# THE TABLE OF CONTENTS

## Alternative Liquid Fuels from Coal and Biomass

*Christopher J. Zygarlicke,*

*Energy & Environmental Research Center, University of North Dakota*

## Pilot-Scale Gasification and Fischer-Tropsch Catalyst Testing

*Joshua R. Strege, Energy & Environmental Research Center, USA.....1*

## Testing and Scale-up of a Dry Coal + Biomass Pump for CBTL and IGCC Processes

*Santosh K. Gangwal and Stephen Piccot, Advanced Energy & Transportation Technologies, Southern Research Institute, USA; and Henrik Hansen and Thomas Koch, TK Energi AS, DENMARK.....2*

## Uhde's Activities in the Development of Biomass-to-Liquids (BTL) Technology

*Ryan Knutson, Uhde Corporation of America, USA; and Dr.-Ing. Sandra Jensen, Norbert Ullrich, Uhde GmbH, GERMANY.....34*

## Coal Hydrolysis into Synthetic Crude in a Single Process with CO<sub>2</sub> Capture

*Xin Xiao, Savannah River National Laboratory, USA.....34*

## Gasification of High Viscous Slurry R&D on Atomization and Numerical Simulation

*T. Jakobs, S. Fleck, M. Mancini, R. Weber, and T. Kolb, Karlsruher Institut für Technologie (KIT), Institute for Technical Chemistry, GERMANY.....35*

## Oxidative Hydrothermal Dissolution (OHD): An Efficient, Environmentally Friendly Process for the Dissolution of Coal and Biomass in Aqueous Media, for the Production of Fuels and Chemicals

*Dr. Ken B. Anderson, John C. Crelling, and Derek Perry, Thermaquatica Inc.; and Tom Fullinghim, Patrick McGill and Paul Kaelin, Department of Geology, Southern Illinois University Carbondale, USA.....49*

## Advanced Modeling I & II

*Dr. Edmundo R. Vasquez,*

*Combustion Specialist*

## Large Eddy Simulation Of Coal Particles In Turbulent Coaxial Jets

*Julien Pedel, Jeremy Thornock, and Philip Smith, University of Utah, USA.....58*

## Artificial Neural Network and Model Predictive Control

*Janusz Lichota, Wrocław University of Technology, POLAND.....68*

## Investigation of Temperature Fluctuations and Acoustic Sources in a Non-Premixed Swirl Combustor with Heterogeneous Sensor Systems

*A.V. Singh, M. Yu, and A. K. Gupta, Department of Mechanical Engineering, University of Maryland; and K.M. Bryden, Department of Mechanical Engineering, Iowa State University, USA.....75*

## The Role of Technology in CO<sub>2</sub> Management

*Chai Bhat, Aspen Technology, Inc., USA.....PIC*

## Modeling Dry Sorbent Injection for In-Duct Reduction of SO<sub>3</sub>

*Liming Shi, Guisu Lu, Li Yan, Jianwei Yuan, Brian Higgins and Lewis Benson, Nalco Mobotec Inc., USA.....8:*

### **Non-Gray Radiation Modeling in Oxy-Fuel Combustion Scenarios**

*Gautham Krishnamoorthy, Department of Chemical Engineering, University of North Dakota; and Muhammad Sami, Stefano Orsino and P. Nakod, ANSYS Inc., USA.....: 2*

### **Evaluation, Comparison and Validation of Deposition Criteria for Numerical Simulation of Slagging**

*Christoph Wieland, Benjamin Kreutzkamb, Gundula Balan and Hartmut Spliethoff, Technische Universität München, Lehrstuhl für Energiesysteme, GERMANY.....; 2*

### **CFD Modeling of Circulating Fluid-Bed Boilers for ROFA Installations to Improve Limestone Utilization**

*Gui-su Liu, Jay Crilley, Brian Higgins and Li Yan, Nalco Mobotec Inc., USA.....124*

### **Gasification Technologies I, II & III**

*Massood Ramezan,  
Leonardo Technologies*

### **Gasification Technologies - Advances for Future Energy Plants**

*Jenny B. Tennant, U.S. Department of Energy, National Energy Technology Laboratory, USA.....136*

### **Economic Evaluation of the UCSRP-HP Process in IGCC Applications**

*Arun Basu, Ajay Makkuni, Howard Meyer, and S. James Zhou, Gas Technology Institute, USA.....144*

### **Rm-1 to Bloodwood Creek: A Status Report**

*Burl E. Davis, Carbon Energy Pty Ltd., USA; and Dr. Cliff Mallett, Carbon Energy Pty. Ltd., AUSTRALIA.....356*

### **Comparison of IGCC Concepts with Oxy-fuel, Pre- and Post-Combustion Based Carbon Capture**

*C. Kunze and H. Spliethoff, Technische Universität München, Institute for Energy Systems, GERMANY.....358*

### **Optimization of Operating Conditions of CO<sub>2</sub> Capture Test**

*Kyohei Nakamura, Electric Power Development Co., Ltd. (J-POWER) Wakamatsu Research Institute, JAPAN.....16:*

### **History and Future Trend of IGCC in Japan**

*Shozo Kaneko, Dr. Eng., Professor, Institute of Industrial Science, University of Tokyo, JAPAN.....37:*

### **Application of a Phenomenological Model to the Atomization of Slurry Feedstocks in Entrained Flow Gasifiers at Elevated Pressures**

*John P Dooher, Adelphi University/ Dooher Institute of Physics and Energy, USA.....39:*

**Dimethyl Ether Production from Victorian Brown Coal: A Model Integrating Drying, Gasification and DME Synthesis Processes**

*Kazi Bayzid Kabir, Prof. Klaus Hein and Associate Prof. Sankar Bhattacharya, Department of Chemical Engineering, Monash University, AUSTRALIA.....3: :*

**Experimental Investigation of High Temperature and High Pressure Coal Gasification**

*Alexander Tremel, Thomas Haselsteiner, Christian Kunze and Hartmut Spliethoff, Technische Universität München, Institute for Energy Systems, GERMANY.....422*

**Evolution of Syngas from Rice Husk Pyrolysis and Gasification**

*I.I. Ahmed, and A.K. Gupta, The Combustion Laboratory, University of Maryland, Department of Mechanical Engineering, USA.....234*

**Fluidised Bed Gasification of South African Coals – Experimental Results and Process Integration**

*A.D. Engelbrecht, B.C North, and B.O. Oboirien, CSIR: Materials Science and Manufacturing; and T. Majozi, and V. Madzivhandila, Department of Chemical Engineering, University of Pretoria, SOUTH AFRICA.....245*

**High-Fidelity Simulations of Coal Gasification Using Large-Eddy Simulation and Moment Methods**

*Charles M. Reid, Philip J. Smith, University of Utah, USA.....257*

**An Eulerian One-Dimensional Turbulence Model: Application to Coal Gasification**

*Naveen Punati, Babak Goshayeshi and James C. Sutherland, University of Utah, USA.....258*

**CFD Modeling of Hydrogen Production from Coal via Lewis Ultra-Superheated Steam (USS) Fluidized Bed Gasification**

*Ryan Knutson, Uhde Corporation of America; Dr. Michael Mann, Dept. of Chemical Engineering, University of North Dakota; Dr. David Bayless, Dept. of Mechanical Engineering, Ohio University; F. Michael Lewis, PE; and Taskin Karim, Texas Tech University, USA.....273*

**High Temperature in-situ Gas Analysis of Coal and Char Conversion for Thermogravimetric Analyzers**

*Thomas Haselsteiner, Christoph Erbel, Christian Kunze and Hartmut Spliethoff, Technische Universität München, Institute for Energy Systems, GERMANY.....275*

**Post Combustion CO<sub>2</sub> Capture I – Novel Concepts**

*Dr. Yewen Tan, CanmetENERGY, CANADA; and Lisa Rimpf, The Babcock & Wilcox Company*

**ECO Scrub - Enhanced Combustion with Oxygen for Scrubbing of Carbon Dioxide**

*Alfons Kather, Matthias Weng, and Sebastian Linnenberg, Hamburg University of Technology, Institute of Energy Systems; and Sandra Schmidt, Thorsten Liese, and Peter Moser, RWE Power AG, R&D – New Technologies, GERMANY.....487*

**Novel Triazine Materials as CO<sub>2</sub> Sorbents**

*Dr. Michael T. Benson, Dr. Frederick F. Stewart, Dr. John R. Klaehn, Michael Christensen and Neil Sing, Idaho National Laboratory, USA.....499*

## Condensed Rotational Separation of CO<sub>2</sub>

*H.P. van Kemenade, R. J. van Benthum, J.J.H. Brouwers, and M. Golombok, Eindhoven University of Technology, THE NETHERLANDS.....4: 8*

## Overview of the U.S. DOE's Carbon Capture Simulation Initiative for Accelerating the Commercialization of CCS Technology

*D.C. Miller, M. Syamlal, G. Richards, and S. Zitney; National Energy Technology Laboratory, U.S. Department of Energy; J. Meza, D. Agarwal, and P. Calafiura, Lawrence Berkeley National Laboratory; D.L. Brown, and C. Tong, Lawrence Livermore National Laboratory; M.M. Fox, J.D. Kress, and B.C. Letellier, Los Alamos National Laboratory; M.A. Khaleel, G. Lin, D.W. Engel, and X. Sun, Pacific Northwest National Laboratory; R. Cottrell, URS Corporation, NETL; S. Sundaresan, Princeton University; N. Sahinidis, Carnegie Mellon University; and J. Shinn, Chevron, USA.....4: ;*

## Post Combustion CO<sub>2</sub> Capture II – Process Analysis

*Dr. Yewen Tan, CanmetENERGY, CANADA; and Lisa Rimpf, The Babcock & Wilcox Company*

## Derivation of Correlations to Evaluate the Impact of Post Combustion Capture Processes on Retrofitted and Newly Built Steam Power Plants

*Alfons Kather and Ulrich Liebenthal, Hamburg University of Technology, Institute of Energy Systems, GERMANY.....328*

## Use of Waste Heat and CO<sub>2</sub> Compression Heat to Reduce Penalty Due to Post-Combustion CO<sub>2</sub> Capture

*Nenad Sarunac and Carlos E. Romero, Energy Research Center, Lehigh University; and Barry Liebowitz, New York State Energy Research and Development Authority, USA.....33:*

## Integration of Rankine and Brayton Cycles Reduces Penalty Due to Post-Combustion CO<sub>2</sub> Capture

*Nenad Sarunac and Carlos E. Romero, Energy Research Center, Lehigh University; and Barry Liebowitz, New York State Energy Research and Development Authority, USA.....346*

## Comparison of Temperature Profiles in CO<sub>2</sub> Removal Process with Aspen Plus and MATLAB

*Udara S.P. Arachchige, Sanoja A. Jayarathna and Morten C. Melaaen (Tel-Tek), Telemark University College, NORWAY.....357*

## Corrosion Behavior of Carbon Steel and Ammonia

*Ye Sun, Center for Applied Energy Research, University of Kentucky, USA.....366*

## Post Combustion CO<sub>2</sub> Capture III – Towards Commercialization

*Dr. Yewen Tan, CanmetENERGY, CANADA; and Lisa Rimpf, The Babcock & Wilcox Company*

## RSAT™ Post Combustion Carbon Capture Development Roadmap

*Steve Moorman, Jeb Gayheart, Ted Parsons and Chris Poling, The Babcock & Wilcox Company, USA.....368*

**The Partnership for CO<sub>2</sub> Capture: Final Evaluation Results of Advanced Solvents and Oxy-Fired Combustion Pilot-Scale Testing**

*Brandon M. Pavlish, Energy & Environmental Research Center, University of North Dakota, USA.....57:*

**Development of CO<sub>2</sub> Scrubbing Technology for Coal-Fired Power Plants**

*Eiji Miyamoto, and Kouichi Yokoyama, Kure Research Laboratory, Babcock-Hitachi K.K.; Shigehito Takamoto, and Jun Shimamura, Kure Works, Babcock-Hitachi K.K., JAPAN; Song Wu and Sandhya Eswaran, Hitachi Power Systems America, Ltd.; and Brandon M. Pavlish, Energy & Environmental Research Center, USA.....58;*

**CO<sub>2</sub> Capture Performance of Novel Solvents in CSIRO's Pilot Plant with Flue Gas from a Brown Coal-Fired Power Station**

*Erik Meuleman, CSIRO, AUSTRALIA.....59;*

**AMP Emissions: Pilot Plant Measurements and Aspen<sup>+</sup> Modeling**

*E. J. Bergsma, A. Huizinga, E. L. V. Goetheer, and E. Kimball, TNO Separation Technology, THE NETHERLANDS.....3: 2*

**Doosan Power Systems Post Combustion Capture Technology Developments**

*Dr. F. D. Fitzgerald, Stuart Bowden, Rebecca Gardiner, and Ian Dale, Plant Group Product Development, Doosan Power Systems, SCOTLAND.....PIC*

**Oxy-Fuel Technology I – Overview & Demonstrations**

*Dr. Ligang Zheng,  
CanmetENERGY, CANADA*

**FutureGen 2.0: Oxy-coal's Opportunity**

*Dennis McDonald, P.E., Advanced Technologies, The Babcock & Wilcox Company; and Etienne Sturm, Air Liquide Process & Construction, USA.....5; ;*

**Three Years Operational Experiences with the 30 MWth Oxyfuel Pilot Plant in Schwarze Pumpe**

*M. Anheden, U. Burchhardt, R. Faber, R. Giering, A. Hjörnhede, O. Jidinger, E. Ramström, and J. Yan, Vattenfall AB, Asset Development, SWEDEN.....423*

**Ultra-Supercritical Oxyfuel Power Generation for CO<sub>2</sub> Capture**

*Andrew Seltzer, Zhen Fan, and Horst Hack, Foster Wheeler North America Corp., R&D, USA.....425*

**Doosan Power Systems OxyCoal<sup>(TM)</sup> Technology Developments**

*B. Dhungel, M.D. Maloney, D.W. Sturgeon and P. Holland-Lloyd, Doosan Power Systems, SCOTLAND.....435*

**CIUDEN Oxy-CFB Boiler Demonstration Project**

*Horst Hack, Foster Wheeler North America Corp., USA; Vicente Cortes and Monica Lupion, Fundación Ciudad de la Energía; and Javier Alvarez, Foster Wheeler ES, SPAIN; and Arto Hotta and Reijo Kuivalainen Foster Wheeler Energia Oy, FINLAND.....447*

**Ignition of Co-Axial Turbulent Diffusion Oxy-Coal Jet Flames: Experiments and Simulations Collaboration**

*Julien Pedel, Jeremy Thornock, Jost Wendt, and Philip Smith, University of Utah; and Jingwei Zhang, ConocoPhillips Company, USA.....656*

**Oxy-Fuel Technology II – Emissions**

*Dr. Ligang Zheng, CanmetENERGY, CANADA and Dr. Lawrence E. Bool, Praxair, Inc.*

**LICONOX – A New Technology for Removal of NO<sub>x</sub> and SO<sub>x</sub> Integrated in the CO<sub>2</sub> Processing Unit**

*Bernd Holling, LINDE-AG, and Roland Ritter, LINDE KCA Dresden GmbH, GERMANY.....657*

**Transformation of Hazardous Air Pollutants in Oxygen-Fired Coal Combustion with Flue Gas Recycling**

*Ye Zhuang, and John H. Pavlish, Energy & Environmental Research Center, University of North Dakota, USA.....658*

**In-furnace Behavior and Emissions from Conventional Combustion and Oxy-Combustion of Coal**

*Yiannis A. Levendis, Reza Khatami and Feyza Kazanc, Mechanical and Industrial Engineering, Northeastern University, USA.....669*

**Development of Mercury and SO<sub>3</sub> Control Technology Using Gas Cooler in Oxy-fuel Combustion System**

*Goki Sasaki, Kure Research Laboratory, and Hirofumi Kikkawa, and Atsushi Katagawa, Kure Division, Babcock-Hitachi K.K., JAPAN.....65:*

**Two-Color Imaging of an Oxy-Coal Flame Using an RGB, Digital Camera**

*Teri Snow Draper, Dale R. Tree, and Darrel Zeltner, Brigham Young University; Yuan Xue, Air Liquide, USA; and Remi Tsiava, Air Liquide, FRANCE.....68:*

**Experiment on NO Formation Characteristic of Char in O<sub>2</sub>/CO<sub>2</sub> Atmosphere**

*Ben Wang, Lushi Sun, Jun Xiang, Sheng Su, Song Hu, Gang Chen, and Hua Fei, State Key Laboratory of Coal Combustion, HuaZhong University of Science and Technology, PEOPLE'S REPUBLIC OF CHINA.....6: 2*

**Oxy-Fuel Technology III – Experimental Studies**

*Dr. Ligang Zheng, CanmetENERGY, CANADA and Dennis K. McDonald, The Babcock & Wilcox Company*

**Nitrogen Oxide Formation during Oxy-Co-firing Combustion**

*Melissa L. Holtmeyer, Scott A. Skeen, Benjamin M. Kumfer, and Richard L. Axelbaum, Consortium for Clean Coal Utilization, Washington University in St. Louis, USA.....6: 4*

**Heat Transfer and Water Vapor Condensation Characteristics of CO<sub>2</sub>/Water-Vapor Mixtures**

*Edward Levy, Michael LaVigne and Daniel Hazell, Energy Research Center, Lehigh University, USA.....6; 6*

**CO<sub>2</sub> Compressors with Interstage Cooling for CCS Applications: Effects of Compressor Type**

*Edward Levy, Gordon Jonas and Jeffrey Zubernis, Energy Research Center, Lehigh University, USA.....528*

**A Study on Char Burning Rate for Single Particle Combustion with *in-situ* Measurement under Oxy-fuel Condition**

*Hitoshi Wakamatsu and Toshihiko Mine, Research Laboratory, Babcock-Hitachi K.K., JAPAN; Martin Schiemann, Victor Scherer and Alfred Gwosdz, Ruhr-Universität Bochum, GERMANY.....73:*

**Oxy-fuel Tests and Results Using a Pilot-scale Circulating Fluidized Bed**

*Y. Tan, L. Jia, Y. Wu and E.J. Anthony, CanmetENERGY, Natural Resources Canada, CANADA.....74;*

**Oxy-Fuel Technology IV – Understanding Oxy-Combustion Impacts**

*Bradley Adams,  
Reaction Engineering International*

**Fire-Side Corrosion of Heat Transfer Surface Materials for Air- and Oxy-coal Combustion**

*Andrew Fry, Brad Adams, Kevin Davis, Dave Swensen, and Shawn Munson, Reaction Engineering International; and William Cox, Corrosion Management, UNITED KINGDOM.....756*

**Mercury Speciation and Emission from Pilot-Scale PC Furnaces under Air- and Oxy-fired Conditions**

*Andrew Fry, Brydger Van Otten, and Brad Adams, Reaction Engineering International; and Dr. Lawrence Bool, Praxair, Inc., USA.....768*

**Transformations of Fuel Sulfur During Oxy-Coal Combustion**

*Eric G. Eddings, Jiyoung Ahn, Liyong Wang, and Ryan Okerlund, University of Utah; and Andrew Fry, Reaction Engineering International, USA.....779*

**On the Use of Single-Film Models to Describe the Oxy-Fuel Combustion of Pulverized Coal Char**

*Kevin Davis and Hong Shig-Shim, Reaction Engineering International; and Manfred Geier and Christopher Shaddix, Sandia National Laboratory, USA.....77:*

**CFD Modeling of Pilot-scale Oxy-combustion Experiments**

*Bradley Adams and Andrew Fry, Reaction Engineering International, USA.....787*

**The Influence of Particle and Gaseous Radiation in Oxy-fuel Combustion**

*Robert Johansson, Klas. Andersson, and Filip Johnsson, Department of Energy and Environment, Chalmers University of Technology, SWEDEN.....793*

**Oxy-Fuel Technology V – Burner Developments**

*Dr. Joerg Maier, University of Stuttgart, GERMANY and  
Dr. Ligang Zheng, CanmetENERGY, CANADA*

**CFD Modeling of Oxy-Coal Combustion: Approaches and Experimental Validation**

*Lei Chen and Ahmed F. Ghoniem, Department of Mechanical Engineering, Massachusetts Institute of Technology, USA.....7: 5*

### **Impact of Selective Oxygen Injection During Oxy-firing of Coal**

*Dr. Lawrence E. Bool, Praxair, Inc. Ryan Okerlund and Eric G. Eddings, University of Utah, USA.....7: 6*

### **Process Modeling and Exergy Analysis of an Integrated Oxy-fuel Power Generation System**

*Ahmed Shafeen, and Kouresh Zanganeh, Zero Emission Technologies Group, Clean Electric Power Generation, CanmetENERGY, Natural Resources Canada; and Eric Croiset and Peter L. Douglas, Chemical Engineering Department, University of Waterloo, CANADA.....7: 7*

### **Performance of Air Liquide's Oxy-Coal Burner with High Oxygen Participation Ratio**

*Yuan Xue, Chendhil Periasamy, and Taekyu Kang, Air Liquide, Delaware Research and Technology Center; Darrel Zeltner, Teri Snow, and Dale Tree, Mechanical Engineering, Brigham Young University, USA; Remi Tsiava, Faustine Panier, and Bernice Belasse, Air Liquide, Centre de Recherche Claude Delorme, FRANCE.....7: 8*

### **Oxy-Combustion Boiler Design and Performance Impacts Determined During 15 MW<sub>th</sub> Testing**

*Armand Levasseur, David Turek, James Kenney, Paul J. Chapman, and Shin Kang, ALSTOM Power Inc.; Timothy Fout, U.S. Department of Energy, National Energy Technology Laboratory, USA.....7; 9*

### **Modeling Radiation Heat Transfer of Oxy-coal Combustion**

*Jiefu Ma and Justin Wang, Air Liquide, USA.....823*

### **Chemical Looping I – Oxygen Carriers**

*Henrik Leion, Chalmers University, SWEDEN; and Dr. Adel Sarofim, Reaction Engineering International*

### **Solid-Solid Separation in a Bubbling Fluidized Bed Cold Model**

*Joshuah Dalton (REM Engineering Services LLC), Justin Weber, Douglas Straub, and Joseph. S. Mei, National Energy Technology Laboratory, U. S. Department of Energy, USA.....82;*

### **Scale-up of Fixed-bed Chemical Looping Combustion**

*E. Kimball, W.A.P. van den Bos, and E.L.V. Goetheer, TNO Separation Technology, THE NETHERLANDS.....842*

### **A Comparative Study between Ilmenite and Freeze-granulated Fe<sub>2</sub>O<sub>3</sub>/Al<sub>2</sub>O<sub>3</sub> Oxygen Carriers Using a Bench Scale Fuel Reactor**

*Yi Zhang, Aurora Rubel, James K. Neathery and Kunlei Liu, University of Kentucky, Center for Applied Energy Research, USA.....849*

### **Oxidation Kinetics of the Oxygen Carrier Used in Chemical Looping Processes**

*Deepak Sridhar, Andrew Tong, Zhenchao Sun, Siwei Luo, Mandar Kathe, Elena Chung, Liang-Shih Fan, The Ohio State University, USA.....84:*

## **Interaction between Fe-Based Oxygen Carriers and Volatile Hydrocarbons during Chemical Looping**

*J.P.E. Cleeton, and S.A. Scott, Department of Engineering, and J.S. Dennis, Department of Chemical Engineering and Biotechnology, University of Cambridge, UNITED KINGDOM.....84;*

## **Chemical Looping II**

*Henrik Leion, Chalmers University, SWEDEN; and Dr. Adel Sarofim, Reaction Engineering International*

## **Analysis of Solid Fuel Combustion Process by Chemical Looping with Oxygen Uncoupling (CLOU)**

*Asad H. Sahir, Adel F. Sarofim, and JoAnn S. Lighty, Department of Chemical Engineering, Institute for Clean and Secure Energy, University of Utah, USA.....863*

## **Assessment of the Scale-Up and Operational Design of the Fuel Reactor in Chemical-Looping Combustion**

*Gerhard Schöny, Vienna University of Technology, AUSTRIA; David Pallarès, and Henrik Leion, Chalmers University of Technology; and Jens Wolf, Vattenfall R&D, AB, SWEDEN.....874*

## **Reactivity Data Derived from Fluidized Bed Experiments for Ilmenite as Oxygen Carrier in Chemical-Looping Combustion**

*Georg L. Schwebel and Wolfgang Krumm, Institut für Energietechnik, Universität Siegen, GERMANY; Peter Hallberg, Department of Energy and Environment, and Henrik Leion, Department of Environmental Inorganic Chemistry, Chalmers University of Technology, SWEDEN.....885*

## **Coupled CLC and CLOU Behaviour for Solid Fuels Conversion**

*Henrik Leion, Department of Environmental Inorganic Chemistry; and Tobias Mattisson, and Anders Lyngfelt, Department of Energy and Environment, Chalmers University of Technology, SWEDEN.....897*

## **Chemical Looping III – System Analysis & Scale-up**

*Henrik Leion, Chalmers University, SWEDEN; and Dr. Adel Sarofim, Reaction Engineering International*

## **Systems Analysis of the Coal Direct Chemical Looping Process for Coal-Based Electricity Production with *in situ* Carbon Dioxide Capture**

*Daniel P. Connell and Mark L. Dunkerley, CONSOL Energy Inc.; Ray Kim, Liang Zeng, and Prof. L. S. Fan, The Ohio State University; Robert M. Statnick, Clear Skies Consulting Group; and David A. Lewandowski, Clean Energy Engineering, USA.....888*

## **Results of Unsupported Materials Under Pressure and Investigations of Supported Materials on Copper/copper-oxide System Functioning as an Oxygen Carrier in Chemical Looping Combustion**

*Richard Baraki, Edward M. Eyring, Gabor Konya, and Blake R. Wilde, Department of Chemical Engineering, The University of Utah, USA.....8; 9*

**Chemical Looping Combustion of Victorian Brown Coal Using Nickel and Copper Oxide as Oxygen Carrier**

*Chiranjib Saha, Prof. Klaus Hein and Assoc. Prof. Sankar Bhattacharya, Department of Chemical Engineering, Monash University, AUSTRALIA.....8; 8*

**Improving Efficiency and Reducing Emissions for Existing Coal Power Plants**

*Dr. Nenad Sarunac, Energy Research Center, Lehigh University*

**Can Coal Plants Choose to Improve? Investment Patterns and Efficiency in the North American Coal Fleet**

*Chuck Zelek, National Energy Technology Laboratory, U.S. Department of Energy; and William Pott, Booz Allen Hamilton, Inc., USA.....932*

**Coal Power Plant Flue Gas Waste Heat and Water Recovery**

*Dexin Wang, Ainan Bao, Walter Kunc, and William Liss, Gas Technology Institute, USA.....95;*

**Sri 'Eqpv t qnVt gcvo gpv Rt qi t co 'é'v'c'Uqwj gcugt p Wlks{**

*Rick Higginbotham Regional Sales Executive Southeast & Caribbean, GE Power & Water, Water & Process Technologies, USA.....972*

**Integrating Coal Electrolysis in an Advanced Coal Power Plant**

*Santosh Vijapur, Ana M. Valenzuela-Muñiz and Gerardine G. Botte, Center for Electrochemical Engineering Research, Department of Chemical and Biomolecular Engineering, Russ College of Engineering and Technology, Ohio University, USA.....973*

**High Efficiency Power Using Micronized Refined Coal in Low Speed Diesel Engines**

*Dr. Louis J. Wibberley, Advanced Carbon Power Systems, CSIRO, AUSTRALIA.....982*

**Air-Pollution Control - Multiple SO<sub>x</sub>, NO<sub>x</sub> and Mercury Removal in a Single Wet Scrubber Pass**

*Dr. Yuval Davidor and Halm Sternfine, Lextran, Ltd., ISRAEL.....995*

**Biomass Combustion I**

*Dr. Edmundo R. Vasquez, Combustion Specialist*

**Biomass Cofiring: TGA Analysis of PRB Coal with Selected Biomass Fuels**

*Dao Duong, David Tillman, Gabriel Lantos and Don Kawecki, Foster Wheeler North America Corp., USA.....996*

**Coal Pulverizer Modifications to Enable 100% Biomass Pellet Firing**

*Les Marshall, Ontario Power Generation, CANADA; and Stanley Kmiotek, Alstom Power, USA.....997*

**Increasing Biomass Utilization and Combustion Efficiency in Pulverized Coal Boilers via Oxygen Enrichment**

*Dr. Mark D'Agostini, Reed Hendershot and Dr. Xiaoyi He, Air Products, USA.....9: 5*

**Production of Chlorine-free Coal Co-firing Fuel from Municipal Solid Waste by Hydrothermal Treatment**

*Pandji Prawisudha and Kunio Yoshikawa, Tokyo Institute of Technology, JAPAN.....995*

**Biomass Cofiring Experiences in Pulverized Coal Fired Power Plants**

*Keith W. Morris, Doosan Power Systems, SCOTLAND.....: 27*

**Biomass Combustion II & III**

*Les Marshall,*

*Ontario Power Generation, CANADA*

**The Combustion Behavior of an Agricultural Biomass in a 0.5 MW Pilot-scale Test Facility**

*Aaron Fuller, Jörg Maier, and G. Scheffknecht, Institute of Combustion and Power Plant Technology, Universität Stuttgart, GERMANY; and Halina Kruczek, Wroclaw University of Technology, Institute of Heat Engineering and Fluid Mechanics, POLAND; Emmanouil Karampinis, Institute for Solid Fuels Technology and Applications/Center for Research & Technology, GREECE.....: 42*

**Issues Associated with Trace Contaminants in Biomass Cofiring: Potential Upgrading Solutions**

*Dave O'Connor and Luis Cerezo, Electric Power Research Institute, USA.....: 56*

**Oxygen Enhanced Combustion in Biomass Fired Boilers**

*L. Bool, B. Damstedt, H. Kobayashi and D. Thompson, Praxair, Inc., USA.....: 57*

**Laboratory High Temperature Corrosion Studies of Superheater Materials Exposed to KCl, ZnCl<sub>2</sub> and PbCl<sub>2</sub>**

*Patrik Yrjas, Dorota Bankiewicz and Mikko Hupa, Process Chemistry Centre, Åbo Akademi, FINLAND.....: 63*

**Analysis of Solid and Gaseous Emissions for Coal-Biomass Co-Combustion**

*T. Koos, Z. Dobo, P. Toth, K. Szemmelveisz and A.B. Palotas, Department of Combustion Technology, University of Miskolc, HUNGARY.....: 75*

**Optical Measurement of Temperature, Particle Size and Particle Shape of Burning Biomass Particles**

*Martin Schiemann, Viktor Scherer, and Siegmund Wirtz, Department of Energy Plant Technology, Ruhr University Bochum, GERMANY.....: 7;*

**Burning Biodiesel and Tall Oil in a Utility Boiler for Ignition, Flame Stability and Overfire**

*Tony Widenman, Fuel SME & Technological Specialist, DTE Energy, USA.....PIC*

**A New and Simple Method to Estimate CO<sub>2</sub> Gasification Rates of Agricultural Biomass**

*Hua Fei, Song Hu, Lushi Sun, Jun Xiang, and Ben Wang, State Key Laboratory of Coal Combustion, HuaZhong University of Science and Technology, PEOPLE'S REPUBLIC OF CHINA.....: 8;*

## **CFD Modeling of Biomass Combustion for Conversion Application**

*Bei Jin, Li Yan, Brian Higgins, and Guisu Liu, Nalco Mobotec Inc., USA.....: 92*

## **Feed Preparation for Thermal Conversion of Biomass and Municipal Solid Waste (MSW)**

*Masato R. Nakamura and Marco J. Castaldi, Combustion and Catalyst Lab (CCL), Earth Engineering Center and Department of Earth and Environmental Engineering (HKSM), USA.....: 4*

## **Low NO<sub>x</sub> Technology**

*J. J. Letcavits, American Electric Power, and Alan Paschedag, Siemens Environmental Systems & Services*

## **Catalytic Mechanism of NaY Zeolite Supported FeSO<sub>4</sub> Catalyst for Selective Catalytic Reduction of NO<sub>x</sub>**

*Ren Wen, Zhao Bo, Zhuo Yuqun, Wang Shujuan, and Chen Changhe, Key Laboratory for Thermal Science and Power Engineering of Ministry of Education, Department of Thermal Engineering, Tsinghua University, PEOPLE'S REPUBLIC OF CHINA.....: 5*

## **Evaluation of Design Alternatives for an SCR System Downstream of a Simple Cycle Combustion Gas Turbine**

*Jilin Zhang, Vlad Zarnescu, Ph.D, and Enrique Vega, Riley Power Inc., USA.....: 6*

## **CFD Modeling of a Turbo Fired Low NO<sub>x</sub> Combustion System**

*Alan Paschedag, PE, and Joe Malone Advanced Burner Product Line, SIEMENS Environmental Systems & Services Siemens Energy; and Randy Casserleigh, GRU, USA.....; 8*

## **State of the Art Low NO<sub>x</sub> Burners To Reduce SCR Operating Costs**

*Samson Kay, Bonnie Courtemanche, P.E., and Bill Medeiros, P.E., Riley Power Inc., USA.....; 27*

## **The Effects of Coal Quality and Fuel Switching on Low NO<sub>x</sub> Burner Performance**

*Bonnie Courtemanche, P.E., and Craig Penterson, Riley Power Inc., USA.....; 39*

## **Installation of CFD-Based Combustion Modifications in China Achieve Significant NO<sub>x</sub> Reduction in Wall and T-Fired Coal Boilers**

*Marc Cremer and Huafeng Wang, Reaction Engineering International; Scott Vierstra, SAVvy Engineering, LLC, USA; and William Latta, LP Amina, PEOPLE'S REPUBLIC OF CHINA.....; 49*

## **Advanced Energy Conversion Systems**

*Massood Ramezan, Leonardo Technologies*

## **Design and Economics of Advanced Energy Systems Using Calcium Sorbents for CO<sub>2</sub> Capture**

*Daniel P. Connell, CONSOL Energy Inc., Research & Development; Nihar Phalak, Robert M. Statnick, and L. S. Fan, The Ohio State University, Department*

*of Chemical and Biomolecular Engineering; and David A. Lewandowski, Clean Energy Engineering, USA.....; 4:*

**Advanced Energy Conversion from Coal Through Electrolysis: Factors Influencing the Production of Hydrogen**

*Ana M. Valenzuela-Muñiz and Gerardine G. Botte, Center for Electrochemical Engineering Research, Department of Chemical and Biomolecular Engineering, Russ College of Engineering and Technology, Ohio University, USA.....; 62*

**Advanced Hydrogen Production Technologies: Coal Gasification, Warm-Gas Cleanup and Hydrogen Separation Membranes**

*Joshua J. Stanislawski, Scott G. Tolbert, and Tyler J. Curran, Energy & Environmental Research Center, USA.....; 63*

**Waste Heat Recovery from Air Turbo-Compressors in Mining: A Comparative Study Between Cogeneration and Heat Pump Technologies**

*M.W. Radiuk, National Mining University, UKRAINE.....; 64*

**Coal Beneficiation**

*Joseph C. Hirschi, Illinois Clean Coal Institute*

**Preparation of CWS from a Low Rank Coal**

*Giovanni Mei, Raimondo Ciccu, Caterina Tilocca, and Alessandro Mazzella, Dept. of GeoEngineering and Environmental Technologies, University of Cagliari, ITALY.....; 74*

**Characterization of Coal and Coal Combustion Products from Five Major U.S. Coal Regions: The Creation of a Digital Data Set to Provide Science-Based Data for Policy and Decision Makers**

*Ronald H. Affolter, Steve Groves, William J. Betterton, William Benzel, Kelly L. Conrad, Sharon M. Swanson, Leslie F. Ruppert, Harvey E. Belkin, and Allan Kolker, U.S. Geological Survey; James G. Clough, Alaska Division of Geological and Geophysical Surveys; and James C. Hower, University of Kentucky Center for Applied Energy Research, USA.....; 86*

**Efficiency of Brown Coal Dryer Depending on Drying Method**

*Halina Pawlak, Kruczek, Janusz Lichota, and Zbigniew Plutecki, POLAND.....; 87*

**PUBLISHED BUT NOT PRESENTED**

**The Influence of Different Supports and Promoters on the Catalytic Activity of Copper Based Water Gas Shift Catalysts**

*Dong-Hyeok Choi, Joong Beom Lee, Tae Hyoung Eom, Jeom In Baek, Keun Woo Park, and Chong Kul Ryu, Green Growth Laboratory, KEPCO Research Institute, KOREA.....; 96*

**Solid Sorbent for CO<sub>2</sub> Capture from Syngas by Sorption Enhanced Water Gas Shift (SEWGS) Reaction**

*Tae Hyoung Eom, Joong Beom Lee, Dong Hyeok Choi, Keun Woo Park, Seug-Ran Yang, Kyeongsook Kim and Chong Kul Ryu, KEPCO Research Institute, KOREA.....; : 2*

**CO<sub>2</sub> Capture Using K-Based Solid Sorbent from Flue Gas of Coal Fired Power Plant**

*Tae Hyoung\_Eom, Joong Beom Lee, Jeom In Baek, Seong Jegarl, Yong-Ho Wi,  
and Chong Kul Ryu, KEPCO Research Institute; and Young Woo Rhee,  
Choongnam National University, KOREA.....; : 9*
