

2011 1st International Electric Drives Production Conference

(EDPC 2011)

**Nuremberg, Germany
28-29 September 2011**

**IEEE Catalog Number: CFP1185P-PRT
ISBN: 978-1-4577-1371-2**

Table of contents

1: New Electric Motor Concepts for E-Mobiles

- 1.1 Bernauer R., Compact Dynamics, Starnberg (D):
Axial Flux Motor DYNAXA Compact Electric Drive for Automotive Power
Trains 1
- 1.2 Deák C., Baumueller Nuremberg GmbH (D):
Compact Motor and Drive System with High Power Density for Mobile
Machines 5

2: Control Methods

- 2.1 Kellner S. L., University of Erlangen-Nuremberg (D):
Impact of Iron Losses on Parameter Identification of Permanent Magnet
Synchronous Machines 11
- 2.2 Seilmeier M., University of Erlangen-Nuremberg (D):
Modelling and Model Based Compensation of Non-Ideal Characteristics of
Two-Level Voltage Source Inverters for Drive Control Application 17
- 2.3 Dr. Vitek O., Brno University of Technology (CZ):
Design of Compact BLDC Drive 23

3: Production Concepts and Processes for Electric Motors

- 3.1 Lamprecht E., Daimler AG, Stuttgart (D):
Fundamental Investigations of Eddy Current Losses in Laminated Stator Cores
Created Through the Impact of Manufacturing Processes 29

4: New Electric Motor Concepts for Industrial Applications

- 4.1 Dr. Jajtic Z., Siemens AG, Munich (D):
Segmented Electric Machine – Modular Motor and System Topology for Direct
Drives 36
- 4.2 Krotsch J., ebm-papst Mulfingen GmbH & Co. KG, Mulfingen (D):
Reduction of Torque and Radial Force Fluctuation in Permanent Magnet
Synchronous Motors by Means of Multi-Objective Optimization 40
- 4.3 Huf A., University of Stuttgart (D):
Linear Actuator Module Based on Multiple Direct Drives 49
- 4.4 Neubauer A., ANDREAS STIHL AG & Co. KG, Waiblingen (D):
New Compact High-Torque Drive for Mobile Outdoor Power Equipment 54

5: Production Technologies for Power Electronics

- 5.1 Steger J., SEMIKRON Elektronik GmbH & Co. KG, Nuremberg (D):
A New Generation of Power Modules with Sinter-Technology for the
Automotive Industry 60
- 5.2 Dr. Lehnberger C., ANDUS ELECTRONIC GmbH, Berlin (D):
High Current PCBs - System Integration of Busbars and Electronics 63
- 5.3 Weber A., Conti Temic microelectronic GmbH, Nuremberg (D):
Factory of the Future for Powerelectronics in Hybrid & Electric Vehicles 65

5.4 Dr. Ramsayer R. M., Robert Bosch GmbH, Schwieberdingen (D): Laser Beam Welding of Copper Components with Brilliant Lasers in the Infrared and Green Wavelength Region	69
6: Production Concepts for Electric Motors	
6.1 Fritsche R., University of Bayreuth (D): Reducing Set-Up Times for Improved Flexibility in High-Mix Low-Volume Electric Drives Production	74
6.2 Böhm A., University of Erlangen-Nuremberg (D): A New Approach in the Production of Electrical Motors Using Only Machining Processes	78
7: New Applications and Assembly Technologies	
7.1 Jaksic D., Unum Limited, Remuera (NZ): “Getting rid of the air” – How to Maximise the Winding Fill Factor	84
7.2 Weigl M., Bayerisches Laserzentrum, Erlangen (D): Laser-Welded Connections for High-Power Electronics in Mobile Systems	88
7.3 Groeger A., Georg-Simon-Ohm University of Applied Sciences Nuremberg (D): Efficiency Improvement of Small Hydroelectric Power Stations with a Permanent-Magnet Synchronous Generator	93
7.4 Dr. Roskamp H., ANDREAS STIHL AG & Co. KG, Waiblingen (D): Energy Efficient Drive Train for High-Performance Battery Chain Saw	101
8: New Electric Motor Concepts for Industry	
8.1 Dr. Becker S., University of Erlangen-Nuremberg (D): Efficient and Silent Cooling of Electric Drives – Basics, Measurement Techniques and Computational Approaches	107
8.2 Hofmann M., Fraunhofer IISB, Erlangen (D): Thermal Characterization of an Axle-Twin-Drive with System Integrated Double-Inverter	115
8.3 Eichinger B., Siemens AG, Nuremberg (D): Calculation Methods for Electromagnetically Excited Noise in Induction Motors	124
9: Winding Technologies	
9.1 Albrecht T., Daimler AG, Stuttgart (D): Proceedings for Wiring Integrated Winding of Segmented Stators of Electric Machines	132
10: Simulation and Calculation	
10.1 Prof. Liess H.-D., University of the Federal Armed Forces Munich (D): Optimal Dimensions for Electrical Conductors in Mobile Systems	139
10.2 Kostetzer L., CADFEM GmbH, Grafing (Munich) (D): Scalable System Simulation for Electric Drives	143

10.3 Lu X., University of Windsor (CDN): Modeling and Comprehensive Analysis of Induction Assisted Permanent Magnet Synchronous AC Motor	147
10.4 Igelspacher J., TU Munich (D) Analytic Examination of Coupled Axial-Flux Induction Machines with Reduced Yoke	153
11: Manufacturing and Test	
11.1 Kock A., Fraunhofer IFAM, Bremen (D): Casting Production of Coils for Electrical Machines	159
11.2 Gardocki A., University of Erlangen-Nuremberg (D): Investigation of the Thermo-Oxidative Degradation of the Plastic Bonded Rare-Earth-Magnets During the Injection Molding Process	162
11.3 Dr. Lelkes A., GEFEG-NECKAR Antriebssysteme GmbH, Gosheim (D): Test System for Electric Motors with Integrated Control Unit	167
11.4 Dr. Vervaeke K., MagCam NV, Leuven (B): Inline Magnet Inspection Using Fast High Resolution MagCam Magnetic Field Mapping and Analysis	172
12: New Materials	
12.1 Noguchi K., Aichi Steel Corporation, Tokai (J): Development of Dy-free NdFeB Anisotropic Bonded Magnet (New MAGFINE)	181
13 Poster Session	
1. Dr. Drubel O., Siemens AG, Berlin (D): Alternative Stiff Asynchronous Motor Design for Efficient Pipeline Operation Schemas	187
2. Hoffmann H., University of Erlangen-Nuremberg (D): Medium Frequency Transformer for Railway Applications Using New Materials	192
3. Hofmann J., Siemens AG, Nuremberg (D): Innovative Motor Design for Production Machines	198
4. Iyer L., University of Windsor (CDN): Online Stator and Rotor Resistance Estimation Scheme Using Swarm Intelligence for Induction Motor Drive in EV/HEV	202
5. Logé H., LTN Servotechnik GmbH, Otterfing (D): The Best Way How to Use Resolvers	208
6. Loos F., University of the Federal Armed Forces Munich (D): Simulation Methods of Heat Transfer Processes in Mechanical and Electrical Connections	214
7. Dr. Schoening M., e+a Elektromaschinen und Antriebe AG, Moehlin (CH): Automated Electrical Machine Design with Differential Evolution Techniques ..	221
8. Dr. Steinbrink J., University of Hannover (D): Applicable Finite Meshes	225
9. Tremel J., University of Erlangen-Nuremberg (D): Innovative Processes and Systems for the Automated Manufacture, Assembly and Test of Magnetic Components for Electrical Machines	228

10. Uygur G., University of Erlangen-Nuremberg (D):	
Parallel Composition – A Practical Solution	235
11. von Zimmermann M., University of Erlangen-Nuremberg (D):	
Model-based Voltage Calculation for Inverters with Small DC-Link Capacitance	243
12. Dr. Werner U., Siemens AG, Nuremberg (D):	
Optimized Rotor Design for Rigid Balancing of Large Flexible Induction Rotors	249
