DIAGNOSTICS AND DETECTION OF *MYCOBACTERIUM AVIUM* SUBSP. *PARATUBERCULOSIS*

Keynote on: Diagnostic testing and detection of MAP: Technological advances, design and reporting guidelines Gardner I, Bannantine J	3
Extension of the storage time of blood in interferon gamma assay to diagnose paratuberculosis: Combination of IL-7 and IL-12 stimulation Begg DJ, Plain KM, de Silva K, Purdie AC, Whittington RJ	6
Use of novel recombinant antigens in the interferon gamma assay for detection of <i>mycobacterium avium</i> subsp. <i>paratuberculosis</i> infection in cattle Mikkelsen H, Aagaard C, Nielsen SS, Jungersen G	7
A longitudinal study to characterize the shedding patterns of <i>Mycobacterium avium</i> spp. <i>paratuberculosis</i> in a naturally infected breeding bull by polymerase chain reaction assays Münster P, Urstadt S, Wemheuer W, Völkel I, Schwarz D, Kuhlen AT, Döring S, Czerny CP	8
Specific VOC patterns in the headspace over MAP cultures – a new diagnostic approach to speed up cultural detection? Klepik K, Miekisch W, Trefz P, Reinhold P, Schubert J, Köhler H	10
Evaluation of newly developed high-efficiency DNA extraction method for real-time PCR detection of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> from faeces in comparison with other diagnostic methods Logar K, Kopinc R, Bandelj P, Staric J, Krt B, Lapanje A, Ocepek M	11
Test comparisons for <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> infections in low prevalence herds Wolf R, Barkema HW, De Buck J, Mortier R, Orsel K	13
New and improved direct faecal PCR test for Johne's Disease Marsh IB, Plain KM, Galea F, Waldron AM, Whittington AM, Whittington RJ	15
Passive MAP fecal shedding attributable to super-shedder cows Whitlock RH, Fecteau M-E, Fyock T, Schukken Y, Van Kessel J, Karns J, Hovingh E, Smith J, Sweeney RW	17
Gamma interferon responses to proteome-determined specific recombinant proteins: Potential as diagnostic markers for paratuberculosis Hughes V, Bannantine JP, Denham S, Kerr K, Watkins C, McLuckie J, Sales J, Paustian M, Stevenson K	18
Paratuberculosis and route in cattle in the three (3) northern regions of Cameroon Policap K, Victor N, Samuel T, Patricia M	19
A novel ELISA test for diagnosis of Johnes Disease Bach H, Raizman EA, Soto P, Vanderwal R, Thrasher S, Chaffer M, Keefe G	20
The Holy Grail of MAP detection: A specific antibody Bannantine JP, Stabel JR, Lamont EA, Kapur V, Sreevatsan S	23
The development and evaluation of new rapid methods for detecting viable <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> from dairy products Botsaris G, Dodd C, Rees C	24
Comparative diagnostic potential of microscopy, culture and direct IS900 PCR for the detection of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> in fecal samples of domestic livestock species in India Chauhan DS, Chauhan A, Singh AV	25

Validation of the ID Screen interferon gamma capture ELISA: Introduction of a standard reference control to improve result interpretation	
Comtet C, Pourquier P	26
Detection of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> in Bactrian camel (<i>Camelus bactrianus</i>) by polymerase chain reaction in Iran	
Derakhshandeh A, Haghkhah M, Mogheiseh A, Mostafaei M, Ayaseh M, Karim aghaie N	27
Evaluation of an ELISA for the detection of antibodies against <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i>	
Geisbauer E, Liebhart M, Altmann M, Dünser M	29
PARA-LP-01 as a diagnostic tool for a cellular immune assay to detect Johne's disease	
Gonzalez-Juarrero M, Soto S, Dascher KJ, Eckstein TM	30
PARASAFE – a new lipid-based ELISA for diagnosing cattle with Johnes Disease	
Meyer SK, Eckstein TM	31
Evaluation of real-time PCR for the detection of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in alpacas and the prevalence of Johne's disease in alpacas presented to four veterinary teaching hospitals in the United States	
Fecteau M-E, Whitlock R, McAdams S, Fyock T, Bedenice D, Cebra C, Pinn T, Sweeney R	32
<i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> in wood bison: diagnostic optimization and herd-level occurrence	
Forde T, De Buck J, Kutz S, Elkin B, Orsel K	33
Immunogenicity evaluation of <i>in silico</i> identified MAP recombinant proteins that were upregulated under stress conditions	
Gurung RB, Purdie AC, Begg DJ, Whittington RJ	35
Correlation between a commercial real-time PCR assay and Herrold's Egg Yolk Medium culture for MAP in bovine faecal samples	
Halpin K, Hoang Q, Boss C, Koolen J, O'Connell C	36
Detection of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in caprine feces; validation using Adiavet[®] ParaTB real time kit	
Johansen TB, Nilsen S, Lindheim D, Sølverød L, Olsen I, Djønne B	39
<i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in wild boards from Korea	
Kim JM, Ku BK, Lee HN, Jang YB, Her M, Kim JW, Kim JY, Kim JJ, Hyun BH, Jung SC	41
Control of paratuberculosis in the closed herd of cattle by real time PCR: Does passive shedding really exists?	
Kralik P, Slana I, Kralova A, Babak V, Kovarcik K, Pavlik I	42
Enumeration of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> by quantitative real time PCR, culture on solid media and optical densitometry	
Kralik P, Beran V, Pavlik I	44
Shedding patterns of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in feces, milk, and colostrum of dairy cows	
Laurin E, Keefe G, McKenna S, Chaffer M	46
Evaluation of three commercial ELISA kits for the determination of herd status for Johne's disease on Atlantic Canadian dairy farms	
Lavers C, Keefe G, McKenna S, Chaffer M	50
Evaluation of environmental culture to determine herd status for Johne's disease on Atlantic Canadian dairy farms	
Lavers C, Keefe G, McKenna S, Chaffer M	52

Efficient DNA extraction and purification for sensitive detection of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in bovine faeces and tissues	
Mori Y, Nagata R, Yoshihara K, Kawaji S, Minegishi Y, Nishikawa T, Haraguchi H	54
A longitudinal study to characterize the shedding patterns of <i>Mycobacterium avium</i> spp. <i>paratuberculosis</i> in a naturally infected breeding bull by polymerase chain reaction assays	
Münster P, Urstadt S, Wemheuer W, Völkel I, Schwarz D, Kuhlen AT, Döring S, Czerny CP	55
Temporal development of antibodies in <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> infected cattle	
Nielsen SS, Toft N	58
Use of different diagnostic tests used to screen naturally infected paratuberculosis cattle	
Vinodh Kumar OR, Gunaseelan L, Sekar M, Ronald BSM	61
Comparison between single intra dermal tests and gamma interferon assay in organized farms to diagnose bovine paratuberculosis	
Vinodh Kumar OR, Gunaseelan L, Sekar M, Ronald BSM	62
Search for <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> (MAP) antigens for the diagnosis of paratuberculosis (PTB)	
Mon M, Viale M, Baschetti G, Alvarado Pinedo F, Gioffre A, Traveria G, Willemsen P, Bakker D, Romano MI	63
Association between herd infection level and the detection of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> (MAP) in bulk tank milk using real-time PCR in small holder dairy farms in Southern Chile	
Salgado M, Muñoz P, Strauch S, Zamorano P	65
Accurate estimation of the analytical sensitivity of an automated broth culture and a real-time PCR system on the detection and confirmation of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> (MAP)	
Salgado M, Castillo P, Zamorano P	66
Validation of easy to use field level 'fecal microscopy test' and comparison with blood PCR for the screening of livestock population of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i>	
Singh SV, Singh B, Singh PK, Kumar A, Mittal A, Gupta S	68
Detection of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> by 251 gene locus polymerase chain reaction in the tissues of naturally infected sheep	
Sonawane GG, Sagar PK, Tripathi BN, Kumar R, Singh F, Kumar J	69
Optimization of methods for the detection of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in milk and colostrum of naturally infected dairy cows	
Bradner L, Robbe-Austerman S, Beitz D, Stabel J	71
Bayesian estimation of the sensitivity and specificity of individual faecal culture and Paralisa™ to detected <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> infection in young farmed deer	
Stringer L, Jones G, Jewell C, Noble A, Heuer C, Wilson P, Johnson W	73
Sensitive detection of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> from cow's blood within 48 h	
Swift B, Denton E, Mahendran S, Huxley J, Rees C	74
Detection of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> (MAP) in alcohol-fixed tissues of sheep by ISMav2 gene PCR and its comparison with histopathology, bacterial culture and IS900 PCR	
Debroy B, Tripathi BN, Sonawane GG, Bind RB	75
Molecular detection of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> enteritis from paratuberculous and non-paratuberculous enteritis of sheep in India	

Debroj B, Tripathi BN, Sonawane GG	78
Development of a lab-on-a-chip immunoassay for diagnosis of Johne's disease	
Wadhwa A, Li S, Yang K, Liu X, Bannatine J, Eda S, Wu J	80
Comparison of fecal DNA extraction kits for the detection of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i>	
Leite F, Stabel J	82
Detection of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in infant formulas by culture, PCR and combined phage-PCR	
Botsaris G, Christodoulou M, Hatzitofi M, Iannou I, Rees C	85
Perspectives on JD diagnostics: A look to the past, a look to the future	
Bannantine J	86
 HOST RESPONSE AND IMMUNOLOGY	
Keynote on: Dissecting protective immune response to mycobacteria in cattle	
Hope J, Siddiqui N, Price S	89
The role of indoleamine 2,3-dioxygenase (IDO) and tryptophan catabolism in paratuberculosis disease progression	
Plain KM, de Silva K, Earl J, Begg DJ, Purdie AC, Whittington RJ	91
The search for candidate genes that characterise susceptibility or resistance to <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i>	
Dobson B, O'Brien R, Griffin F	92
Gene expression in red deer resistant or susceptible to MAP	
Mackintosh CG, Griffin JFT, Brauning R	94
In vitro expression of SLC11A1 gene in goat monocyte-derived macrophages challenged with <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i>	
Taka S, Liandris E, Gazouli M, Andreadou M, Ikonomopoulos I	97
Genetic markers for resistance and susceptibility to Johne's disease: a deer model	
Griffin JFT, O'Brien R, Liggett S, Dobson B, Mackintosh CG	99
Immune profiles and faecal shedding of <i>Mycobacterium avium paratuberculosis</i> indicate eventual severity of Johne's disease	
de Silva K, Begg DJ, Plain KM, Purdie AC, Kawaji S, Whittington RJ	100
Seroreactivity of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> infected, vaccinated and healthy animals	
Elguezabal N, Bastida F, Gonzalez N, Garrido JM, Juste RA	101
Therapeutic vaccination with recombinant Hsp70 of cattle naturally infected with <i>Mycobacterium avium</i> spp. <i>paratuberculosis</i>	
Santema W, Rutten V, Poot J, Hensen S, Van den Hoff D, Heesterbeek H, Koets A	102
Mechanisms of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> (<i>Map</i>) induced apoptosis and necrosis in bovine macrophages	
Periasamy S, Tripathi BN, Singh N	103
The onset of detectable immune responses and fecal shedding after experimental infection with <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i>	

Mortier R, Barkema HW, Orsel K, Wolf R, De Buck J	105
NOD2 mediates host resistance to <i>Mycobacterium avium paratuberculosis</i> infection	
Lalande JD, Behr M	108
Possible mechanisms how <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> may evade host immune responses in naturally infected cows	
Buddle BM, Shu D, Subharat S, Wedlock DN, de Lisle GW	109
Detection of CD4/CD8 ratio in mice immunized with bicistronic plasmid construct encoding a PPD gene of <i>Mycobacterium avium paratuberculosis</i> and a cytokine gene of murine gamma interferon	
Deb R	110
Immune response profiles of lambs infected with a lyophilised pure culture seed-stock of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i>	
Dukkipati VSR, Ridler AL, Buddle BM, Hedgespeth BA, Begg DJ, Whittington RJ, Murray A	111
Immunogenicity of eight <i>Mycobacterium paratuberculosis</i> specific antigens in DNA vaccinated and MAP infected mice	
Roupie V, Viart S, Leroy B, Romano M, Trincherio N, Govaerts M, Letesson J-J, Wattiez R, Huygen K	114
Immunogenicity of a heat killed <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> vaccine in goats	
Kumanan K, Vijayarani K, Abirami B, Tirumurugaan KG, BSM Ronald	115
Intestinal strictures, fibrous adhesions and high local IL-10 production in gotas with severe lesions caused by <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i>	
Lybeck KR, Løvoll M, Olsen I, Storset AK, Valheim M	116
Heritability/susceptibility of red deer to MAP challenge	
Mackintosh CG, de Lisle GW, Clark RG, Griffin JFT	117
Biochemical analysis on cattle naturally infected with <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i>	
Mohammed KB, Ibrahim IG, Mohamed ZA	119
Immune responses from blood and mesenteric lymph node cells of calves experimentally challenged with <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i>	
Shu D, Subharat S, Wedlock ND, de Lisle GW, Buddle BM	122
Efficacy of 'indigenous vaccine' using native 'Indian bison type' genotype of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> for the control of clinical Johne's disease in an organized goatherd in Gujarat, India	
Singh K, Chandel BS, Chauhan HC, Dadawala A, Singh SV, Singh B, Singh PK, Gupta S, Mittal A, Singh H	123
Efficacy of indigenous vaccine in controlling Johne's disease in a sheep flock using 'Indian bison type' strain of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> of goat origin in four years of trial	
Singh SV, Singh AV, Singh PK, Gupta S, Singh H, Singh B, Rajindran AS, Swain N, OR Vinodh	124
Phenotypic characterization of immunocompetant cells and the role of IFN-g and iNOS cytokines in pauci- and multi-bacillary cases of paratuberculosis in sheep	
Sonawane GG, Tripathi BN	125
Activation of host immune responses in neonatal calves and interference with tb diagnostics after immunization with a commercial heat-killed vaccine	
Stabel J, Waters W, Bannantine J, Lyashchenko K	126

The other way around: Probiotic <i>Lactobacillus acidophilus</i> NP51 restrict progression of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> (MAP) infection in Balb/c mice via activation of CD8A⁺ immune cell-mediated immunity	
Osman MA, Stabel JR, Hostetter JM, Nettleton D, Ware D, Beitz CD	129
A multi-stage paratuberculosis vaccine: Effect of age on immunological response in calves	
Thakur A, Aagaard C, Andersen P, Jungersen G	131
Macrophage immune responses to <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> (MAP) and antigens	
Thirunavukkarasu S, Plain KM, de Silva K, Eckstein TM, Whittington RJ	132
Detection of humoral immune response in experimentally and naturally infected sheep with <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> and its relationship with progressive pathological changes and diagnostic significance	
Tripathi BN, Kurade NP	133
Characterization of immunopathological forms of bovine paratuberculosis: Implications for infection control	
Vázquez P, Molina E, Alonso-Hearn M, Geijo M, Sevilla IA, Ruíz-Larrañaga O, Estonba A, Garrido JM, Juste RA	136
Determination of survival and anti-apoptotic activities of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in epithelial cells	
Wilsky S, Borrmann E, Köhler H	138
Perspectives on: Host response and immunology	
Olsen I	139
 CONTROL PROGRAMS	
Keynote on: Controlling Johne's disease – Learning from the past 15 years	
Kennedy DJ	143
Controlling paratuberculosis in UK dairy herds using milk ELISA tests and risk management	
Orpin PG, Sibley RJ, Pearse HL	147
Certification programme to reduce risk of between-herd transmission of paratuberculosis in the Danish dairy industry	
Krogh K, Nielsen SS, Trier L	149
Comparison of participants and non-participants in a voluntary Johne's disease control program in Ontario, Canada	
Kelton D, Perkins N, Godkin A, MacNaughton G, Cantin R, Hand K	151
Ovine Johne's disease – histopathological findings for 13,143 suspect lesion from abattoir monitoring in NSW Australia from 1999-2009	
Links I, Hum S	153
Reduction in incidence of paratuberculosis infection in Minnesota Johne's disease demonstration dairy herds	
Espejo LA, Godden S, Hartmann WL, Wells SJ	155
Cost-effectiveness of diagnostic strategies to identify <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> super-shedder cows in a large dairy herd using antibody ELISAs, quantitative real-time PCR and bacterial culture	
Aly S, Anderson R, Whitlock R, Fyock T, McAdams S, Byrem T, Jiang J, Adaska J, Gardner I	156
Five years of milk quality assurance for paratuberculosis in The Netherlands	
Weber MF	157
Field efficacy of SilirumTM vaccine in two Australian dairy cattle herds	
Little P, Winterbottom J, Hodge A, Aranda M	158

Use of a national Johnes serum survey to help design a least cost surveillance programme	
Mullowney P, More S, Graham D, Good M	160
Outcomes from the Victorian TCP2 (2003-2010)	
Davis K, Bell C	162
Experiences and results with paratuberculosis control in Austria	
Geisbauer E, Altmann M, Zollner A, Dünser M	165
Effect of vaccination against paratuberculosis in the diagnosis of bovine tuberculosis with comparative cervical skin test	
Garrido JM, Molina E, Plazaola JM, Sevilla IA, Geijo MV, Vázquez P, Rodríguez AB, Alonso M, Juste RA	166
The Atlantic Johnes's Disease Initiative	
Keefe GP, McKenna SLB, Schenkels FJ, Hicks BW, Drake JL, O'Leary VL	168
Can Johnes's disease be controlled by vaccination? Data on 12 million ovine vaccinations and 7.6 million carcass examinations in NSW Australia from 1999-2009	
Links I, Denholm L, Evers M, Kingham L, Greenstein RJ	170
Is whole of flock vaccination for Ovine Johnes's disease justified?	
Links I, Templeton R, Nordblom T	172
The benefits of a simple financial & project management approach to the Ovine Johnes's Disease program in New South Wales	
Links I, Hamilton J, Nordblom T	174
Evaluation of 108 abattoir traces for ovine Johnes's disease to the New South Wales low prevalence area – a standardised approach	
Links I, Evers M, Wright T, Barwell R	176
Development of a group approach to facilitate vaccination for Ovine Johnes Disease (OJD) in New South Wales	
Kingham L, Links I	178
Efficacy of killed vaccine with different adjuvants for the control of Johnes's disease	
Ronald BSM, Manohar MB, Chandran NDJ	179
Efficacy of a killed vaccine for the control of paratuberculosis in French goat herds	
Mercier P, Pellet M-P, Chartier C, Vialard J	182
Use of Animal Identification and Movement System (AIM) data to assist risk assessors in a Johnes's Control Programme	
Mullowney P, Barrett D, Fallon R, Cashman W, Mellet C, Graham D, Good M	185
Use of a Learning Management System (Moodle) to provide online training for risk assessors in a Johnes's Control Programme	
Mullowney P, Barrett D, Fallon R, Cashman W, Mellet C, Graham D, Good M	187
Successes and failures of a Government subsidised pilot Johnes's Control Programme	
Mullowney P, Barrett D, Fallon R, More S, Whyte P, Graham D, Good M	189
Healthier gotas, a project for eradicating contagious diseases in Norwegian goats	
Lybeck KR, Lindheim D, Sølverød L, Johansen TB, Djønne B, Valheim M, Olsen I	191
A web based system for management of Johnes's Disease	
Orpin PG, Sibley RJ, Dawkins R	192

Fertility, udder Health and milk production in cows that have high milk antibodies to paratuberculosis Sibley RJ, Orpin PG, Pearse HL	194
Paratuberculosis control in the Czech Republic: 25 years of experience Pavlik I, Slana I, Kralova A, Kralik P	196
Heat treatment and gamma-irradiation of bovine colostrum: Impact on survival of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> (MAP) and other pathogens and on immunoglobulin content Garbarino C, Cammi G, Archetti I, Amadori M, Panella G, Ricchi M, Tranquillo V, Arrigoni N	197
Measuring the impacts of a participatory approach to accelerating the adoption of practices and procedures to control Johne's disease (JD) on Ontario dairy farms Roche S, Kelton D, Jones A	198
Comparative efficacy of 'indigenous vaccine' against 'Caprine Johne's Disease' vis a vis 'a commercial vaccine' in a challenge model Singh AK, Singh SV, Singh PK, Srivastava AK	199
Control of 'Bovine Johne's Disease' in Indian cattle by 'indigenous vaccine' developed using 'Indian bison type' strain of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> of goat origin Singh SV, Singh AV, Singh B, Gupta S, Kumar A, Singh PK, Srivastav A, Singh H, Sohal JS, Yadav S, Srivastav AK	200
Uptake of the national sheep health statement by Australian sheep producers: Knowledge, attitudes, and practices Taylor M, Dhand N, Lee A	201
Seroprevalence of paratuberculosis at an organized farm in serim-arid region of Rajasthan in India Tripathi BN, Sonawane GG, Sagar PK, Kumar J, Singh F	203
Evidence for importance of management intervention in addition to prolonged vaccination for control of ovine paratuberculosis Windsor PA, Eppleston J, Dhand N, Whittington R	204
Bottlenecks in best management practices identified in the Alberta Johne's disease Initiative (AJDI) Wolf R, Barkema HW, McDonald E, Mason BS, Ollis G, Slomp M, De Buck J, Orsel K	205
Perspectives and progress on: Control programs Sergeant ESG	207
 PATHOGENOMICS AND <i>MYCOBACTERIUM AVIUM</i> SUBSP. <i>PARATUBERCULOSIS</i> BIOLOGY	
Keynote on: 'Paratuberculomics' to discover biomarkers of infection and disease progression De Buck J	211
Characterization of an experimental goat model of paratuberculosis Köhler H, Meyer M, Soschinka S, Reinhold P, Liebler-Tenorio E	213
Influence of repeated cycles of mechanical and physical disinfection procedures on viability of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> measured by propidium monoazide F57 quantitative real time PCR Kralik P, Pavlik I	214
MAP3776C codes for a novel iron uptake protein specific to <i>Mycobacterium avium paratuberculosis</i> Moolji J, Sermier V, Dufort A, Behr M	216

Identification of chromosomal regions associated with antibody response to <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> in milk of Dutch Holstein-Friseans using a genome-wide association approach	
Van Hulzen KJ, Schopen GCB, van Arendonk JA, Nielen M, Koets AP, Schrooten C, Heuven HCM	217
Intestinal infection of calves with <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> following aerosol challenge	
Eisenberg S, Koets A, Nielen M, Heederik D, Mortier M, DeBuck J, Orsel K	218
Polymorphisms of NOD2/CARD15, SLC11A1, CD209, SP110, TLR2 and TLR4 genes and their association with bovine <i>paratuberculosis</i>	
Vázquez P, Molina E, Alonso-Hearn M, Geijo M, Sevilla IA, Ruíz-Larrañaga O, Manzano C, Iriondo M, Estonba A, Garrido JM, Juste RA	220
Regenerating islet-derived 3 gamma gene is strongly expressed in the distal ileum of guinea pigs and cattle infected with <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i>	
Nagata R, Tanaka S, Yoshihara H, Kawaji S, Nishimori K, Mori Y	221
Transcriptomic analysis of sub-clinical <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> infection in cattle	
Purdie AC, Begg DJ, de Silva K, Plain KM, Whittington RJ	224
Exploring <i>M. paratuberculosis</i> pathogenesis using an in vitro cell culture passage model	
Everman JL, Bermudez LE	225
Humoral responses against <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> stress-associated recombinant proteins in cattle	
Kawaji S, Nagata R, Tanaka S, Nishimori K, Whittington RJ, Mori Y	226
The effect of short- and long-term antibiotics exposition on viability of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> measured by propidium monoazide F57 real time quantitative PCR and culture	
Pribylova R, Kubickova L, Babak V, Pavlik I, Kralik P	227
Influence of repeated cycles of mechanical and physical disinfection procedures on viability of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> measured by propidium monoazide F57 quantitative real time PCR	
Kralik P, Pavlik I	230
Investigation on genetic susceptibility to <i>paratuberculosis</i> in Sarda sheep breed	
De Grossi L, Sezzi E, De Sanctis B, Brozzi A, Pariset L	232
MHC class II DRB gene polymorphism and genetic resistance/susceptibility to Johne's disease in an endangered Jamunapari breed of goats	
Singh PK, Singh SV, Singh MK, Saxena VK, Horin P, Singh AV, Sohal JS	234
Identification and characterization of novel adhesins in <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i>	
Viale M, Echeverria G, Mon ML, Romano MI, Gioffré A	235
Perspectives on: Pathogenomics	
Koets AP	237
 MYCOBACTERIAL DISEASES OF WILDLIFE	
<i>Mycobacterium avium paratuberculosis</i> cultured from the faeces of a black rhinoceros (<i>Diceros bicornis minor</i>) and observations subsequent to anti-tuberculous therapy	
Bryant B	241
Diagnosis and management of tuberculosis (<i>Mycobacterium tuberculosis</i>) in an Asian elephant in Australia	

Vogelnest L, Hulst F, Vinette Herrin K, Thompson P	242
Non-mammalian mycobacteriosis in a zoo setting – pathological and epidemiological findings	
Sangster C	243
GENOTYPING AND <i>MYCOBACTERIUM AVIUM</i> SUBSP. <i>PARATUBERCULOSIS</i> DIVERSITY	
Keynote on: Molecular diversity analysis of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> as an aid in transmission studies, defining population genetic frameworks and trait-allele associations	
Sreevatsan S	247
A large-scale study of differential virulence of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> strains with distinct genotypes and isolated from diverse hosts in bovine macrophages	
Abendaño N, Sevilla IA, Garrido JM, Prieto JM, Juste RA, Alonso-Hearn M	249
Epidemiological inferences from typing <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> (MAP) isolates from mixed sheep, deer and cattle farms	
Heuer C, Verdugo C, Price-Carter M, Collins D, French NP, Wilson PR	250
DNA typing of recent New Zealand isolated of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> from cattle, sheep and deer by VNTR and SSR	
Collins DM, Price-Carter M, Scandurra GM, de Lisle GW	251
Use of ssDNA-MALDI-TOF to determine the diversity of MAP isolates originating from Canadian dairy herds	
Ahlstrom C, Barkema HW, De Buck J	253
Genomic variations associated with attenuation in <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> vaccine strains	
Bull TJ, Schock A, Sharp JM, Greene M, McKendrick IJ, Sales J, Linedale R, Stevenson K	255
Investigation of inter-species distribution and genotype diversity of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> in the ruminant and non-ruminant livestock species co-habiting in closed ecosystem in the temperate climate of Southern India	
Singh SV, Singh AV, Singh PK, Singh B, Kumar A, Swain N, Rajendran AS, Vinodh OR	256
Identification and characterization of a spore-like morphotype in chronically starved <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> cultures	
Lamont EA, Bannantine JP, Anibal A, Ariyakumar DS, Sreevatsan S	257
High resolution melting with unlabelled probe for short sequence repeat analysis in <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> sub-typing	
Ricchi M, Barbieri G, Cammi G, Garbarino CA, Arrigoni N	259
Molecular characterization of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> (MAP) isolates in Austria	
Dünser M, Altmann M, Geisbauer E, Möbius P	261
Quantification of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> strains with distinct genotypes and isolated from diverse hosts using a liquid culture system	
Abendaño N, Sevilla IA, Geijo M, Garrido JM, Prieto JM, Juste RA, Alonso-Hearn M	263
Exploiting multiple-locus variable number tandem repeat analysis to evaluate strain diversity of <i>M. avium</i> complex in Argentina	
Gioffré A, Correa M, Alvarado Pinedo MF, Montenegro V, Vaca J, Morsella C, Barandiaran S, Imperiale B, Fiorentino MA, Martínez Vivot M, Morcillo N, Paolicchi F, Zumárraga M, Travería GE, Romano MI	264

Genome sequencing to identify phylogenetic diversity and single nucleotide polymorphisms in <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i>	
Thibault VC, Bryant J, Harris S, Bentley S, Smith DGE,, McLuckie J, Parkhill J, Stevenson K	267
Genetic evaluation of IS900 partial sequence of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> (MAP) Brazilian isolates from bovine milk	
Carvalho IA, Silva VO, Vidigal PMP, Schwarz DGG, Pietralonga PAG, Silva Junior A, Chang YF, Moreira MAS	268
How many? <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> comparison of quantification methods	
Elguezabal N, Bastida F, Sevilla IA, Gonzalez N, Molina E, Garrido JM, Juste RA	269
Molecular characterization of a strain of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> isolated from goat milk	
Kumanan V, Abirami B, Kathaperumal K	271
MLSA-derived phylogeny of German <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> strains	
Fritsch I, Kolb J, Hillemann D, Köhler H, Möbius P	272
Improvement of the estimation of G-repeat numbers of MLSSR typing using fragment analysis with “Chaperone Marker”	
Nishimori K, Nakamura S, Katayose T, Kawaji S, Nagata R, Mori Y	273
Sequence profiling of multispecies, highly pathogenic and immunogenic <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> ‘Indian bison type’ genotype strain ‘S 5’ of goat origin exposes co-existence with intestinal bacteria potentiating gene transfer mechanisms	
Singh SV, George S, Sohal JS, Singh PK, Singh AV, Kumar N	274
 INDUSTRY SPECIAL FOCUS	
Kangaroo Island control of Ovine Johne’s Disease – a success story?	
Nosworthy P, Ewers A, Masters A	277
The challenges of managing paratuberculosis long-term	
Collins M (no abstract)	N/A
How an arid zone pastoral community worked to prevent entry of OJD to Western division of New South Wales from 1990s onwards	
Curran G, Allison K, Hams M	282
A cooperative approach to Ovine Johnes Disease control in Tasmania	
Jackson RB, Bell R, O’Dell J	292
OJD ten years on, out of the tunnel and towards improved productivity	
Reardon J	293
It couldn’t happen here: The impact of Johne’s disease on productivity	
Lean G	294
An industry funded management and control program for Bovine Johne’s Disease in South Australian dairy industry using a dairy scoring system	
Rogers J, Vanwijk J, Nosworthy P	295
Q-Alpaca-surveillance aimed at the early detection of Johne’s disease within the Australian industry	
Lee A	303

Protecting the Australian beef industry from BJD	
Keatinge N	304
The role of the BJD counsellor as an industry advocate in the development of individual disease management plans; in particular the benefits this arrangement provides for the producer, government agency, private practitioner and the wider industry	
Allan D	305
Bovine Johne's Disease control in the dairy industry – a producer's perspective	
Westacott T	306
The Irish Johne's Disease control program	
Graham DA	307
 SOCIOLOGY AND <i>MYCOBACTERIUM AVIUM</i> SUBSP. <i>PARATUBERCULOSIS</i> CONTROL	
The Ontario Johne's Disease education and management assistance program	
Kelton D, Godkin A, MacNaughton G, Cantin R, Perkins N, Fairles J	311
A two-level training and communication program on bovine paratuberculosis in the Veneto region	
Crovato S, Favero L, Mascarello G, Valente A, Pozzato N	313
Livestock agents in Australia and their influence on sheep producers' animal health management practices	
Dhand N, Taylor M, Lee A	316
Motivation of farmers to reduce between-herd transmission of paratuberculosis through repeated on-farm meetings with discussion on certification	
Trier L, Nielsen SS, Krogh K	318
Johne's Disease education: Creating teachable moments to engage learners	
McDonald J, Collins M, Hovingh E, Horn E, Worrell C	319
 INTERNATIONAL CONSORTIA	
Johne's Disease Research Consortium (JDRC) – New Zealand industry's paratuberculosis research initiative	
Larking K	323
International Consortia - International Johne's Disease Initiatives - EU JD Tools	
Nielsen SS, Bakker D (no abstract)	N/A
Johne's disease management and control in Australia: A dynamic partnership	
Citer L	324
International Consortia - International Johne's Disease Initiatives - JDIP	
Kapur V (no abstract)	N/A
 EPIDEMIOLOGY	
Keynote on: Bayesian tools in <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> epidemiology: What we should and what we shouldn't do	
Kostoulas P	329

Effect of positive test results for <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> on weaning weights in beef cow-calf herds	
Bhattarai B, Fosgate GT, Osterstock JB, Fossler CP, Park SC, Roussel AJ	330
Effect of delaying exposure to <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> until adulthood on incidence of infection in adult dairy cows	
Wells SJ, Kubat N, Espejo LA, Godden SM	332
Evaluation of the effectiveness of vaccination for reducing Ovine Johne's Disease prevalence in sheep flocks in Australia	
Dhand NK, Eppleston J, Windsor PA	333
Fertility, udder health and milk production in cows that have high milk antibodies to paratuberculosis	
Sibley RJ, Orpin PG, Pearse HL	334
Bayesian latent class prevalence estimation of herd level infection with <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i>	
Verdugo C, Jones G, Johnson W, Wilson P, Heuer C	336
A dynamic simulation model for cost-benefit analysis of paratuberculosis control strategies in dairy farms	
Fourichon C, Ezanno P, Marcé C, Pfeiffer DU, Seegers H	337
Occurrence of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in milk at dairy cattle farms: A systematic review and meta-analysis	
Okura H, Toft N, Nielsen SS	338
Presence of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in alpacas inhabiting the Chilean altiplano	
Salgado M, Sevilla IA, Rios C, Crossley J, Zamorano P, Otto B, Manning EJB	340
Modelling transmission dynamics of paratuberculosis in red deer under pastoral farming conditions	
Heuer C, Verdugo C, Mitchell R, Lu Z, Wilson PR, Schukken YH	342
MAP at the wildlife-cattle interface in Southwestern Alberta	
Orsel K, Forde T, Pruvot M, De Buck J, Ruckstuhl K, Barkema HW, Kutz S	343
Investigative workshop for mathematical modeling of Johne's Disease Epidemiology and Immunology	
Eda S, Lenhart S, Stabel J, Bannantine J, Gardner I, Schukken Y	345
Detection of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> in caribou	
Forde T, Orsel K, De Buck J, Côté SD, Cuyler C, Davison T, Elkin B, Kelly A, Kienzler M, Popko R, Taillon J, Veitch A, Kutz S	347
Evaluation of combined environmental and pooled animals sampling to determine dairy cattle herd infection status for <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> (MAP)	
Guatteo R, Joly A, Beaudreau F, Chognard T, Fourichon C	349
Shedding patterns over time of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> (MAP) in cattle	
Guatteo R, Joly A, Seegers H, Burban E, Fourichon C	352
Prevalence on <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> (MAP) infection in dromedary camel (<i>Camelus dromedarius</i>) in Iran	
Haghkhah M, Derakhshandeh A, Jamshidi R, Karim aghaie N, Ayaseh M	355
Concordance between <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> ELISA results in paired sera and milk of dairy goats	
Aggelidou E, Kostoulas P, Leontides L	357
Case report of paratuberculosis in a miniature donkey (<i>Equus asinus F. asinus</i>)	

Möbius P, Stief B, Köhler H, Pöhle D	358
Between-farm movement of livestock: Epidemiological implications for the transmission and control of paratuberculosis in New Zealand	
Marquetoux N, Heuer C, Wilson P, Stevenson M	361
Prevalence of cattle paratuberculosis in farmer's field of Tamilnadu, State, India	
VinodhKumar OR, Gunaseelan L, Sekar M, Ronald BSM	363
Slaughter house prevalence of ovine paratuberculosis in Chennai City, India	
VinodhKumar OR, Gunaseelan L, Sekar M, Ronald BSM	364
Herd level prevalence of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in Alberta dairy herds using environmental samples	
Orsel K, Wolf R, McDonald E, Mason BS, Ollis G, Slomp M, De Buck J, Barkema HW	365
Antibody surveillance for <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> (MAP) at a sheep-guanaco interface	
Salgado M, Otto B, Manning EJB, Dalmazzo P, Acosta-Jamett G	367
Presence and genotypes of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> in dairy cattle herds of Agra, Mathura and Firozabad regions of North India using microscopic examination, direct IS900 PCR and IS1311 PCR-REA methods	
Singh AV, Chauhan DS	369
Interspecies sharing of native 'Indian bison type' genotype of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> between a colony of domesticated rabbits (<i>Oryctolagus cuniculus</i>) and a sheep flock	
Singh SV, Singh AV, Singh PK, Sohal JS, Singh B, Gupta S, Singh H, Rajindran AS, Swain N, Rajpandi S	370
Investigation of paratuberculosis in Quebec (Canada) based on molecular, microbiological, serological and pathological analysis	
Sohal JS, L'Homme Y, Robinson Y, Anne	371
Cow-level association between serum vitamin D (25-hydroxycholecalciferol) concentration and MAP-antibody seropositivity	
Sorge US, Molitor T, Linn JG, Gallaher DD, Wells S	372
Bayesian latent class prevalence estimation of herd level infection with <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i>	
Verdugo C, Jones G, Johnson W, Wilson P, Heuer C	373
A Bayesian assessment of the dependence of infection prevalence and clinical incidence of paratuberculosis on joint grazing of sheep, beef cattle and deer	
Verdugo C, Jones G, Johnson W, Wilson P, Heuer C	374
Paratuberculosis infection prevalence and disease incidence in farmed deer in New Zealand	
Wilson PR, Heuer C, Stringer L, Hunnam J, Verdugo C, Cayol C	375
Perspectives on Epidemiology: Higher standards in epidemiologic research on <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i>	
Nielsen SS, Toft N	376

PUBLIC HEALTH AND MYCOBACTERIUM AVIUM SUBSP. PARATUBERCULOSIS IN THE ENVIRONMENT

Keynote on: Etiological relation of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> and human Crohn's disease: Histological, molecular comparison and new evidence of the pathogenesis	
Momotani E	379
Isolation of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> from crops, soil and feed after manure spreading on dairy farms with Johne's disease	
Fecteau M-E, Hovingh E, Whitlock RH, Sweeney RW	381
Variability in environmental survival of ovine and bovine strains of MAP across climatic zones of NSW	
Eppleston J, Begg DJ, Curran G, Dhand N, Watt B, Whittington RJ	382
Frequency of mycobacteria reactive CD4 T-cell clones in intestinal biopsies of Crohn's Disease patients	
Olsen I, Bodd M, Amundsen S, Lundin KE, Sollid LM	383
Development and optimisation of a multiplex SNP genotyping assay for <i>Mycobacterium paratuberculosis</i>	
Wynne JW, Beller C, Boyd V, Heine HG, Michalski WP	384
MAP specific seroreactivity in three diverse European groups of patients, with and without IBD	
Bull TJ, Castagliuolo I, Sumar N, D'Inca R, Linedale R, Willemsen P, Olsen I, Bakker D, Pozzato N, Chong SKF, Ang W	387
Antibodies recognizing <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> epitopes cross-react with the B-cell antigen zinc transporter 8 (ZnT8) in Sardinian type 1 diabetes patients	
Masala S, Paccagnini D, Cossu D, Brezar V, Pacifico A, Ahmed N, Mallone R, Sechi LA	388
Recovery of viable <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> (MAP) from pasteurized commercial milk in Brazil	
Carvalho IA, Schwarz DGG, Pietralonga PAG, Faria ACS, Oliveira TES, Chang YF, Moreira MAS	389
Presence of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> (MAP) in human intestinal biopsy tissues in Brazil using IS900 nested PCR	
Carvalho IA, Schwarz DGG, Pietralonga PAG, Faria ACS, Oliveira TES, Ferrari MLA, Chang YF, Moreira MAS	390
Detection of MAP in environmental samples of dairy herds in Southern Chile	
Kruze J, Burgos P, Mella A, Leiva S	391
Performance of a pepsin-HCl digestion protocol for the detection of map in raw meat	
Tondo A, Okura H, Adami I, Stefani E, Nielsen SS, Pozzato N	392
Micro-filtration treatment of bovine colostrum infected by <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> (MAP): Preliminary results	
Battioni F, Amadori M, Archetti I, Taddei R, Arrigoni N	394
Association between herd infection level and the detection of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> (MAP) in bulk tank milk using real-time PCR in small holder dairy farms in Southern Chile	
Salgado M, Muñoz P, Strauch S, Zamorano P	395
Does soil slope favor movement of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> (MAP) in grassland soil?	
Salgado M, Alfaro M, Salazar F, Ramirez L, Zamorano P, Castillo P, Badilla X, Collins M	396
Molecular and serological prevalence of <i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> in first large scale screening of human populations and association with various pathological and physiological conditions	
Singh SV, Mittal A, Kumar P, Singh S, Singh B, Singh PK, Gupta S, Mahendru P	398
Detection of <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in child food of animal origin	

Taka S , Liandris E, Andreadou M, Gazouli M, Vaiopoulou A, Tzimotoudis N, Filiouis G, Baseas D, Kasabasidis I, Ikonomopoulos J	399
Isolation of <i>Mycobacterium</i> sp. from patients with inflammatory bowel disease	
Timms VJ, Gehringer MM, Mitchell HM, Daskalopoulos G , Neilan BA	400
Effects of paratuberculosis vaccination on tuberculosis infection in goats	
Pérez de Val B, Domingo M, Garrido JM, Nofrarías M, López-Soria S, Juste RA	402
Clinical investigations on paratuberculosis in camels in Al-Hasa, KSA	
Zaghawa A, Housawi FMT, Al-Naeem A, Hammoda M	403
Heterogeneity of subspecies <i>Mycobacterium avium paratuberculosis</i> from genotype to phenotype	
Lefrancois LH, Bodier CC, Cochard T, Gilbert F, Canepa S, Lecher S, Raze D, Lanotte P, Haguenoer E, Sevilla IA, Stevenson K, Behr M, Collins D, Loch C, Biet F	404
Perspectives on: Public Health and <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> in the Environment	
Behr M (no abstract)	N/A
<u>SUMMATION</u>	
11-ICP Summation
