

**GeoRisk 2011**

**Geotechnical Risk Assessment and  
Management**

**Atlanta, Georgia, USA  
26-28 June 2011**

**Volume 1 of 2**

**Editors:**

**C. Hsein Juang  
Anand J. Puppala  
Gordon A. Fenton**

**Kok Kwang Phoon  
Russell A. Green**

**ISBN: 978-1-61839-019-6**

**Printed from e-media with permission by:**

# Table of Contents

## Keynote Lectures

<b>Risk of Limit-Equilibrium Failure of Long Earth Slopes: How It Depends on Length</b>	<b>1</b>
Erik Vanmarcke	
<b>Development of a Risk-Based Landslide Warning System</b>	<b>25</b>
Wilson H. Tang and L. M. Zhang	
<b>Unresolved Problems in Geotechnical Risk and Reliability</b>	<b>50</b>
John T. Christian and Gregory B. Baecher	
<b>Learning to Live with Geohazards: From Research to Practice</b>	<b>64</b>
Suzanne Lacasse and Farrokh Nadim	
<b>Geo-Risks in the Business Environment</b>	<b>117</b>
William F. Brumund	
<b>The Practical Application of Risk Assessment to Dam Safety</b>	<b>129</b>
Gregg A. Scott	

## Characterization and Modeling of Variability of Soils across Scales

<b>Random Field Model Parameters for Columbia River Silt</b>	<b>169</b>
Armin W. Stuedlein	
<b>Reliability-Based Design for Allowable Bearing Capacity by Considering Differential Settlement on Highly Fractured Rock Masses</b>	<b>178</b>
Jianye Ching, Yu-Gang Hu, Zon-Yee Yang, and Jang-Quang Shiau	
<b>Assessment of Levee Site Variability As a Function of the Number of Explorations</b>	<b>186</b>
Christopher B. Groves, Hollie L. Ellis, and N. Kyle Tabor	
<b>Influence of Geotechnical Dataset on the Range of Influence of Undrained Shear Strength</b>	<b>193</b>
Site Onyejekwe and Louis Ge	
<b>Reliability Based Approach to Quantify Montmorillonite Mineral in Expansive Clays</b>	<b>201</b>
Bhaskar Chittoori and Anand J. Puppala	

## Probabilistic/Simulation Methods

<b>Subset Simulation and Its Application to a Spatially Random Soil</b>	<b>209</b>
Ashraf Ahmed and Abdul-Hamid Soubra	
<b>Probabilistic Analysis of Basal Heave in Deep Excavation</b>	<b>217</b>
Y. G. Tang and Gordon T. C. Kung	
<b>Influence of the Scale of Fluctuation of the Friction Angle on the Face Stability of a Pressurized Tunnel in Sands</b>	<b>225</b>
M. Guilhem Mollon, Kok-Kwang Phoon, Daniel Dias, and Abdul-Hamid Soubra	

<b>Probabilistic Finite Element Analysis of a Raft Foundation Supported by Drilled Shafts in Karst</b>	<b>233</b>
D. V. Griffiths, D. Dotson, and J. Huang	
<b>Probabilistic Slope Stability Analysis As a Supplement to a Deterministic Study</b>	<b>240</b>
Nishant Dayal, A. Rafael Prieto, J. Paul Lewis, and R. David Scherer	
<b>Liquefaction Probability by Probabilistic Version of Robertson and Wride Model</b>	<b>247</b>
Chih-Sheng Ku, C. Hsein Juang, Jianye Ching, and Der-Her Lee	

## Uncertainty Modeling

<b>Design Criteria for the Differential Settlement of Landfill Foundations Modeled Using Random Fields</b>	<b>255</b>
K. C. Foye and X. Zhao	
<b>Bayesian Updating of Load Settlement Curves for Footings on Cohesionless Soil</b>	<b>263</b>
Shadi S. Najjar and Michel Saad	
<b>Stochastic vs. Deterministic Analysis of Consolidation Problem in Natural Alluvial Deposits</b>	<b>271</b>
Pouya Pishgah Gilani and Reza Jamshidi Chenari	
<b>Bearing Capacity of Strip Footings on Spatially Random Soils Using Sparse Polynomial Chaos Expansion</b>	<b>279</b>
Tamara Al-Bittar and Abdul-Hamid Soubra	
<b>Spatial Variability of Aperture in a Rough-Walled Crack in Surface Soil</b>	<b>287</b>
J. H. Li, Z. F. Wang, and L. M. Zhang	
<b>Parameter Estimation and Uncertainty Analysis Incorporating Engineering Judgement by Bayesian Inversion</b>	<b>295</b>
C. P. Lin and Y. C. Hung	

## Earthquake Engineering and Soil Dynamics I

<b>Site Response Effects on Partially Ergodic PSHA</b>	<b>303</b>
G. A. Montalva and A. Rodriguez-Marek	
<b>A Case Study of Alternative Site Response Explanatory Variables in Parkfield, California</b>	<b>310</b>
E. M. Thompson, L. G. Baise, Robert E. Kayen, Eugene C. Morgan, and James Kaklamanos	
<b>Estimating Repair Cost and Downtime Due to Earthquake-Induced Damage at Container Ports</b>	<b>318</b>
L. M. Ivey, G. J. Rix, S. D. Werner, and A. L. Elera	
<b>Effect of Fabric Anisotropy on Seismic Response of Strip Foundations</b>	<b>326</b>
Bo Li, Xiangwu Zeng, and Hao Yu	
<b>Seismic Response of Reinforced Soil Retaining Walls: Is PGA-Based Design Adequate?</b>	<b>336</b>
J. B. Varnier and K. Hatami	
<b>Performance Based Assessment of Dynamic Soil-Structure Interaction Effects on Seismic Response of Building Frames</b>	<b>344</b>
Behzad Fatahi, Hamid Reza Tabatabaiefar, and Bijan Samali	

# Geotechnical Assessment, Characterization, and Design for Risk Management I

<b>Effects of Slenderness Ratio on Seismic Behavior of Vertical Micropiles</b>	<b>352</b>
Gholamreza Saghaee and Reza Noorzad	
<b>Multichannel Analysis of Surface Waves (MASW) at the National Geotechnical Engineering Site at Texas A&amp;M University (NGES/TAMU)</b>	<b>361</b>
R. T. Williams and D. Penumadu	
<b>Probabilistic Compressible Soil Thickness from Field Settlement Data</b>	<b>371</b>
Sangho Lee and Masud Alam	
<b>A Novel Application of Risk Analysis Methods to Evaluate the Future Viability of Two Large Concrete Stormwater Detention Tanks</b>	<b>379</b>
M. Eddleston and P. J. Mason	
<b>Risk Management for Large-Scale Foundation Design and Construction in Challenging Karst Geology</b>	<b>387</b>
John I. Yao and Emad Farouz	
<b>Effect of Spatial Variability and Model Uncertainty on the Design of Sockets in Weak Carbonate Rocks</b>	<b>395</b>
Khaled H. Charif and Shadi Najjar	

# Engineering Geology and Site Characterization

<b>CPT-Based Probabilistic Characterization of Effective Friction Angle of Sand</b>	<b>403</b>
Zijun Cao, Yu Wang, and Siu-Kui Au	
<b>Prediction of Embankment Settlement from PCPT Measurements: A Case Study at Courtableau Bridge</b>	<b>411</b>
Xinbao Yu and Murad Abu-Farsakh	
<b>Geochemical and Geotechnical Features of Terra Rossa in Karst Areas of Southern Appalachians</b>	<b>420</b>
A. Nandi and J. Moore	
<b>Characterizing Spatial Variability of Cone Penetration Testing through Geostatistical Evaluation</b>	<b>428</b>
D. A. Saftner, R. A. Green, R. D. Hryciw, M. F. Fadden, and A. DaCosta	
<b>Case Study—A Landslide on Coastal Slope in Bellingham Bay</b>	<b>436</b>
X. Huang	
<b>Developing Resistance Factors for Design of Piles in Sand</b>	<b>444</b>
K. C. Foye, M. Prezzi, and R. Salgado	

# Quantitative Risk Analysis for Embankments, Dams, and Slopes

<b>Probabilistic Slope Stability Analysis of a 300 m High Embankment Dam</b>	<b>452</b>
Qun Chen and Li-Ying Chang	

<b>Identification of Hazardous Loose Landslide Deposits and Scars Formed during the 2008 Wenchuan Earthquake</b>	<b>460</b>
H. F. Zhao and Limin Zhang	
<b>Bounding the Probability of Failure for Levee Systems</b>	<b>468</b>
Justin C. Hollenback and Robb E. S. Moss	
<b>Breaching of Changkai Levee in June 2010 in Jiangxi Province, China</b>	<b>476</b>
M. Peng and L. M. Zhang	
<b>Distinct Element Modelling for High Rock Slopes in Static and Dynamic Conditions: A Case Study</b>	<b>484</b>
Ganesh W. Rathod, A. K. Shrivastava, and K. S. Rao	
<b>Reliability Analysis of Stone Columns for Ground Improvement</b>	<b>493</b>
Jose A. Alonso and Rafael Jimenez	

## **Earthquake Engineering and Soil Dynamics II**

<b>Application of SCPTU for Assessing Liquefaction Potential of the 1976 Tangshan Earthquake, China</b>	<b>501</b>
Guojun Cai, Songyu Liu, and Anand J. Puppala	
<b>Characterizing the Liquefaction Potential of the Pleistocene-Age Wando Formation in the Charleston Area, South Carolina</b>	<b>510</b>
T. Heidari, R. D. Andrus, and S. M. J. Moysey	
<b>Influence of <math>r_d</math> on Liquefaction Triggering Evaluation at Two Case History Sites</b>	<b>518</b>
John Liao and Jorge Meneses	
<b>Evaluating Bias of Liquefaction-Induced Settlement Methods for Performance-Based Design</b>	<b>526</b>
H. Hayati and R. E. S. Moss	
<b>Estimating CSRs for Evaluating Liquefaction That Are Consistent with Building Code Design Spectra</b>	<b>534</b>
Aaron S. Bradshaw and Russell A. Green	
<b>Potential Differences between Time Series and Random Vibration Theory Site Response</b>	<b>544</b>
Albert R. Kottke and Ellen M. Rathje	

## **Geotechnical Assessment, Characterization, and Design for Risk Management II**

<b>Understanding Uncertainty: Assessment and Management of Geotechnical Risk in Tunnel Construction</b>	<b>552</b>
Thomas W. Pennington and Donald P. Richards	
<b>Communicating and Managing Risk in Geotechnical Engineering Practice</b>	<b>560</b>
Jessee A. Scarborough	
<b>Reliability Analysis of Deep Excavation Based on a Semi-Empirical Approach</b>	<b>568</b>
J. K. Park, G. Biscontin, and P. Gardoni	

**Jet-Grouting in Cohesive Soils for Ground Improvement in Hawaii** 578  
John Y. L. Chen, Robin M. Lim, and Kyle Furuhashi

**Risk Assessment of Success Dam, California: Evaluation of Operating Restrictions As an Interim Measure to Mitigate Earthquake Risk** 586  
D. Bowles, M. Ruthford, and L. Anderson

## **Load and Resistance Factor Design (LRFD) for Foundation Systems**

**Some Observations on Reliability-Based Design of Rock Footings** 600  
Widjojo A. Prakoso and Fred H. Kulhawy

**A Practical LRFD Design Method for Deep Foundations Using Side Friction and End Bearing** 608  
H. Klammler, M. McVay, Jeongsoo Ko, P. Lai, and R. Herrera

**Reliability-Based Design of Shallow Foundations in Cohesionless Soils under Compression Loading: Serviceability Limit State** 616  
Sami O. Akbas and Fred H. Kulhawy

**Quantile Framework for Simplified Geotechnical Reliability-Based Design** 624  
Jianye Ching and Kok-Kwang Phoon

**Reliability Assessment of Eurocode 7 Spread Foundations Design Methodology** 632  
Sónia H. Marques, A. Topa Gomes, and A. Abel Henriques

**Deterministic and Probabilistic Seismic Analyses of a Slope-Footing System** 640  
Nancy Salloum, Dalia Youssef Abdel Massih, Abdul-Hamid Soubra, and Jacques Harb

## **Limit State Design in Geotechnical Engineering**

**A Comparative Study of Drilled Shaft Design Using LRFD and Expanded RBD** 648  
Yu Wang, Zijun Cao, and Fred H. Kulhawy

**Limit States Design of Pile Foundations in Clay under Combined Action of Transient Uplift Loads and Frost Jacking** 656  
Konstantin Ashkinadze

**Safety Margin in Design of Pile-Supported Structural Slabs for Frost Action** 664  
Konstantin Ashkinadze

**Statistical Characterization and Stochastic Simulation of Load-Displacement Behavior of Shallow Footings** 672  
Marco Uzielli and Paul W. Mayne

**Reliability Based Design of Base Heave Stability in Wide Excavations** 680  
Shih-Hsuan Wu, Chang-Yu Ou, and Jianye Ching

**Probabilistic Analysis of Shallow Foundations on Rocks Obeying Hoek-Brown Failure Criterion** 688  
Nut Mao, Tamara Al-Bittar, and Abdul-Hamid Soubra

## **Risk and Reliability in Geoenvironmental Engineering**

<b>Influence of Aging on the Mechanical Behavior of Municipal Solid Waste</b>	<b>696</b>
A. Nayebi, N. Shariatmadari, M. H. Hamzeie Tehrani, and P. Oskouie	
<b>Effect of 1D Infiltration Assumption on Stability of Spatially Variable Slope</b>	<b>704</b>
Anastasia M. Santoso, Kok-Kwang Phoon, and Ser-Tong Quek	
<b>Old Sewer, Big Risks: Managing Risks during the Design and Construction of a 21-Story Building Adjacent to a Critical 100-Year-Old Sewer Structure</b>	<b>712</b>
Damian R. Siebert, Joel S. Mooney, Richard Marks, Daniel Ocasio, and Kevin McKenna	
<b>Effect of Leachate Recirculation and Extent of Degradation on the Stability of Bioreactor Landfill Slopes</b>	<b>720</b>
Amit Srivastava, G. L. Sivakumar Babu, Krishna R. Reddy, and Hanumanth S. Kulkarni	
<b>Sustainable Flood Risk Management: Lesson from Recent Cases</b>	<b>728</b>
Xiong (Bill) Yu and Yuewen Huang	
<b>Life Cycle Approaches for Brownfields Redevelopment</b>	<b>736</b>
Patricia M. Gallagher and Sabrina Spatari	

## **Retaining Structures I**

<b>Strain Localization Effect on System Reliability Based Design of Bridge Abutments under Earthquake Loading</b>	<b>744</b>
B. Munwar Basha and G. L. Sivakumar Babu	
<b>Serviceability Considerations in the Design of Sheet Pile Walls for Risk Management</b>	<b>754</b>
Ömer Bilgin, Eman Mansour, and Mohamad Gabar	
<b>Reliability Based Performance Evaluation of Earth Retaining Structures</b>	<b>762</b>
Manojit Chakraborty, A. Murali Krishna, and Arunasis Chakraborty	
<b>Wall and Ground Responses in a Braced Excavation Considering Spatial Variability</b>	<b>770</b>
Zhe Luo, C. Hsein Juang, and Fu-Kuo Huang	
<b>Evaluation of LRFD Resistance Factors and Risk for Mechanically Stabilized Earth Walls</b>	<b>778</b>
S. Wasman, M. McVay, D. Bloomquist, M. Harrison, and P. Lai	

## **Hazards/Risks I**

<b>(Sub)Global Rock Slope Stability: Using Rock Mass Indices to Characterize and Manage Rockfall Risk</b>	<b>787</b>
Brian Bruckno	
<b>Evaluation of the Susceptibility of Landslides and Debris Flows on Costa Rica's National Road Network: Analysis of a Segment of National Route 32</b>	<b>795</b>
Diego A. Cordero Carballo	
<b>Spatial Prediction of Groundwater Depth to Trigger Liquefaction in St. Louis</b>	<b>804</b>
Jae-Won Chung and J. David Rogers	
<b>Study on Risk Assessment for an Individual Landslide</b>	<b>812</b>
Juan Du and Kun-Long Yin	

<b>Geohazard Interpretation of the Cagliari Slope (Southern Sardinia, Italy)</b>	<b>820</b>
William J. Johnson, Francesca Zolezzi, James Nicholls, Eric J. Parker, and Ennio Morgante	
<b>Delineation of Slope Profiles from Digital Elevation Models for Landslide Hazard Analysis</b>	<b>829</b>
Mesut Turel and J. David Frost	

## **Earthquake Engineering and Soil Dynamics III**

<b>Establishing Confidence in Surface Wave Determined Soil Profiles</b>	<b>837</b>
P. Michaels	
<b>Surface Wave Benchmarking Exercise: Methodologies, Results, and Uncertainties</b>	<b>845</b>
B. R. Cox and C. M. Wood	
<b>Analysis of Surface Wave Benchmarking Data</b>	<b>853</b>
Don Zhao	
<b>An Assessment of Surface Wave Techniques at the Texas A&amp;M National Geotechnical Experimentation Site</b>	<b>859</b>
Khiem T. Tran and Dennis R. Hiltunen	
<b>Analysis and Interpretation of the Texas A&amp;M University Benchmark Data Using the Refraction Microtremor Technique</b>	<b>867</b>
A. Pancha and S. Pullammanappallil	
<b>Determination of the Dynamic Soil Characteristics at the NGES</b>	<b>875</b>
S. A. Badsar, M. Schevenels, and G. Degrande	
<b>Analysis of SASW, MASW, and Passive Surface Wave Data Collected at the National Geotechnical Experimentation Site at Texas A&amp;M University</b>	<b>886</b>
A. J. Martin	

## **Geotechnical Assessment, Characterization, and Design for Risk Management III**

<b>Active Risk Management in Geotechnical Engineering</b>	<b>894</b>
W. Allen Marr	
<b>Risk Assessment of Success Dam, California: Flood Related Potential Failure Modes</b>	<b>902</b>
Loren Anderson, Michael Ruthford, Vlad Perlea, David Serafini, Jack Montgomery, and David Bowles	
<b>Geotechnical Risk in the Peruvian Andes</b>	<b>910</b>
A. Carrillo-Gil and A. Carrillo-Acevedo	
<b>Quantified Risk Assessment of Shield Tunneling Effects on Urban Cement Concrete Pavement</b>	<b>915</b>
Q. F. Hu and H. W. Huang	
<b>Risk Assessment of Success Dam, California: Earthquake Induced Potential Failure Modes</b>	<b>923</b>
M. Ruthford, V. Perlea, D. Serafini, M. Beaty, L. Anderson, and D. Bowles	
<b>A Parametric Study on Factors Affecting Ground Vibrations during Pile Driving through Finite Element Simulations</b>	<b>931</b>
Mo Zhang and Mingjiang Tao	

## Retaining Structures II

- Tunnel Face Support Pressure and Associated Risk** 939  
Mahmoud Ahmed and Magued Iskander
- Risk Analysis of Pile Pressing-In on an Adjacent Earth-Retaining Wall** 948  
Amy D. D. Lu and Albert T. Yeung
- Numerical Study on the Dynamic Behavior of Retaining Walls Backfilled with Shredded Tires** 955  
E. Huggins and N. Ravichandran
- Probabilistic Analysis of the Deflection of Retaining Walls in Deep Excavation** 963  
Y. G. Tang
- Risk Management with Performance-Based Geoengineering Monitoring: APM Tunnel Extension at Hartsfield-Jackson International Airport** 971  
Thomas Allen Tye and W. Allen Marr

## Hazards/Risks II

- Probability-Based Risk Assessment of Landslide/Slope Failure** 979  
Y. Y. Chi, Y. F. Lee, C. H. Juang, Y. L. Wu, and Y. P. Wu
- Road Slopes Risk Assessment of the Northern Part of Gifu Prefecture, Japan** 988  
Yusuke Honjo, Yu Otake, Shuzi Moriguchi, and Takashi Hara
- Managing Settlement Risk Due to Tunneling beneath Downtown Seattle** 996  
Michael A. Lach
- Assessing the Probability of Occurrence of Earthquake-Induced Landslides Offshore the U.S. East Coast: A First-Order, Second Moment Approach** 1004  
Eugene C. Morgan and Laurie G. Baise
- An Innovative Landslide Risk Assessment System: Application to Highway Embankments** 1012  
L. Pantelidis
- Seismic Risk Assessment and Application in the Central United States** 1020  
Zhenming Wang

## Earth Structures/Slopes

- Implicit Expression Solution of Slope Reliability on Kinematical Element Method and Response Surface Method** 1028  
Ping Cao and Ke Zhang
- Field Performance of a New Approach Slab System** 1036  
Qiming Chen and Murad Abu-Farsakh
- External Stability of Geotubes Subjected to Wave Loading** 1044  
M. Khalilzad and M. A. Gabr
- Probabilistic Assessment of Commercial Design Guides for Steep Reinforced Slopes:** 1055

## **Implications for Design**

W. A. Kitch, R. B. Gilbert, and S. G. Wright

**Using Computer Simulations to Take a Closer Look at Load and Resistance Factors for Designing Geosynthetic-Reinforced Walls** 1063

Stanley M. Miller

**Impact of Non-Analytical Factors in Geotechnical Risk Assessment of Levees** 1073

Mary Perlea and Edward Ketchum

## **Geotechnical Assessment, Characterization, and Design for Risk Management IV**

**Rockfall and Mitigation Evaluation with 3-D Discrete Element Modeling** 1082

R. Zhang and A. Rock

**GeoRisk in the Design-Build Procurement Process** 1090

John Christos Daoulas

**Owner Involvement—Choosing Risk Factors for Shallow Foundations** 1098

Roger A. Failmezger and Paul J. Bullock

**Model Test Study of Soil Variation Impact on Shield Tunnel Segment Structure** 1109

Hongwei Huang, Dongming Zhang, Qunfang Hu, and Jie Zhang

**Mitigating Risk and Managing Foundation Cost and Schedule on “Mega” Transmission Line Projects: Beginning with the End in Mind** 1117

K. Yamatani and A. Jahangir

**Comparison Study on Computer Simulations for Bridge Scour Estimation** 1125

Xinbao Yu, Junliang Tao, and Xiong (Bill) Yu

## **Uncertainty Analysis**

**Updating Uncertainties in Friction Angles of Clean Sands** 1133

Jianye Ching, Jieru Chen, and Kok-Kwang Phoon

**Constructing Joint Distributions of Multivariate Geotechnical Data** 1141

Jianye Ching, Kok-Kwang Phoon, and Wen-Chao Huang

**Extension of CSRSM for the Parametric Study of the Face Stability of Pressurized Tunnels** 1149

Guilhem Mollon, Daniel Dias, and Abdul-Hamid Soubra

**Beam on Spatially Random Elastic Foundation** 1157

S. Haldar and D. Basu

**Teaching Reliability at the Undergraduate Level** 1165

Robb Eric S. Moss
