Table of Contents

13th Annual Water Distribution Systems Analysis Symposium

Asset Management

- Burst Detection and Location in Water Distribution Systems** 1
M. Romano, Z. Kapelan, and D. A. Savić
- External Risk Assessment of Pipe Leakages** 11
E. Trietsch, B. Jacobs, S. Gielens, and M. van den Boomen
- Fast-Growing China's Hydropower Systems and Operation Challenges** 20
Chun-Tian Cheng, K. W. Chau, Xin-Yu Wu, and Jian-Jian Shen

Field Work

- Sampling and Condition Assessment of Ductile Iron Pipes** 30
Yehuda Kleiner and Balvant Rajani

Network Hydraulics

- Investigation on the Influence of Utilizing Average Hydraulic Pressure and Maximum Hydraulic Pressure for Pipe Burst Rate Prediction in Water Distribution Networks** 42
A. Shirzad, M. Tabesh, and P. Arjomandi
- Short-Term Generation Scheduling for Hydropower Systems with Discrepant Objectives** 51
Jian-Jian Shen, Chun-Tian Cheng, and Xin-Yu Wu
- SMART OPS—Simulation and Modeling Assisted Real Time Operations** 61
Petr Ingeduld and Johan Spannare
- Effect of Parameter Uncertainty on Water Distribution Systems Model Prediction** 68
M. F. K. Pasha and K. Lansey
- Parallel Artificial Neural Network Using CUDA-Enabled GPU for Extracting Hydraulic Domain Knowledge of Large Water Distribution Systems** 79
Z. Y. Wu and A. A. Eftekharian
- Predetermining Pressure Surfaces in Water Distribution System Design** 93
J. Saldarriaga, S. Takahashi, F. Hernández, and M. Escovar
- The Computational Efficiency of EPANET-PDX** 103
C. Siew and T. Tanyimboh

Network Models

- Application of a Stochastic Test Case Generation for Water Distribution Systems** 113
R. Sitzenfrei, M. Möderl, C. Hellbach, and W. Rauch
- Determining Realistic Criticality of Large Water Distribution System Facilities** 121
Laura Jacobsen, Sri Kamojjala, Chariti Welch, and Tahmineh Pennington
- GIS Based Applications of Sensitivity Analysis for Water Distribution Models** 129
M. Möderl, C. Hellbach, R. Sitzenfrei, M. Mair, A. Lukas, E. Mayr, R. Perfler, and W. Rauch
- Influence of Network Properties and Model Purpose on the Level of Skeletonization** 137
C. Hellbach, M. Möderl, R. Sitzenfrei, and W. Rauch

Network Optimization

- A Scenario-Based Optimization Model for Water Supply System Planning** 146
Doosun Kang and Kevin Lansey
- Multi-Objective Design Optimization of Branched Pipeline Systems: Analytical Probabilistic Assessment of Fire Flow Failure** 156
BongSeog Jung, Yves Filion, Barry Adams, and Bryan Karney
- Performance Study of Differential Evolution with Various Mutation Strategies Applied to Water Distribution System Optimization** 166
Feifei Zheng, Angus R. Simpson, and Aaron Zecchin
- A Logical Approach for Water Distribution System Optimal Design** 177
Doosun Kang and Kevin Lansey
- Design of the Anytown Network Using the Penalty-Free Multi-Objective Evolutionary Optimization Approach** 190
C. Siew and T. Tanyimboh
- Formulation of Chlorine and Decontamination Booster Station Optimization Problem** 199
T. Haxton, R. Murray, W. Hart, K. Klise, and C. Phillips

Network Reliability

- Global Maximum Entropy Minimum Cost Design of Water Distribution Systems** 206
Salah H. A. Saleh and Tiku T. Tanyimboh
- Penalty-Free Evolutionary Algorithm Optimization for the Long Term Rehabilitation and Upgrading of Water Distribution Systems** 214
C. Siew and T. Tanyimboh
- Reliability/Availability Analysis of Water Distribution Systems Considering** 224

Adaptive Pump Operation

Baoyu Zhuang, Kevin Lansey, and Doosun Kang

Network Water Quality

Build-Up of Discolouration Potential in Networks As Function of Treatment Performance 234

J. H. G. Vreeburg and M. Z. Tankerville

Hydraulics and Mixing Efficiency of Small Public Water Disinfection Systems 243

J. M. Wilson and S. K. Venayagamoorthy

Impact of Sustainable Urban Water Infrastructure on Water Quality 253

M. A. Andrade, P. Romero-Gomez, and C. Y. Choi

Water Security

Adjoint-Based Probabilistic Characterization of Contaminant Sources in Water Distribution Systems under Realistic Flow and Sampling Conditions 263

R. M. Neupauer and D. E. Wagner

Bayesian Inference of Contaminant Source in Water Distribution Systems 268

Hui Wang and Kenneth W. Harrison

An Agent-Based Modeling Approach to Evaluate Protective Action Strategies in a Water Distribution Contamination Event 276

Mohammadmehdi Shafiee and Emily M. Zechman

Modeling Discrete Interconnection Events of Two Water-Distribution Systems to Reconstruct Historical Human Exposure 283

Jason B. Sautner, Walter Grayman, and Morris L. Maslia

Quantification of the Relative Importance of Factors Contributing to Intrusion in a Distribution System Using a Full Factorial Design 291

Gabrielle Ebacher, Marie-Claude Besner, and Michèle Prévost

A Bayesian Approach for Probabilistic Contamination Source Identification 304

Xueyao Yang, Dominic L. Boccelli, and Annamaria E. De Sanctis

Alternative Approaches for Solving the Sensor Placement Problem in Large Networks 314

R. Pinzinger, J. Deuerlein, A. Wolters, and A. R. Simpson

Using Niche Co-Evolution Strategies to Address Non-Uniqueness in Characterizing Sources of Contamination in a Water Distribution System 324

Kristen Drake and Emily Zechman

Minimize Impact or Maximize Benefit: The Role of Objective Function in Approximately Optimizing Sensor Placement for Municipal Water Distribution Networks 330

William E. Hart, Regan Murray, and Cynthia A. Phillips

Multi-Criteria Response Planning for Water Utility Contamination Events	340
Amin Rasekh and Kelly Brumbelow	

8th Urban Watersheds Management Symposium

Bioretention and Infiltration Case Studies

Assessing the Accuracy of Bioretention Installation in North Carolina	347
B. J. Wardynski and W. F. Hunt	

Bioretention Design and Performance in Johnson County, KS	356
Edward Peltier and Greg Carbone	

Treating Highway Bridge Deck Runoff Using Bioretention and a Swale	364
S. K. Luell, W. F. Hunt, and R. J. Winston	

Bioretention Design and Modeling

Bioretention Outflow: Does It Mimic Rural Water Interflow?	375
Kathy M. DeBusk and William F. Hunt	

Impact on Bioretention Design of the Calculation Method for the 95th Percentile Rain Event	387
Ruth A. Sitler and Shirley E. Clark	

Performance Comparison of Biofiltration Designs	395
Michael Barrett, Maëlle Limouzin, and Desmond Lawler	

Bioretention Media

Evaluating Media Depth, Surface Storage Volume, and Presence of an Internal Water Storage Zone on Four Sets of Bioretention Cells in North Carolina	405
Robert A. Brown and William F. Hunt	

Filtered Metals Control in Stormwater Using Engineering Media	415
Shirley E. Clark and Robert Pitt	

Treatability of Organic Emerging Toxicants in Urban Stormwater Runoff	428
Robert Pitt and Shirley E. Clark	

Emerging Issues in Urban Stormwater Management

BMP Performance Analysis Results for the International Stormwater BMP Database	441
Jane Clary, Marc Leisenring, Aaron Poresky, Andrew Earles, and Jonathan Jones	

One Water One Watershed Plan—Breakthroughs in Collaboration and Sustainability	450
Mark R. Norton	

Potential Maximum Use of Harvested Stormwater Volume at a Site Level	457
Scott Taylor, Daniel Apt, and Remi Candaele	
Erosion Control	
Eroded Particle Size Distributions for Southeastern U.S. Soils	467
J. C. Hayes, C. V. Privette III, C. B. Sawyer, and J. W. Price	
Turbidity Modeling Based on the Concentration of Total Suspended Solids for Stormwater Runoff from Construction and Development Sites	477
S. S. Patil, B. J. Barfield, and G. G. Wilber	
Hydromodification in Urban Streams	
Incompatible Uses: The Dichotomy between the Flood Control Use and Other Designated Beneficial Uses of Streams in the Los Angeles Basin	487
Geremew G. Amenu	
Predicting Hydromodification Impacts Using a Four Factor Approach	499
J. A. Goodman and L. Austin	
Relating Stormwater Control Measure (SCM) Discharge Design Standards to Stream Erosion in Piedmont North Carolina: Case Studies in Raleigh and Chapel Hill, North Carolina	509
E. D. Tillinghast, W. F. Hunt, and G. D. Jennings	
Integrated Water Management in Southern California	
Integrated Water Management Efforts in the Greater Los Angeles County Region: Accomplishments and Future Direction	519
Phil Doudar	
Stakeholders in Ventura County Collaborate in Addressing Water Management Challenges through IRWM Planning Process	528
Lynn Rodriguez	
LID Computations and Modeling	
How Are Low Impact Stormwater Control Measures Simulated by Different Computational Models?	538
Franco Montalto and Bill Lucas	
Modeling Low Impact Development Water Quality BMPs with IDEAL	547
M. D. Alexander, B. J. Barfield, J. C. Hayes, S. L. Harp, M. Chalavadi, S. Yeri, E. Stevens, and B. T. Bates	
Low Impact Development Computations—WWHM	558
Douglas Beyerlein	
Spreadsheet and Design Storm Routing Approaches to LID Computations:	577

From Permitting Perspectives to Detailed Design

Hunter S. Freeman and William C. Lucas

Hydraulic and Hydrologic Modelling of Permeable Pavement 587

Nick Hohaia, Elizabeth Fassman, William F. Hunt, and Kelly A. Collins

Multiobjective Automatic Calibration of the Storm Water Management Model (SWMM) Using Non-Dominated Sorting Genetic Algorithm II (NSGA-II) 598

T. A. Shinma and L. F. R. Reis

LID Implementation

Applying Low Impact Development Practices to Meet Multiple Objectives: Case Studies 608

Scott D. Struck, Steve Carter, Jamie Brescol, Dan Christian, Carol L. Hufnagel, and Youn Sim

Developing Standards for Low Impact Development in San Diego: City of San Diego Low Impact Development Design Manual 619

Sumer Hasenin, Jason Wright, Chad Helmle, and Scott Struck

The Farmington River Enhancement Grants: A Tale of Two Towns and the Path to Low Impact Development 629

Steve Trinkaus

Manufactured Treatment Devices

Development of Municipal Separate Storm Sewer System (MS4) Numeric Limits for Constituents of Concern and Evaluation of Proprietary Best Management Practices (BMPs) for the City of San Diego, CA 638

J. C.-L. Jones, G. Minton, J. Nabong, and S. Hasenin

Field Study of Total Phosphorus Removal from Stormwater Runoff Using Adsorptive Filtration Media 649

Jia Ma, Derek Berg, James H. Lenhart, John Pedrick, and Karel Tracy

Information for Inspection and Maintenance of Stormwater Manufactured Treatment Devices 657

Qizhong Guo and Junghoon Kim

Self Fertilising Geotextiles in Model Pervious Pavement Structures 670

Alan P. Newman, Les Duckers, Ernest O. Nnadi, and Andrew J. Coble

Urban Area Water Quality Issues

A Comparative Study of Water Quality Conditions between Heavily Urbanized and Less Urbanized Watersheds of Los Angeles Basin 680

Geremew G. Amenu

Effectiveness of TSS, TN, and TP As Indicators of Stormwater Runoff Pollutant Concentration and Partitioning 691

Shirley E. Clark and Christina Y. S. Siu

Pollutant Load Evaluation in Stormwater Systems 700

Daeryong Park, Jom C. Loftis, and Larry A. Roesner

Salinity and Pollutant Stratification at the Margin of San Diego Creek and Upper Newport Bay, California 713

B. J. Hibbs, M. Horns, M. Merino, and C. Sevilla

Urban Hydrologic Modeling

Economic Consideration in Water Quality Improvement Practices under Extreme Flow Conditions: Water Quality Design Storm 722

Youn Sim, Stephen Carter, John Riverson, Rui Zou, Jenny Zhen, and Clary Barreto

Impact Assessment of Non-Point Source Pollution with the L-THIA Model 732

Patrik de Oliveira Aprígio and João Luiz Boccia Brandão

Indirect Determination of Effective Impervious Area (EIA) of an Urban City of North East India 742

Sanat Nalini Sahoo and P. Sreeja

Revisiting Modified Rational Method 751

Nirajan Dhakal, Xing Fang, Theodore G. Cleveland, and David B. Thompson

Vegetated Systems

Floating Vegetated Island Retrofit to Treat Stormwater Runoff 763

K. Borne and E. Fassman

Media Moisture Content to Determine Evapotranspiration from Swales and Bioretention Cells 773

Elizabeth Fassman and Karen Stokes

The Applicability of Classical Predictive Equations for the Estimation of Evapotranspiration from Urban Green Spaces: Green Roof Results 783

Kimberly DiGiovanni, Stuart Gaffin, Franco Montalto, and Cynthia Rosenzweig

Watershed Modeling

Integrated Systems Dynamics Model for TMDL Policy Assessment: A Lake Allegan Case Study 793

Ali Mirchi and David Watkins, Jr.

Water Quality Prediction Models for Storm Water Runoff in an Urban Watershed 803

J. R. Fisher, B. I. Dvorak, D. M. Admiraal, and A. A. Hosni

9th Symposium on Groundwater Hydrology, Quality, and Management

Aquifer Storage and Recovery System: Operations, Management, and Policy

Assessment of the Effectiveness of Dams on the Recharge of the Shallow Aquifer in the Northern Area of UAE 813

M. M. Sherif, M. M. Al Mulla, and A. A. Ebraheem

Spatial Decline Distribution of Groundwater Levels of Confined Aquifer in the Whole Red River Delta, Vietnam 823

D. D. Bui, A. Kawamura, T. N. Tong, H. Amaguchi, and N. Nakagawa

The Impact of Artificial Recharge Plans on Aquifer and Demand Management Techniques in Shahrekord, Iran 833

Faroozan Rajaei, Hossein Samadi-Borujeni, Saeid Eslamian, and E. Zia Hosseinipour

Wavelet and Cross-Wavelet Analysis of Groundwater Quality Signals of Saltwater Intruded Coastal Aquifers 846

J. Sreekanth and Bithin Datta

California Groundwater Resources: Challenges and Opportunities

The Sacramento Regional Groundwater Model 854

Norman L. Jones, Michelle Smilowitz, and Derrick Whitehead

Planned Updates and Refinements to the Central Valley Hydrologic Model with an Emphasis on Improving the Simulation of Land Subsidence in the San Joaquin Valley 864

Claudia C. Faunt, Randall T. Hanson, Peter Martin, and Wolfgang Schmid

Geothermal Energy and Related Topics

Sustainable Geothermal Reservoir Management Using Geophysical and Hydraulic Investigations 871

J. Szanyi, B. Kovács, I. Czinkota, B. Kóbor, T. Medgyes, M. Barcza, A. Bálint, and S. Kiss

Geothermal Energy in a Central European Perspective—Challenges and Opportunities 876

R. Sitzenfrei, M. Möderl, C. Hellbach, E. Fleischhacker, and W. Rauch

Geothermal Energy: Sustainability, Climate Change, and State of the Practice in the United States 886

Susan Cahalan, Yee Cho, Kathleen Campbell, and Matthew Kwan

Groundwater (Quality and Quantity) Modeling Tools and Techniques

Evaluation of Well Heads by Using Different Approaches: Well Package, Multi-Node Well Package, and Analytical Solution 898

Jesús R. Gastélum, Zhuping Sheng, Chenggang Wang, and Shiliang Zhao

Stop Saltwater Intrusion toward Water Wells Using Scavenger Wells 904

Frank T.-C. Tsai

Trend Detection in Groundwater Levels of Holocene Unconfined Aquifer in Hanoi, Vietnam, by Non-Parametric Approaches 914

A. Kawamura, D. D. Bui, T. N. Tong, H. Amaguchi, and N. Nakagawa

Use of Simulation Filters in 3-D Groundwater Contaminant Transport Modeling 924

Godwin Appiah Assumaning and Shoou-Yuh Chang

Generalized Visualization Modules for Solute Transport in Groundwater 934

V. Chandramouli, Madhusudhan Narayana, Vamsi Duruvai, Site Guo, John Moreland, Venkatesh Merwade, Chen Q. Zhou, Alfie Song, Yuzhu Hu, and Fan Zhang

Analytic Modeling for Aquifer Radial Movement Caused by Artificial Discharge 943

J. Li

Contrasting Advective Spreading and Dispersive Mixing 954

A. N. Piscopo, R. M. Neupauer, and D. C. Mays

Groundwater Characterization, Monitoring, Management, and Its Uncertainty

Energy-Water Meter: A Novel Solution for Groundwater Monitoring and Management 962

Amin Moazedi, Mohsen Taravat, Hossein Nazarboland Jahromi, Kaveh Madani, Ashkan Rashedi, and Saman Rahimian

Hydrodynamic Characterization of a Karst Aquifer in the Brazilian Semi-Arid Region with Time Series Analysis of Hydrology Data 970

Guilherme Fernandes Marques, Stela Cota, Paulo Vicente Braga, Jr., Leila Menegasse Velásquez, Paulo Rodrigues, and Rodrigo Sérgio De Paula

Policy Implications of Institutional Arrangements for Sustainable Management of Common Pool Resources: The Case of Groundwater 981

Kaveh Madani and Ariel Dinar

Groundwater Quality and Human Health

Current Status and Trend of Nitrate-N and Factors Affecting Its Concentration in Shallow Groundwater Systems of Kathmandu 990

Dhundi Raj Pathak, Akira Hiratsuka, and Yosuke Yamashiki

Reconstruction of Groundwater Contamination History in Hadnot Point Area of Camp Lejeune, North Carolina, Using Linear Stochastic Control Model 1000

Jiabao Guan, Morris L. Malia, and Mustafa M. Aral

Groundwater Sustainability

Groundwater Modeling of the Calera Aquifer Region in Central Mexico 1009

Jairo E. Hernández, Prasanna H. Gowda, Terry A. Howell, Jean L. Steiner, Francisco Mojarro, Ernesto P. Núñez, and José R. Avila

Interaction of Stream and Groundwater and Integrated Management

- Modeling Maui's Freshwater System to Inform Water Resource Management** 1019
E. Grubert
- Adjoint Model to Quantify Stream Depletion Due to Pumping in Coupled Groundwater/Surface Water Systems** 1029
R. M. Neupauer and S. A. Griebing
- Kinetics and Seepage Forces in Steady-State Ground-Water Flow** 1038
Hugo A. Loáiciga
- Sediment Oxygen Demand and Pore Water Phosphate Flux: Measurement, Characterization, and Monitoring in Deer Creek Reservoir** 1055
Derek Lounsbury, Oliver Obregon, Reed Chilton, Rolando F. Velasquez, Gustavious P. Williams, and E. James Nelson
- Use of Environmental Isotopes to Determine Impacts on Wetlands Due to Lining of Irrigation Canals, Salton Sea Area, California** 1064
B. J. Hibbs, M. Kelliher, and N. Erdelyi

Microbial and Nanoparticle Transport in the Subsurface

- Encapsulation of Iron Nanoparticles and Trichloroethylene Degrading Bacteria for Groundwater Clean-Up** 1075
Sai Sharanya Shanbhogue, Achintya Bezbaruah, Eakalak Khan, and Senay Simsek
- Groundwater Arsenic Remediation Using Amphiphilic Polysiloxane Graft Copolymer Coated Iron Nanoparticles** 1083
Sita Krajangpan, Achintya Bezbaruah, and Bret Chisholm

Probabilistic Methods for Aquifer Parameter Estimation, Groundwater Modeling, and Inverse Modeling

- A Hierarchical Bayesian Model Averaging Approach to Cope with Sources of Uncertainty in Conceptual Ground Water Models** 1089
Frank T.-C. Tsai and Ahmed S. Elshall
- A Sequential Monte Carlo Method to Update the Conditional Solute Concentration in a Three Dimensional Contaminant Transport Model** 1099
Shoou-Yuh Chang, Sikdar Latif, and Tushar Chowhan
- Ensemble Kalman Filter to Improve the Accuracy of a Three Dimensional Flow and Transport Model with a Continuous Pollutant Source** 1109
Shoou-Yuh Chang and Sikdar Latif
- Use of Regional Covariance in Data Assimilation Method to Improve the** 1118

Estimation Accuracy of a Three Dimensional Contaminant Transport Model

Shoou-Yuh Chang and Sikdar Latif

Vadose Zone Hydrology

Experimental and Numerical Investigation of the Effect of Diesel or Ethanol-Blended Diesel on Hydraulic Properties of Unsaturated Soils 1127

Antonella Sciortino and Feike J. Leij

Arid Lands Symposium

Arid Lands Hydrology and Hydraulics

Effect of Spatial and Temporal Variability of Antecedent Moisture Content on Model-Generated Runoff from an Arid Watershed 1137

William J. Meyer, Sajjad Ahmad, Michael H. Young, David S. Shafer, Julianne J. Miller, and Karletta Chief

Modeling Nutrient Dynamics and Benthic Algal Relationships on the South Fork Humboldt River, NV 1147

D. W. Smith, J. J. Warwick, and C. H. Fritsen

Using Doppler Radar Precipitation Measurements to Enhance Estimates of Playa Inundation 1151

J. J. Miller, R. H. French, S. A. Mizell, M. E. Cablk, and C. B. Kratt

Hydroclimate

Assessment and Comparison of SPI and RDI Meteorological Drought Indices in Selected Synoptic Stations of Iran 1161

Hamed Jamshidi, Davar Khalili, Mehdi Rezaeian Zadeh, and E. Zia Hosseinipour

Effects of Coupling in Understanding the Surface Energy Balance in the Snake River Basin, Idaho 1174

Thilin Jaksa, Kevin Nuss, and Venkat Sridhar

Seasonal Prediction of Karoon Streamflow Using Large-Scale Climate Indices 1184

Mahmoud Azimi, Fatemeh Golpaygani, Massoud Tajrishy, and Ahmad Abrishamchi

Water Management in Arid Climates

A System Dynamics Approach to Economic Assessment of Water Supply and Demand Strategies 1194

M. Karamouz, M. S. Semsar Yazdi, B. Ahmadi, and B. Zahraie

Assessment of Agricultural Water Foot Print in Iran Based on Virtual Water Trade 1204

A. Arabi Yazdi, A. Alizadeh, and E. Zia Hosseinipour

California Water and Environmental Projects and Issues

[The Environmental, Engineering, and Economic Analysis of Large Scale Dam Removal on the Klamath River](#) 1213

Chris Park and Ben Swann

[Application of Geographical Information System to the Hydrological Analysis of Cajon Creek, near Devore, CA](#) 1223

Portia Gonzalez and Antonella Sciortino

Climate Change Symposium

Assessment of Climate Risks, Vulnerabilities, and Hazards

[Climate Change Response of Three Physically Based Hydrology Models in the Connecticut River Watershed](#) 1233

A. Polebitski, S. Steinschneider, R. N. Palmer, C. Brown, and D. Ahlfeld

[The Risk Analysis of Long Term Impact to Reservoir under Extreme Hydrologic Events—Shihmen Reservoir, a Case Study](#) 1237

P. S. Lee and G. J.-Y. You

[Water and Deforestation in Brazil: Future Challenges for Policy Implementation](#) 1247

R. K. Phillips and E. Grubert

Assessment of Risks in Hydrology/Water Resources within an Evolving Climate

[Creating an Index of Flood Vulnerability to Climate Change for Korean Fundamental Local Governments: The Effect of the Four Major Rivers Restoration Project As an Adaptation Strategy](#) 1257

Jaeyoung Yoon, Yong Jung, Minha Choi, Hyun Suk Shin, Moo Jong Park, and Sangdan Kim

[Entropy-Based Probability Distribution for IDF Curves](#) 1265

Vijay P. Singh and Zengchao Hao

[Impact of Climate Change on SPI and SAD Curve](#) 1273

Jae Won Kwak, Min Soo Kyoung, Duck Gil Kim, and Hung Soo Kim

[Hidden Markov Model Based Probabilistic Assessment of Droughts](#) 1282

Ganeshchandra Mallya, Shivam Tripathi, and Rao S. Govindaraju

[Sea Level Changes along the Peninsular Malaysia and Sabah and Sarawak Coastlines for the 21st Century](#) 1292

Ali Ercan, M. Levent Kavvas, and Mohd Fauzi Mohamad

California Climate Change Experiences

Climate Warming Effects on Hydropower Demand and Pricing in California 1298
Marion Guégan, Kaveh Madani, and Cintia B. Uvo

Climate Impacts on Critical infrastructure/Designing for Climate Change

The Investigation of Drought Values Fluctuation under the Effect of Climate Change—Case Study: Gharesou Basin 1308
Maryam Golmohammadi, Alireza Kamal, and Alireza Massah Bovani

Using HEC-HMS for Stormwater Infrastructure Assessment in Response to Changes in Design Storm Depths Calculated from Climate Projections 1318
W. Forsee and S. Ahmad

Decision Processes and Climate Uncertainty
