

Third International Conference on Transportation Engineering 2011

(ICTE 2011)

**Chengdu, China
23-25 July 2011**

Volume 3'qhi6

Editors:

**Q. Peng
K. Wang
Y. Qiu**

**Y. Pu
B. Shuai**

ISBN: 978-1-61839-139-1

Table of Contents

Travel Behavior, Simulation, and Transportation Planning

Travel Behavior, Household in the Same Life Cycle Stage, and Built Environment	1
Yilin Sun, Zhiyi Huang, and Ryuichi Kitamura	
Adaptive Driver Characteristics Lateral Warning Algorithm	7
E. Tian and Jiandong Sun	
Dynamic Simulation Model of Mixed Traffic Flow at Urban Road Intersection Based on Multi-Agent System	13
Haifeng Jiang, Han Feng, and Dingyuan Wang	
A Traffic Information Fusion Algorithm Based on Self-Organizing Maps	19
Lixia Bao	
Transportation Volume Forecast Methods Based on Time-Series Model	25
Sheng Wang and Wenqiang Chen	
Evaluation of Urban Rail Network Based on Analytic Network Process	31
Chao Zhu, Zheng Wang, and Xiaofang Shan	
Reasonable Sequence of Placing-In and Taking-Out of Freight Cars for Branch-Shaped Sidings by Adoption of Dynamic Programming Model	37
Hongyan Li, Xinchun Yang, and Haifeng Yan	
Horizontal Development Strategy for ITS in Urban Transit System	43
Shanshan Qi and Qiyuan Peng	
A Genetic Algorithm for the City Coach Station Location and Distribution of Transit Lines	48
Le Zhang, Xiaoping Qiu, and Li Yang	
Cost Analysis of Public Transport in Shanghai	54
Zheng Wang, Chao Zhu, and Xiaofang Shan	
Coordination between Urban Planning and Transportation Hub Design of Passenger Dedicated Line	60
Xiaoke Yu and Feng Chen	
Combinatorial Optimization Model and Algorithm of Congestion Pricing for Toll Levels and Toll Locations in Multi-Class Network	66
Jincheng Zhu, Zhengfeng Huang, Chao Tuo, and Wen Wu	
Analysis of Traffic Stream Characteristics of Urban Expressway	73

Rui Song and Xingjian Xue	
Collaborative Platform for the Preparation of Dispatch Daily and Shift Plans Based on Blackboard Model	79
Bin Wang and Fucai Jin	
Period Operating Method: A New Method of Transport Organization in Carrying Capacity-Restricted District for Railway Speed-Raising Lines	85
Dajie Zuo	
An Analysis on Tourist Bus Operation Plan of Mount Emei Scenic	91
Nian Deng and Li Mei	
An Adaptive Kalman Filter for Short-Term Traffic Flow Forecasting	97
Liyan Zhang, Yan Sun, and Jian Ma	
Comparative Analysis of the Travel Cost of Electric Bicycles and Its Countermeasures	103
Haitao Wu and Guozhong Ma	
Demonstration of Passenger Shunt by Qingdao Cross Ocean Bridge	108
Yong Zhou, Yuhe Wang, and Huanhuan Sun	
Computer-Aided Design System of Operation Organization: Urban Rail Transit	114
Hongxia Lv, Shaoquan Ni, and Xiaomei Fan	
Grading of Train Operation Conflicts	121
Chao Wen and Guanyu Xiao	
Application of Transportation Optimization Algorithm Based on Hopfield Neural Network	127
Wenquan Bie and Mo Kuang	
A Parking Pricing Model with Parking Behavior in City	133
Ji Hu	
Collaborative Optimization Model for Loaded and Empty Wagon-Flow Adjustment in Regional Railway Network	139
Qiang Peng, Zhanjie Zhang, and Feng Xue	
Application of External Theory in National Economy Evaluation of Railway Construction Project	144
Si Ma, Yue Peng, and Yanmei Peng	
Construction of Transit Metropolis in China: Theory and Practices	150
Min Huang	
Multiple Linear Regression-Based Approach to the Analysis of Multi-Anticipative Car-Following Behavior	156
Xiao Zhang, Duijia Zhao, Ping Han, and Junmin Shen	

Port and Economy Relationship Analysis by System Dynamics	162
Mingming Fu	
Viscous Resistance in Continuum Traffic Model	168
Weisheng An, Siyu Tao, and Zutao Zhang	
Building National Highway Traffic Transportation Statistics Database Based on Transportation Turnover Statistical Indicator System	174
Hui Ma	
A Multi-Objective Model about Period Train Timetable Problem and a Heuristic Algorithm Based on Precedence Order of Train Sections	180
Xiaoqiu Jia and Xiaoyu Guan	
Railway Liberalization of Passenger Transportation in Europe	186
Guanyu Xiao and Kelvin C. P. Wang	
Short-Term Traffic Flow Forecasting of Urban Rail Transit Based on Fractal Theory	192
Jian Li and Yuanchun Huang	
Shipyards Ship Shifting Scheduling Problem with Dynamic Programming Model and Its Five-Point Approach Method	198
Jianping Chen and Jiawei Ye	
Solving Mode Selection Problem in Multimodal Transportation Considering Transportation Cost Structure	204
Yu Li, Shan Tong, Meiyang Li, and Jun Zhao	
Evaluation and Improvement of Traffic Operations at Roundabout Intersection	210
A. Mansoor Yousif and ZhiQiang Zhang	
The Carrying Capacity Optimum Design Algorithm of Railway Net Based on the Store-Forward Model	217
Wang Li, Shaoquan Ni, and Jinshan Pan	
Application of ATS in Integrated Supervision and Control System	223
Qilu Xu and Guanyu Xiao	
Knitting Algorithm to Compile Maglev Train Working Diagram	229
Qiliang Zhang, Yongsheng Chen, and Lei Du	
Embodiment of Bounded Rationality in Travel Choice	235
Mingyu Zhao, Lijun Sun, Nick Tyler, and Cheng Lan	
Analysis of Integration and Complexity of Yard Intelligent Dispatching System	241
Feng Xue, Chongshuang Chen, and Congkai Mu	

Method on Layout Optimizing of Public Bicycle Rental Stations Based on Complex Network Theory	247
Congying Li and Zhaofei Wang	
Model Analysis of Parking Price of Park-and-Ride Facilities with Price Sensitivity Measurement	253
Ping Xiong	
Transportation Planning of Altitude Training Resource Based on Microscopic Traffic Model	259
Jixue Yuan, Fang Xu, and Chaozhe Jiang	
Economy Estimation of Operational Passenger Cars for Freeway Route on Typical Driving Cycles	265
Yunlong Wang, Xiansheng Li, and Hongtian Zhang	
Model and Algorithm for Continuous Time-Varying Shortest Path Problem	271
Lu Hu, Bo Peng, Yangsheng Jiang, Gai Zhang, and Haitao Du	
Evaluation of Port Investment Effect on Regional Economic Development Using DEA Method	277
Xuemei Chen	
Influence of Individual/Household Socio-Demographics on Trip Chains of Nuclear Households	283
Dan Li, Wei Wang, and Min Yang	
Metro Station Pedestrian Organization Optimization through Space Analysis	290
Yuning Zhu, Qi Zhao, Yu Shu, and Chengyu Sun	
Urban Road Network Optimizing Based on Unblocked Reliability	296
Pengyun Chong, Lu Li, and Shuai Bin	
Evaluation of Coordination between Performance-Based Navigation (PBN) Flight Procedure Design and Aerodrome Operating Conditions Based on Interval Number	302
Ken Chen	
Modeling Traffic Mode Choice Behavior Based on WC-OWA Operator	309
Bingyi Qian, Shuai Bin, and Lixia Huang	
New Method to Appraise the Maritime Traffic Situations	315
Jiacai Pan, Qingshan Jiang, and Zheping Shao	
Application of Traffic Flow Wave Theory to Research the Impact of Large-Scale Trucks on Traffic Flow of Expressway	322
Qiu Yan, Wen Du, and Fenjuan Yang	
Compatibility Evaluation between BRT and Conventional Bus Based on Novel AHP Algorithm	328

Yangdong Zhao, Hong Chen, and Haigang Tong	
Option of Toll Road with C-Means Clustering Algorithm Based on Interval Fuzzy Numbers	334
Guanglin Sun and Jian Wang	
Ship Routing Problem in Liner Transport Based on Immune Genetic Algorithm	340
Yulei Yang and Min Hu	
Forecasting of Short-Term Traffic Flow Based on SVR with SFLA	346
Hongfei Ding, Ming Lu, and Li Tang	
Bus Route Travel Time Reliability Analysis Based on Travelers' Perceptions	352
Chenghui Chen, Yongneng Xu, and Xiaoli Fu	
A User Equilibrium Assignment Model Based on Late Arrival Penalty Factor	358
Kaixin Wu	
Development of an Adaptive Origin-Destination Estimation Methodology Considering Traffic Operational Characteristics	364
Xiaobo Liu, Lianyu Chu, and Mei Chen	
Hindrance Probability Based on Mixed Cellular Automaton Model	370
Jianhua Deng	
Intelligent Decision Support Management System of Urban Roadway Network	376
Xiaoxiao Xu	
The Strategy of Chengdu Metro Management and Development	383
Rongdi Zeng, Ying Yao, and Bo Cheng	
The Stochastic Time-Varying Shortest Path Problem	390
Jie Wei and Hang Wei	
Analysis of Influence on the Travelers' Choice of Parking Lots by Parking-Charging Based on SP Data Downtown	398
Jingheng Zheng and Jun Chen	
Applicability of Staggered Work Hours for Urban Traffic: Case of Guangzhou	404
Lin Huang and Jun Li	
Interaction between URT and Urban Spatial Structure	410
Lixin Zhou and Yongmei Ye	
Model of the Large Parking Lots Guidance Information System	416
Qingfa Liu, Hong Chen, and Yuanyuan Liu	
Congestion Pricing and Its Effects on Urban Development	422
Haisong Yu and Guanyu Xiao	

Ship Waves Simulation Based on OSG	428
Wen Yu, Shenhua Yang, Guoquan Chen, and Qing Zhao	
Urban Rail Transit Construction and Regional Economic Development in China	434
Changfu Huang and Yuan Xia	
The Problem Need to Be Concerned in the Theory of Comprehensive Transport Network Planning	440
Yanfei Jiang and Enchong Xi	
Genetic Algorithm for Railway Placing-In and Taking-Out of Wagons in Actinoid Private Line for Through Wagon Flow	446
Haijun Li, Ruichun He, and Changfeng Zhu	
An Economic Analysis of the Price System of Real-Name System for Train Ticket	452
Yu Wang and Jitao Li	
Evaluation of Transportation Accessibility of Surface Transportation in Yangtze River Delta	458
Lan Yang	
Modeling Vehicle Routing Problem with Pick-Up Time Constraint for Multimodal Transportation	464
Xichun Chen and Huimin Niu	
Analysis of Factors Influencing Modal Choice in Inland Transport of International Containers	470
Xuezhong Tao	
Simulation and Optimization of Loading and Unloading Operation System in Port Logistics Park Based on Arena	476
Jinping Shu and Jin Zhang	
A Production Scheduling Method Based on Interactive Simulation and Expert System	482
Bo Guo, Ling Xu, and Qin Yang	
Evaluation of Signaled Intersection Status under Capacity of Sections	488
Yan Liu, Dianhai Wang, and Xiaoqiong Jin	
Measuring Perceptions Service Quality of Taxi Passenger Based on SEVERPERE	493
Xiaodong Ding, Ling Xu, and Lijun Tian	
Overall Plan Optimization of Urban Comprehensive Public Transportation Network Based on the Whole Trip Process	499
Gaowei Zhou, Xiaoru Yin, and Ming Lu	

Overcoming the Capacity Constraints on Central Business District's Commuters	505
Pengyao Ye and Naizhi Chen	
Concentration Degree Analysis of Stroke-Based Urban Road Network Topology	511
Pengyao Ye and Hong Yang	
Empirical Analysis of Commuting Length Choice Behavior	517
Jianchuan Xianyu, Xiaomin Xu, and Xu Xu	
Planning of Parking Space in Urban TOD District	523
Lingling Wu	
A Traffic Capacity Improvement Example of Urban Road Intersection	529
Shenghai Fan and Ling Lin	
Bus Regional Scheduling Model Based on Improved Genetic Algorithm	535
Yunmei Qin	
Predicting Red Light Running Behavior of Two-Wheeled Riders in China: An Application of the Theory of Planned Behavior	541
Lin Yao, Changxu Wu, and Kan Zhang	
Speeding Behaviors in Beijing Based on the Theory of Planned Behavior	547
Liwei Zhu, Zhiyong Zhang, and Zuojun Bao	
Nash Equilibrium Analysis of Developing Cyclic Economy for Highway Project Construction	555
Chi Yuan	
Traffic Calming Measures Applicability Research	560
Yamin Huo and Qin Xu	
A SUE Assignment Model with Elastic Transit Demand and Bottlenecks for Transit Networks	566
Rongqing Hong, Weixiong Zha, and Chuan Peng	
Optimization of Urban Traffic Mode Structure in Nanchang City	572
Weixiong Zha and Yan Huang	
Rough Location of License Plate Based on Dot-Matrix Detector	580
Jian Li and Jinhang Liu	
Based on the Optimal Path Selection between Two Places Adaptive Random Testing Algorithm	586
Chuan Peng, Weixiong Zha, and Rongqing Hong	
The Demarcation of Traffic Control Area in PGIS Relies on Correlation of	593

Parking Lots: A Case Study of Shangcheng District in Hangzhou City	
Wenjing Wu and Linlin Liang	
The Adaptability of Supply and Demand That the Highway Transport Relief Supplies to Wenchuan Earthquake Disaster Areas	599
Jianbo Wang, Yanxian Ye, Bin Chen, and Cao He	
Synergetic Analysis of Public Transit System and Urban Form	605
Guo Lu, Jianme Zhu, Song Liu, and Su Lu	
Analysis of Greenway Network Size Based on Trip Mode Chain	611
Xiyun Chen	
Simulations of Traffic Flow Induced by the Reduction of Lanes under Different Management Measures with Cellular Automata Model	617
Jian Zhang, Xingli Li, Chan Li, Xu Wang, and Xiaochao Cui	
Dynamic Cooperation of UTCS with UTGS	623
Xin Chen, Haiyang Wang, and Zhaosheng Yang	
Nodes Clustering Analysis in Comprehensive Transportation Network Planning Based on Ant Colony Algorithm	629
Qiao Xiong and Qipeng Yan	
Evaluation of Coordinated Development between Urban Comprehensive Traffic System and Economic System	635
Hang Chen, Yuewei Wang, and Haiying Wang	
Transferring Controller Handoff Research Based on Air Traffic Emergency Response	641
Yaqing Chen, Xin He, Haoran Gao, and Guoyi Liu	
A Modified Paired Combinatorial Logit Route Choice Model with Probit-Based Equivalent Impedance	648
Jun Li, Xinjun Lai, and Lianghai Xie	
A System Dynamics-Based Model for the Interaction between Comprehensive Transportation System and District Economy	654
Zijian Guo, Wenyan Wang, Guolei Tang, and Xiangqun Song	
Regional Logistics Competitiveness Integrated Evaluation System of the Central Plain Urban Agglomeration	660
Pei Yu	
Public Transport Travelers Oriented Transfer Guidance Information Design	666
Bing Li, Zhijun Zou, and Weiqi Yao	
Reasons and Possible Remedies for Baghdad City Traffic Congestion	672
Ahmed Subhi Abd Al-Jabbar, Ammar A. M. Shubber, and Hussein Yousif Aziz	

Best-Routing Algorithm Based on Guangzhou Metro	679
Chang Gao and Qiaomei Tang	
Regional Bus Scheduling Planning Based on Time-Space Network	685
Di He and Shoujing Guo	
Modeling Functional Matching Degree of Urban Roads Based on System Aggregate	691
Shuichao Zhang and Renfa Yang	
Dynamic Features of Pedestrian-Vehicle Counter Flow Conflicts	697
Jian Ma, Siuming Lo, Xuan Xu, and Weiguo Song	
Analysis of Road Factors on Driving Reliability of High-Grade Highways in Rainfall Environment	703
Chao Wang, Hongguo Xu, Zhaohui Liu, and Hongfei Liu	
Traffic Assignment Model and Application of Comprehensive Transportation Channel	709
Bofeng Fan and Yuling Yang	
Layout Planning of Bus Rapid Transit (BRT) Network	715
Jianguo Zhang and Liangpeng Hao	
Calculation of Station-Behind Turning-Back Capability	722
Xiuyun Guo, Fuhua Liu, and Shaoquan Ni	
Sustainable Development Evaluation Index System and Methods of Railway Construction Project	728
Ronghua Hou, Feibiao Bai, and Pan Wang	
Traffic State Forecast of Road Network Based on Spatial-Temporal Data Mining	734
Rui Deng and Lizhu Jiang	
Analysis of TOD Categories According to the Differences of Land Uses	740
Xiangnan Li	
An Analysis on Economic Development of Transportation Junction Pattern in Medium-Sized City	746
Ming Li and Si Yu	
Design Method of Residential Community Microcirculation Transport Services System Based on Behavior	752
Weiqi Yao, Bing Li, and Yun Huang	
Key Technologies of Taxi-Sharing System	758
Zhongna Hao and Yunmei Qin	

A Bottleneck Identification Method for Transfer Pedestrian Route of Comprehensive Transportation Hub Based on Social Force Model	764
Miao Tian, Xia Luo, and Ke Zhuang	
Theory Model for Traffic Capacity of Unsignalized Roundabout in Urban Road	770
Yulong Pei, Chuanyun Fu, and Ting Peng	
Development Strategy of Harbor Waterway Combined Transport System	776
Hua Wen	
Travel Information Sharing Platform for Comprehensive Passenger Hub	781
Qiao Ling and Qing Ye	
Carrying Capacity Calculation Method of PDL Stations	787
Xiao Dong, Baoming Han, Dewei Li, and Xiaojuan Li	
Evaluation of Level of Service in Comprehensive Transportation Hub Using Grey Relational Analysis	793
Ke Zhuang, Xia Luo, Miao Tian, and Ming Lu	
Historical Changes of Research on the Road Landscape Methods in Japan—Taking Research from 1960 to 2010 As Subjects	799
Li Li, Kun Yang, Chun Guo, Qian Wen, and Shinichi Kitamura	
A Model for Evaluating the Stabilization of the Taxi Industry: A Case Study in Anhui Province	805
Xiaohang Bai, Qiaojun Xiang, and Changfei Luan	
Traffic Organization Planning and Control of Shenzhen 2011 Summer Universiade	811
Qiusheng Tang, Yingying Du, and Yongfei Zhu	
Research and Programming of the Aviation Network of One Express Company	817
Hui Sun, Linjing Xiao, and Qicai Liu	
Comprehensive Benefit Evaluation of Regional Express Railway	823
Libin Mu, Bin Ji, and Shilong Yu	
Parking Demand Forecasting of Urban Comprehensive Development Blocks Involving Shared Parking and Location Conditions	829
Yangsheng Jiang, Bo Peng, Luchuan Dai, and Yanru Chen	
Rationality Evaluation on Regional Integrated Transport Network	835
Hong Chen, Qingfa Liu, and Yidan Zhang	
Division Degree of High-Grade Road in Big Cities	841
Changquan He and Lin Zhao	
Financing of Ordinary Highways after Fuel Tax Reform in China	847

Xiaofang Tan and Yan Li

Status Classification and Relevant Feature Analysis on City Street Landscape in Chengdu 853

Kun Yang, Li Li, Chun Guo, Toshio Shimokawa, and Shinichi Kitamura

Investment, Pricing, and Efficiency of Private Road with Heterogeneous Trip-Makers 859

Feng Xiao

Intelligent Speed Adaptation—The Next Generation of Traffic Management Tools 865

Frank Lai and Oliver Carsten

Rail Operation and Organization

Improved Model for Single Strategic-Loading-Station Location Problem 871

Xuesong Han, Yuzhao Zhang, and Chao Zhou

A New Model for Solving Integrated Wagon-Flow Allocation and Shunting Locomotive Scheduling Problem at Railyard 877

Yi Zhang and Jun Zhao

Multiple Coal Transportation Mode Network Optimizations 883

Yu Zhou and Dong Ding

Optimization Model of Freight Train Stations: Extend Hub-and-Spoke System 889

Mohamed Alhossein and Qiyuan Peng

Travel Speeds for Intercity and Intracity Rails under Regional Transportation Integration 895

Yanshuo Sun, Ruihua Xu, Guanyu Xiao, and Yi Lu

Passenger Transport Structure in Cheng-Yu Corridor Based on Passengers' Selection 901

Yueya Shi, Qifeng Mou, and Ciguang Wang

Train Stops Distribution Scheme Model and Algorithm Based on Train Stops Rate for Passenger Dedicated Line 908

Jinshan Pan, Miaomiao Lu, and Qiao He

Crew Plan in Condition of Designated Cycle for Passenger Dedicated Lines 913

Jie Zhang, Xiaofa Zhang, and Xiaobing Zhang

Interval Estimating the Carrying Capacity of Railway Stations 919

Wangzi Zhao and Hongxia Lv

Integrated Calculation of the Throat in Railway Stations 925

Lan Liu, Ling Gan, and Hongyang Guo

Evaluation of Comprehensive Traffic Hub of Railway Passenger Station Based on Entropy Weight and Set Pair Analysis	931
Hai Zhu and Xia Luo	
Generalized Cost Model for Operation of Passenger Flow between High-Speed and Conventional Rail	937
Qing Ye and Qiao Ling	
A Graph Approach to Distribute Waiting Rooms for Passengers	943
Xiuzhang Liu and Zhiguo Zhu	
A Simulation Model and Algorithm for Turning-Back Capacity of Intercity Dedicated Passenger Railway Station	948
Wenli Liu and Jinwu Li	
Railway Passenger Station Guiding Plan Preparation System	954
Tao Chen, Yuanyuan Wang, and Hongxia Lv	
A Network Method of Optimizing Dynamic Railcar Organization	960
Lihua Wang, Qiyuan Pen, and Zhanjun Zhang	
Method for Predicting Passenger Volume of the New PDL	967
Wenyu Rong, Shanyu Yan, and Yu Wang	
The Complexity of Railway Passenger Transportation Networks in China	973
Lin Wang	
Expressway Network Planning of Multi-Center Group Cities Based on Traffic Location Theory: A Case Study of Guiyang	979
Xueyan Zhong and Hui Yue	
Research on Fuzzy Self-Tuning of PID Autopilot	985
Qing Zhao, Lina Li, and Guoquan Chen	
Method for Constructing Operation Reliability Model of High-Speed Railway System Based on Petri Net	991
Feng Chen and Xiaoke Yu	
Urban Rail Transit AFC's Tendency Referring Telecom BOSS System	997
Weihua Qiu, Jianhao Sang, Yuanchun Huang, Lu Huang, and Haize Pan	
Evaluation of Inter-City Railway's Function Orientation in the Comprehensive Transportation Corridor	1003
Chaofeng Lu	
A New Data Resolving Method in CBTC System	1009
Wudong Yang, Jin Guo, Rongwu Chen, and Wanli Jiao	
The Optimization of Urban Rail Transit's Train Operation Plan in Non-Peak	1015

Period Based on Coordinated Transfer	
Peng Sun, Miaomiao Lv, and Hu Xiao	
Methodology of Planning for Integrating Railway Transit and Urban Space	1021
Mingyuan Zheng	
A Method of Determining Town Passenger Transport Station Scale	1027
Yinping Fu, Quancai Dai, and Hui Yan	
A Model Establishment for Reasonable Network Scale of Urban Rail Transit and Its Influencing Factor Analysis	1033
Zheng Fan, Gaowei Zhou, and Xiaoru Yin	
Intelligent Service-Integrated Software Framework Based on Mobile RFID Technology for Railway Industry	1039
Hongwei Wang, Lingling Gao, and Yusong Yan	
Evaluation of Railway Passenger Station Service Level Based on Artificial Fish-BP ANN	1045
Ming Lu, Hongfei Ding, Xia Luo, and Gaowei Zhou	
Stop Scheme of Passenger Dedicated Line	1052
Junshan Zhang and Xiaohui Zhao	
Layout Optimization of Passenger Station in Kunming Railway Terminal	1058
Shunli Wang, Zhengbin Wang, and Yibin Zhang	
Rough Calculation of Network Scale of Urban Rail Transit	1064
Xia Luo, Zheng Fan, Yong Liao, and Hai Zhu	
Role of Urban Rail Transit in Urban Traffic System and Its Inevitability of Development	1071
Xiaofan Xu, Liping Shen, Hong Li, and Shilian Gao	
Operation Planning and Design of an Urban Rail Transit System	1077
Liping Shen, Xiaofan Xu, Ling Yang, and Shilian Gao	
The Forecasting of the Newly-Added Passenger Volume of Cheng-Du East Railway Station and the Method of Traffic Organization Improving the Traffic Condition of Its Station Square	1083
Longfei Niu, Weisi Deng, and Yi Xu	
Optimization System Design of Train Plan for Urban Railway Transportation	1089
Lianbo Deng, Qiang Zeng, and Wei Gao	
Passenger Volume of the Chengdu Metro Line 1 Analysis	1095
Jingwen Xiao and Hui Li	
On the Marketing Strategy of Train Tickets under Multi-Layer Discounts	1101
Zongping Li and Qian Wen	

Principles and Processes of Dedicated Passenger Railways' Train Running Scheme	1107
Yonghui Li, Dong Chen, and Yibin Zhang	
Theory and Methods of Post Evaluation for Urban Rail Transit Investment Project	1113
Feibiao Bai, Ronghua Hou, and Hua Liu	
Effect of Rail Transit Accessibility on the Selection of Shanghai Expo Entrances	1119
Shuwei Bian and Weiwei Liu	
Railway Administration Organization Modes Evaluation of Passenger Dedicated Line	1125
Xin Mu, Xueqing Cheng, Wenfang Lin, Enxiang Liu, and Huaqiang Jia	
The Impact of Yichang-Wanzhou Railway on Regional Development	1131
Yongcheng Guo and Jianlin Li	
Passenger Flow Distribution Based on the Choice of the Optimum Path in Urban Rail Transit Network	1137
Wu Feng and Xia Luo	
Programs Evaluation of Introducing Epu-Zhanjiang Railway into Zhanjiang Terminal	1143
Jinge Zhang, Xueqing Cheng, Enxiang Liu, and Wenfang Lin	
Scheme Evaluation on Introducing Passenger Dedicated Line into Existing Railway Terminal	1149
Qi Tang and Yi Wang	
Layout Planning Scheme Evaluation Model about Comprehensive Hub Passenger Stations	1155
Xicheng Zhang and Qiyuan Peng	
Description and Calculation about Comprehensive Capacity of Railway Junction Terminals	1162
Pengfei Yan and Yusong Yan	
Adjustment of Intercity Passenger Dedicated Line Operation	1168
Dong Chen, Yonghui Li, and Yan Zhang	
Comprehensive Evaluation on Transfer and Link-Up of Urban Passenger Transport Hub	1174
Yugang Liu, Cailiang Jiang, Weiqing Zheng, and Mingwen Wang	
Train Scheduling Problem in Railway Passenger Dedicated Lines	1180
Qiyuan Peng, Jun Zhao, and Guanyu Xiao	

Passenger Transportation and High-Speed Rail

Passenger Transport Product Design and Distribution Model	1186
Yulei Gu and Sheng Wang	
Passenger Flow Forecast in Guangzhou-Shenzhen (Hong Kong) High Speed Railway	1192
Hongguo Shi and Hanying Guo	
Passenger Vehicle Scheduling during the Transformation of the Old Passenger Train Operation Plan into the New Plan	1198
Miaomiao Lv, Yuanyuan Wang, and Shaoquan Ni	
Influence Factors and Principle Analysis about Division of Passenger Special Line and Existing Railway	1204
Jian Luo, Feng Mu, and Feng Xue	
Reliability of High-Speed Railway Security System	1210
Xiaoyong Xu	
Design of EMU Routing Scheme System for Passenger Dedicated Line	1217
Zhenping Fan, Xiaofa Zhang, and Bowen Tian	
Lost Time of Passenger Transfer and Waiting for Trains	1223
Jinyong Wang, Gongjuan Zhai, and Zhenghong Tan	
Optimizing Research of Utilization of Tracks in Passenger Dedicated Lines Station	1229
Ting Cheng	
Prediction Model of Intercity Passenger Train Volume Based on Grey System Theory	1234
Dong Ding and Yu Zhou	
A Model for Layout Operating Program Based on Reserve Capacity Distribution Mode of Redundancy on Passenger Dedicated Line	1239
Shuguang Zhan and Xiaozhu Chen	
Carrying Capacity of High Speed Railway under the Mode of High and Medium Speed Mixture Trains in One Line	1245
Shaoquan Ni, Dajie Zuo, Hongxia Lv, and Yuanzhao Yin	
Surface Pressure on the Noise Absorbing Board of High-Speed Railway Track	1251
Honglin Wang, Haiquan Bi, and Guozhong Ma	
Influence of Phase Separation upon Headway of Trains of Passenger-Dedicated Line	1257

Yingjie Nie, Jingchun Geng, and Jinyuan Ma

Algorithm for Electric Multiple Unit Scheduling Based on High-Speed Railway Network	1263
Jingchun Geng, Shaoquan Ni, Anhui Hu, and Xiaopeng Xing	
Model of Passenger Traffic Sharing Rates in Transport Corridor Based on Fuzzy Measure and Fuzzy Integral	1269
Huanhuan Feng and Congkun Zhu	
The Charge Patter in High-Speed Rails for Passenger Transport	1275
Guangyin Yan	
Pricing Strategies on Intercity Dedicated Passenger Lines	1281
Dong Chen, Qiyuan Peng, Peng Deng, and Yibin Zhang	
The Status and Development Trend of Rail Transportation Equipment and Technology	1287
Ting Lan, Xiaobo Wang, and Ling Liu	
High-Speed Railway Pricing Mechanism Based on Tour Expense for Family Private Car Using Highway	1293
Hao Chen and Lei Zhang	
Characteristics of Talent Demand and Coping Strategies in High-Speed Railway Era	1299
Yankun Ouyang	
Evaluation under 3E Principle for Urban Rapid Rail Transit Network Planning Based on Grey Incidence Analysis	1305
Jiazhong Zhou and Xiyun Chen	
Evaluation Method of Introducing Passenger Dedicated Line into Railway Terminals Based on Data Envelopment Analysis	1311
Liwei Duan and Kang Liu	
Multi-Objective Optimization Model and Algorithm of Through Passenger Trains' Departure Time Range	1317
Yuzhao Zhang, Xuesong Han, and Hongwei Wang	
Selecting Railway Timetables of Passenger Dedicated Line Based on Vague Sets	1323
