfect Maze.....                            | 24 |
| <i>Xiang Liu, Daoxiong Gong</i>                                                                                |    |
| A Design of Natural Gamma Spectrum Logging System.....                                                         | 28 |
| <i>Xi Hao</i>                                                                                                  |    |
| A LDO Regulator With Slew-Rate Enhancement Circuit for Low-Power SoC.....                                      | 32 |
| <i>Zhou Qianneng, Li Hongjuan, Min Tan</i>                                                                     |    |
| A Linear Maximum Variance Unfolding Algorithm and Its Application in Image Recognition.....                    | 36 |
| <i>Shengli Jiang, Junying Zhang, Chunlin Kuang</i>                                                             |    |
| A Magnetic Field Monitoring System for MRI Using $^{19}\text{F}$ -NMR Technique: A Preliminary Study.....      | 40 |
| <i>Rui-peng Ning, Yan Zhu, Geng-ying Li</i>                                                                    |    |
| A measuring instrument for angle based on invariant optical path and autocollimation principle.....            | 44 |
| <i>Yang Liangen, Wei Lv, Wang Xuanze, Ming Li</i>                                                              |    |
| A model-based automatic control algorithm for a laser anneal processing system.....                            | 48 |
| <i>Qiang Li, Liren Yan, Wei Zhou, Wei Zhang</i>                                                                |    |
| A modified unwrapping method for omnidirectional.....                                                          | 52 |
| <i>Zhipeng Chen, Bingwei He</i>                                                                                |    |
| A Monolithic SiGe HBT Low Noise Amplifier Using a Novel Resistive Feedback Configuration.....                  | 56 |
| <i>SHEN Pei, ZHANG Wan-rong, JIN Dong-yue, XIE Hong-yun, DING Chun-bao, YOU Yun-xia, SUN Bo-tao</i>            |    |
| A New System Of Operation Ticket For Generation and Misoperation Prevention in Smart Distribution Network..... | 60 |
| <i>Jiang Chao, Qiang, Zhou Hong, Deng QiJun</i>                                                                |    |
| A Novel Dynamic TDMA Protocol for Ad Hoc Networks Using Directional Antennas.....                              | 65 |
| <i>TIAN Yan-xia, WU Ke-jun</i>                                                                                 |    |
| A Novel Method of Power Flow Analysis with UPFC Considering Limit Violations of Variable.....                  | 70 |
| <i>Qiang Tong, Qiang Jiang</i>                                                                                 |    |
| A Novel Nanoscale Staggered 6T SRAM Cell Layout To Mitigate Multiple Nodes Charge Collection Effect.....       | 75 |
| <i>Chengmin Xie, Zhongfang Wang, Fuxin Yan, Longsheng Wu, Youbao Liu</i>                                       |    |
| A Novel Open Automatic Test System Based on SI and SCMM Technology.....                                        | 78 |
| <i>Ling He, Juebang Yu</i>                                                                                     |    |
| A Novel Wavelength Calibration Method for Fiber Bragg Grating Sensor System.....                               | 83 |
| <i>Zhi Yang, Guozhen Yao, Yongqian Li</i>                                                                      |    |

|                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------|-----|
| A Parking Algorithm for Parking Assist System.....                                                                                | 86  |
| <i>Jian Li, Xiaomin Sun</i>                                                                                                       |     |
| A Reconfigurable PCB test system based on VI.....                                                                                 | 91  |
| <i>Hongbing Pan, Shengsheng Yu</i>                                                                                                |     |
| A Secure Framework for Web Service Interaction.....                                                                               | 95  |
| <i>Haiyan Zhuang</i>                                                                                                              |     |
| A Si <sub>2</sub> Sb <sub>2</sub> Te <sub>5</sub> Phase Change Memory Featuring 27F2 Cell Size and Ultra Low Writing Current..... | 99  |
| <i>Chen Yifeng, Song Zhitang, Chen Xiaogang, Liu Bo</i>                                                                           |     |
| A simulation system for training telerobotic spine surgery.....                                                                   | 102 |
| <i>Xie Yongming, Pheng Ann Heng, Zhang Jishuai, Liu Ping, Zhu Tanchao, Li Jianying</i>                                            |     |
| A stable nonconforming finite element method for Darcy-Stokes flow.....                                                           | 106 |
| <i>Liuchao Xiao, Yongqin Yang, Huixia Sun</i>                                                                                     |     |
| A study on processing method for outliers obtained from CNC gear measuring center.....                                            | 110 |
| <i>Lianfu Han, Wenyan Tang, Qiang Ma, Changfeng Fu</i>                                                                            |     |
| A Study on the Controller of Solar Heating System.....                                                                            | 114 |
| <i>Lou Chengzhi, He Siyang, An Ning, Wu Guowen</i>                                                                                |     |
| A Study on Variable Region Variable Step-size LMS Adaptive Control of Distillation Columns.....                                   | 118 |
| <i>Bin Du, Xi Cao, Jizheng Chu</i>                                                                                                |     |
| A TDC Method-based Design of Temperature Measuring Circuit.....                                                                   | 122 |
| <i>Yunzhe Wang, Zuqiang Wang</i>                                                                                                  |     |
| A Time Synchronization Method for SMP2 Simulation under Service Orented Architecture.....                                         | 125 |
| <i>WANG Chao, LI Qun, WANG Weiping</i>                                                                                            |     |
| A Weighted Relative Entropy Method for Forecasting Demand.....                                                                    | 130 |
| <i>Suyan He, Yuxi Jiang</i>                                                                                                       |     |
| A Wide Tunable Range Pseudo-Differential OTA.....                                                                                 | 134 |
| <i>Jing Wei, Weidong Wang</i>                                                                                                     |     |
| Adaptive Guidance for Spacecrafts Autonomous Rendezvous with Aspect Constraint.....                                               | 138 |
| <i>Yu-heng SHEN, Ming-shan HOU</i>                                                                                                |     |
| Adaptive Sliding Mode Observer-Based Fault Diagnosis for Flight Control System.....                                               | 144 |
| <i>hufenqiao</i>                                                                                                                  |     |
| An Artifical Physics-based 3D Swarm Control Strategy.....                                                                         | 148 |
| <i>Guanghui Zeng, Xiang Li</i>                                                                                                    |     |
| An Included Angle Based Nonlinearity Measure for Hammerstein-like Systems.....                                                    | 152 |
| <i>Jingjing Du, Chunyue Song</i>                                                                                                  |     |
| An Intelligent System of Multi-Agent Technology-Based for Multi-sensor Fusion.....                                                | 156 |
| <i>YUAN Ping, ZHAO Hong-zhuan</i>                                                                                                 |     |
| An Note on Absolute Ruin Probability in a Markov Risk Model.....                                                                  | 160 |
| <i>Juan Liu, Jiancheng Xu</i>                                                                                                     |     |
| Analysis and Compensation of Error Introduced by Grid Calibration for RFID Package Equipments.....                                | 163 |
| <i>Min Li, Bo Xiong, Bo Tao</i>                                                                                                   |     |
| Analyzing Spatial Structure Characteristics of the Port System in Liaoning Province.....                                          | 169 |
| <i>JIANG Lili, WANG Shijun</i>                                                                                                    |     |
| Application of BP Network to Short-term Power Load Forecasting Considering Weather Factor.....                                    | 172 |
| <i>MAO Yi, YANG Fan, YANG Fan, WANG Caiping</i>                                                                                   |     |
| Application of Tabu-Algorithm-Based Possibility Prediction in Edge Finding.....                                                   | 176 |
| <i>Wang Fang, Wei Zhang</i>                                                                                                       |     |

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| Application research of pressure sensing system in agriculture based on SCM.....                                          | 179 |
| <i>Pengfei WU, Yu ZHOU</i>                                                                                                |     |

| A Method on Pre-matching of Engine with Turbocharger and Their Applications.....                                                        | 1917 |
| <i>LIU Jingping, ZHAO Zhichao, XU Xinsheng, XIA Xiaolang, FU Jianqin</i>                                                                |      |
| A Method to Reduce Engine Intake Noise Based on Numerical Simulation.....                                                               | 1921 |
| <i>FU Jianqin, LIU Jingping, DENG Banglin, FENG Kang</i>                                                                                |      |
| A Model of Path Fault Recovery of MPLS VPN and Simulation.....                                                                          | 1925 |
| <i>Shu-mei LI, Hai-ying LIANG</i>                                                                                                       |      |
| A New Ubiquitous Information Agent System for Cloud Computing - Example on GPS and Bluetooth Techniques in Google Android Platform..... | 1929 |
| <i>Sheng-Yuan Yang, Dong-Liang Lee, Kune-Yao Chen</i>                                                                                   |      |
| A Potential Energy Regenerating System Fueled by the Gravitation.....                                                                   | 1933 |
| <i>Yuh-Huei Shyu</i>                                                                                                                    |      |
| A Rapid Design Method For High Speed Aeronautic Switched Reluctance Generator.....                                                      | 1937 |
| <i>Qin Ming, Dong Lei, Huang Xiaojiao, Liao Xiaozhong</i>                                                                               |      |
| A real-time position and posture measurement device for painting robot.....                                                             | 1942 |
| <i>Zhengdong Xu, Wenhao He, Kui Yuan</i>                                                                                                |      |
| A study of engine fuel economy and its optimization method in hybrid electric vehicles based on MATLAB toolbox.....                     | 1947 |
| <i>Yuanwang Deng, Fei Zhou, Bangji Zhang, Guohai Jia, Kelian Chen</i>                                                                   |      |
| A study of grey theory used in prediction of annual wind power generation.....                                                          | 1952 |
| <i>Tian Chengwei, Dong Lei, Gao Shuang, Liao Xiaozhong</i>                                                                              |      |
| A Study of Maximum Power Operation for Engine in Continuously Variable Transmission Powertrain.....                                     | 1956 |
| <i>He Lin, Li Liang, Yu Liangyao, Song Jian</i>                                                                                         |      |
| A Study on the Prospect of Engine Exhaust Gas Energy Recovery.....                                                                      | 1960 |
| <i>FU Jianqin, LIU Jingping, YANG Yanping, YANG Hanqian</i>                                                                             |      |
| Advanced Gasoline Engine Misfire Diagnostic Method Based On Crankshaft Speed Multiple Filtering.....                                    | 1964 |
| <i>Wang Yinhui, Huang Kaisheng, Lin Zhihua, Meng Fanbo</i>                                                                              |      |
| Air Flow Simulation in High-pressure Air Blower.....                                                                                    | 1969 |
| <i>Liu Jitang, Li Zhouhang, Li Jianfeng, Lv Junfu, Liu Qing</i>                                                                         |      |
| An arc tangent interpolation algorithm applying in CNC cutting machine.....                                                             | 1973 |
| <i>PU Junguo, XU Xinping, CUI Xiangqun</i>                                                                                              |      |
| An Improved Mothed for Compensating of Harmonics of Voltage-Source with Parallel Active Power Filter.....                               | 1977 |
| <i>Han Libo, Liao Xiaozhong, Dong Lei, Yang Geng</i>                                                                                    |      |
| An improved Rotor Position and Velocity Estimation Technique for PMSM Based on Modified Machine Model.....                              | 1983 |
| <i>He Dongwei, Peng Xiafu, Jiang Xuecheng, Zhou Jiehua</i>                                                                              |      |
| An Optimal Design for Suspension Based on LQG Control.....                                                                              | 1987 |
| <i>Shian Chen, Ren He, Hongguang Liu, Yonggang Wang, Ming Yao</i>                                                                       |      |
| Analog computation and experimental study of Small Gasoline Engine.....                                                                 | 1993 |

Lv qinghua,Xu zhongbao,Zhai zhongsheng,Cheng chunfu

De-noising of Spectral Signal Based on Stationary Wavelet Transform.....3098  
Xu Zhe, Zhang Di

Derivation of the precise calculation formula of compliance and optimal design of circular flexure hinge.....3102  
XIE Zhiyong,QIU Lifang,BIAN Xinxiao,DUAN Lei

Design and analysis of indentation tester with nanometer accuracy.....3106

*Song Zhongkang, Ma Dejun, Chen Wei, Guo Junhong*

Design and Implementation of Camera Calibration System based on OpenCV.....3110

*Zhang Zhi, Zhou Xiang, Mao Zheng, Ma Lianyi*

Design and Implementation of City Fire Control Management System Based on GIS.....3114

*Yan Shunxi, Wang Xiaolei*

Design and Implementation of Interaction Mode for System Test Beased on Wireless PDA.....3118

*XIE Guodong, YI Quan, LI Ping, YANG Jianchang, HAN ZhaoFu*

Design and implementation of random current source based on analog output card.....3122

*PAN Yong, LIU Bao-guo, CHENG Min, Su Lin-lin, Liang Guo-zhen*

Design and Implementation of S-Tap Membership Function applied to Non-motion-compensation  
De-Interlacing Algorithm.....3126

*Pi-Tung Chen, Chih-Wei Chen, Wei-Ting Jian*

Design and Implementing of Target Sound Orientation System Based on Multichannel Sound Card.....3130

*XIE Guodong, YI Quan, HAN ZhaoFu, YANG Jianchang, LIU Zhongren*

Design and optimization of supporting structure for scanning mirror in aviation remote sensor.....3134

*Li Yan-wei, Yang Hongbo, Yuan Guo-qin, Ding Ya-lin, Zhang Ji-chao, Cheng Zhi-fen*

Design and realization of Cone Beam CT 3D Image Reconstruction Based on FPGA.....3139

*Chenxin MA, Hua JIANG, Bin YAN, Lei LI*

Design and Realization of Portable Direction-finding and Communication Receiver.....3143

*Xia Jiyuan, Mao Fengj*

Design of A Fall Detection System.....3148

*Ming-Chih Chen, Hong-Yi Wu*

Design of A High Precision Conductivity Measurement System.....3152

*Wu Bangchun, Xiao Yunshi, Yue Jiguan, Lv Feng, Peng Xiaotong, Zhou Huaiyang*

Design of an Airoplane Ejection Seat ATE System.....3156

*ZHANG Xingguo, YI Xiaoyu*

Design of Disturbance Observer for Air Ball Movement System.....3159

*Jing Cui, Zhongyi Chu*

Design of Enterprise Production and Sales Measures Information System Based on WEB.....3163

*Gao Shu-zhi, Wang Jie-sheng*

Design of eye-controlled multi-mouse based on OpenCV.....3167

*Guanhua Wang*

Design of Fault Diagnosis System for Polymerizer Process Based on Neural Network Expert System.....3171

*gao shu-zhi, wang jie-sheng*

Design of Gas Flow Meter Calibration Based on Sonic Nozzles using Negative Pressure Method.....3175

*Huifeng Zheng, Yingqi Ge, Qianmin Mao*

Design of Large Space fire alarm controller based on intelligent video surveillance.....3179

*Shuangye Chen, Chen Luo, Yawei Chen, Weijing Zhang, Jie Hou, Jiaru Qian*

Design of Performance Parameter Automatic Measurement System for Intelligent Motor Soft Starter.....3184

*Xei Qi, Xu Wei, Gu Qimin, Tu Shuilin, Xu Huigang*

Design of Software platform in General Purpose Automatic Test System based on PAWS.....3187

*Xiucui Zhao, Min Guo*

Design of Spots Intelligent Monitoring System of Digital Scenic.....3192

*Ling Lu, Zhenhua Feng*

Design of Stability Augmentor for Aircraft Nose Wheel Steering System Based on Hopfield  
Network Identification Algorithm.....3196

*ZHU Dan-dan, JIA Yu-hong*

| <i>Zhang Qingfang</i>                                                                          |      |
| A fast surface temperature signal generator.....                                               | 3834 |
| <i>Wu Jianfeng, Li Jianqing, Wu Jianjin</i>                                                    |      |
| A Forward-Secure Blind Signature Schemes Based on Bilinear Pairing.....                        | 3837 |
| <i>Hong Wang,Shimin Wei,Gang Qiu,Guozhen Xiao</i>                                              |      |
| A Improved Rapid Restoration Algorithm of Motion Blurred Coal Dust Image.....                  | 3841 |
| <i>Sun Sitong,Zhang Wei</i>                                                                    |      |
| A low information feedback beamforming scheme in distributed MIMO downlink systems.....        | 3845 |
| <i>Meng Yinkuo</i>                                                                             |      |
| A LVS Verification Flow for Hybrid Digital-Analog Integrated Circuits.....                     | 3849 |
| <i>XU-Haitao, Li-Zheyang</i>                                                                   |      |
| A MAP equalizer for the wireless ultraviolet communication.....                                | 3853 |
| <i>Chang Luo, Jiye Li ,Xiaomin Chen</i>                                                        |      |
| A method for CBOC signal processing.....                                                       | 3858 |
| <i>ZHANG Shunangna,JU Tao,CHEN Xiao</i>                                                        |      |
| A method to detect the rotational speed and direction with one sensor.....                     | 3862 |
| <i>Guoping Zhou</i>                                                                            |      |
| A Module of the Public Safety Information Management System Based on Streaming Data.....       | 3865 |
| <i>SUO Yina, YU Fuxing, SONG Dingli</i>                                                        |      |
| A Monitor System based on Virtual Instrument for Fuel Cell Commuter.....                       | 3869 |
| <i>Su ZHOU, Haiyang YU, Fengxiang CHEN</i>                                                     |      |
| A Multi-view Video Coding Based on Correlation Analysis.....                                   | 3872 |
| <i>Tao Yan,Xiaobin Shao,GuoChao Li,Changshou Deng,Jun Dai</i>                                  |      |
| A New High-precision Frequency and Duty Cycle Measurement Method with FPGA Implementation..... | 3876 |
| <i>Ying Chen, Longbin Liu, Huqiu Liu, Li Gao</i>                                               |      |

|                                                                                                                  |      |
|------------------------------------------------------------------------------------------------------------------|------|
| A new low-power LDO chip It's current is 9A on no-load.....                                                      | 3880 |
| <i>Zhao Junxia, Xu Xian, Zhang Jing</i>                                                                          |      |
| A New Novel Data Reconciliation Model.....                                                                       | 3883 |
| <i>Cai Weijian, Qu Xiao</i>                                                                                      |      |
| A New Perspective for Reliability of the Civil Aviation Network - Complex Networks.....                          | 3887 |
| <i>Zhengquan Yang, Qing Zhang, Jiachang Liang, Zengqiang chen</i>                                                |      |
| A New Sizing Equation and It's Application in Electrical Machine Design.....                                     | 3890 |
| <i>Fan Tao, Luo Jian, Wen Xuhui, Liao Xiaofeng</i>                                                               |      |
| A new VOx thin film for uncooled infrared focal plane arrays.....                                                | 3894 |
| <i>Xiqu Chen, Qiang Lv</i>                                                                                       |      |
| A Novel SoC Design of Gas Volume Controller With Network and Smart Card Functions.....                           | 3898 |
| <i>Quan Miao, Dongfeng Yuan, Honghong Tong, Quan Huang</i>                                                       |      |
| A Scalable Solution of Fuel Cell Backup Power for Telecommunications Facilities.....                             | 3902 |
| <i>Ma Tian-Cai, Sun ZheChang, Lou Jie-Liang, Li Feng</i>                                                         |      |
| A Simple SVM Control Algorithm for Three-Level Inverter.....                                                     | 3906 |
| <i>CHEN Yongchao, MIAO Fengdong</i>                                                                              |      |
| A Trainable Vietnamese Speech Synthesis System Based on HMM.....                                                 | 3910 |
| <i>Linyu He, Jian Yang, Libo Zuo, Liping Kui</i>                                                                 |      |
| Accelerated Realization Method of Infrared Targets Detection Based on GPU.....                                   | 3914 |
| <i>He-Xijun, CHEN Hua-chu</i>                                                                                    |      |
| Adaptive Feature Extraction of Four-Class Motor Imagery EEG Based on Best Basis of Wavelet Packet and CSP.....   | 3918 |
| <i>LI Ming-Ai, Lin Lin, Yang Jin-Fu</i>                                                                          |      |
| Amended EOQ Model and its Utilization for Limited Space Warehouse.....                                           | 3922 |
| <i>Shasha Lu, Xiaolin Wang</i>                                                                                   |      |
| An Analysis on the Plant Landscaping of Waterfront in Hangzhou.....                                              | 3926 |
| <i>Lijue</i>                                                                                                     |      |
| An analytical model of axial magnetic thrust and finite element simulation for a moving magnet linear motor..... | 3930 |
| <i>Kui Li, Xiaoqing Zhang, Lei Bao, Qing Er</i>                                                                  |      |
| An Automatic Method for Image Mosaic Based on.....                                                               | 3934 |
| <i>Zhang Guimin</i>                                                                                              |      |
| An Efficient Method to Compute Arithmetic Transforms for Datapath by Module Compositions.....                    | 3938 |
| <i>Pang Yu, Liu Yunhui, Tan Hanyue, Wu Wei</i>                                                                   |      |
| An EPC Circuit Reducing High Voltage Storage Capacitance in Pulse TWTA.....                                      | 3942 |
| <i>Dong Ge, Chen Yu, Chen Zhonglin, Xu Chenqian, Zhang Xuanli</i>                                                |      |
| An Experimental Study of Automobile Interior Aerodynamic Noise.....                                              | 3946 |
| <i>He Yinzhi, Yang Zhigang, Wang Yigang, Ma Gang, Shen Zhe</i>                                                   |      |
| An ILP Algorithm for Voltage-Island Generation Considering Temperature in 3D-Ics.....                            | 3950 |
| <i>Shouchun Tao, Jia Liu, Yuchun Ma, Zhigang He, Ning Xu, Yu Wang, Xianlong Hong</i>                             |      |
| An Image Block Compression Method with High Fidelity Based on AWG Algorithm.....                                 | 3954 |
| <i>WEI Li</i>                                                                                                    |      |
| An implementation method of Canny edge detection algorithm on FPGA.....                                          | 3958 |
| <i>Zhengdong Xu, Kui Yuan, Wenhao He</i>                                                                         |      |
| An Improved FCM for Image Segmentation.....                                                                      | 3963 |
| <i>Cao Liping, Xia Zhihua</i>                                                                                    |      |
| An on-line technology for measuring chamber temperature of blast furnace.....                                    | 3966 |
| <i>Dong Da-ming, Li Yong-zhi, Dang Heng-yao, Wu Wei</i>                                                          |      |

|                                                                                                                                                                              |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Analysis and design of CIC compensation filter.....                                                                                                                          | 3969 |
| <i>Guo Xuan, Du Wei-tao</i>                                                                                                                                                  |      |
| Analysis and Implementation of Complex Phase-Coded Pulse Signals.....                                                                                                        | 3972 |
| <i>SU Yong, WANG Hua-Li</i>                                                                                                                                                  |      |
| Analysis and Improvement of Singular Value Decomposition-Based Watermarking Algorithm.....                                                                                   | 3976 |
| <i>Tai Liang Kuang,Wang Dao Shun,LI Shundong,Xu Luxiong</i>                                                                                                                  |      |
| Analysis of Active Noise Control Methods Effect on Automobile Cabin Noise Loudness Improvement.....                                                                          | 3980 |
| <i>Han Guangyu,Jin Xiaoxiong</i>                                                                                                                                             |      |
| Analysis of Frequency Hopping Signal Acquisition Using Frequency Estimation.....                                                                                             | 3984 |
| <i>Jun Lv,Junhui Liu,Bingli Xu</i>                                                                                                                                           |      |
| Analysis of Noninverting Amplifiers' Gain Error Patterns by MathCAD.....                                                                                                     | 3987 |
| <i>YANG Yong,LI Xingdong,JIANG Yachao,YANG Wenlu</i>                                                                                                                         |      |
| Analysis of Relationship between Size of Image Resolution and Recognition Performance.....                                                                                   | 3991 |
| <i>Liu Yu-qin, Yuan Wei-qi, Guo Jin-yu</i>                                                                                                                                   |      |
| Analysis of Tilting Torque of Steel Ladle Based on ANSYS.....                                                                                                                | 3995 |

|                                                                                                                                    |      |
|------------------------------------------------------------------------------------------------------------------------------------|------|
| A FFT based long-code acquisition algorithm suitable for FPGA implementation.....                                                  | 5621 |
| <i>LIU Suxiao, FENG Wenquan, XIONG Huagang, WANG Dong, LIU Xi</i>                                                                  |      |
| A Flexible Card Configuration System for Instrument Testing in Wafer Fabrication Equipment.....                                    | 5625 |
| <i>Xiaoshan Su, Ling Tian</i>                                                                                                      |      |
| A Frame Synchronization Algorithm in Burst OFDM Communication Based on IEEE802.11a.....                                            | 5631 |
| <i>Sun Wensheng, Song Jiao</i>                                                                                                     |      |
| A Neural Network Application in Predicting Slope Stability.....                                                                    | 5635 |
| <i>Z h a o m i n g</i>                                                                                                             |      |
| A New High Sensitivity Fiber Bragg Gratings Acceleration Sensor Based on Four Beams and a Ring.....                                | 5639 |
| <i>SHAO Jun, LIU Junhua, QIAO Xueguang, JIA Zhenan, WANG Ping</i>                                                                  |      |
| A New Method to Optimize Function Verification.....                                                                                | 5642 |
| <i>Feng Xinyu, Jiang Hongbo, Liu zhaoyong</i>                                                                                      |      |
| A portable gait acceleration acquisition system.....                                                                               | 5645 |
| <i>Hou Xiangfeng, Zhou Zhao Feng</i>                                                                                               |      |
| A Simulation Research on the Reverse Recovery Characteristics of PIN Diode.....                                                    | 5649 |
| <i>Peng Zhang, Xuhui Wen, Yulin Zhong, Jun Liu</i>                                                                                 |      |
| A Single-phase Three-level PWM Rectifier Based on AC Electronic Load and Space Vector Control.....                                 | 5652 |
| <i>Zhang Yin feng, Zhu Zhongni, Yu Ming You, Hu Liang</i>                                                                          |      |
| A Study on Control of Lockup Clutch of Hybrid Vehicle's Torque Converter.....                                                      | 5659 |
| <i>Zhang Jun, Zhou Yunshan, Huang Wei, Cao Chenglong</i>                                                                           |      |
| A Texture-Based Method for Autonomous Star.....                                                                                    | 5663 |
| <i>Jiaqi Gong, Zhongliang Jing</i>                                                                                                 |      |
| A Ultrawideband 3–10 GHz Low-Noise Amplifier MMIC Using Inductive-series Peaking Technique.....                                    | 5667 |
| <i>Chia-Song Wu, Tah-yeong Lin, Chien-Huang Chang, Hsien-Ming Wu</i>                                                               |      |
| A Wavelet-Galerkin Method for the Simulation of Torsion MEMS devices under the Effect of Squeeze Film Damping.....                 | 5671 |
| <i>Song Yongping, Li Pu, Hu Rufu</i>                                                                                               |      |
| Accuracy analysis and optimization design of constant-diameter cam.....                                                            | 5675 |
| <i>YUAN Guo-qin, DING ya-lin, HUI Shou-wen, Liu Zhe-hua, Li Yan-wei</i>                                                            |      |
| AMT Research Based on the Electric Drive System.....                                                                               | 5679 |
| <i>YANG Yunyun, WU Sen, CAO Zhengce, WANG Fan</i>                                                                                  |      |
| An Investigation on the Relationship between Engine Knock and Amplitude Characteristics of Spark Plug's Ionic Current Signals..... | 5683 |
| <i>Yueguo Sun, Zhaocheng Yuan, Shiyu Li, Liying Li</i>                                                                             |      |
| An stability measurement Instrument with high precision and great measurement range quality.....                                   | 5687 |
| <i>Qu bayi, Feng xingle, Wang Jiang'an, Li Wei</i>                                                                                 |      |
| Analysis of Heat Release Rate of a Diesel Engine Using Jatropa curcas oil as Fuel.....                                             | 5691 |
| <i>Liang Yu, Wang Zi-yu, Guo Jian, Pan Jun-ru, Luo Fuqiang</i>                                                                     |      |
| Analysis of impact factors of fuel-gas mixing performance for gasoline direct injection engine.....                                | 5695 |
| <i>YANG Hanqian, LIU Jingping, YIN Ling, CHEN Shanping, YANG Jing</i>                                                              |      |
| Analysis of Vibration Characteristics of e-CVT Powetrain.....                                                                      | 5700 |
| <i>Han Bing, Zhang Tong, Wang Yanyun</i>                                                                                           |      |
| Analysis of Voltage Source Inverter Losses Model.....                                                                              | 5704 |

Zhang Xuhui, Wen Xuhui, Guo Xinhua, Zhao Feng

Analytical Model for Hole Mobility in (001)-biaxially Strained Si.....5708  
Song JianJun, Shan HengSheng, Zhang HeMing, Hu HuiYong

Application of a Discrete Sliding Variable-structure System for Switched Reluctance Motor Drives.....5711  
Cai Shao, Dong Zhi-ming, Li Ai-hua

Application of a New-type Battery Nipple in the Downhole Trajectory Control Tool.....5716  
Ding Feng, Li Wu, Yongxin Yuan, Hong Zhang, Bianyou Tan, Xuhui Liu, Peng Wang

Application of Binary Particle Swarm Optimization in Feature Selection for Transient Stability Assessment.....5719  
Man Cao, Yajun Wang

Application of Non-prior Base Analysis in Diagnosing the Boundary Loose of Cantilever Beam.....5723  
Zhao Xiaodan, Sun Shaolin, Sui Linqiang

Application Study on Bank's CRM Based on Data Mining Technology.....5727  
Wu Dong Sheng

ARM9-based embedded controller of the boiler combustion.....5732  
Li qang, zhangbao, Gou zhi feng, tongyongbo, luoyuhuan

Attitude Control of an Asymmetric 3D Rigid Pendulum.....5736  
Huang Xiaoxiong, Ge Xinsheng

Based on ADAMS of the Analysis of Vibration and Noise Testing of Micro-vehicle Rear Axle.....5740  
Shao-jun Han, Xiong Li, Kang Liu

Challenges facing the Low Temperature Diesel Combustion Boosting System.....5744  
Liu Jingping, Xia Xiaolang, Wang Shuqing, Xu Xingsheng, Xu Zhengxing, Yin Ling

Closed-loop Control Strategy of NH<sub>3</sub>-SCR for Diesel Engines.....5748  
Pi-qiang TAN, Fei CHEN, Zhi-yuan HU, Di-ming LOU, Zheng-xing ZHANG

Combined hysteresis current-controlled PWM inverter and robust control for a permanent-magnet synchronous motor.....5753  
Genzhong Wu, Haiyan Zhu

Conductivity and Magnetic Properties Study on Doped Semiconductor Material of 3C-SiC:  
A First-principle Investigation.....5758  
Baicheng Sheng, Mang Niu, Xiaohong Shao

Configuration and Thermal Gravimetric Analysis of Diesel Particulate Matter after Plasma.....5762  
Chaochen Ma, Lei Zhong, Shuliang Yu, Shikai Xing, Jing Tian

Configuration Development of Robot Controller with UML.....5766  
Yi Ning, JunFeng Zhao, XiaoJun Guo

Construction Information management in CCTV.....5770  
Liangli Xiao, Dongping Huang, Yawen Zheng

Container Cranes Seismic Load Calculation Criteria Based on Structural Dynamics.....5774  
Pei Zheng, Qin Zhang

CREEP MODEL FOR ZONAL DISINTEGRATION OF DEEP ROCK MASS.....5780  
Li Haitao, Tan Yunliang, Ning Jianguo, Yan Wenzhu

Cutter Setting Calculation for CNC Hobbing Non-circular Gear.....5784  
yancang jiang, zaixin wu, fangyong tian

Decimal Counter Based on Redundancy-Restraining Technique.....5787  
Zhao Li-li, Jia Mo-yi, Yan Xiao-dong

Decision Tree SVM basing on kernel Clustering.....5791  
Jianhua Zhang

Design and Development of Web-based Computer Teaching Auxiliary System.....5795  
zhou min
