CONTENTS

Keynote papers

Effects of wind turbine generated power fluctuations to thermal power generation I
C. Ziems, H. Weber *1*

Wave power generation: operation and control challenges
Zhang Xiao-Ping, University of Birmingham *7*

Smart grid power system control in distributed generation environment
Pertti Järventausta, Sami Repo, Antti Rautiainen, Jarmo Partanen *10*

Power plant control 1

Application of fuzzy self-adapting PID controller and fuzzy non-uniform grid scheduling to WFGD
Xiao-Feng Li, Shi-He Chen, Hui-Yian Wu, Gang Chen *20*

Pulverized fuel control using biased flow measurements
Mathias Jesper Dahl-Soerensen, Brian Solberg *26*

Model-based method for combustion power stabilisation in grate-fired boilers
Mika Ruusunen *32*

Model-based multivariable control of a secondary air system using controlled finite Markov chains
Enso Ikonen, Kimmo Leppäkoski, Urpo Kortela *38*

Model based control of the circulating fluidized bed boiler
Jirí Findejs, Vladimír Havlena, Jan Jech, Daniel Pachne *44*

Power system analysis 1

An approximation of static voltage stability margin using artificial neural networks in power systems
Arthit Sode-Yome, Kwang Y. Lee *50*

Observation of state variables in resonant DC-DC converter using the high gain design approach
F. Giri, F. Liu, O. El maguiri, H. El Fadil *56*

Available transfer capability evaluation based on sensitivity analysis
Yajing Gao, Gengyin Li, Ming Zhou *62*

Power system reliability evaluation using safety factor concept and Simpson's 1/3rd rule
R. K. Saket, A. F. Zobaa *68*

A proposal for allocating PMUs for monitoring critical oscillation modes in the Mexican system
Jorge Guillermo Calderón-Guizar *74*

Renewable energy systems and energy markets

Three stages control strategy for hybrid electrical energy systems
Alioune Badara MBOUP, François GUERIN, Pape Alioune NDIAYE, , Dimitri LEFEBVRE 80

Automation and operation strategies in a stand-alone power system that uses solar and wind energy in conjunction with hydrogen long-term storage
Chrysovalantou Ziogou, Dimitris Ipsakis, Costas Elmasides, Fotis Stergiopoulos, Simira Papadopoulou, Panos Seferlis, Spyros Voutetakis 86

Optimal capacity of battery energy storage system and its effect of CO2 reduction
Yusuke Hida, Ryuichi Yokoyama, Kenji Iba,,Kouji Tanaka, Kuniaki Yabe 92

Electricity market modelling with photovoltaic active and reactive power generation
A. G. Petoussis, S. G. Petoussis, X.-P. Zhang, G. E. Georghiou , M. Patsalides, G. Makrides, K. R. Godfrey 98

Locational marginal price with demand-side bidding in a competitive electricity market
Jong-Bae Park, Joo-Won Lee, Hyun-Hong Kim, Wook Kim, Kwang-Yeon Lee 104

Power plant control 2

Inverse dynamic neuro-controller for superheater steam temperature control of a large-scale ultra-supercritical (USC) boiler unit
Kwang Y. Lee, Liangyu Ma, Chang J. Boo, Woo-Hee Jung, Sung-Ho Kim 107

Control for ecological improvement of small biomass boilers
Bohumil Šulc, Stanislav Vrána, Jan Hrdlièka, Martin Lepold 113

Control strategy for small-scale wood chip combustion
Timo M. Korpela, Tomas K. Björkqvist, Pentti A. J. Lautala 119

Boiler modelling and optimal control of steam temperature in power plants
S. Rominus Valsalam, S. Anish , B. Raja Singh 125

Reverse normal-boundary intersection for multi-objective optimization for power plant operation
Joel H. Van Sickel, Kwang Y. Lee 131

Energy management in misc. systems

Genetic algorithm fuzzy logic energy management strategy for fuel cell hybrid vehicle
W. Hankache, S. Caux, D. Hissel, M. Fadel 137

Modern energy saving generation-distribution systems for large vessels
E. Lerch 143

Active coordination of thermal household appliances for load management purposes
Stephan Koch, Marek Zima, Göran Andersson 149

Power management system for the oil and refinery plants
Jiri Marek, Luboš Vargovèík, UNIS, Petr Neuman 155

Control and regulation of electrodes in an electric furnace supported by a FMEA
Blanca Rodríguez, Joaquín Santos, Miguel Strefezza, Leonardo Contreras 161

Power system control 1

Flexible nonlinear control technique with applications to power systems
Mark Gordon, David J. Hill *167*

Simple models for model-based portfolio load balancing controller synthesis
Kristian Edlund, Tommy Mølbak, Jan Dimon Bendtsen *173*

Hierarchical models in solution of large power systems control problems
O.A. Soukhanov, I.B.Yadykin *179*

Robust and nonlinear controller for a unity power factor rectifier
I. Lachkar, F. Giri, A. Abouloifa, F. Z. Chaoui *185*

Predictive control approach for long-term hydropower scheduling using annual inflow forecasting model
Mônica S. Zambelli, Ivette Luna, Secundino Soares *191*

Power plant optimization

Model based start-up optimization of a combined cycle power plant
D. Faille, F. Davelaar *197*

A dynamical model for customer's gas turbine generator in industrial power systems
Masayuki Watanabe, Yuuya Ueno, Yasunori Mitani, Hiroyuki Iki, Yoshihisa Uriu, Yasuhiro Urano *203*

A near optimal hoist scheduling for deep level mine rock winders
Werner Badenhorst, Jiangfeng Zhang, Xiaohua Xia *209*

Power system stabilization

Delayed-Input power system stabilizer using supplementary remote signals
A. A. Hashmani, I. Erlich *215*

Nonlinear excitation control for transient stability of multi–machine power systems using structure–preserving models
Wissam Dib, Romeo Ortega, David Hill, Fran¸coise Lamnabhi-Lagarrigue *221*

Power system diagnosis

Development of security system for SCADA network of electric power system
Dong-Joo Kang, Jong-Joo Lee, Seog-Joo Kim, Young-Hwan Moon, Young-Hyun Moon *227*

Modeling and simulation of power plants

Derivation and validation of a coal mill model for control
Piotr Niemczyk , Palle Andersen, Jan Dimon Bendtsen, Tom Søndergaard Pedersen, Anders Peter Ravn *233*

Dynamic modelling and simulation of fast pyrolysis process integrated with circulating fluidized bed boiler
Jyri J.P. Kaivosoja, Yrjö J. Majanne *239*

State model of steam reheating for control optimization
Lukas Hubka *244*

Object-oriented modelling of power plants: a structured approach
Francesco Casella *249*

Dynamic model of a circulating fluidized bed boiler
Yrjö Majanne, Petri Köykkä 255

Power system optimization

V2G scheduling - A modern approach to unit commitment with vehicle-to-grid using particle swarm optimization
Ahmed Yousuf Saber, Ganesh Kumar Venayagamoorthy 261

A modified particle swarm optimization for economic dispatch with nonsmooth cost functions
Mehdi Neyestani, Malihe M. Farsangi, Hossein Nezamabadi-pour, Kwang Y. Lee 267

Electricity market forecasting using artificial neural network models optimized by grid computing
Aishah Mohd Isa, Takahide Niimura, Noriaki Sakamoto, Kazuhiro Ozawa, Ryuichi Yokoyama 273

Optimal dispatch of ancillary services via self-organizing migration algorithm
Jakub Novák, Vladimír Bobál, Petr Chalupa 278

Power system control 2

Robust control of series resonant DC-to-DC power converters
O. Elmaguiri, F. Giri, H. El Fadil 284

Adaptive control of a class of resonant DC-to-DC converters
O. Elmaguiri, F. Giri, H. El Fadil, F.Z. Chaoui 290

Interconnected state observer for series resonant converters
O. El Maguiri, F. Giri, H. El Fadil, F.Z. Chaoui 296

Backstepping nonlinear control of three phase AC/DC PWM converters
I. Lachkar, F. Giri, A. Abouluifa, F. Z. Chaoui 302

Feedback linearization based nonlinear control strategy of VSC-HVDC
Gengyin Li, Ming Yin, Ming Zhou 308

Power plant simulation

Simulation assisted automation testing during Loviisa automation renewal project
Topi Tahvonen, Pasi Laakso, Jens Wittig, Klaus Hammerich, Esa Maikkola 314

Modelling and simulation of a combustion turbogenerator for control analysis and design
Raul Garduno-Ramirez, Miguel A. Delgadillo-Valencia, Isaura Hernandez-Rodriguez, Indira X. Alcaide-Godinez, Ricardo Guevara-Gordillo 320

Dynamic simulation assisted design of industrial power plant process and control
Yrjö Majanne, Mikael Maasalo 326

Applying a neural network model for process study: a case study on fluidized bed boilers
Tero Joronen, Jukka Pennanen 332

Time based data reconciliation and decision support for a CFB boiler
Anders Avelin, Björn Widarsson , Erik Dahlquist, Reijo Lilja 338

Control of electric motors

Speed regulation with power factor correction of synchronous motors including AC/DC/AC converters
A. El magri, F. Giri, A. Abouloifa, I. Lachkar, F.Z. Chaoui 344

Magnetic saturation effect in the achievement of wide speed range control for induction machine
H . Ouadi, F. Giri, A. Elfadili, L. Dugard 350

DC motor velocity adaptive control through buck-boost AC/DC converter with power factor correction
A. Abouluifa, F. Giri, I. Lachkar, F. Z. Chaoui, A. El Magri 356

Sensorless PMSM sliding mode observer with stator resistance estimation
Vasilios C. Ilioudis , Nikolaos I. Margaris 362

Power system control and analysis

Inverter-based distributed generation control using droop/isochronous load sharing
A. Mohd, E. Ortjohann, W. Sinsukthavorn, M. Lingemann, N. Hamsic, D. Morton 368

Applications of Matlab symbolic and optimization toolboxes in static voltage stability in power systems
Arthit Sode-Yome, Kwang Y. Lee 374

A real-time regulator, turbine and alternator test bench for ensuring generators under test contribute to whole system stability
Marc Langevin, Marc Soullière, Jean Bélanger 380

Solar energy

Intelligent control of solar collector fields in changing operating conditions
Esko Juuso 386

Nonlinear adaptive control for MPPT in photovoltaic systems
H. El Fadil, F. Giri 392

Power system modeling and optimization

Models of synchronous generator and transformers for dispatch training simulators and real time digital simulators
P. Neuman 398

Effect of generic synchronization approaches on subsynchronous damping characteristics of thyristor controlled series capacitor
P. Vuorenpää, P. Järventausta 404

Wind power systems

Controller validation and verification for a doubly-fed variable speed wind generator system
Shady A. El-Kashlan, Mahmoud S. Abou-Zeid 410

Nonlinear control of a variable speed wind generator
A. El magri, F. Giri, A. Abouloifa, A. Elfadili 416

Effects of wind turbine generated power fluctuations to thermal power generation -Part II-2
F. Gottelt, S. Meinke, E. Hassel, J. Nocke 422

Distributed generation

A hierarchy control strategy and management of interconnected distributedgeneration systems
E. Ortjohann, W. Sinsukthavorn, A. Mohd, M. Lingemann, D. Morton 428

Network interconnection studies of distributed generation
Anna Kulmala, Kari Mäki, Sami Repo, Pertti Järventausta 434

Predictive control of ancillary services using direct search methods
Petr Chalupa, Jakub Novák, Vladimír Bobál 440

Estimating distributed generation and loads for voltage profile optimal regulation
Anna R. Di Fazio , Giuseppe Fusco, Mario Russo 446
