# CONTENTS

## Keynotes

- Dual source heat pump systems: operation and performance  
*R. M. Lazzarin* pag. 3
- Heat pump market: present and future  
*M. Axell* 19
- Heat pumps for simultaneous heating and cooling  
*M. Monsberger, H. Huber* 27

## AS Solar

- Simulated performance of a solar assisted heat pump using ice slurry as a latent storage material  
*J. Tamasauskas, M. Poirier, R. Zmeureanu, R. Sunyé* 39
- Performances simulation of an evaporative air cooler using solar energy under algerian climate  
*M.L. Yousfi, S. Elmetenani, Z. Belgroun, L. Merabeti, A. Chikouche* 47

## AS Ground

- First experiences with coaxial borehole heat exchangers  
*J. Acuña, B. Palm* 59
- Ground-source heat pumps. Overcoming market and technical barriers  
*H. Halozan* 67
- Energetic and economic comparison between a compression and an absorption ground source heat pump  
*C. Di Perna, F. Polonara, G. Magri, S. Procaccini, G. Santori* 75
- Use of underground water tank as heat sink  
*R. R. Easow* 85
- Energy optimization of a ground source heat pump system for heating and cooling in an office building  
*J.M. Corberan, C. Montagud, F. Heselhaus* 93

|  |     |
|--|-----|
| Energy efficiency of variable capacity ground source heat pumps<br><i>P. Munari, E. Da Riva, D. Del Col, M. Mantovan</i>   | 103 |
| Ground source heat pumps for heating and cooling in the mediterranean countries<br><i>D. Mendrinós, J. M. Corberan, E. Da Riva, D. Del Col, C. Montagud</i>          | 113 |
| Possible ground energy uses in zones with anomalous gradient of temperature<br><i>M. De Carli, G. Emmi, A. Zarrella, A. Galgaro</i>                                  | 123 |
| Comparison of borehole heat exchangers response based on different hourly load models<br><i>M. Fossa, F. Minchio</i>   | 133 |
| Numerical evaluation of BHE thermal resistance for ground coupled heat pump systems<br><i>M. Fossa, D. Dalla Pietà</i>   | 141 |
| <b>AS Heat recovery</b>  |     |
| An “active” recovery system for air handling units<br><i>R. Giannoni, D. Pedrini, M. Parenti, G. Parenti, D. Facchini</i>  | 151 |
| Multisource heat pump: data analysis for the first year of operations of a case study<br><i>F. Busato, R. Lazzarin, M. Noro</i>                                      | 161 |
| <b>AS Simultaneous H&amp;C</b>   |     |
| Versatility and energy efficiency of reversible heat pumps illustrated with case studies<br><i>M. Serraino, C. Carano</i>  | 173 |
| Energy analysis of a combined heating and cooling system for conditioning hotels in mild and warm dry climates<br><i>M. De Carli, F. Cappon, L. Prendin, A. Teti</i> | 185 |
| A survey on performance of heat pumps present on the italian market<br><i>M. De Carli, G. Emmi, A. Polito, M. Scarpa</i>   | 197 |
| Units for 4-pipes systems for simultaneous production of heating and cooling energy, designed for dual source applications<br><i>L. De Rossi, E. Busnardo</i>        | 203 |
| Integrated control system with DC inverter technology for heat pumps<br><i>W. Muvegi, B. Lamanna</i>   | 215 |

# CONTENTS

## Keynotes

|   |        |
|---|--------|
| Topics towards development of advanced heat pump systems<br><i>Shigeru Koyama</i> |        |
| Open cycle absorption and desiccant technology<br><i>G. Grossman</i>              | pag. 3 |
| Trends in absorption machines<br><i>K. Gluesenkamp, R. Radermacher, Y. Hwang</i>  | 13     |
| Advancement in solar cooling<br><i>C. Infante Ferreira</i>                        | 23     |

## ISHPC11 Absorption

|   |     |
|---|-----|
| A lithium bromide absorption chiller with cold storage<br><i>Ching-Jen Tang, W. Gerstler</i>  | 49  |
| Simulation of absorption of H <sub>2</sub> O in falling film of LiBr aqueous in vertical tubes in wavy regime<br><i>E. Garcia-Rivera, J. Castro, J. Farnos, A. Oliva</i>  | 59  |
| Air source gas absorption heat pump cycle with full heating output at low outdoor ambient and high supply temperatures<br><i>M. Guerra</i>  | 67  |
| Application of absorption chillers on vessels<br><i>M. Safarik, L. Richter, G. Weidner, Y. Wild, P. Albring</i>   | 75  |
| Direct air-cooled single effect LiBr/H <sub>2</sub> O absorption prototype using a flat-fan sheets adiabatic absorber: experimental results<br><i>M. Izquierdo, A. González-Gil, J.D. Marcos, M.E. Palacios</i> | 85  |
| Ionic liquids: new high-performance working fluids for absorption chillers and heat pumps<br><i>M.-C. Schneider, R. Schneider, O. Zehnacker, O. Buchin, F. Cudok, A. Kühn, T. Meyer, F. Ziegler, M. Seiler</i>  | 95  |
| Applications of absorption chillers<br><i>F. Barberis</i>   | 107 |

|   |     |
|---|-----|
| Development of a small capacity air-cooled ammonia/lithium nitrate absorption chiller-first cooling capacity and cop measurements-<br><i>M. Zamora, M. Bourouis, M. Vallés, A. Coronas</i>                | 117 |
| Experimental investigation of ionic liquid emim EtSO <sub>4</sub> as solvent in a single-effect cycle with adiabatic absorption and desorption<br><i>M. Radspieler, C. Schweigler</i>                     | 125 |
| Air-cooled, single effect, waste heat-driven water/LiBr absorption system for high ambient temperatures<br><i>K. Gluesenkamp, C. Horvath, R. Radermacher, Y. Hwang</i>                                    | 135 |
| Crystallization inhibitors for water/LiBr absorption chillers<br><i>K. Gluesenkamp, R. Radermacher, Y. Hwang</i>  | 145 |
| Thermal conductivity of NH <sub>3</sub> -LiNO <sub>3</sub><br><i>Y. Cuenca, A. Vernet, M. Vallès</i>  | 155 |
| Performance comparison of a bubble absorber with ammonia/lithium nitrate and ammonia/(lithium nitrate + water) for absorption chillers<br><i>C. Oronel, C. Amaris, M. Vallés, M. Bourouis, A. Coronas</i> | 165 |
| A modular thermal hub for building integrated energy systems<br><i>M. D. Determan, S. Garimella</i>   | 175 |
| Coupled component- and system-level simulation of a diffusion absorption refrigeration system for residential applications<br><i>A. S. Rattner, S. Garimella</i>  | 185 |
| Numerical study of heat and mass transfer in LiBr falling films and droplets<br><i>V. Subramaniam, S. Garimella</i>   | 197 |
| Experimental study of a spray adiabatic absorber using fog-jet nozzles<br><i>R. Ventas, A. Lecuona, C. Vereda, M. Venegas, M.C. Rodríguez</i>   | 207 |
| Nucleate pool boiling heat transfer of 2-ethyl-1-hexanol added LiBr solution on a nano-porous surface<br><i>Chi Young Lee, Bong June Zhang, Jiyeon Park, Kwang J. Kim, B. Belmont</i>                     | 217 |
| Study on the performances of an ejector as adiabatic absorber in absorption cycles<br><i>C. Vereda, R. Ventas, A. Lecuona, M. Venegas</i>   | 227 |
| On-line concentration measurement of ammonia aqueous solution<br><i>Siyong Jeong, Han Gu Yoon, Dae Hwan Kim, Seong- Ryong Park, Minsung Kim</i>   | 237 |

|  |     |
|--|-----|
| The effects of concentration of oil-droplet and surfactant on bubble absorption performance enhancement in binary nanoemulsion<br><i>Young-Jin Kim, Jin Ki Lee, Yong Tae Kang</i>          | 245 |
| CO <sub>2</sub> absorption enhancement by using methanol based Al <sub>2</sub> O <sub>3</sub> nanofluids<br><i>I. Torres Pineda, Jung-Yeul Jung, Jae Won Lee, Yong Tae Kang</i>            | 253 |
| Parametric analysis aimed at optimizing the control logic of an absorption-based cooling system<br><i>G. Evola, L. Marletta, N. Le Pierrès, E. Wurtz</i>                                   | 263 |
| Study state simulation of absorption type heat pump - fundamental models considering heat and mass transfer in detail-<br><i>Daisuke Wada, Keisuke Ohno, Kiyoshi Saito</i>                 | 273 |
| Research on LiBr-H <sub>2</sub> O absorption refrigeration system with interior storage under crystallization conditions<br><i>Qichao Yang, Xiaoling zhang, Wenxing Shi, Yinping Zhang</i> | 285 |
| Static simulation of multistage absorption heat transformer with modular analysis<br><i>H. Tano, K. Saito, N. Inoue</i>  | 295 |
| Absorption gas fired chiller: recovery heat for heating in winter<br><i>A. Polito, G. Emmi, M. De Carli</i>  | 305 |

## **ISHPC11 Adsorption**

|  |     |
|--|-----|
| Nitrogen sorption on activated carbon<br><i>N. Tzabar, G. Grossman</i>   | 317 |
| Study on an adsorption chiller employing lithium chloride in silica gel and methanol: design and experimental study<br><i>L. X. Gong, R. Z. Wang, Z. Z. Xia, Z.S. Lu</i> | 329 |
| Study on a thermochemical resorption refrigeration and its application in the long-distance cold transportation<br><i>H. S. Bao, R. Z. Wang, T. X. Li</i>                | 341 |
| Influence of temperature fluctuations on the operational behaviour of adsorption chillers<br><i>M. Schicktzanz</i>   | 351 |
| Optimal cyclic operation of two-bed adsorption chillers with mass recovery<br><i>M. Gräber, C. Kirches, J. Schlöder, W. Tegethoff</i>                                    | 359 |

|  |     |
|--|-----|
| Experimental setup for determining ammonia-salt adsorption and desorption behavior under typical heat pump conditions: a description of the setup and experimental results<br><i>M. van der Pal, R. de Boer, J. Veldhuis, S. Smeding</i> | 369 |
| Measurement results of a hybrid adsorption-compression heat pump based on a roots compressor and silica gel-water sorption cycle<br><i>M. van der Pal, A. Wemmers, S. Smeding, J. Veldhuis</i>   | 381 |
| Performance analysis and entropy generation for multi-beds adsorption cooling system<br><i>Aung Myat, Kyaw Thu, Kim Choon Ng</i>   | 389 |
| Discussion on the use of dimensionless parameters in design of adsorbent beds<br><i>G. Gediz Ilis, M. Mobedi, S. Ülkü</i>  | 403 |
| The potential of PCPs/MOFs for the use in Adsorption heat pump processes<br><i>S.K. Henninger, F. Jeremias, J. Ehrenmann, C. Janiak</i>  | 415 |
| Development of a 3d simulation tool for design improvement of adsorbers dedicated to solar air-conditioning systems<br><i>F. Makni, M. Clausse, F. Meunier</i>   | 425 |
| A study on thermophysical characteristics of activated carbon powder/ethanol pair in adsorber<br><i>N. Makimoto, B. Hu, S. Koyama</i>  | 433 |
| Stability of adsorption materials under hydrothermal treatment<br><i>G. M. Munz, S. K. Henninger, M. Baumgartner, P. Schossig, H.-M. Henning</i>   | 443 |
| Annular-finned sorption bed heat exchanger design for adsorption heat pump optimization<br><i>A. Raymond, S. Garimella</i>   | 453 |
| Alternative cycle time control methods for variable-temperature-source adsorption heat pumps<br><i>T. R. Robbins, S. Garimella</i>   | 467 |
| Development of new hybrid materials based on zeolite sapo and carbon supports for adsorption heat pump applications<br><i>L. Bonaccorsi, L. Calabrese, D. Di Pietro, E. Proverbio, A. Freni, G. Restuccia</i>                            | 477 |
| Experimental test of plate evaporator for sorption refrigeration systems<br><i>M. Clausse, J. Leprieur, F. Meunier</i>   | 487 |
| Thermal conductivity and volume cooling capacity of a new type of consolidated composite activated carbon<br><i>L.W. Wang, S.J. Metcalf, R.E. Critoph, Z. Tamainot-Telto, R. Thorpe</i>  | 495 |

|  |     |
|--|-----|
| Towards tailored materials for adsorption heat pump applications<br><i>F. Lanzerath, B. Klitzing, A. Bardow</i>  | 503 |
| Unified water adsorption measurement procedure for sorption materials<br><i>S.K. Henninger, A. Freni, L. Schnabel, P.Schossig, G. Restuccia</i>  | 513 |
| Simulation of water sorption dynamics in adsorption chillers<br><i>A. Freni, Yu. I. Aristov, G. Maggio, A.S. Glaznev, F. Cipiti</i>  | 523 |
| Numerical layer optimization of aluminum fibre/sapo-34 composites for the application in adsorptive heat exchangers<br><i>G. Földner, L. Schnabel, U. Wittstadt, H.-M. Henning, F.P. Schmidt</i> | 533 |
| Evaluation of different evaporator concepts for thermally driven sorption heat pumps and chillers<br><i>L. Schnabel, K. T. Witte, J. Kowol, P. Schossig</i>                                      | 543 |
| Modelling of a waste heat driven silica gel / water adsorption cooling system comparison with experimental results<br><i>M. Verde, J.M. Corberan, R. de Boer, S. Smeding</i>                     | 553 |
| Improvement in water vapor sorption on inorganic salt-supported anodic alumina plate<br><i>M. Kumita, K. Watanabe, H. Komori, Y. Suwa, A. Kodama</i>   | 569 |
| Dynamic characteristics of a chemical heat pump consisting of calcium chloride/ expanded graphite composites<br><i>K. Fujioka, H. Suzuki, N. Miyatani, T. Fudaba</i>                             | 577 |
| Adsorption heat exchangers –a comparison of two experimental methods for their characterization<br><i>U. Wittstadt, A. Sapienza, D. Sonnekalb, A. Frazzica, G. Restuccia, L. Schnabel</i>        | 587 |

## **ISHPC11 Co-Trigeneration**

|  |     |
|--|-----|
| Optimized control strategy of a combined heating, cooling and power system<br><i>M. Schicktanz, N. K. K. Rajgopal, H. Neumann, T. Núñez</i>      | 599 |
| Assessment of a sorption chiller driven by a cogeneration unit in a residential building<br><i>M. Kegel, R. Sunye, N. Galanis, M. A. Douglas</i> | 607 |
| Preliminary design of a low regeneration temperature residential adsorption chiller<br><i>K. Gluesenkamp, R. Radermacher, Y. Hwang</i>           | 615 |
| Energetic and economic analysis of trigeneration for San Nicola building<br><i>F. Busato, R. Lazzarin, M. Noro</i>                               | 625 |

Performance evaluation of a CCHP system with thermal storage in buildings of different load characteristics  
*Xiaoling Zhang, Qichao Yang, Wei Wu, Wenxing Shi, Xianting Li* 637

Performance analysis for the characteristics of CHP system (micro gas turbine + hybrid type absorption chiller)  
*E.J. Pialago, XiRu Zheng, Da Young You, Ick Tae Im, Chan Woo Park* 647

## **ISHPC11 Desiccant**

Experimental study on a silica gel coated heat exchanger cooling system  
*T.S. Ge, Y.J. Dai, Y. Zhao, R.Z. Wang* 661

Development of a novel desiccant chiller with regenerative evaporative cooling  
*Y.J. Dai, D.La, H.Li, R.Z. Wang* 671

Limiting heat and mass transfer mechanisms in desiccant wheels  
*M Goldsworthy, S. D. White* 679

Simulation of heat driven air conditioning systems integrating desiccant wheels and absorption chillers  
*S. De Antonellis, C. M. Joppolo, L. Molinaroli* 689

Cycle simulation of hybrid desiccant cooling system utilizing solar energy  
*Siyoung Jeong, Dae Hwan Kim, Young Lyoul Kim, Seon Chang Kim* 699

Performance of four-divided adsorbent rotor for desiccant dehumidification  
*A. Kodama, A. Sanno, Y. Osaka* 707

Potential study of desiccant wheel-based water catchment from air and possible application for climatization  
*C. Glück, E. Roldán Blasco, B. Lenz, F. P. Schmidt* 715

Experimental performance of a liquid desiccant dehumidification system using an indirect contact heat & mass exchanger  
*Rajat Subhra Das, Sagun Tripathi, Sanjeev Jain* 725

Experimental analysis on the performances of a desiccant wheel regenerated by low grade thermal energy  
*G. Angrisani, F. Minichiello, C. Roselli, M. Sasso* 733

Experimental analysis of a desiccant-based air conditioning system for a flower greenhouse  
*G.A. Longo, A. Gasparella, S. Storato* 745

## ISHPC11 Heat pumps

|  |     |
|--|-----|
| Measuring data and experiences from the Netherlands<br>two real cases of applications of absorption heat pumps<br><i>Gas-fired absorption heat pumps with different sources</i><br><i>R.Schilt</i> | 753 |
| Optimal performance of compression resorption heat pump systems<br><i>D.M. van de Bor, C.A. Infante Ferreira</i>   | 761 |
| Integrated approach for the treatment of steady-state operational data of absorption chillers and heat pumps<br><i>D. Martínez-Maradiaga, D. Sendeku, J.C. Bruno, A. Coronas</i>                   | 771 |
| Performance analyses of absorption heat pumps using conventional working fluids and alternatives<br><i>D. Hera, C. Vasilescu</i>   | 781 |
| Thermodynamic analysis of ammonia/ionic liquid absorption heat pumping processes<br><i>O. Kotenko, H. Moser, R. Rieberer</i>   | 789 |
| Optimal configuration for solution circulation in a double-effect parallel flow H <sub>2</sub> O-LiBr absorption heat pump<br><i>L. Molinaroli, C. M. Joppolo, S. De Antonellis</i>                | 797 |
| Expanded graphite mixture reactant for packed bed reactor of chemical heat pump<br><i>Seon Tae Kim, Junichi Ryu, Yukitaka Kato</i>   | 805 |
