

2011 IEEE Radiation Effects Data Workshop

**Las Vegas, Nevada, USA
25 – 29 July 2011**

**IEEE Catalog Number: CFP11422-PRT
ISBN: 978-1-4577-1281-4**

2011 REDW Table of Contents

Wafer by Wafer Low Dose Rate Qualification in a Production Environment.....	1
N. W. van Vonno, L. G. Pearce, A. L. Northen, J. R. Touvell, J. C. Brewster, J. S. Gill, E. T. Thomson, P. J. Chesley, Intersil; D. Schettler, Hopewell Designs, Inc.	
Total Ionizing Dose Considerations in Space Bound Electronics Subjected to Real Time X-Ray Radioscopic Examinations.....	8
R. K. Lawrence, C. L. Ocheltree, BAE Systems	
The Use of Diodes as Dose and Fluence Probes in the Experimental Beamline at the Francis H. Burr Proton Therapy Center.....	13
E. W. Cascio, The Francis H. Burr Massachusetts General Hospital; E. H. Bentefour, Ion Beam Applications s.a	
Guide to the 2010 IEEE Radiation Effects Data Workshop Record.....	19
D. M. Hiemstra, MDA	
Recent Total Ionizing Dose and Displacement Damage Compendium of Candidate Electronics for NASA Space Systems	23
D. J. Cochran, M. V. O'Bryan, MEI Technologies; A. J. Boutte, M. J. Campola, M. A. Carts, M. C. Casey, D. Chen, K. A. LaBel, R. L. Ladbury, J-M. Lauenstein, C. J. Marshall, J. A. Pellish, A. B. Sanders, M. A. Xapsos, NASA/GSFC; T. R. Oldham, Dell Perot Systems Inc.	
Recent Single Event Effects Compendium of Candidate Electronics for NASA Space Systems.....	33
M. V. O'Bryan, H. S. Kim, A. M. Phan, M.D. Berg, MEI Technology Inc.; K. A. LaBel, J. A. Pellish, J-M. Lauenstein, D. Chen, C. J. Marshall, M. J. Campola, A. B. Sanders, M. A. Xapsos, NASA Goddard Space Flight Center; T.R. Oldham, Petot Systems Government Services, Inc.; P. W. Marshall, Consultant; D. F. Heidel; K. P. Rodbell, IBM T.J Watson Research Center; J. W. Swonger, D. Alexander, Peregrine Semiconductor; M. Gauthier, B. Gauthier, Semicoa	
Compendium of Recent Total Ionizing Dose Test Results Conducted by the Jet Propulsion Laboratory from 2009-2011	46
J. N. Bowles-Martinez, D. O. Thorbourn, B. G. Rax, R. D. Harris, L. Z. Scheick, G. R. Allen, S. S. McClure, Jet Propulsion Laboratory - California Institute of Technology; A. J. Kenna, Northrop Grumman Aerospace Systems	
Total Dose Test Results for CubeSat Electronics.....	57
K. Avery, J. Finchel, J. Mee, R. Netzer, Air Force Research Laboratory; W. Kemp, SAIC; D. Elkins, Microelectronics Research and Development Corporation; B. Zufelt, COSMIAC; D. Alexander, David R. Alexander/LLC	
A Summary of Single Event Upset Testing of CD4000 Series Devices.....	65
R. E. Lombardi, A. L. Bogorad, J. J. Likar, A. S. Rubin, C. F. Camacho, Lockheed Martin	
Heavy Ion Single Event Effects Performance of RadHard Devices Migrated to an Alternate Wafer Fab.....	69
C. Hafer, M. Lahey, D. Harris, J. Larsen, F. Sievert, T. Sims, S. Meyer, R. Dumitru, A. Jordan, P. Milliken, Aeroflex Colorado Springs	
Results of Low Dose Rate Testing of Legacy Intersil Products	77
N. W. van Vonno, L. G. Pearce, J. S. Gill, E. T. Thomson, P. J. Chesley, Intersil	

SEE and TID Results for Commercial Non-Optogalvanic Isolators for Space Application	85
M. A. Jacobson, S. P. Buchner, H. L. Hughes, Naval Research Laboratory, P. J. McMarr, SDS	
Single Event Upset Characterization of a Mixed-Signal Field Programmable Gate Array Using Proton Irradiation	88
D. M. Hiemstra, P. Gill, MDA	
Radiation Characterization of Microsemi ProASIC3 Flash FPGA Family	92
C. Poivey, ESA ESTEC; M. Grandjean, F. X. Guerre, HIREX Engineering	
Recent Single Event Effects Results in Advanced Reconfigurable Field Programmable Gate Arrays.....	97
G. R. Allen, California Institute of Technology/Jet Propulsion Laboratory; G. Madias, E. Miller, Boeing SIS; G. Swift, Xilinx	
Single Event Sensitivity of High-Speed Differential Signaling Devices to Heavy Ions and Protons.....	103
R. Koga, J. George, S. Bielat, P. Yu, The Aerospace Corporation	
Single-Event Characterization of Multi-Gigabit Transceivers (MGT) in Space-Grade Virtex-5QV Field Programmable Gate Arrays (FPGA).....	110
R. Monreal, Southwest Research Institute; C. Carmichael, G. Swift, Xilinx, Inc.	
LEON3FT Proton SEE Test Results for the Solar Probe Plus Program.....	118
C. Pham, H. Malcolm, R. Maurer, D. Roth, K. Strohhahn, Johns Hopkins Applied Physics Lab	
Investigation of Low Cross Section Events in the RHBD/FT UT699 Leon 3FT	122
S. M. Guertin, NASA/JPL; C. Hafer, S. Griffith, Aeroflex	
Radiation and Reliability Characterization of a Multiplexer Family Using a 0.35µm Triple-Well CMOS Technology	130
A. Wilson, D. Kerwin, T. Richardson, Q. Ton, K. Merkel, G. Koziuk, C. Hafer, Aeroflex Colorado Springs	
130nm Single Event Upset Performance Evaluation: Commercial vs. Hardened by Design Architectures ...	137
R. Dumitru, C. Hafer, T-W. Wu, R. Rominger, P. Milliken, K. Bruno, T. Farris, Aeroflex Colorado Springs	
SEE and TID Response of Spansion 512Mb NOR Flash Memory	143
F. Irom, D. N. Nguyen, Jet Propulsion Laboratory	
SEU and MBU Angular Dependence of Samsung and Micron 8-Gbit SLC NAND-Flash Memories under Heavy-Ion Irradiation	147
K. Grürmann, D. Walter, M. Herrmann, F. Gliem, TU Braunschweig; H. Kettunen, University of Jyväskylä; V. Ferlet-Cavrois, European Space Agency	
Investigation of Current Spike Phenomena during Heavy Ion Irradiation of NAND Flash Memories	152
T. R. Oldham, Dell Services Federal Government; M. Berg, M. Friendlich, T. Wilcox, C. Seidleck, MEI-NASA GSFC; K. A. LaBel, NASA GSFC; F. Irom, JPL; S. P. Buchner, D. McMorro, NRL; D. G. Mavis, P. H. Eaton, J. Castillo, Micro-RDC	
Proton-Induced Single Event Upsets in 90nm Technology High Performance SRAM Memories	161
H. Puchner, Cypress Semiconductor; J. Tausch, JD Instruments; R. Koga, The Aerospace Corporation	
SEEs Induced by High-Energy Protons and Neutrons in SDRAM.....	164
H. Quinn, P. Graham, T. Fairbanks, Los Alamos National Laboratory	

Neutron Beam Testing of High Performance Computing Hardware	169
S. E. Michalak, A. J. DuBois, C. B. Storlie, H. M. Quinn, W. N. Rust, D. H. DuBois, D. G. Modl, S.P. Blanchard, Los Alamos National Laboratory; A. Manuzzato, Universita degli Studi di Padova	
Radiation Characterization of Commercial GaN Devices	177
R. D. Harris, L. Z. Scheick, J. P. Hoffman, T. Thrivikraman, M. Jenabi, Y. Gim, T. Miyahira, Jet Propulsion Laboratory	
Recent Power MOSFET Test Results	182
L. Z. Scheick, JPL/CIT; M. Gauthier, B. Gauthier, B. Triggs, Semicoa Corporation	
Calculating Spacecraft Single Event Environments with FLUKA: Investigating the Effects of Spacecraft Material Atomic Number on Secondary Particle Showers, Nuclear Reactions, and Linear Energy Transfer (LET) Spectra, Internal to Spacecraft Avionics Materia	188
S. Koontz, B. Reddell, NASA Johnson Space Center; P. Boeder, The Boeing Company	
COTS Based On-Board-Computer on South Africa's Sumbandilasat: A Radiation and In-Orbit Performance Analysis.....	196
A. Barnard, Stellenbosch University; C. Nwosa, South African Astronomical Observatory	
FASTRAD 3.2: Radiation Shielding Tool with a New Monte Carlo Module	200
P. Pourrouquet, J-C. Thomas, P-F. Peyrard, TRAD; R. Ecoffet, G. Rolland, CNES	
Applicability of the Accelerated Switching Test Method - A Comprehensive Survey.....	205
M. Wind, P. Beck, AIT Austrian Institute of Technology; J. Boch, L. Dusseau, Université Montpellier 2; M. Latocha, AIT Austrian Institute of Technology; M. Poizat, A. Zadeh, ESA/ESTEC, TEC-QCA	
Impact of Reference Voltage on the ELDRS Characteristics of the LM4050 Shunt Voltage Reference	213
K. Kruckmeyer, T. Trinh, National Semiconductor; A. T. Kelly, BAE Systems; L. McGee, National Semiconductor
