# TABLE OF CONTENTS

|                                                                                                                                                        |           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Stochastic Resonance Enhances DNA Transport In the Entropic Trapping Regime .....</b>                                                               | <b>1</b>  |
| <i>Victor M. Ugaz, Nan Shi</i>                                                                                                                         |           |
| <b>Accumulation of Air Bubbles In Field Driven Oscillations of a Droplet.....</b>                                                                      | <b>2</b>  |
| <i>Ezinwa Elele, Yueyang Shen, Boris Khusid</i>                                                                                                        |           |
| <b>Probing the Basset Force Acting On a Particle Undergoing AC Electrophoresis .....</b>                                                               | <b>3</b>  |
| <i>Christopher L. Wirth, Paul J. Sides, Dennis C. Prieve</i>                                                                                           |           |
| <b>Joule Heating Effects On Fluid and Particle Transport In Insulator-Based Dielectrophoresis Devices .....</b>                                        | <b>4</b>  |
| <i>Sriram Sridharan, Junjie Zhu, Xiangchun Xuan</i>                                                                                                    |           |
| <b>Impact of Material Morphology On Bioseparations In Nanocomposite Hydrogels: A Modeling Approach In An Annular Channel.....</b>                      | <b>5</b>  |
| <i>Jeffery W. Thompson, Holly A. Stretz, Pedro E. Arce</i>                                                                                             |           |
| <b>AC Electrohydrodynamic Flows In Flame Plasmas .....</b>                                                                                             | <b>6</b>  |
| <i>Aaron M. Drews, Kyle J. M. Bishop, Ludovico Cademartiri, Robert Shepherd, Aaron Mazzeo, George M. Whitesides</i>                                    |           |
| <b>Determining Zeta Potential Through the Solution Displacement Method.....</b>                                                                        | <b>7</b>  |
| <i>Sumita Pennathur</i>                                                                                                                                |           |
| <b>Dielectrophoretic Assessment of Microparticle Dielectric Properties Employing a Planar Carbon Electrode Platform .....</b>                          | <b>8</b>  |
| <i>Victor H. Perez-Gonzalez, Hector Moncada-Hernandez, Rodrigo Martinez-Duarte, Sergio O. Martinez-Chapa, Marc J. Madou, Blanca H. Lapizco-Encinas</i> |           |
| <b>The Effect of Disorder On DNA Dynamics In Post Arrays During Electrophoresis .....</b>                                                              | <b>15</b> |
| <i>Daniel W. Olson, Kevin D. Dorfman</i>                                                                                                               |           |
| <b>Bioparticle Capture In a Sawtooth Dielectrophoretic Microchannel.....</b>                                                                           | <b>16</b> |
| <i>Paul V. Jones, Sarah J. R. Staton, Mark Hayes</i>                                                                                                   |           |
| <b>Effects of Cell Shape On Electrokinetic Immobilization Efficiency In Insulator-Based Dielectrophoretic Devices.....</b>                             | <b>17</b> |
| <i>Hector Moncada-Hernandez, Victor H. Perez-Gonzalez, Javier Baylon-Cardiel, Blanca H. Lapizco-Encinas</i>                                            |           |
| <b>Two-Phase Microfluidic Flow System for the Isolation of Circulating Melanoma Cells Detected Using Photo-Acoustics.....</b>                          | <b>25</b> |
| <i>Kyle Rood, Christine O'Brien, Rebekah Conley, Thiago Q. Desouza, John A. Viator, Shramik Sengupta</i>                                               |           |
| <b>Multiplexed Detection of Viral Nucleic Acids In a Combinatorial Microfluidic Screening Chip .....</b>                                               | <b>26</b> |
| <i>Benjamin R. Schudel, Melikhan Tanyeri, Arnab Mukherjee, Charles M. Schroeder, Paul J. A. Kenis</i>                                                  |           |
| <b>Barcoded Microgel Particles and Scanner for Multiplexed Protein Detection.....</b>                                                                  | <b>27</b> |
| <i>Rathi L. Srinivas, David C. Appleyard, Stephen C. Chapin, Patrick S. Doyle</i>                                                                      |           |
| <b>Monitoring Pyocyanin Production by Bacteria Using Nanofluidic Electrochemical Sensors .....</b>                                                     | <b>28</b> |
| <i>Thaddaeus A. Webster, Anthony P. Fusco, Chun-Wei Kuo, Edgar D. Goluch</i>                                                                           |           |
| <b>Scanning Helium Ion Microscope (HIM)-Milled Solid-State Nanopores: Fabrication and Application to Biomolecule Detection.....</b>                    | <b>29</b> |
| <i>Adam R. Hall, Jijin Yang, David C. Ferranti, Lewis A. Stern, Jason Huang, Colin A. Sanford</i>                                                      |           |
| <b>Diffusionless Particle Separation In Coherent Arrays of Flow Perturbors .....</b>                                                                   | <b>30</b> |
| <i>Eric B. Cummings, Yolanda Fintschenko</i>                                                                                                           |           |
| <b>On-Chip Sample Preparation and Nucleic Acid Profiling Using Isotachophoresis.....</b>                                                               | <b>31</b> |
| <i>Juan G. Santiago</i>                                                                                                                                |           |
| <b>Acoustically-Driven Microcentrifugation .....</b>                                                                                                   | <b>32</b> |
| <i>Nick Glass, Richard Shilton, James Friend, Leslie Y. Yeo</i>                                                                                        |           |
| <b>Subcellular Complexity, An Electrophoretic Perspective .....</b>                                                                                    | <b>33</b> |
