Biology of Molecular Plant-Microbe Interactions, Volume 7

2009 IS-MPMI Congress Proceedings

Contents

1. **Homologues of *Cladosporium fulvum* effectors occur in Dothideomycete fungi** 1
Pierre J.G.M. de Wit, Harrold van den Burg, Bilal Ökmen, Henriek Beenen, Gert H.J. Kema, Rahim Mehrabi, Guodong Wang, and Ioannis Stergiopoulos
2. **The effectors of smut fungi** 7
Kerstin Schipper, Gunther Doehlemann, Thomas Brefort, Armin Djamei, Liang Liang, Yuliya Khrunyk, Jan Schirawski, and Regine Kahmann
3. **Molecular response of *Casuarina* upon infection by *Frankia*** 15
Hassen Gherbi, Valérie Hocher, Sergio Svistoonoff, Patrick Doumas, Laurent Laplaze, Florence Auguy, Claudine Franche, and Didier Bogusz
4. **Local and long distance auxin transport regulation is required for nodule formation in *Medicago truncatula*** 21
Jian Jin, Anton P. Wasson, Giel E. van Noorden, Flavia I. Pellerone, and Ulrike Mathesius
5. **Variation in arbuscular mycorrhizal symbiosis in *M. truncatula* cv. *Jemalong* (A17) and accession Sa 3054 as assessed by molecular markers** 27
Roslyn D. Noar and Maria J. Harrison
6. ***Pseudomonas syringae* pathogenesis in *Arabidopsis*** 35
Sheng Yang He, Kinya Nomura, Christy Mecey, Weiqing Zeng, Young Nam Lee, John Withers, Lori Imboden, Francisco Uribe, XiuFang Xin, Jian Yao, Wei-Ning Huang, and Matthew Oney
7. **Small signaling molecules in the plant immune response: New tools for unraveling molecular mechanisms** 44
Erich Kombrink, Mario Serrano, Zheming Wang, Markus Kaiser, and Stéphanie Cottier
8. **Role of ABA and abiotic factors on PAMP-induced callose deposition**
Estrella Luna, Jérôme Robert, Victor Flors, Yuhua Zhang, Jurriaan Ton, and Brigitte 52
Mauch-Mani
9. **Regulators of innate immunity in cereal-fungal interactions** 58
Roger P Wise, Yan Meng, Matthew J. Moscou, and Weihui Xu
10. **Oomycete Crinklers are a novel class of host-translocated effectors that target the nucleus** 65
Edgar Huitema, Sebastian Schornack, Mireille van Damme, Tolga O. Bozkurt, Liliana M. Cano, Matthew Smoker, Marco Thines, and Sophien Kamoun

11. **Biocontrol agents and plant-pathogen interactions: A vision in the third dimension** 72
Richard R. Bélanger, Caroline Labbé, Beate Teichmann, François Lefebvre, Walid Hammami, and Wilfried Rémus-Borel
12. **Host pathogen-responsive small RNAs in plant innate immunity** 80
Chellappan Padmanabhan and Hailing Jin
13. **Small RNAs, emerging regulators of the *M. truncatula*-*S. meliloti* symbiotic interaction** 84
Christine Lelandais, Loreto Naya, Erika Sallet, Adnane Boualem, Carole Laffont, Philippe Laporte, Mariana Jovanovic, Caroline Hartmann, Florian Frugier, Jérôme Gouzy, and Martin Crespi
14. **Virus resistance induced by NB-LRR proteins involves translational control of viral transcripts dependant on Ago4-like proteins** 90
Saikat Bhattacharjee, Alejandro Zamora, Julio Vega-Arreguin, Marianne J. Jaubert, Sarah M. Collier, Melanie A. Sacco, and Peter Moffett
15. **Genetic dissection of MAMP-triggered immunity in *Arabidopsis*** 99
Yusuke Saijo, Xunli Lu, Nico Tintor, Phillip Rauf, Silke Robatzek, and Paul Schulze-Lefert
16. **Intracellular dynamics of *Arabidopsis* EDS1 during immune responses to host-adapted pathogens** 104
Ana V. García, Servane Baufumé-Blanvillain, Robin P. Huibers and Jane E. Parker
17. **Genomics-directed dissection of plant immune responses** 110
Xinnian Dong, Jinyoung Y. Barnaby, Karolina Mukhtar, Wei Wang, Yasuomi Tada, and Daniela Caldelari-Guex
18. **Isoflavonoids participate in hypersensitive cell death during race-specific soybean-*Phytophthora* interactions** 114
Madge Y. Graham, Senthil Subramanian, Oliver Yu, and Terrence L. Graham
19. **The regulation of a natural plant defense pathway in wheat and its role in aphid resistance** 120
Ruth Gordon-Weeks, Lesley Smart, Shakoor Ahmad, Henriett Elek, Yuhua Zhang, Janet Martin, and John Pickett
20. **Indole glucosinolates are an important first layer defence of *Arabidopsis* against *Phytophthora brassicae*** 127
Klaus Schlaeppi, Eliane Abou-Mansour, Antony Buchala, and Felix Mauch

21. **Cellular and transcriptional reprogramming of host plants in the presence of arbuscular mycorrhizal fungi** 134
M. Guether, A. Genre, J. Gómez-Ariza, M. Novero, G. Ortu, V. Volpe, A. Faccio, R. Balestrini, and P. Bonfante
22. **Symbiotic exception: The Nod-independent interaction between the *Aeschynomene* legumes and photosynthetic Bradyrhizobia** 141
K. Bonaldi, F. Cartieaux, J. Fardoux, B. Gourion, L. Hannibal, L. Moulin, N. Nouwen, Y. Prin, A. Renier, and E. Giraud
23. **Blue-copper binding proteins of *Medicago truncatula*: Characterization of the expression of two genes related to the arbuscular mycorrhizal symbiosis** 148
Istvan Paradi, Diederik van Tuinen, Dominique Morandi, Sergio Ochatt, Franck Robert, Louis Jacas, and Eliane Dumas-Gaudot
24. **Abscisic acid regulation of nodulation** 158
Yiliang Ding and Giles E.D. Oldroyd
25. **Nitric oxide signaling in tobacco cells elicited by cryptogein: Interplays with calcium and protein kinases** 161
Jennifer Dahan, Izabela Wawer, Angélique Besson-Bard, Jérémy Astier, Adrien Gauthier, Stéphane Bourque, Olivier Lamotte, Sylvain Jeandroz, Grazyna Dobrowolska, and David Wendehenne
26. **Functional interaction between the NADPH oxidase and heterotrimeric G proteins in the pathogen response** 168
Miguel Angel Torres, Clara Sanchez, Alan Jones, Antonio Molina, and Jeff L. Dangl
27. **Tomato 14-3-3 protein TFT7 positively regulates programmed cell death mediated by Pto and MAPKKK α** 173
Chang-Sik Oh, Kerry F. Pedley, and Gregory B. Martin
28. **Riboflavin synthesis participates in plant immune responses in *Nicotiana benthamiana*** 178
Shuta Asai, Keisuke Mase, and Hirofumi Yoshioka
29. **The involvement of quorum sensing in biofilm formation in *Sinorhizobium meliloti*** 184
Nancy A. Fujishige, Rachel S. Resop, Imilce Rodriguez-Fernandez, Juan E. González, and Ann M. Hirsch
30. **Modulation of quorum-sensing signal by lactonases in *Agrobacterium tumefaciens*** 190
Elise Haudecoeur, Mélanie Tannières, Amélie Cirou, Sara Planamente, Yves Dessaux, and Denis Faure
31. **The role of quorum sensing in the *Sinorhizobium meliloti*-alfalfa symbiosis** 196
Nataliya Gurich, Neela Keshavan, Amanda Keith, Konrad Mueller, and Juan E. González

32. **Stomata modulation by *Xanthomonas campestris* pv. *campestris*** 200
Gustavo E. Gudesblat, Pablo S. Torres, and Adrian A. Vojnov
33. **Regulatory systems controlling gall formation by the bacterium *Pantoea agglomerans*** 206
Laura Chalupowicz, Isaac Barash, Mary Panijel, Guido Sessa, and Shulamit Manulis-Sasson
34. **Role of ABA and abiotic factors on PAMP-induced callose deposition** 211
Estrella Luna, Jérôme Robert, Victor Flors, Yuhua Zhang, Jurriaan Ton, and Brigitte Mauch-Mani
35. **How to resist a tomato resistance gene?** 217
Frank Takken, Gerben van Ooijen, Ewa Lukasik, Lisong Ma, Fleur Gawehns, Petra Houterman, and Martijn Rep
36. **Virulence and avirulence of the extracellular pathogens *Cladosporium fulvum* and *Verticillium dahliae* on *Arabidopsis* and tomato** 223
Bart P.H.J. Thomma, Ronnie de Jonge, H. Peter van Esse, Ursula Ellendorff, Koste A. Yadeta, Anja Kombrink, Grardy C.M. van den Berg, Zhao Zhang, Ermis Yanes Paz, Parthasarathy Santhanam, Sajid Rehman, and Emilie Fradin
37. **Surprises from the genome of the ectomycorrhizal fungus *Amanita bisporigera*** 229
Jonathan D. Walton, Heather E. Hallen-Adams, Hong Luo, Subashini Nagendran, and John S. Scott-Craig
38. **Building up plant defence by cell wall sensing** 234
Marie-Thérèse Esquerré-Tugayé, Elodie Gaulin, Arnaud Bottin, Mathieu Larroque, and Bernard Dumas
39. **Plant innate immunity and resistance to necrotrophic pathogens: At the cell wall and beyond** 240
Clara Sánchez-Rodríguez, Andrea Sánchez-Vallet, Lucía Jordá, Marie Pierre Rivière, Francisco Llorente, Camilo Hernández-Blanco, Magdalena Delgado, Sara Sopeña, and Antonio Molina
40. **High methylesterification of pectin reduces the susceptibility of plants to fungal and bacterial pathogens** 248
Alessandro Raiola, Vincenzo Lionetti, Ibrahim Elmaghraby, Giulia De Lorenzo, Felice Cervone, and Daniela Bellincampi
41. **Reduction of disease symptoms caused by fungal pathogens in transgenic wheat plants expressing the polygalacturonase-inhibiting protein 2 (PvPGIP2)** 253
Michela Janni¹, Chiara Volpi¹, Anna Gordon², Donal O'Sullivan², and Renato D'Ovidio

42. **Characterization of an *Arabidopsis* mutant resistant to thaxtomin A, a phytotoxin produced by *Streptomyces scabies*, the causal agent of potato common scab** 257
Hélène Pagé-Veillette, Sylvain Lerat, Viviane Brochu, Carole Beaulieu, and Nathalie Beaudoin
43. **Signal transduction in root symbiosis** 262
Martin Parniske, Meritxell Antolin-Llovera, Andreas Binder, Martin Groth, Ana Cosme, and Sylvia Singh
44. **Deciphering PAMP-triggered immunity in *Arabidopsis*** 268
Martine Batoux, Severine Lacombe, Jing Li, Karen Morehouse, Vladimir Nekrasov, Valerie Nicaise, Roda Niebergall, Alejandra Rougon, Milena Roux, Ben Schwessinger, Isa Westedt, and Cyril Zipfel
45. **Proteomic analysis of plant innate immunity: Identification of the RIN4 complex and investigating dynamic changes in the plasma membrane proteome** 273
J. Liu, J.M. Elmore, and G. Coaker
46. **RIN4 is a multifunctional regulator of *Arabidopsis* immune defense against *Pseudomonas syringae*** 282
Luis da Cunha and David Mackey
47. **Effector proteins of phytoparasitic nematodes** 292
Eric L. Davis, Richard S. Hussey, Melissa G. Mitchum, and Thomas J. Baum
48. **Physical characteristics of calcium oxalate crystals as determinants in structural defense against chewing insects in *Medicago truncatula*** 301
Kenneth L. Korth¹, Paul A. Nakata², Robert E. McGehee, Jr.³, and Radhakrishnan Nagarajan
49. **Cellular targeting and host-specific recognition of cyst nematode CLE proteins** 305
Jianying Wang, Amy Replogle, Sneha Joshi, Dmitry Korkin, Richard Hussey, Thomas Baum, Eric Davis, Xiaohong Wang, and Melissa Mitchum
50. **Resistance to sap-sucking insect pests in a model legume, *Medicago truncatula*** 311
Karam B. Singh, Ling-Ling Gao, Lars G. Kamphuis, John P. Klingler, Jonathan P. Anderson, Judith Lichtenzveig, Kefan Peng, Sumin Guo, Ramakrishnan M. Nair, Kadambot H. M. Siddique, and Owain Edwards
51. **Expression and functional study of PIN auxin transporters during syncytium establishment** 318
Wim Grunewald, Bernard Cannoot, and Godelieve Gheysen

52. **Role of biosurfactants and phenazines in *Pseudomonas*-mediated biological control of soilborne fungal pathogens** 321
Jolien D'aes, Hua Hoang Gia Khuong, Katrien De Maeyer, Joke Pannecoucq, and Monica Höfte
53. **Phage-receptor interactions and phage abortive infection: Potential biocontrol factors in a bacterial plant pathogen** 325
T.R. Blower, T.J. Evans, P.C. Fineran, I.K. Toth, I.J. Foulds, and G.P.C. Salmond
54. **Insights into the plant defense mechanisms induced by *Bacillus* lipopeptides** 332
Marc Ongena, Guillaume Henry, Akram Adam, Emmanuel Jourdan, and Philippe Thonart
55. **Expression profiling of *Ampelomyces quisqualis* during mycoparasitization of *Podosphaera xanthii*** 337
Lorenzo Tosi, Alberto Ferrarini, Massimo Delledonne, Alessandro Ferrari, Antonio Chimento, Monica Maurhofer, Cesare Gessler, and Ilaria Pertot
56. **Comparative genomics of the *Sinorhizobium meliloti* strains Rm1021, SM11 and Rm41 and the *Sinorhizobium fredii* strain HH103** 342
Alfred Pühler, Anke Becker, Alexander Goesmann, Andreas Schlüter, Michael Göttfert, José Enrique Ruiz-Sainz, and Stefan Weidner
57. **Transcriptional and post-transcriptional regulation in common bean nodules** 346
Oswaldo Valdés-López, Peter H. Graham, Mario Ramírez, Michael K. Udvardi, José L. Reyes, Carroll P. Vance, and Georgina Hernández
58. **Group II introns as controllable gene-targeting vectors, contribution to the development of functional genomics in microorganisms and plants** 351
F.M. Garcia-Rodriguez, R. Nisa-Martinez, V. Diaz-Prado, A. Barrientos-Duran, F. Martinez-Abarca, and N. Toro
59. **Improving virus induced gene silencing (VIGS) in rice through *Agrobacterium* infiltration** 357
Xin Shun Ding, Kimberly Ballard, and Richard S. Nelson
60. **Differential accumulation of small RNAs during *Magnaporthe oryzae* growth and development** 365
Cristiano C. Nunes, Malali Gowda, Feng Chen, Minfeng Xue, Douglas Brown, Joshua Sailsbery, and Ralph A. Dean
61. **Application of LCO signal molecules for better crop production** 368
R. Stewart Smith and Ahsan Habib
62. **Signals in the underground: Microbial signals and plant productivity** 375
Donald L. Smith

63. **Enhancing nitrogen use efficiency in wheat using *Trichoderma* seed inoculants** ****
Gary E. Harman and Fatemeh Mastouri
64. **Increase of plant growth by a *Microbacterium thalassium* with phosphate solubilizing phenotype isolated from a tropical soil** *****
Isbelia Reyes and Hani Antoun
65. **Development of an effective agent to enhance flavor production in strawberries based on a bacterial formulation** ****
Markus Verginer, Henry Mueller, Barbara Siegmund, Erich Leitner, and Gabriele Berg
66. **Subcellular trafficking in plant-microbe interactions** *****
Silke Robatzek
67. **Stochastic actin dynamics and disease resistance signaling: The AvrPphB-actin connection** *****
Brad Day, Miaoying Tian, Mohamad Abu-Abied, Masaki Shimono, Katie Porter, and Chris Staiger
68. **Probing plant innate immunity with *P. syringae* type III effectors** *****
Jie Zhang, Haitao Cui, Tingting Xiang, Wei Li, Yujing Wang, Jijie Chai, and Jian-Min Zhou
69. **Potato virus X TGBp3 induces ER stress and programmed cell death** *****
Jeanmarie Verchot-Lubicz, Chang-Ming Ye, and Martin B. Dickman
70. **Diverse interactions between plant viral RNAs and host translation initiation factors reveal many ways to usurp the host's translation machinery** *****
W. Allen Miller and Zhaohui Wang
71. **Identification and characterization of novel natural alleles of eIF4E in barley providing broad-spectrum resistance to bymoviruses** *****
Bernhard J. Hofinger, Chris Bass, Thomas Baldwin, Hai-Chun Jing, Frederic Beaudoin, Kim E. Hammond-Kosack, and Kostya Kanyuka
72. **Phytoplasma strain Aster Yellows Witches' Broom (AY-WB) secreted proteins induce morphological changes in *Arabidopsis thaliana*** *****
Akiko Sugio, René Dreos, Heather Kingdom, Victoria Nicholls, Christian Ruzanski, and Saskia Hogenhout
73. **A novel RNA-binding peptide regulates the establishment of the *Medicago truncatula* - *Sinorhizobium meliloti* nitrogen-fixing symbiosis** *****
Philippe Laporte, Béatrice Satiat-Jeunemaître, Isabel Velasco, Tibor Csorba, Willem Van de Velde, Anna Campalans, Jozsef Burgyan, Miguel Arevalo-Rodriguez, and Martin Crespi
74. **The role of auxin in symptom development upon *Rhodococcus fascians* infection of *Arabidopsis thaliana*** *****
Elisabeth Stes, Els Prinsen, Marcelle Holsters, and Danny Vereecke

75. **Identifying genes involved in *Grosmannia clavigera*'s response to pine tree defenses** *****
 Scott DiGuistini, Ye Wang, Sepideh Alamouti, Christopher I. Keeling, Richard Hamelin, Steven Jones, Joerg Bohlmann, and Colette Breuil
76. **Identification and profiling of American elm genes involved in a compatible interaction with the fungal pathogen *Ophiostoma novo-ulmi*** *****
 Mirella Aoun, Volker Jacobi, Brian Boyle, Danny Rioux, Marie Simard, and Louis Bernier
77. **Chasing effectors in the secretome of *Melampsora larici-populina*** *****
 David L. Joly, Stéphane Hacquard, Nicolas Feau, Philippe Tanguay, Francis Martin, Richard C. Hamelin, and Sébastien Duplessis
78. **Chitin-mediated signal transduction and plant innate immunity** *****
 Jinrong Wan, Geon Hui Son, Xuecheng Zhang, Mi Ha Le, Jong Chan Hong, and Gary Stacey
79. **Systemic immunity – insights from genetic, transcriptomic and metabolomic approaches** *****
 William Truman, Bing Zhai, Venura Perera, Ron Yang, Colin Turnbull, Mark Bennett, and Murray Grant
80. **Signatures of adaptation to obligate biotrophy in the *H. arabidopsidis* genome** *****
 Laura Baxter, Suchetta Tripathy, Nico Boot, Adriana Cabral, Naveed Ishaque, David Studholme, Eric Kemen, Guido Van den Ackerveken, Jonathan D. G. Jones, Sandra W. Clifton, Jane Rogers, John M. McDowell, Jim Beynon, Brett M. Tyler, and the H. arabidopsidis Genome Coalition
81. **Many model pathogen strains instead of one: taking advantage of natural diversity to unravel the basis of *Pseudomonas syringae* host specificity in the post-genomic era** *****
 Shuangchun Yan, Rongman Cai, Haijie Liu, Nalvo F. Almeida, David J. Schneider, Magdalen Lindeberg, David A. Baltrus, Corbin D. Jones, David J. Studholme, Eric Kemen, Jeff L. Dangl, Scotland C. Leman, Joao C. Setubal, and Boris A. Vinatzer
82. **Proteome analysis of lipid rafts associated with rice innate immunity mediated by OsRac1** *****
 Masayuki Fujiwara, Satoshi Hamada, Yoichiro Fukao, Tsutomu Kawasaki, and Ko Shimamoto
83. **Priming in systemic plant immunity** *****
 Ho Won Jung, Timothy J. Tschaplinski, Lin Wang, Jane Glazebrook, and Jean T. Greenberg
84. **Analysis of the MOS4-Associated Complex (MAC) by immuno-affinity chromatography and quantitative proteomics** *****
 Fang Xu, Jacqueline Monaghan, She Chen, Yuelin Zhang, and Xin Li

85. **Development of RNAi technology for plant protection** *****
Xiao-Ya Chen, Ying-Bo Mao, and Xue-Yi Xue
86. **Mining the active proteome in plant-pathogen interactions** *****
Renier A. L. van der Hoorn, Christian Gu, Muhammad Ilyas, Izabella Kolodziejek, Selva Kumari, Johana Misas, Adriana Pruzinska, Kerstin Richau, Mohammed Shabab, Takayuki Shindo, Zheming Wang, and Farnusch Kaschani
87. **Dissecting plant defense signaling by chemical and molecular genetics** *****
Colleen Knoth, Kishor Bhattarai, Mercedes Schroeder, Melinda Salus, Tokuji Tsuchiya, Isgouhi Kaloshian, and Thomas Eulgem
