

2011 24th International Vacuum Nanoelectronics Conference

(IVNC 2011)

**Wuppertal, Germany
18 – 22 July 2011**

**IEEE Catalog Number: CFP11VAC-PRT
ISBN: 978-1-4577-1243-2**

Table of Contents

International steering committee (ISC) and Program and advisory committee	iii
Sponsors	iv
Foreword	v
IVMC/IVNC Conference series	vi
Local organizing committee	vii
Session Schedule	viii

Electron Emission Fundamentals I

Progress in securing the foundations of field-assisted electron emission theory

Richard Forbes, J.H.B. Deane, *Univ. of Surrey, Guildford, UK*..... 1

Exceptionally low threshold of field emission from carbon nanostructures

Georgy N. Fursey, M.A. Polyakov, A.M. Yafyasov, V.B. Bogevolnov, *Univ. of Telecommunications, St. Petersburg, Russia*; B. S. Pavlov, *Massey Univ., Auckland, New Zealand*

Cooling effects of field emission from semiconductors at high temperatures

Moon S. Chung, *Univ. of Ulsan, Korea*; A. Mayer, *Univ. of Namur, Belgium*; B.L. Weiss, N.M. Miskovsky, P.H. Cutler, *Pennsylvania State Univ., Univ. Park, USA*..... 5

Study of time responsibility of initial vacuum breakdown in pulsed field electron emission for carbon nanotube

Y. Ye, Shaozhi Deng, J.C. She, J. Chen, N.S. Xu, *Sun Yat-sen Univ., Guangzhou, China* 7

Statistical Coulomb interactions in cold field emitters

Ben Cook, T. Verduin, P. Kruit, *Techn. Univ. of Delft, Netherlands*..... 9

Device Applications I

Triple-gated Spindt-type FEA for image sensor with HARP target

Yuki Honda, Y. Takiguchi, N. Egami, *NHK STRL*; M. Nanba *NHK ES Inc., Tokyo*; K. Nakamura, M. Taniguchi, *Futuba Corp., Chiba, Japan*..... 11

Progress in laboratory based X-ray microscopy

Thomas Ebensperger, F. Nachtrab, F. Sukowski, R. Hanke, *Fraunhofer Inst. IS-EZRT, Fürth, Germany*..... 13

Survey of field emitters for lighting

Bernard Vancil, J. Lorr, *e-beam Inc., Beaverton USA*; A. Rakhimov, *MSU, Moscow, Russia*; F. Spina, *Autom. & Eng. Techn., Naples, Italy* 15

Characterization of all-metallic field emitter arrays in combined diode-RF cavity electron gun	
Soichiro Tsujino, M. Paraliiev, E. Kirk, C. Gough, S. Ivkovic, H. Braun, <i>PSI Villigen, Switzerland</i>	17

Silicon-based integrated field emission electron sources for sensor application	
Rupert Schreiner, F. Dams, C. Prommesberger, <i>Univ. of Appl. Sci. Regensburg</i> ; B. Bornmann, P. Serbun, A. Navitski, G. Müller, <i>Univ. of Wuppertal, Germany</i>	19

Poster Session I

Electron Emission Fundamentals and Cold Cathode Modeling

Lateral resolution of the NFESE microscopy and the existence of self-focusing of electrons	
Andreas Kyritsakis, J.P. Xanthakis, <i>Techn. Univ. of Athens, Greece</i> ; T.L. Kirk, D. Pescia, <i>ETH Zürich, Switzerland</i>	21

Enhanced field emission and breakdown near the contact between metal and dielectric	
Moon S Chung, <i>Univ. of Ulsan, Korea</i> ; A. Mayer, <i>Univ. of Namur, Belgium</i> ; B.L. Weiss, N.M. Miskovsky, P.H. Cutler, <i>Pennsylvania State Univ., University Park, USA</i>	23

Enhancement factor γ of a sharp emitting tip: a revisit with the aim of a simple formula for γ	
Gery C. Kokkorakis, A. Kyritsakis, J.P. Xanthakis, <i>Nat. Techn. Univ. of Athens, Greece</i>	25

Development of Materials

Homogeneity, activation effects and current limits of structured CNT column cathodes on Si substrates	
Aliaksandr Navitski, P. Serbun, G. Müller, <i>Univ. of Wuppertal</i> ; R.K. Joshi, J. Engstler, J.J. Schneider, <i>Techn. Univ. of Darmstadt, Germany</i>	27

Field emission from carbon nanotube (CNT) arrays and triode test of single CNT columns	
Pavel Serbun, S. Rutkowski, A. Navitski, G. Müller, <i>Univ. of Wuppertal, Germany</i> ; N. T. Hong, S. Lee, <i>Ajou Univ., Korea</i>	29

Smoother Mo films for molded FEAs by addition of N₂ to Ar sputter gas	
Eugenie Kirk, A. Mustonen, E. Pomjakushina, S. Ritter, J. Gobrecht, S. Tsujino, <i>PSI Villigen, Switzerland</i>	31

Scandate coating for tungsten field emission electron sources	
Congshang Wan, J.T. Sadowski, M.E. Kordesch, <i>Ohio Univ. and BNL, Upton, USA</i>	33

Structural and electrical properties of inflamed graphite at high temperature as a new field emitter	
Takayoshi Koike, A. Jyouzuka, T. Nakamura, Y. Onizuka, <i>Onizuka Glass Corp. Tokyo</i> ; M. Miyoshi, <i>Univ. of Tokyo</i> , H. Mimura, <i>Shizuoka Univ., Hamamatsu, Japan</i>	35

Preparation of CuO nanowire field emitter arrays by thermal oxidation in water vapor containing environments and their field emission properties	
G.X. Liu, Jun Chen, S.Z. Deng, N.S. Xu, <i>Sun Yat-sen Univ., Guangzhou, China</i>	37
Synthesis and field emission properties of molybdenum nanowall arrays	
Y. Shen, Shao Zhi Deng, Y. Zhang, J. Chen, N.S. Xu, <i>Sun Yat-sen Univ., Guangzhou, China</i> ..	39
Patterned growth of AlN nanowires and investigation on their field emission properties	
Z. Su, Fei Liu, L. Li, T. Guo, H. Gan, J. Chen, S.Z. Deng, N.S. Xu, <i>Sun Yat-sen Univ., Guangzhou, China</i>	41
Fabrication of titanium-oxide nanostructures on glass substrate and field-emission properties	
Fujio Wakaya, T. Nakatani, S. Abo, M. Takai, <i>Osaka Univ., Japan</i>	43
A low-temperature and patterned-growth technique for tungsten oxide nanowire arrays	
L. Li, Fei Liu, T. Guo, S. Jin, H. Gan, J. Chen, S.Z. Deng, N.S. Xu, <i>Sun Yat-sen Univ., Guangzhou, China</i>	45
 Fabrication and Characterization Methods	
Low-energy photon-assisted field emission from GaN surfaces	
A. Evtukh, V. Litovchenko, V. Ievtukh, <i>LISP NASU, Kyiv, Ukraine</i> ; Oktay Yilmazoglu, H.L. Hartnagel, D. Pavlidis, <i>Techn. Univ. Darmstadt, Germany</i>	47
Fabrication process of silicon tip arrays for field emission applications	
Florian Dams, C. Prommesberger, R. Schreiner, <i>Univ. of Appl. Sci., Regensburg, Germany</i>	49
Structural analysis of nanometer-size pyramid grown on an end of tungsten blunt tip	
Tatsuhiko Nakagawa, E. Rokuta, G. Hashimoto, H. Murata, H. Shimoyama, <i>Meijo Univ., Nagoya</i> , C. Oshima, <i>Waseda Univ., Tokyo, Japan</i>	51
Field emission properties of metal oxide-incorporated carbon nanotube films on a metal mesh	
Ju Sung Choi, H.S. Lee, N. Lee, <i>Sejong Univ., Seoul, Korea</i>	53
Tuning the electrical properties of ZnO-Si nano-contacts and its effect on field electron emission from ZnO nanowires	
X.Y. Wu, Juncong She, S.Z. Deng, J. Chen, N.S. Xu, <i>Sun Yat-sen Univ., Guangzhou, China</i> ...	55
Optically controllable emitter array with pn-junction integrated Si tip	
Yujiro Tanaka, H. Miyashita, E. Tomono, M. Esashi, T. Ono, <i>Tohoku Univ. Sendai, Japan</i>	57
Study of photo-induced effect on field emission from zinc oxide nanowires cold cathode	
J. L. Hu, M.X. Liao, S.Z. Deng, W.J. Zai, Ningsheng Xu, <i>Sun Yat-sen Univ., Guangzhou, China</i>	59
Extremely stable, low operation voltage and 36-nm base length transfer mold field emitter arrays	
Masayuki Nakamoto, J. Moon, W. Kurota, <i>Shizuoka Univ., Hamamatsu, Japan</i>	61

Device Applications

Light source with field-emission cathode made of nanostructured carbon material

Irina V. Ekhmenina, E.P. Sheshin, N.N. Chadaev, *Moscow State Univ., Russia*..... 63

Towards a new quantum system: electron guiding in a microwave potential

Jakob Hammer, J. Hoffrogge, R. Fröhlich, P. Hommelhoff, *MPI, Garching, Germany* 65

Nano- ZnO Film for field emission lighting tube

Xiuxia Zhang, L. Zhang, E. Wang, *Univ. of Yinchuan*; W. Shuyi, *CAS Beijing, China*..... 67

Investigation of field emission characteristics of vacuum diodes and triodes with nano-graphite diamond-like cathode

N. Zaytsev, S. Orlov, O. Gutchin, S. Yanovich, A. Krasnikov, I. Khomyakov, *Mikron JSC, Moscow*; R.Yafarov, *RAS-KIREE, Saratov, Russia*; M. Baklanov, *IMEC, Leuven, Belgium* 69

Development of Materials I

Efficient and reliable field emission from silicon tip arrays for miniaturized electron sources

Aliaksandr Navitski, P. Serbun, G. Müller, *Univ. of Wuppertal*; F. Dams, R. Schreiner, *Univ. of Appl. Sci. Regensburg, Germany*..... 71

Graphite coated CNTs for high current electron emission devices

S.W. Lee, W.M. Bae, A.N. Ha, E.H. Lee, H.C. Woo, Y.J. Eom, J. Jang, Kyu Chang Park, *Kyung Hee Univ., Seoul, Korea* 73

Freestanding copper nanocones for field emission by ion-track template technology and electrodeposition

Ina Alber, J. Krieg, C. Müller, M.E. Toimil-Molares, C. Trautmann, *GSI Darmstadt*; P. Serbun, F. Jordan, A. Navitski, G. Müller, *Univ. of Wuppertal, Germany*..... 75

Fabrication Methods I

CNT flexible field emitters fabricated by a filtration-transfer method

Dong Hoon Shin, Y. Song, Y. Sun, C. J. Lee, *Korea Univ., Seoul, Korea* 77

Gold-tip cathodes for plasmon-assisted field emitter array

Kentaro Iwami, K. Ida, N. Umeda, *Tokyo Univ. of Agriculture and Techn., Japan* 79

CsBr- InN/GaN photocathodes examined with photoelectron emission microscopy

J. M. Vaughn, C. Wan, Martin Kordesch, *Ohio Univ., Athens, USA* 81

Scaling of high aspect ratio current limiters for the individual ballasting of large arrays of field emitters

Stephen A. Guerrero, L. F. Velasquez-Garcia, A. I. Akinwande, *MIT, Cambridge, USA* 83

Electron emission Si-based resonant-tunneling diode

Anatoliy Evtukh, N. Goncharuk, V. Litovchenko, *LISPNASU, Kyiv, Ukraine*;
H. Mimura, *Shizuoka Univ., Hamamatsu, Japan* 85

Electron Emission Fundamentals II and Cold Cathode Modeling

The spatial distribution of field emission

Christopher J. Edgcombe, *Univ. of Cambridge, UK* 87

A theoretical calculation of the electrical characteristics of the NFESE microscopy

A. Kyritsakis, John Paraskevas Xanthakis, *Univ. of Athens, Greece*; T.L. Kirk, D. Pescia, *ETH Zürich, Switzerland*..... 89

Time dependent emission from coated metals and semiconductors

Kevin L. Jensen, J.E. Yater, J.L. Shaw, B.B. Pate, *NRL, Washington*, E.J. Montgomery, D.W. Feldman, P.G. O'Shea, *Univ. of Maryland, College Park, USA*..... 91

Electron emission from ultra-thin multilayer cold cathodes

Vu Thien Binh, *Univ. of Lyon, France* 93

Characterization Methods I

Mechanism of ultrafast laser-induced field emission

Hirofumi Yanagisawa, *ETH Zürich*; M. Hengsberger, J. Osterwalder, *Univ. of Zürich, Switzerland*..... 95

Laser induced field emission from metallic field emitters: near field enhancement of optical electric field at metallic nano-surfaces

Anna Mustonen, E. Kirk, T. Feurer, S. Tsujino, *PSI Villigen, Switzerland* 97

Increasing the current density of light-induced thermionic electron emission from carbon nanotube arrays

Parham Yaghoobi, M.V. Moghaddam, A. Nojeh, *Univ. of Brit. Col., Vancouver, Canada* 99

Field emission spectroscopy studies on photo-sensitive p-doped Si-tip arrays

Benjamin Bornmann, S. Mingels, D. Lützenkirchen-Hecht, G. Müller, *Univ. of Wuppertal*, F. Dams, R. Schreiner, *Univ. of Appl. Sci. Regensburg, Germany*..... 101

Aperture size dependent collimation in double gate field emitter arrays

Patrick Helfenstein, K. Jefimovs, E. Kirk, C. Escher, H.W. Fink, S. Tsujino, *PSI Villigen, Switzerland*..... 103

Device Applications II

Anode current efficiency simulation with grid mesh perforation rate in cold cathode X-ray device

Kyo Keun Im, G.J. Nam, *NEXVIEW Ltd., Seoul, Korea* 105

A functional tiny electron gun for a true microcolumn

Akifumi Koike, T. Fujino, Y. Neo, H. Mimura, *Shizuoka Univ., Hamamatsu*; T. Yoshida, T. Nishi, M. Nagao, *AIST, Tsukuba*; H. Murata, *Meijo Univ., Nagoya, Japan* 107

Electron emission from LiTaO₃ and LiNbO₃ crystals excited by Nd:YLF laser light and its X-ray source application

Eiichi Kaga, T. Kisa, K. Nakahama, S. Abo, F. Wakaya, M. Takai, *Osaka Univ., Japan*..... 109

A field-emission monochromatic micro-X-ray source

Brady C. Smith, C.E. Hunt, C.A. Mcleod, *Univ. of California, Davis, USA* 111

Poster Session II

Electron Emission Fundamentals and Cold Cathode Modeling

Comments on discrepancies in the Fowler and Nordheim 1928 paper

Richard Forbes, *University of Surrey, Guildford, UK* 113

Simulation of electron trajectories of a field emission electron source in triode configuration by using finite element methods

Christian Prommesberger, F. Dams, C. Langer, R. Schreiner, *Univ. of Appl. Sci., Regensburg*; S. Rutkowski, B. Bornmann, G. Müller, *Univ. of Wuppertal, Germany* 115

Comments on inconsistencies in a recent handbook theory chapter

Richard Forbes, *University of Surrey, Guildford, UK* 117

First-principles study of field emission properties of CO adsorption on ZnO(10 $\bar{1}$ 0)

W. Yu, Xiaobing Zhang, W. Lei, J. Chen, *Southeast Univ. and JIDERC, Nanjing, China* 119

Emission reference level: a missing concept in emission theory

Richard Forbes, *Univ. Surrey, UK*; Z.B. Li, *Sun Yat-sen Univ., Guangzhou, China* 121

Development of Materials

Synthesis of titanium oxide-polyaniline nanotube composite and its superior field emission characteristics

Sandip Patil, M.A. More, *Univ. of Pune*; S.P. Koiry, D.K. Aswal, *BARC Mumbai, India* 123

Field emission mechanism of n-type semiconducting diamond with negative electron affinity

Takatoshi Yamada, M. Hasegawa, *NIAIST, Tsukuba*; Y. Kudo, T. Masuzawa, K. Okano, *Univ. Mitaka, Tokyo, Japan*; C. E. Nebel, *FHI Freiburg, Germany* 125

Generation of low-aberration beams of electrons based on nanosized Si-sponge field emission cathodes

Mykola Semenenko, A. Evtukh, O. Steblova, V. Litovchenko, *LISP NASU, Kyiv, Ukraine* O. Yilmazoglu, H.L. Hartnagel, D. Pavlidis, *Techn. Univ. Darmstadt, Germany* 127

Selective deposition of carbon nanowalls and investigation of their emission properties

Stanislav A. Evlashin, M.E. Belousov, V.V. Borisov, A.A. Pilevski, A.S. Stepanov, N.V. Suetin, A.T. Rakhimov, *Moscow State Univ., Russia* 129

Comparison of electron emission properties of silicon coated carbon nanotubes in O₂ atmosphere

Woo Mi Bae, S.W. Lee, A.N. Ha, E.H. Lee, H.C. Woo, Y. J. Eom, J. Jang, K.C. Park, *Kyung Hee Univ., Seoul, Korea* 131

Enhancement of field emission of iron oxide nanoemitters by in-situ thermal treatment

J.Q. Wu, Jun Chen, S.Z. Deng, N.S. Xu, *Sun Yat-sen Univ., Guangzhou, China* 133

Liquid phase deposition and field emission measurements of the carbon nanomaterials grown in 1-octanethiol

C. Arai, Mikka N. Gamo, *Toyo Univ. Saitama*; H. Gamo, *Toppan Printing Co., Saitama*; T. Ando, *NIMS, Ibaraki, Japan* 135

Improvement of field emission uniformity of tungsten oxide nanowire arrays via in-situ plasma treatment

F. Mo, Fei Liu, T. Guo, L. Li, H. Gan, J. Chen, S.Z. Deng, N.S. Xu, *Sun Yat-sen Univ., Guangzhou, China* 137

Electron emission laser-structured carbon nanowalls on Si and stainless steel substrates

H.G. Jain, N. Hartmann, Volker Buck, *Univ. of Duisburg-Essen and CeNIDE*; P. Serbun, A. Navitski, G. Müller, *Univ. of Wuppertal, Germany* 139

Improvement of environmental stability of carbon nanotube cold cathode with diamond-like carbon coating

Y. Liang, Yu Zhang, S. Deng, J. Chen, N.S. Xu, *Sun Yat-sen Univ., Guangzhou, China* 141

Fabrication and Characterization Methods

Development of high-temperature durable CNT emitter for a cold cathode X-ray tube

Jae Woo Kim, J.T. Kang, J.W. Jeong, S. Choi, *ETRI*; Y.H. Song, *Univ. of Science and Techn.*; D.J. Kim, A.R. Cho, *VSI Co. Ltd, Daejeon, Korea* 143

High-transmission triode CNT emitter on metal tip for super-miniature X-ray tube

Jun Tae Kang, J. Kim, J. Jeong, S. Choi, H. Lee, Y. Song, *ETRI, Daejeon, Korea*..... 145

Work function measurement of Nd-oxide/W(100) surface by using of photoemission electron microscope

Hideaki Nakane, T. Kitaguchi, *Muroran IT*; T. Kawakubo, *Kagawa NCT, Japan*..... 147

High emission current density from printed CNTs by enhanced emitters-substrate contact

Yunkang Cui, *Nanjing Inst. of Techn*; X. Zhang, W. Lei, Y. Di, X. Yang, J. Chen, *Southeast Univ., Nanjing, China*..... 149

Large emission current from carbon nanotubes cathode by peeling-off process

Y. Di, *Nanjing Normal Univ.*; Y. Cui, *Nanjing Inst. of Techn.*, X. Yang, Wei Lei, X. Zhang, J. Shen, *Southeast Univ., Nanjing, China* 151

Novel photo-cathode using surface plasmon resonance

Chung Han Chen, Y. Neo, T. Aoki, H. Mimura, *Shizuoka Univ., Hamamatsu*; T. Matsumoto, *Stanley Electric Corp., Tsukuba, Japan* 153

Device Applications

Growth of high electron emission CNTs for high resolution X-ray source

An Na Ha, S.W. Lee, E.H. Lee, W.M. Bae, H.C. Woo, Y.J. Eom, J. Jang, K.C. Park, *Kyung Hee Univ., Seoul, Korea* 155

Ultraviolet photodetector using a-Se anode and diamond cold cathode

Tomoaki Masuzawa, R. Kato, M. Onishi, W. Miyazaki, I. Takahashi, K. Okano, *Intern. Christian Univ., Tokyo*; Y. Kudo, *Univ. of Tsukuba*; T. Yamada, *NIAIST, Tsukuba, Japan*; I. Saito, *Univ. of Cambridge, UK*..... 157

Extremely stable field emission and photo-sensitive field emission from single crystalline CdS nanowires	
Padmakar G. Chavan, M.A. More, D.S. Joag, <i>Univ. of Pune</i> ; S.S. Badadhe, I.S. Mulla, <i>NCL, Pune, India</i>	159
An integrated MEMS vacuum diode	
Paul Resnick, E. Langlois, <i>Sandia NL, Albuquerque, USA</i>	161
Electron source design with CNT field-emitter cathode	
Wolfram Knapp, <i>Univ. of Magdeburg, Germany</i>	163
In situ investigation of pressure in a fully-sealed field emission display panel	
Y.L. Ke, L. Lin, Jun Chen, S. Deng, N.S. Xu, <i>Sun Yat-sen Univ., Guangzhou, China</i>	165
Nano-diamond film pressure sensor	
<u>Xiuxia Zhang</u> , E. Wang, L. Zhang, <i>North Nat. Univ., Yinchuan</i> ; W. Shuyi, <i>CAS Beijing</i> ; B. Lu, <i>Xi'an Jiaotong Univ., China</i>	167
Fabrication and Characterization Methods II	
Images of electron transmission through thin diamond films	
Jonathan L. Shaw, F.N. Wood, J.E. Yater, K.L. Jensen, B.B. Pate, <i>NRL, Washington</i> ; J.M. Hanna, <i>Beam-Wave Res., Silver Spring</i> ; T. Feygelson, J. E. Butler, <i>SAIC, McLean USA</i>	169
Resonant electron-emission from a flat surface AlN/GaN system with carbon nanotube gate electrode	
Oktay Yilmazoglu, L. Considine, D. Pavlidis, H.L. Hartnagel, R. Joshi, J.J. Schneider, <i>Techn. Univ. Darmstadt, Germany</i> ; H. Mimura, <i>Shizuoka University, Hamamatsu, Japan</i> ; A. Evtukh, M. Semenenko, V. Litovchenko, <i>LISPNASU, Kyiv, Ukraine</i>	171
Rotation of spin-polarization due to the Verwey transition at a surface of a <110>-oriented magnetite whisker observed by field-emitted electrons polarimetry	
Shigekazu Nagai, K. Hata, <i>Mie Univ., Tsu</i> ; M. Okada, H. Mimura, <i>Shizuoka Univ., Japan</i>	173
Electron emission from nanocrystalline silicon based MOS cathode under laser irradiation	
Hidetaka Shimawaki, <i>Hachinohe IOT</i> ; Y. Neo, H. Mimura, <i>Shizuoka Univ., Hamamatsu</i> ; F. Wakaya, M. Takai, <i>Osaka Univ., Japan</i>	175
Development of Materials II	
High emission performance from point emitters made by carbon nanotube films	
D.H. Shin, J.H. Shin, Cheol Jin Lee, <i>Korea Univ., Seoul, Korea</i>	177
Field emission from dense graphene edges at mechanical pencil lead rods	
H. Tsurumi, T. Higuchi, Y. Yamada, Masahiro Sasaki, <i>Univ. of Tsukuba, Japan</i>	179
Field emission characteristics of vertical few-layer graphene in different shapes	
Yu Zhang, P. Liu, S. Tang, J.L. Du, S.Z. Deng, J. Chen, N.S. Xu, <i>Sun Yat-sen Univ. Guangzhou, China</i>	181
Field emission properties of copper nanocones grown in polymer ion-track membranes	
Pavel Serbun, F. Jordan, A. Navitski, G. Müller, <i>Univ. of Wuppertal</i> ; I. Alber, M.E. Toimil-Molares, C. Trautmann, <i>GSI Darmstadt, Germany</i>	183

Device Applications III

Smart X-ray tube based on CNT emitters for stationary tomosynthesis examination system

Sungyoul Choi, J.W. Jeong, J.T. Kang, J.W. Kim, Y.H. Song, *ETRI, Daejeon, Korea*..... 185

Miniaturized THz source with free electron beams

Hans Koops, *HaWilKo GmbH, Ober-Ramstadt*, A. Al-Mudhafar, H.L. Hartnagel, *Techn. Univ. Darmstadt, Germany* 187

CNT lateral field emission electron source for an orbitron micropump

Tomasz Grzebyk, A. Gorecka-Drzazga, J. Dziuban, *Wroclaw Univ. of Techn., Poland* 189

Improvement of the sensitivity and operating range of MEMS-based resistive-type vacuum gauges

Kasun A. Gardiye Punchihewa, A Rangaraj, M. Liu, M. Purahmad, H. Saboonchi, A. Vesa, G. Gezahegne, C. Hughes, M. Humayun, J. Huang, A. Padmanabhan, S. Seethapathy, J. Shelton, B. Hsu, A. Prabhakar, M. Jendo, P. Sridhar, A. Suh, K. Banerjee, T. Dankovic, A. Feinerman, H. Busta, *Univ. of Illinois, Chicago, USA* 191
